Hello Dr. Kozlik,

My name is Jonathan Angle and I am requesting to reuse two images in one of your publications for my Master's thesis written at Virginia Tech. The images I would like to use are Figures 2 and 4 from your publication entitled "Cryomilled and spark plasma sintered titanium: the evolution of microstructure". Thank you very much for your time and consideration for this request.

Sincerely,

Jonathan Angle
Ph.D. Student
Materials Science and Engineering
Virginia Polytechnic and State University

Dear Mr. Angle,

permission granted. What is the topic of your thesis? I am quite curious, because we have never been able to undoubtedly find out what this fcc-Ti phase actually is.

Kind regards,
Jiri Kozlik

P.S. There is no need to call me 'doctor', in fact, I am a first year Ph.D. student.

I don't know if I have the rights to authorize the image use. You need to contact the publisher.

You can generate a figure like that yourself. I have have attached images and drawings that you can use to generate a figure (all are out of my lab).

-Richard

As I was not fully granted permission to reuse his published image, I was allowed permission to repurpose his old cartoons, which he created. I then used my own images to make my own figure. In figure 3 of my thesis I only used his cartoons, which he sent to me.
