North-South Section through the Porch

The staged porch connects the two entrances on the street level and the courtroom exit on basement level and works as an enjoyable walking path along the curtain wall from Main Street to the interior of the block.

North-South Section through Two Staircases

Floor-to-floor circulation goes through the two staircases on the north and south ends of the building. Handicapped people will use the elevator. The stair on the south is for public access and the one on the north is mainly for office use.
