ART 2385, Survey of the History of Art I (Paleolithic to Medieval), encourages students to connect art, architecture, and material culture from early cultures and civilizations as well as with the modern world. Working in groups, students created virtual thematic art exhibits to be featured in this exhibition. Students identified and researched a theme, and then discovered and chose diverse historical works of art and architecture related to that theme. These curated digital exhibitions showcase the varied and unexpected ways that cultures—through their visual culture— can connect across time and space.
