# **Virginia Coal**

## **1991 VIRGINIA COAL**

The past year brought many new challenges and opportunities to the coal industry across the U.S. The onset of conflict in the petroleum-rich Persian Gulf focused national attention on coal as a secure, domestic energy resource. At the same time, passage of a new, federal Clean Air Act promised to more stringently regulate emissions from the vast majority of coal-burning facilities nationwide. With these regulations, however, has come the possibility of increased consumption of Virginia's low-sulfur coal.

In Virginia, 1990 was a record year; 46.5 million tons of coal were produced in the state's seven, southwestern coal counties: Buchanan, Dickenson, Lee, Russell, Scott, Tazewell and Wise. Coal exports were also impressive, with record 61.9 million tons passing through the Port of Hampton Roads. Although the number of active mines in the state continued to decline, modern extraction methods - particularly longwall mining - and an overall increase in the productivity of Virginia's miners made possible the increased production of coal from a smaller number of operations. Too, it has only recently become possible to mine seams which would, in earlier decades, have been inaccessible. Through expanded productivity and accessibility, Virginia coal operators have been able to increase production and sales in a very competitive market.

Coal endures as an important part of Virginia's economy, and plays a vital role in the nation's energy security. Moreover, it is believed that over half of the state's original reserves still lie underground. This edition of *Virginia Coal*, published by the Virginia Center for Coal and Energy Research, is a complete data reference and directory of all coal mining which occurred in Virginia during the calendar year 1990. It is dedicated to the many men and women of Virginia who owe their livelihoods to coal, and to a healthy and productive coal industry.

## VIRGINIA COUNTY COAL SUMMARIES: 1988/1989/1990

<b>1988</b>	<b>Buchanan</b>	<b>Dickenson</b>	<b>Lee</b>	<b>Russell</b>	<b>Scott</b>	<b>Tazewell</b>	<b>Wise</b>	<b>TOTAL</b>

\* Figure reported on 1991 survey: 1.5 million tons/year

1. M = Metallurgical coal; S = Steam coal
2. Most recent figure available (1988 or 1991)
3. New entry, 1991
4. A division of Island Creek Coal Company

# **Hampton Roads Coal Shipments**

## HAMPTON ROADS COAL EXPORT TERMINALS

### **DOMINION TERMINAL ASSOCIATES (D.T.A.)**

Dominion Terminal Associates is located on the east bank of the James River in Newport News, and is co-owned by Ashland Coal, Inc., Peabody Holding Company, Inc., the Pittston Company and Westmoreland Coal Company. Served by the CSX Rail System, D.T.A. has an annual throughput capacity of 15 million tons and can accommodate vessels ranging from barges to ships of 178,000 dwt. The tandem rotary dumper can unload coal at a rate of 5,700 tons per hour. Nineteen belt conveyors transport the coal from dumper to storage or direct to the shiploader. Coal is stored in four areas with a maximum capacity of 1.5 million tons, and is later reclaimed for shipment by two stacker/reclaimers and one reclaimer. These three machines have 200-foot booms and are capable of luffing, slewing and traveling along the length of the storage areas to stack and reclaim the coal with a minimum amount of dozing. Coal can be reclaimed and transported to the twin silos at 6,200 tons per hour, where two grades can be blended and loaded into vessels at up to 6,500 tons per hour. The single shiploader with a 145-foot boom can accommodate ships with a 79-foot air draft. Pierside, D.T. A. matches the harbor's 50-foot depth.

During 1990, D.T.A. underwent expansion in order to increase storage capacity by 45% and throughput capacity to 17.5 million tons per year. The completed facilities went into operation on December 11. ADDRESS: **Dominion Terminal Associates, P.O. Box 967-A, Newport News, VA 23607; 804/245-2275.**

### **NORFOLK SOUTHERN COMPANY**

The Lamberts Point coal handling facilities of the **Norfolk and Western Railway Company (NW)** are the largest and the largest and among the most modern in the world, concentrating at one point the collection and blending of coals originating from more than 300 producers on the NW and Southern rail systems. In addition to the shiploading piers, NW has weighing, thawing and dumping facilities to supply coal to the pier. Classification and storage yards accommodate approximately 7,500 loaded coal hopper cars at Lamberts Point, or the equivalent of almost 700,000 tons of coal on hand each day, with additional tracks provided for receiving loaded trains and assembly of empty cars returning to the coalfields. Service is expedited by a high-speed, virtually one-way route for coal trains from the mines to Norfolk. NW's **Coal Pier 6** features twin traveling loaders, each as high as a 17-story building, which can serve two colliers or concentrate on a single ship; over 150,000 tons of coal have been loaded in a single collier, some of which are 1,000 feet in length and 175 feet in width. Coal is carried to the loaders by a series of 8-foot-wide rubber conveyor belts (which are, in turn, equipped with a sophisticated, mechanical sampling system). Even-flow retractable booms then deposit the coal slowly into the colliers. The booms can reach out as far as 120 feet, providing an even-keel loading for ships with centerline bulkheads. Pier 6 has a design capacity of 16,000 tons an hour, with a maximum capacity of 20,000 tons per hour.

In addition to Coal Piers 5 and 6, NW operates at Hampton Roads a large shop for the repair of coal cars before their return to the mines. ADDRESS: **Pier Master's Office, Norfolk Southern, P.O. Box 3070, Norfolk, VA 23514; 804/446-5481.**

### **PIER IX TERMINAL COMPANY**

With a depth of over 50 feet, loading facilities include a double-berth pier with a conveyor system, a single shiploader, and an air draft of 75 feet, capable of loading up to 130,000-ton colliers in twenty-four-hour period. Berth and loading facilities will accommodate vessel lengths of up to 1,000 feet and breadths of up to 155 feet. The storage facility has a rated capacity of 12 million tons of coal per year with ground storage of 1.36 million tons in 12 piles. The Terminal is served by the CSX Rail System, which accesses the highest qualities of metallurgical and steam coals with competitive rail rates. Pier IX Terminal Company also offers mechanical sampling to and from storage, stockpile blending to an accuracy of plus or minus 1%, and guaranteed demurrage protection. ADDRESS: **Pier IX Terminal Company, P.O. Box 38, Newport News, VA 23607; 804/244-8800.**

**1991  
Virginia Coal Mine  
Directory**

## ABOUT THE 1991 VIRGINIA COAL MINE DIRECTORY

The following listing presents a comprehensive data set for 480 mines licensed in Southwestern Virginia by the Virginia Division of Mines (VDM/Virginia Department of Mines, Minerals and Energy) as of January 1, 1991. (VDM actually had 482 mines licensed as of this date. Two of these were small, refuse-processing operations in Montgomery County, and have not been included.) All figures presented refer to mine activity during the calendar year 1990, and were drawn from VDM computer files at the agency's offices in Big Stone Gap. The data in this Directory are printed as shown in VDM records, which present information reported by coal-mine operators for individual mining operations.

Mines are listed alphabetically by company, and the following information is included for each mine:

Company Name	Mine ID #	# of Employees	County
Company Contact	Mine Type	# of Days Worked	Seam(s) Worked
Company Address	Activity Status, 1/1/91	# of Hours Worked	Seam Height(s)
Telephone #	Production, 1989	Tons/Man Hour	Equipment Used
	Production, 1990	Wages	Coal Owner(s)

VCCER extends its sincere appreciation to Chief Mine Inspector Harry Childress and to the employees of the Virginia Division of Mines for their invaluable help in providing the information included in this directory.

### ABBREVIATIONS USED

#### MINE TYPE

deep(TI) = Underground Tipple Mine	surface(A) = Surface Auger Mine
deep(TR) = Underground Truck Mine	surface(S) = Surface "Strip" Mine

#### EQUIPMENT

ATRS = Automatic Temporary Roof Support	DCAR = Diesel-Powered Car
AUGER = Various Augering Equipment	LDR = Conventional Loader
BCAR = Battery-Powered Car	LW = Longwall
CD = Coal Drill	RD = Roof Drill or Bolter
CH = Continuous Haulage	SCAR = Shuttle Car
CM = Continuous Miner	SCOOP = Haulage Machine (LHD)
CMA = Continuous Miner/Auger Type	STRIP = Various Stripping Equipment
CTR = Conventional Cutter	NA = Not Available
