Copyright

Describes the rights related to the publication and distribution of research. It governs how authors (as well as their employers or funders), publishers and the wider general public can use, publish and distribute articles or books.

Journal author rights

In order for Elsevier to publish and disseminate research articles, we need publishing rights. This is determined by a publishing agreement between the author and Elsevier. This agreement deals with the transfer or license of the copyright to Elsevier and authors retain significant rights to use and share their own published articles. Elsevier supports the need for authors to share, disseminate and maximize the impact of their research and these rights, in Elsevier proprietary journals* are defined below:

| For subscription articles | For open access articles |
|--|--|
| <p>Authors transfer copyright to the publisher as part of a journal publishing agreement, but have the right to:</p> <ul style="list-style-type: none"> • Share their article for Personal Use, Internal Institutional Use and Scholarly Sharing (https://www.elsevier.com/about/policies/sharing) purposes, with a DOI link to the version of record on ScienceDirect (and with the Creative Commons CC-BY-NC- ND license for author manuscript versions) • Retain patent, trademark and other intellectual property rights (including research data). • Proper attribution and credit for the published work. | <p>Authors sign an exclusive license agreement, where authors have copyright but license exclusive rights in their article to the publisher**. In this case authors have the right to:</p> <ul style="list-style-type: none"> • Share their article in the same ways permitted to third parties under the relevant user license (together with Personal Use rights) so long as it contains a CrossMark logo (https://www.elsevier.com/about/policies/crossmark), the end user license (https://www.elsevier.com/about/policies/open-access-licenses), and a DOI link to the version of record on ScienceDirect. • Retain patent, trademark and other intellectual property rights (including research data). • Proper attribution and credit for the published work. |

***Please note that society or third party owned journals may have different publishing agreements. Please see the journal's guide for authors for journal specific copyright information.**

****This includes the right for the publisher to make and authorize commercial use, please see "Rights granted to Elsevier (<https://www.elsevier.com/about/policies/copyright#Elsevier%20rights>)" for more details.**

[Using other GSL material](#) - contact information for requests to use *Geoscientist* magazine content, web images, the GSL logo or content from the Society Archives or art collection.

Open Access Articles

Articles that have the Open Access padlock logo can be used freely without permission. However, if you re-use figures or other parts of the article you must acknowledge the author and the source of the material. If your article uses more than 25% of an Open Access article or if more than 25% of your article comes from an Open Access article it could constitute duplicate publication and be in contravention of normal publishing ethics.

Articles with the 'Free' logo are not the same as Open Access and are subject to the conditions below.

Other Articles

All articles published in Geological Society books and journals that do not have the Open Access padlock logo, including ones that are free to access online, are subject to the conditions below.

Re-publishing material from Geological Society of London copyright

Using material from GSL publications

Extensive quotation (more than c. 100 words) and reproduction of previously published illustrations (even if re-drawn) require permission from the rights holder (GSL in this case). In the UK, material remains in copyright until 70 years after the death of the author.

Material that can be used without permission:

Authors may re-use their own material without permission subject to the exceptions listed below. They may include the whole article in a PhD or other thesis provided that it will not be published, and that the original source is fully acknowledged in the standard form. If the thesis is to be included in the institution's electronic repository or other online host, authors must use their own finally accepted version, not the typeset PDF (unless it is [Gold Open Access](#)). Please also see [Copyright Policy and Terms of Use for Authors](#) and [Sharing your article](#). Authors may not re-publish their whole article, or a substantial part of it, without permission. Such permission will be granted only in exceptional circumstances.

Anyone may use up to three items* (text extracts of 100 words or less, figures or tables) from GSL published material without permission or charge provided that a proper acknowledgement of source is made.
