

ACKNOWLEDGEMENTS

I would first like to thank Dr. W. Samuel Easterling for his advice and guidance throughout the duration of this research. I would like to express sincere appreciation to Dr. Thomas M. Murray for his earnest efforts inside and outside of the classroom on my behalf and for serving on my committee. I would also like to thank Dr. Thomas E. Cousins for serving on my committee. Thanks also go to Nucor Corporation for sponsoring this research and to David Samuelson for his assistance throughout this project.

I would like to express tremendous gratitude to my parents, Eric and Pauline Alander, for their constant love and support throughout my entire life and for providing me with the opportunity to further my education at the institute of my choice. A special thank you also goes to my fiancée, Gigi Kaldahl, for her encouragement, support, and understanding during my graduate studies.

Many thanks go to Brett Farmer and Dennis Huffman for their hard work and invaluable help at the structures lab over the past year. Thanks also to Ann Crate for her assistance in preparing the data report for this study. A sincere thanks goes to Michelle Rambo-Roddenberry, Budi Widjaja, and Joe Howard for their assistance at the lab and from whom I have learned so much. I wish to express exceptional gratitude to Bobby Prince and Jared Jamison for their selfless help in the classroom and at the lab in the preparation of the test specimens for this project. Thanks also go to my fellow graduate students who were so helpful along the way. A special thanks is due Jennifer Frank, as well, for her assistance in the statistical analysis of the data presented in this report.

TABLE OF CONTENTS

	<u>Page</u>
ABSTRACT	ii
ACKNOWLEDGEMENTS	iii
LIST OF FIGURES	vi
LIST OF TABLES	viii
CHAPTER 1: INTRODUCTION	1
1.1 Background.....	1
1.2 Literature Review	3
1.3 Scope of Research	15
CHAPTER 2: EXPERIMENTAL PROGRAM.....	17
2.1 General.....	17
2.2 Fabrication of Test Specimens	18
2.2.1 Steel Reinforcement.....	22
2.3 Specimen Configuration.....	23
2.3.1 Preliminary Series Configuration.....	23
2.3.2 Series A Configuration.....	27
2.3.3 Series B Configuration.....	29
2.3.4 Series C Configuration.....	31
2.3.5 Series D Configuration.....	33
2.4 Test Setup	37
2.5 Instrumentation and Testing Procedure.....	41
CHAPTER 3: TEST RESULTS	43
3.1 General.....	43
3.1.1 Description of Data Pack	43
3.2 Test Results	46
3.2.1 Preliminary Series Test Results	47
3.2.2 Series A Test Results	50
3.2.3 Series B Test Results.....	52
3.2.4 Series C Test Results.....	55
3.2.5 Series D Test Results	56
3.3 Comparison of Results	59
CHAPTER 4: ANALYSIS AND INTERPRETATIONS.....	62
4.1 General.....	62
4.2 Ultimate Shear Strength of Standoff Screws in Profiled Steel Deck	62
4.2.1 Hankins' Proposed Shear Strength Equation	64
4.2.2 Effects of Individual Test Parameters on Ultimate Shear Strength .	66
4.2.2.1 Effects of Base Angle Thickness.....	67
4.2.2.2 Effects of Deck Geometry	69

4.3	Shear Strength of Standoff Screws at Low Slippage in Profiled Steel Deck	73
4.3.1	Effects of Individual Test Parameters on Shear Strength at Low Slippage.....	74
4.3.1.1	Effects of Base Angle Thickness.....	74
4.3.1.2	Effects of Deck Geometry.....	75
4.4	Shear Strength of the Elco Grade 8 Standoff Screw	79
4.5	Effects of Rib Failure on the Shear Strength of Standoff Screws	87
4.6	Ultimate Shear Strength of Standoff Screws in Solid Slabs.....	92
CHAPTER 5: SUMMARY, CONCLUSIONS, AND RECOMMENDATIONS		95
5.1	Summary.....	95
5.2	Conclusions	96
5.3	Limitations.....	102
5.4	Suggestions and Recommendations for Further Research	103
REFERENCES.....		105
APPENDIX.....		108
VITA.....		112

LIST OF FIGURES

<u>Figure</u>	<u>Page</u>
1.1 Typical Standoff Screw.....	2
1.2 Self-tapping Screws with Standoff Sleeves (Strocchia).....	3
1.3 Typical Screw Rotation (Hankins).....	9
1.4 Longitudinal Shear Path (Lloyd and Wright).....	10
1.5 Wedged Shear Cone (Lloyd and Wright).....	11
2.1 Typical Pushout Specimen.....	17
2.2 Standoff Screw Dimensions.....	19
2.3 Typical Top Chord Section.....	19
2.4 Vulcraft Deck Profiles.....	20
2.5 Typical Standoff Screw Pushout Specimen.....	21
2.6 Preliminary Series Dimensions	
(a) Test Groups P1-P4 Dimensions.....	25
(b) Test Group P5 Dimensions.....	25
(c) Test Group P6 Dimensions.....	26
(d) Test Groups P7-P10 Dimensions.....	26
2.7 Series A Dimensions	
(a) Test Groups A1-A2 Dimensions.....	28
(b) Test Groups A3-A8 Dimensions.....	28
2.8 Series B Dimensions	
(a) Test Groups B1-B9 Dimensions.....	30
(b) Test Groups B10-B11 Dimensions.....	30
2.9 Series C Dimensions	
(a) Test Groups C1-C3 Dimensions.....	32
(b) Test Groups C4-C6 Dimensions.....	32
(c) Test Groups C7-C8 Dimensions.....	33
2.10 Series D Dimensions	
(a) Test Groups D1-D3 Dimensions.....	34
(b) Test Groups D4-D6 Dimensions.....	35
(c) Test Groups D7-D8 Dimensions.....	35
(d) Test Groups D9-D10 Dimensions.....	36
(e) Test Groups D11-D12 Dimensions.....	36
2.11 Typical Test Setup.....	38
2.12 Test Setup Detail.....	39
2.13 Apparatus Used to Limit Longitudinal Splitting.....	40
2.14 Lateral Bracing Apparatus.....	41
3.1 Locations of Potentiometers/Slip Readings.....	45

4.1	Average Normalized Shear Strength per Screw vs. Embedment Depth Above Top of Deck (Series B).....	63
4.2	Normalized Shear Strength Per Screw vs. Top Chord Thickness.....	67
4.3	Interaction Curve for High-strength Bolts Under Combined Tension and Shear	69
4.4	Normalized Shear Strength Per Screw vs. Bottom Rib Width	70
4.5	Normalized Shear Strength Per Screw vs. Top Rib Width	70
4.6	Normalized Shear Strength Per Screw vs. Rib Area.....	71
4.7	Normalized Shear Strength Per Screw vs. Average Rib Width to Height Ratio	73
4.8	Normalized Shear Strength Per Screw at 0.2 in. Slip vs. Top Chord Thickness	75
4.9	Normalized Shear Strength Per Screw at 0.2 in. Slip vs. Bottom Rib Width	76
4.10	Normalized Shear Strength Per Screw at 0.2 in. Slip vs. Top Rib Width.....	77
4.11	Normalized Shear Strength Per Screw at 0.2 in. Slip vs. Rib Area	78
4.12	Normalized Shear Strength Per Screw at 0.2 in. Slip vs. Average Rib Width to Height Ratio	78
4.13	Experimental vs. Predicted Shear Strength (using Eq. 4.2)	83
4.14	Experimental vs. Predicted Shear Strength (using Eq. 4.3)	87

LIST OF TABLES

<u>Table</u>	<u>Page</u>
1.1 Experimental Shear Connection.....	6
2.1 Preliminary Series Configuration.....	27
2.2 Series A Configuration.....	29
2.3 Series B Configuration.....	31
2.4 Series C Configuration.....	33
2.5 Series D Configuration.....	37
3.1 Preliminary Series Results	48
3.2 Preliminary Series Average Results.....	49
3.3 Series A Results	51
3.4 Series A Average Results.....	51
3.5 Series B Results	53
3.6 Series B Average Results.....	53
3.7 Series C Results	55
3.8 Series C Average Results.....	56
3.9 Series D Results	57
3.10 Series D Average Results.....	58
3.11 Normalized Average Shear Strength.....	61
4.1 Results of Tests with One Screw Per Rib	64
4.2 Comparison of Hankins' Proposed Shear Strength Equation and Average Experimental Results.....	65
4.3 Shear Strength Per Screw at 0.2 in. of Slip for Tests with One Screw Per Rib.....	74
4.4 Data Used in First Multiple Linear Regression	80
4.5 Predicted Shear Strength at 0.2 in. of Slip (using Eq. 4.2)	82
4.6 Data Used in Second Multiple Linear Regression	84
4.7 Predicted Shear Strength at 0.2 in. of Slip (using Eq. 4.3)	86
4.8 Rib Shear Failure Loads, Series C and D.....	90
4.9 Maximum Number of Screws Per Rib.....	92
4.10 Predicted Shear Strength in Solid Slab Tests (using Eq. 4.5).....	94
