EXECUTIVE SUMMARY

This report includes information on retention and graduation outcomes for students enrolling at Maryland public colleges and universities as first-time, full-time undergraduate students between 1996 and 2016. This includes student outcomes between one and six years following matriculation. In addition, information regarding second-, third-, and fourth-year retention rates for independent institutions since 2014, the first year that these data became available.

Of the 13,735 first-time, full-time students entering four-year public colleges and universities in fall 2011, 67.4% graduated within six years. This represents a 1.9 percentage point increase over the graduation rate of the 2010 cohort and is the highest six-year graduation rate since MHEC began reporting these data. The graduation rates for African American, Hispanic, and Asian students were the highest on record.

Among the 14,922 students in the 2016 cohort, 83.0% returned to their original campus for a second year. This represents a slight increase (0.6 percentage points) over the second-year retention rate of the 2015 cohort, and also reverses a two-year trend of decreases in the retention rate.

For the first time since 2007, the increase in graduation rates was experienced across all racial and ethnic groups. The largest year-to-year gain was seen in African American graduation rates. However, in the long-term, graduation rates for Asian, white, and Hispanic students have experienced greater rates of educational progress and increases in degree attainment than African American students.

INTRODUCTION

This report presents information on six-year retention and graduation rates for first-time, full-time undergraduate students who enrolled at Maryland colleges and universities between 1996 and 2016. Retention rates include students who persisted at their original campus, and graduation rates include students who graduated from either their original institution or any other institution, including state-aided independent institutions, in the state of Maryland.¹ This report includes retention rates between one and six years after enrollment, and four-, five-, and six-year graduation rates.

This report focuses on the second-year retention rates for the 2016 cohort and the six-year graduation rate for the 2011 cohort. There are also updated data tables that include second-, third-, and fourth-year retention rates in addition to four-, five-, and six-year graduation rates for each cohort between 2011 and 2016, as data are available. These tables are disaggregated by gender, racial/ethnic group, and institution.

The tables for this report include statewide and institutional data. They are broken out by racial and ethnic groups and by gender.² The University of Maryland University College is included in the statewide tables provided in this report but is not included in the institutional reports because it primarily enrolls an adult, part-time population. The University of Maryland Baltimore is excluded from both the statewide and institutional tables because it does not enroll first-time undergraduate students. All data in this report come from MHEC's Enrollment and Degree Information Systems, unless otherwise noted.

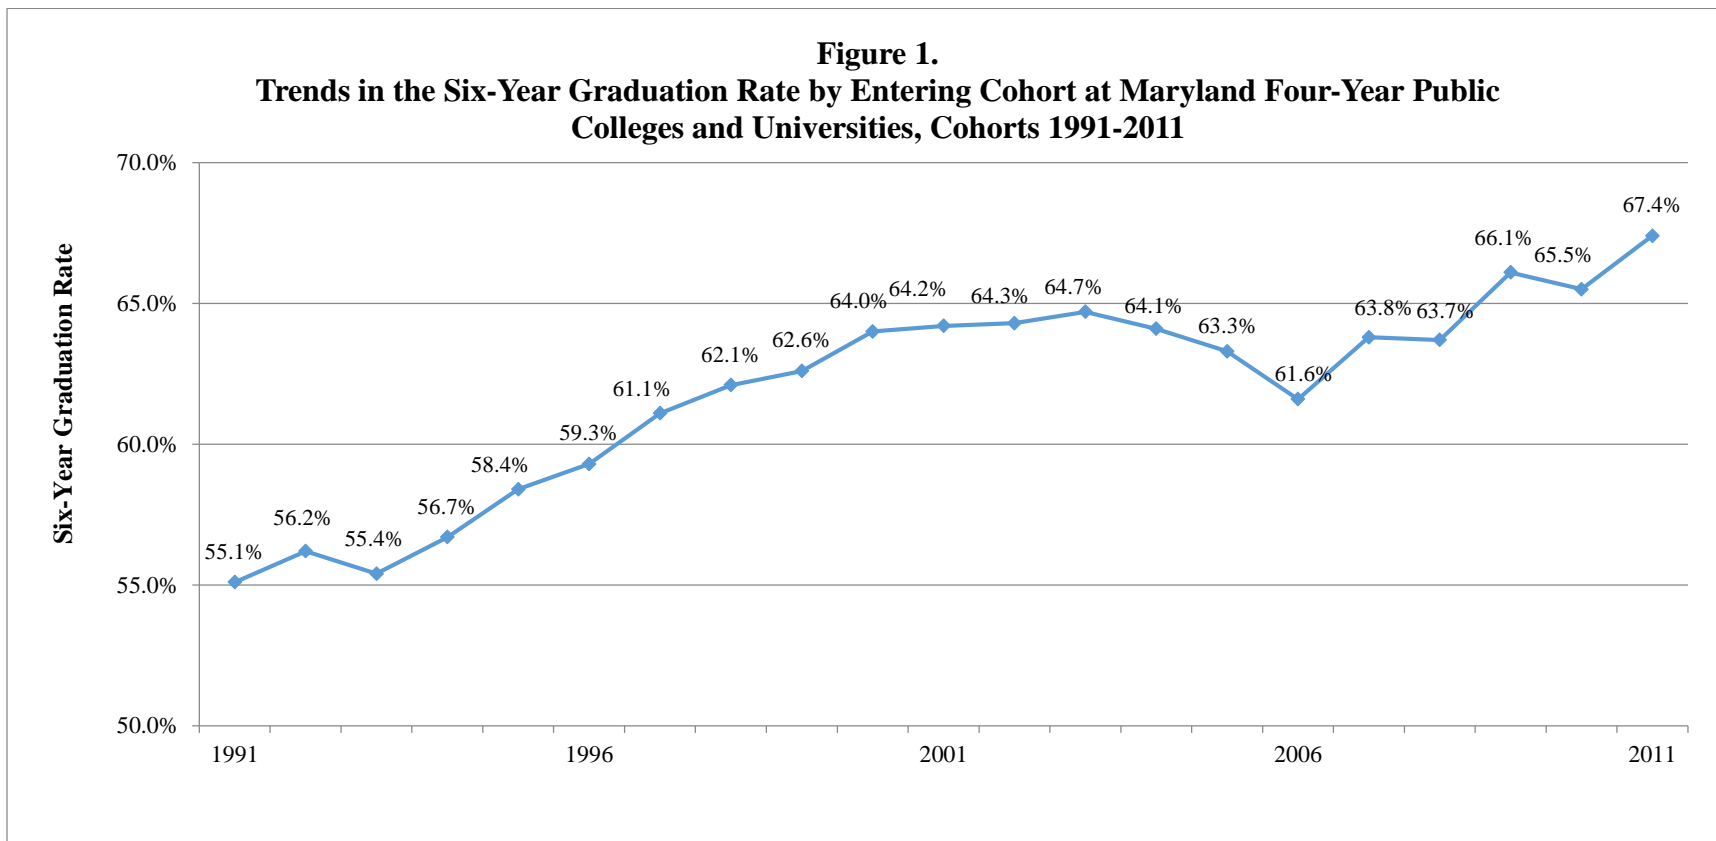

¹ Prior to 2013, independent institutions were not required to report consistent identification numbers, which are necessary to match students transferring across institutions. Therefore, information on transfers to independent institutions is provided where available. Beginning with the 2014 cohort, retention and graduation rates include students transferring to and from all independent institutions.

² Separate tables for racial and ethnic groups appear for any group that represents 5 percent or more of the total cohort population at the institution.

ANALYSIS AND DISCUSSION

Six-Year Graduation Rates for all Students

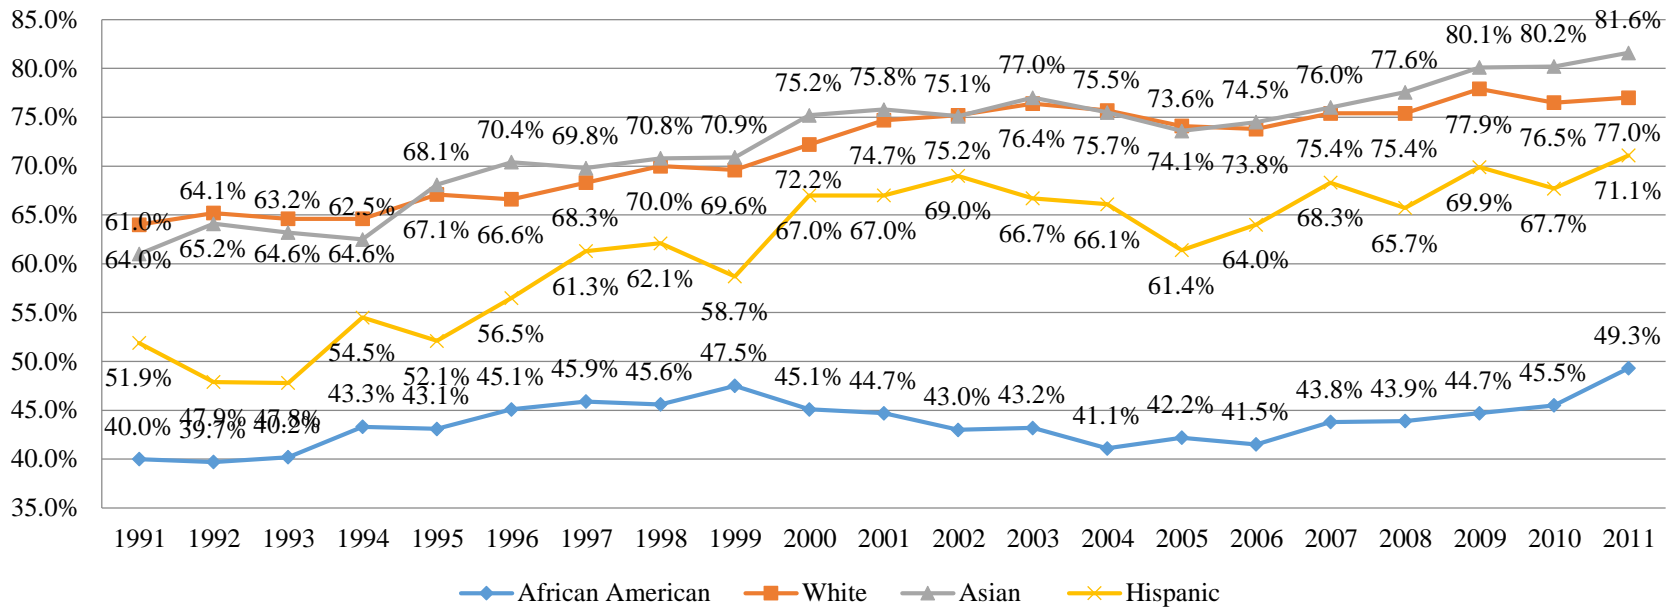

Of the 13,735 first-time, full-time students entering four-year public colleges and universities in fall 2011, 67.4% graduated within six years, as Figure 1 shows. This represents a 1.9 percentage point increase over the graduation rate of the 2010 cohort and the highest six-year graduation rate on record. This also continues a long-term trend of increasing graduation rates; between 1991 and 2011, despite year-over-year fluctuations, six-year graduation rates have increased by an annual average of 0.6% during that period.

Graduation Rates by Race and Ethnicity

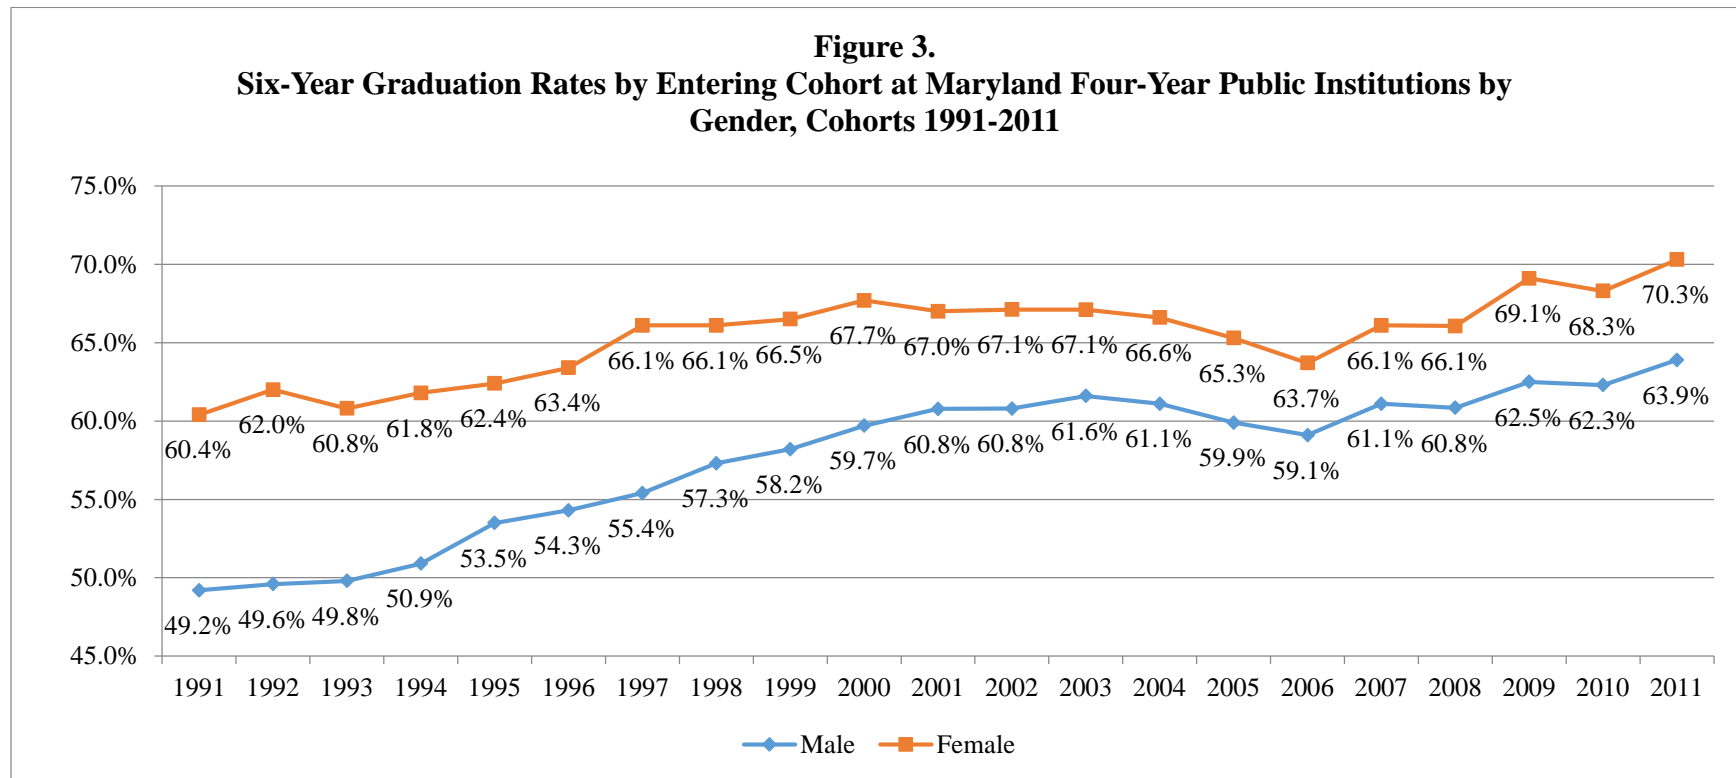

For the first time since 2007, the increase in graduation rates was experienced across each of the four largest racial and ethnic groups. The rates for African American, Hispanic, and Asian students were the highest on record. The largest gain occurred in the African American graduation rate, which increased by 3.8 percentage points, from 45.5% to 49.3%. The smallest was among white students, whose graduation rates increased from 76.5% to 77.0%, a gain of 0.5 percentage points.

Figure 2.
Six-Year Graduation Rates by Entering Cohort at Maryland Four-Year Public Institutions
by Race and Ethnicity, Cohorts 1991-2011

Graduation Rates by Gender

Both men and women graduated at the highest rates in the past 20 years. Women continue to graduate at higher rates than men. The increase in the graduation rate for women (2.0 percentage points, from 68.3% to 70.3%) was slightly higher than that for men (62.3% to 63.9%, 1.6 percentage points), resulting in a widening of the achievement gap from 6.0 to 6.4 percentage points. However, this gap is substantially lower than in 1991 (11.2 percentage points). These long-term trends are consistent with national data showing that females consistently graduate at higher rates than males.³

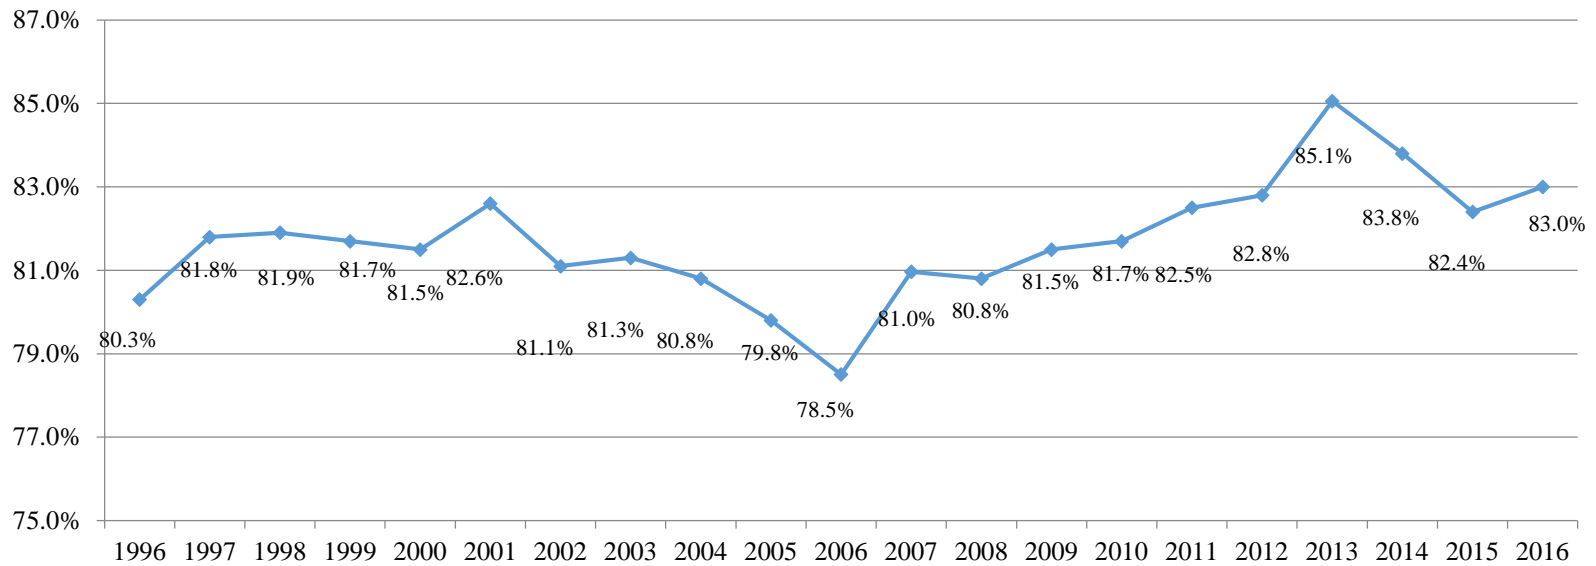

³ National Center for Education Statistics, “Graduation rate from first institution attended for first-time, full-time bachelor’s degree- seeking students at 4-year postsecondary institutions, by race/ethnicity, time to completion, sex, control of institution, and acceptance rate: Selected cohort entry years, 1996 through 2009,” October 2016. https://nces.ed.gov/programs/digest/d16/tables/dt16_326.10.asp

Second-Year Retention Rates for All Students

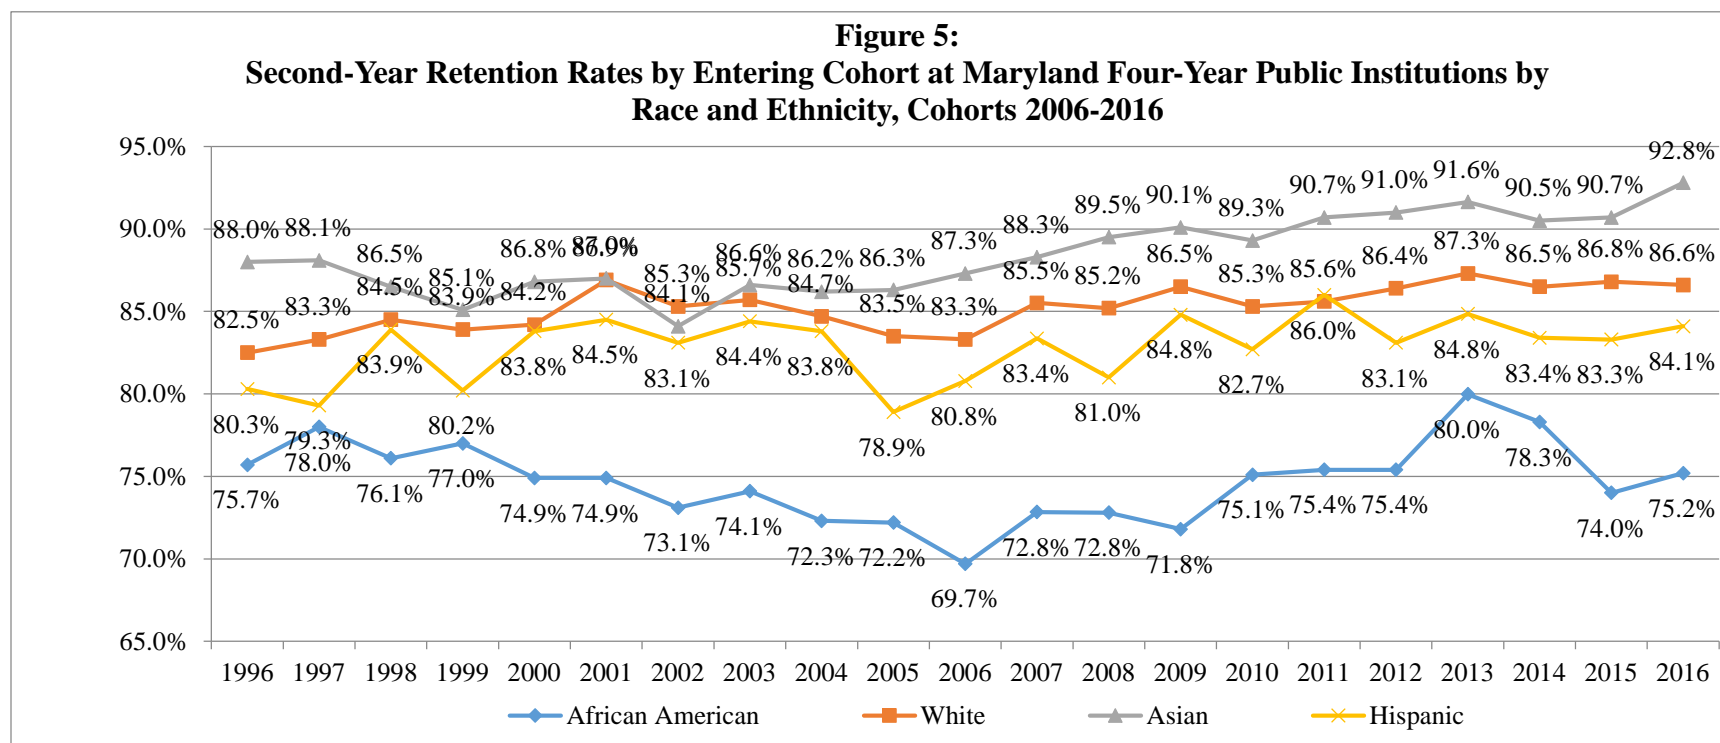

Of the 14,922 first-time, full-time students enrolling in fall 2016, 83.0% returned to the institution in which they originally matriculated in fall 2017, as shown in Figure 4. This represents a very slight increase (0.6 percentage points) of the retention rate over that of the fall 2015 cohort (82.4%). While this rate is below the 20-year high of 85.1% among the fall 2013 cohort, it remains part of a long-term positive trend, rising from 80.3% in 1996 (a 2.7 percentage point increase).

Figure 4.
Second-Year Retention Rates by Entering Cohort at Maryland Four-Year Public Colleges and Universities, Cohorts 1996-2016

Second-Year Retention Rates by Race and Ethnicity

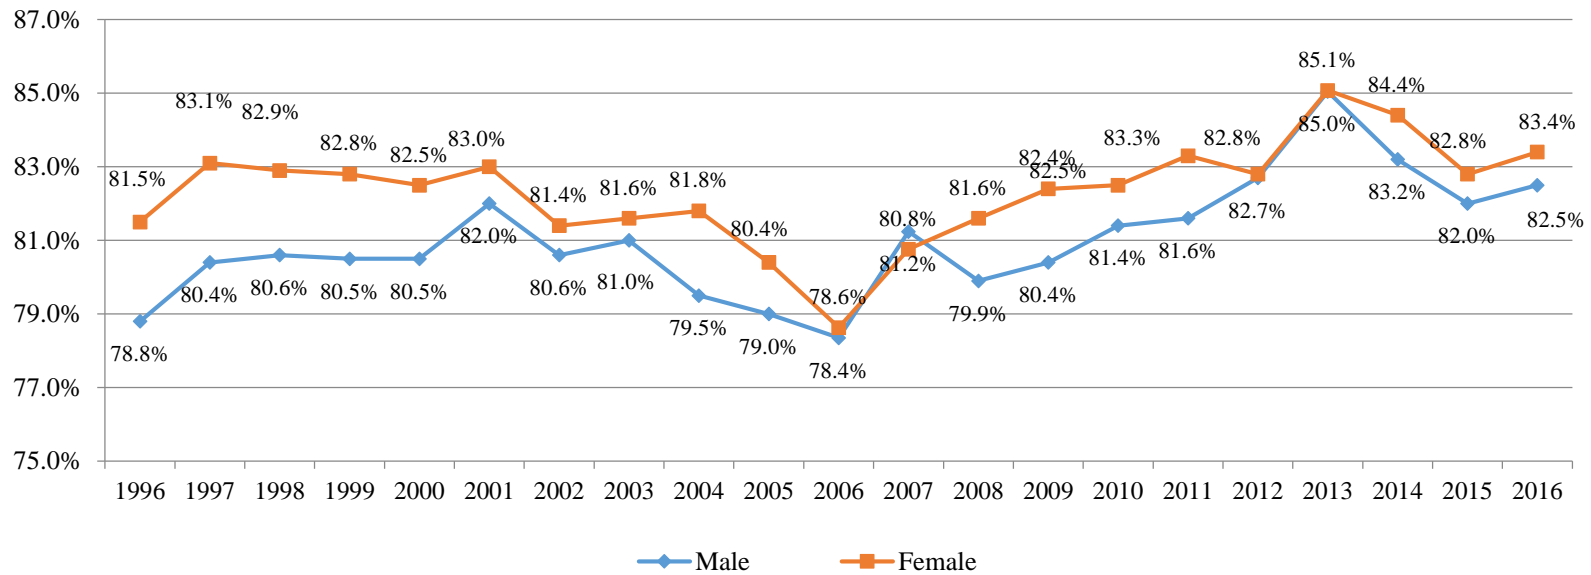

Figure 5 shows the second-year retention rates for the largest racial and ethnic groups. The retention rate for white students declined slightly, from 86.8% to 86.6%, but rates increased for Asian, Hispanic, and African American students. The largest increase (2.1 percentage points) was seen among Asian students. As this indicates, rates remained relatively similarly to those of the previous year. When examining long-term trends, retention rates for all groups except for African American students have increased approximately four percentage points since 1996; the rate for African American students has declined very slightly, from 75.7% to 75.2%. However, as noted in the 2017 report, cohort sizes for each racial and ethnic group have increased since 1996. While the white student cohort size saw a very small increase (1.7%), the African American student cohort increased by over one-quarter (27.5%). A far more substantial difference was seen among the Asian student population, which more than doubled (a 117.0% increase) and the Hispanic population, which increased by 465.2%. Overall, the 2016 entering cohort includes 3,856 more students than the 1996 cohort, and the number of students retained to the second year has increased by 3,499.

Second-Year Retention by Gender

Second-year retention rates increased slightly for both men and women (from 82.0% to 83.5%, and 82.8% to 83.4%, respectively). As Figure 6 shows, the retention rate gap (0.9 percentage points) is consistently smaller than the gap in graduation rates (6.4 percentage points for the 2011 cohort). While the average graduation rate gap since the 1991 cohort has been 7.7 percentage points, the gap between genders for retention has been consistently lower, an average of 1.3 percentage points. However, it is important to note that despite year-to-year fluctuations, during this period, the gaps in both retention and graduation rates have declined.

Figure 6.
Second-Year Retention Rates by Entering Cohort at Maryland Four-Year Public Institutions by Gender, Cohorts 1996-2016

Maryland State-Aided Independent Institutions

Beginning with the 2013 cohort, several important changes were made to the way that MHEC collects data from state-aided independent institutions. Most significantly, independent institutions were now required to submit student-level data on all students; prior to 2013, institutions were only required to submit at the individual student level for Maryland residents. During the initial year following this change, independent institutions did not consistently report data using the same type of student identification number as public institutions and using the same identification number for all data reporting on an individual student. Because many students were reported with different identification types in 2013, MHEC remains unable to report consistent retention and graduation data for those students who enrolled in a cohort before 2014. Consequently, MHEC determined that reporting retention and graduation rates for state-aided independent institutions would begin with the 2014 cohort.

This report includes information on retention rates for the 2014, 2015, and 2016 cohorts for state-aided independent colleges and universities. As the table shows, there has been a decline in the cohort size and both second-year and third-year retention rates between the 2014 and 2016 cohorts. Between 2014 and 2016, the cohort size decreased from 6,144 to 5,840 (a 4.9% decrease). Similarly, the retention rates declined as well, though the magnitude of those changes was small – 0.6 percentage points, from 82.1% in 2014 to 81.5% for the 2016 cohort for one-year retention, and a 1.4 percentage point decline in third-year retention, from 73.6% in 2014 to 72.2% in 2015. While these are small changes, they bear monitoring as additional cohort data become available.

CONCLUSION

The six-year graduation rate for the 2011 cohort of first-time, full-time students at Maryland public institutions is the highest rate since the Maryland Higher Education Commission began reporting retention and graduation data. This continues a long-term trend of growth in graduation rates; since the 1991 cohort, six-year graduation rates have increased from 55.1% to 67.4%.

The increase in graduation rates did not occur evenly across all groups. While graduation rates for both genders have increased, females continue to graduate at higher rates than men. There has been a long-term narrowing in this achievement gap, however; in 1991, this gap was 11.2 percentage points, compared to 6.4 for the 2011 cohort. Additionally, while graduation rates increased for each of the four largest racial and ethnic groups for the first time since 2007, the rates of increase have varied substantially over time. Though there has been a narrowing in the gap between the group with the highest graduation rate and the group with the lowest (from 27.8 percentage points in 1991 to 21.8 percentage points in 2011), this achievement gap persists.

The second-year retention rate for the 2016 cohort increased slightly, from 82.4% to 83.0%, following two consecutive years of declining retention rates. While a slight gap in retention rates between men and women persists, it is much lower than that among graduation rates. Additionally, this gap has declined over time, from 2.7 percentage points for the 1996 cohort to 0.9 for the 2016 cohorts. On the other hand, the gap between the racial and ethnic group with the highest retention rates has increased over time, from 12.3 percentage points in 1996 to 17.6 in 2016. Also, while second-year retention rates have increased since 1996 for Asian, white, and Hispanic students, the retention rate for African American students has slightly decreased, from 75.7% to 75.2%.

As this report indicates, progress continues to be made in improving both second-year retention and six-year graduation rates. However, persistent gaps between genders and racial and ethnic groups remain. Maryland's public colleges and universities should strive to create and continue initiatives designed to ensure that all groups benefit from continued progress.
