Collaborators.....	3
Total Number of Specimens Received.....	4
Exotic Pest Surveys.....	4
Arthropods Received by Reported Host Plants.....	5
Specimens Received by Month.....	34
Source of Insects by County.....	45

INTRODUCTION

A total of 1151 requests were received in 2014. This report summarizes the activity of the Insect Identification Laboratory at Virginia Tech for 2014. The laboratory is located in 205A Price Hall and is managed by Eric R. Day, Lab Manager, and Doug Pfeiffer, Extension Entomologist, Department of Entomology, Virginia Tech, Blacksburg, Virginia. Theresa Dellinger and Olivia McCraw also worked in the Lab in 2014.

Images attached to emails accounted for 31% of the samples received in the lab in 2014. Starting in 2003, data on samples submitted by images attached to an email were collected and summarized in the table below.

Of the samples indicating preference for control recommendations received in 2014, 78% of the samples (893) requested control recommendations, 22% of the samples (257) indicated no control recommendations needed.

Also from the samples received in 2014, 26% of the samples (298) were forwarded from the Plant Disease Clinic, managed by Mary Ann Hansen and Elizabeth Bush. The remaining 74% were sent directly (853).

Specimens are identified and recorded in the lab, then if necessary sent for control recommendations and additional comments from Extension Entomologists who handle particular commodity groups. All specimen data are entered into the Insect I.D. Lab computer database on the Virginia Tech mainframe computer. The database greatly facilitates sorting and storage of the information. Some of the records were sent via microcomputer to the Cooperative National Plant Pest Survey and Detection Program (USDA, APHIS, PPQ). We at Virginia Tech acknowledge support provided by this program.

Whenever possible insects are identified to the species level. Common names are used where possible because of their wide recognition. To facilitate mailing insects and insect damaged plant specimens to the lab, local offices of Virginia Cooperative Extension are provided with Insect Identification and Diagnosis Request forms (form 444-113), alcohol vials, and mailing tubes. Specimens also may be brought directly to the lab or mailed to:

Persons providing identifications and/or control recommendations:

Identifications and control recommendations covering most commodities performed by:

Mr. Eric R. Day Manager, Insect Identification Laboratory

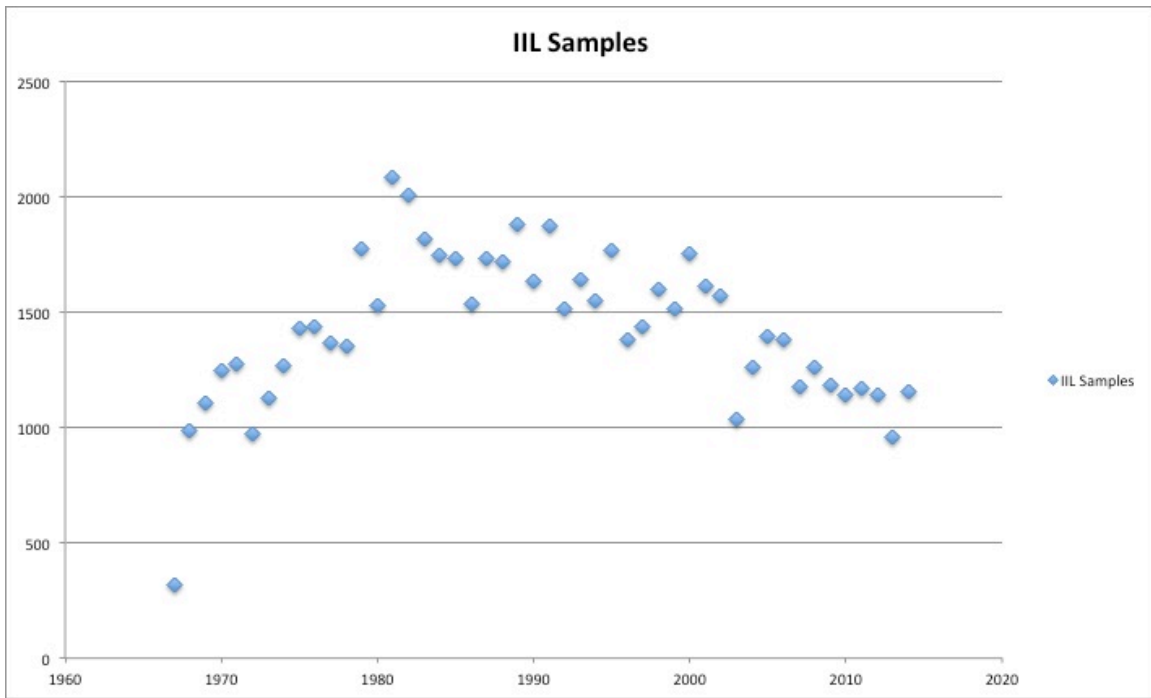

Timely and valuable identifications and/or control recommendations were also provided by:

Dr. Paul Marek	Assistant Professor of Entomology	Systematics
Dr. Tom Kuhar	Professor of Entomology	Vegetable Pests
Dr. Richard D. Fell	Professor of Entomology	Apiculture and Stinging Insects
Dr. Dini Miller	Professor of Entomology	Structural and Household Insects
Dr. Ames Herbert	Professor of Entomology	Soybeans, Small grains, Peanuts, Cotton
Mr. Steve Hiner	Technical Support Staff	Aquatic Insects and Invertebrates
Dr. Michael Kosztarab	Emeriti Professor of Entomology	Scale Insects
Dr. Theresia Dellinger	Post-Doctoral Staff	Entomology Systematics
Dr. Douglas G. Pfeiffer	Professor of Entomology	Fruit and Nuts

Dr. Scott Salom	Associate Professor of Entomology	Forest and Conifer
Dr. Peter Schultz	Station Director, Hampton Roads	Ornamentals
Dr. J. Reese Voshell	Professor of Entomology	Aquatic Insects
Mr. Curt Laub	Professor of Entomology	Corn, Small grains, and Grasses

SAMPLES RECEIVED SINCE 1967

The following table lists the magnitude of activities and services provided by the Insect Identification Laboratory (IIL) and the faculty and staff associated with it since 1967. Chart below includes 2014 data of 1151 samples.

Exotic Pests Surveys

Port Survey: 49 trap collections samples from 5 trips to the Virginia Ports of Entry were processed and no exotic pests were detected. So suspect beetles were forwarded to specialists.

Lobesia Survey: 23 sites were sample with pheromone traps for *Lobesia botrana* through out Virginia. No suspect moths were found.

An impact survey for the Brown Marmorated Stink Bug was conducted at Commodity meetings in 5 States including Virginia and the results showed that it causes economic damage for farmers and growers.

Pests received by reported host or location

Host Pest Data	
Reported host and numbers of pests identified	Total
ACUBA	2
OLEANDER SCALE, <i>Aspidiotus nerii</i> Boucher	2
ANEMONE, JAPANESE	1
FOURLINED PLANT BUG, <i>Poecilocapsus lineatus</i> (Fabricius)	1
ANIMAL FEED	1
FOREIGN GRAIN BEETLE, <i>Ahasverus advena</i> (Walt)	1
APARTMENT	8
BED BUG, <i>Cimex lectularius</i> Linnaeus	1
LACE BUGS, , ,	1
NO BITING INSECTS FOUND, , ,	1
NO INSECTS FOUND, , ,	1
ORIENTAL COCKROACH, <i>Blatta orientalis</i> Linnaeus	1
ORNITHONYSSUS MITES, <i>Ornithonyssus</i> ,	2
RIBBONWORM, , ,	1
APPLE	17
AMERICAN PLUM BORER, <i>Euzophera semifuneralis</i> (Walker)	2
APPLE TWIG BORER, <i>Amphicerus hamatus</i> (F.)	1
BROWN MARMORATED STINK BUG, <i>Halyomorpha halys</i> (Ståhl)	2
CICADA KILLER, <i>Sphecius speciosus</i> (Drury)	1
CODLING MOTH, <i>Cydia pomonella</i> (Linnaeus)	1
FLATHEADED APPLETREE BORER, <i>Chrysobothris femorata</i> (Olivier)	1
HOPLIA BEETLES, <i>Hoplia</i> spp.	1
JAPANESE BEETLE, <i>Popillia japonica</i> Newman	1
LOCUST LEAFMINER, <i>Odontota dorsalis</i> (Thunberg)	1
MEALYBUGS, , ,	1
PERIODICAL CICADA, <i>Magicicada septendecim</i> (L.)	1
PULVINERIA SCALES, <i>Pulvineria</i> spp.	1
ROSE CHAFER, <i>Macroductylus subspinosus</i> (Fabricius)	1
WOOLLY APPLE APHID, <i>Eriosoma lanigerum</i> (Hausmann)	2
APRICOT	1
CALICO SCALE, <i>Eulecanium cerasorum</i> (Cockerell)	1
ARBORVITAE	10
ARBORVITAE LEAFMINER, <i>Argyresthia thuiella</i> (Packard)	4
BAGWORM, <i>Thyridopteryx ephemeraeformis</i> (Haworth)	1
