East-West Section/Lines of Sight:

In order to reduce the volume of the new building, the court chamber is put into the basement floor. The height of the new building is lowered to be 23 feet instead of 32 feet.

As a result, the court chamber and related offices are located in a more quiet environment. At the same time, a small below-grade garden is constructed beyond the row of columns near the lower entrance to the chamber.

In the garden, people's view will be limited by the edge of the pool of water. Only the top of the existing Court House and the monument can be seen.

But, on the first floor and on the second floor, there are many opportunities for visitors to appreciate the whole historical block.
