Cc: William Ducker <@vt.edu>

PNAS:

I am completing a master's thesis at Virginia Tech entitled "Effect of Surface Chemistry and Young's Modulus on Pseudomonas Aeruginosa Surface Motility." I would like your permission to reprint in my thesis excerpts from the following:

Parsek, M. and E. Greenberg (2000). "Acyl-homoserine lactone quorum sensing in Gram-negative bacteria: A signaling mechanism involved in associations with higher organisms." Proceedings of the National Academy of Sciences of the United States of America 97: 8789-8793.

The excerpts to be reproduced are: Figure 3. The requested permission extends to any future revisions and editions of my dissertation, including non-exclusive world rights in all languages, and to the prospective publication of my thesis. These rights will in no way restrict republication of the material in any other form by you or by others authorized by you. Your granting permission will also confirm that your company owns the copyright to the above-described material.

If these arrangements meet with your approval, please reply to this e-mail that you grant permission. You can reach me at [@vt.edu](mailto:@vt.edu) or xxx-xxx-xxxx.

Thank you very much.

Sincerely,

Jon Hittel  
Virginia Tech  
Chemical Engineering

Thank you for your message. Permission is granted for your use of the material as described in your request. Please include a complete citation for the original PNAS article when reusing the material, and include "Copyright (2000) National Academy of Sciences, U.S.A." as a copyright note. Because this material published between 1993 and 2008, a copyright note is needed. There is no charge for this material, either. Let us know if you have any questions.

Sincerely,

Kay McLaughlin for

Diane Sullenberger

PNAS Executive Editor

# ELSEVIER LICENSE TERMS AND CONDITIONS

Jan 01, 2020

This Agreement between Jonathan Hittel ("You") and Elsevier ("Elsevier") consists of your license details and the terms and conditions provided by Elsevier and Copyright Clearance Center.

License Number	4740360146158
License date	Jan 01, 2020
Licensed Content Publisher	Elsevier
Licensed Content Publication	Current Opinion in Structural Biology
Licensed Content Title	Type IV pili: paradoxes in form and function
Licensed Content Author	Lisa Craig, Juliana Li
Licensed Content Date	Apr 1, 2008
Licensed Content Volume	18
Licensed Content Issue	2
Licensed Content Pages	11
Start Page	267
End Page	277
Type of Use	reuse in a thesis/dissertation
Portion	figures/tables/illustrations
Number of figures/tables /illustrations	2
Format	electronic
Are you the author of this Elsevier article?	No
Will you be translating?	No
Title	Effect of Surface Chemistry and Young's Modulus on the Surface Motility of the Bacterium Pseudomonas Aeruginosa
Institution name	Virginia Polytechnic Institute and State University
Expected presentation date	Jan 2020
Portions	Figures 3a and 4b
Requestor Location	Jonathan Hittel
	United States
	Attn:
Publisher Tax ID	98-0397604
Total	<b>0.00 USD</b>
