## Open Choice: Your research. Your choice.

Open Choice allows you to publish open access in the majority of Springer's subscription-based journals.

### Open Choice benefits for you and your readers

- High visibility – All articles are made freely available online for everyone, immediately upon publication
- Easy compliance with open access mandates, as all articles are CC BY licensed
- The final article can be reused and immediately deposited in any repository
- Authors retain the copyright to their work
- Automatic export triggered to PubMed Central/Europe PubMed Central (PMC)

### How can readers tell your articles are Open Choice?

When searching for your article on SpringerLink, readers will find them clearly marked as 'open access'.

### The copyright remains with you

If authors choose to publish open access with Springer Open Choice, the copyright remains with them. The vast majority of Springer's Open Choice eligible journals publish open access articles under the liberal [Creative Commons Attribution 4.0 International \(CC BY\)](#) license. The CC BY license permits unrestricted use, distribution and reproduction in any medium, provided appropriate credit is given to the original author(s) and the source, a link to the Creative Commons license is included, and it is indicated if any changes were made.

For a list of Open Choice eligible journals please refer to our [list of journals](#).

A limited number of journals continue to use the [Creative Commons Attribution Non-Commercial 4.0 International \(CC BY-NC\)](#) license, including those published under the [Adis](#) imprint.

## How to order Open Choice

After your article has been accepted for publication, you will receive an email from Springer with a link to the [MyPublication](#) process pages. There you can opt for your article to be published open access. Please note that your decision to publish open access or not cannot be changed after you have finished the MyPublication process.

### Publication fee

- Visit our [open access funding page](#) to find out how the open access publication charge can be covered.
- Publishing Open Choice articles involves an open access publication fee of US\$ 3000/EUR 2200 (excl. VAT). You can choose to pay by credit card or to receive an invoice.
- Our Springer Compact agreements are in place to cover the open access charges if you belong to a participating institution. For more information, please visit <http://www.springer.com/de/open-access/springer-open-choice/springer-compact>
- The open access publication fee does not replace any other existing journal publication costs, which are billed separately (e.g. surcharges for color figures in print, oversized articles, etc.).
- Customers providing payment from the Americas will be charged in US\$. Sales tax will be charged if applicable. Customers providing payment from Europe, Africa and Asia will be charged in EUR. VAT is not included in the price and will be added, at a standard rate, if applicable.
- Article processing charge (APC) refund policy: Springer Nature will refund an article processing charge (APC) if an error on our part has resulted in a failure to publish an article under the open access terms selected by the authors. This may include the failure to make an article openly available on the journal platform, or publication of an article under a different Creative Commons licence from that selected by the author(s). A refund will only be offered if these errors have not been corrected within 30 days of publication.

If you become aware of an error in the open access status or licensing of your article, please contact [the central customer support team](#) immediately.

APCs will not be refunded when articles are retracted as a result of author error or misconduct.

\*Please note

- Open Choice articles are not included in our [Open Access Membership Program](#). This means that fees for articles published in Springer's subscription-based journals using the Open Choice option are not covered by your institution's membership.
- Open Choice articles are not covered by the [SpringerOpen waiver fund](#).
- Once the MyPublication process has been completed, it is no longer possible to cancel Open Choice orders.
- The final published version will be made freely available on PMC/Europe PMC, the full-text archive of scientific literature in the biomedical and life sciences, if the respective journal is on the [PMC Journal List](#).
- Springer Open Choice price adjustment policy: Springer has been committed to factoring the Open Choice article uptake into journal subscription prices since 2011. In 2015, we have gone a step further: since the 2015 journal list prices solely reflect the subscription-based article publications. This means that only subscription-based articles have been factored into the list-price calculation. General price increases due to subscription-based article volume growth were also applied.
