

AUTHOR AND USER RIGHTS

INTRODUCTION

Elsevier requests transfers of copyright, or in some cases exclusive rights, from its journal authors in order to ensure that we have the rights necessary for the proper administration of electronic rights and online dissemination of journal articles, authors and their employers retain (or are granted/transferred back) significant scholarly rights in their work. We take seriously our responsibility as the steward of the online record to ensure the integrity of scholarly works and the sustainability of journal business models, and we actively monitor and pursue unauthorized and unsubscribed uses and re-distribution (for subscription models).

In addition to [authors' scholarly rights](#), anyone who is affiliated with an [institution with a journal subscription](#) can use articles from subscribed content under the terms of their institution's license, while there are a number of other ways in which anyone (whether or not an author or subscriber) can make use of content published by Elsevier, which is [free at the point of use](#) or [accessed under license](#).

Author Rights

As a journal author, you have rights for a large range of uses of your article, including use by your employing institute or company. These rights can be exercised without the need to obtain specific permission.

How authors can use their own journal articles

Authors publishing in Elsevier journals have wide rights to use their works for teaching and scholarly purposes without needing to seek permission.

Table of Author's Rights

	Preprint version (with a few exceptions- see below *)	Accepted Author Manuscript	Published Journal Articles
Use for classroom teaching by author or author's institution and presentation at a meeting or conference and distributing copies to attendees	Yes	Yes	Yes
Use for internal training by author's company	Yes	Yes	Yes
Distribution to colleagues for their research use	Yes	Yes	Yes
Use in a subsequent compilation of the author's works	Yes	Yes	Yes
Inclusion in a thesis or dissertation	Yes	Yes	Yes
Reuse of portions or extracts from the article in other works	Yes	Yes with full acknowledgement of final article	Yes with full acknowledgement of final article
Preparation of derivative works (other than for commercial purposes)	Yes	Yes with full acknowledgement of final article	Yes with full acknowledgement of final article
Preprint servers	Yes	Yes with the specific written permission of Elsevier	No
Voluntary posting on open web sites operated by author or author's institution for scholarly purposes	Yes (author may later add an appropriate bibliographic citation, indicating subsequent publication by Elsevier and journal title)	Yes, with appropriate bibliographic citation and a link to the article once published	Only with the specific written permission of Elsevier
Mandated deposit or deposit in or posting to subject-oriented or centralized repositories	Yes under specific agreement between Elsevier and the repository	Yes under specific agreement between Elsevier and the repository**	Yes under specific agreement between Elsevier and the repository
Use or posting for commercial gain or to substitute for services provided directly by journal	Only with the specific written permission of Elsevier	Only with the specific written permission of Elsevier	Only with the specific written permission of Elsevier

** Voluntary posting of Accepted Author Manuscripts in the arXiv subject repository is permitted.

Examples of use or posting for commercial gain:

- Posting by companies of employee-authored works for use by customers of those companies (e.g. pharmaceutical companies and physician prescribers)
- Commercial exploitation such as directly associating advertising with posting or charging fees for document delivery or access

***Which journals have different pre-print policies?**

If an electronic pre-print of an article is placed on a public server prior to its submission to an Elsevier journal, this is not generally viewed by Elsevier as 'prior publication' and will not disqualify the article from further consideration by Elsevier, nor will Elsevier require the removal of that pre-print version.

However Cell Press and The Lancet have different pre-print policies and will not consider for publication articles that have already been posted publicly. This is a rule agreed upon by The International Committee of Medical Journal Editors. Information on [Cell Press policy on pre-prints](#) is available, as is [The Lancet pre-print policy](#). There are a number of other journals published by Elsevier (principally journals published on behalf of third party owners) that also have their own pre-print policies which will be set out in the Guide for Authors for the relevant journal.

Does Elsevier request a transfer of copyright?

Elsevier requests a transfer of copyright for articles published under subscription-based business models but we generally use different licensing approaches for other publishing models where we offer authors a variety of Creative Commons licenses for some of our author-pays journals and are piloting a range of options. More information on Creative Commons licenses can be found at: <http://creativecommons.org/licenses>

For subscription-based publishing, we ask for a transfer of copyright for a number of reasons, mainly because:

- (i) By having the ability to exercise all rights under copyright, Elsevier is able to quickly launch new products and services, and to make agreements with other platforms and services to enrich published content and to make it more accessible and usable. Authors may be based in a number of different countries, which will have their own copyright regimes. Copyright assignments give more legal certainty, particularly in relation to future rights in new technologies.
- (ii) Elsevier uses copyright to protect the integrity of the journal articles in cases of plagiarism, copyright infringement and other third party infringements. The journal subscription business model depends on a substantial body of subscribing customers providing financial support to a particular journal, and "free-riding" infringements diminish this model.
- (iii) An assignment of rights under copyright means that we can more easily show that we own the rights and do not have to seek the participation of the author or obtain power of attorney from the author in order to bring an enforcement action.

Remember, even though we ask for a transfer of copyright, our journal authors retain (or are granted back) significant [scholarly rights](#).

For a more detailed discussion, see STM Position Paper on the benefits of copyright assignments at http://www.stm-assoc.org/2007_10_01_Copyright_Assignment_Benefits.pdf

Where can I find more information on Elsevier's posting and copyright policies?

Please visit our [Article Posting Policies](#) information page.

You can also [download here](#) your practical guide to Elsevier's copyright policy.

Does Elsevier claim rights in an author's supporting data?

Elsevier supports the general principle that raw research data should be made freely available to all researchers and encourages the public posting of the raw data outputs of research. (Note that this is distinct from charts, tables, etc. which may be included within an article and in which rights would be transferred or licensed to Elsevier as part of the article, in the same way as text, illustrations or photographs.)

Elsevier therefore does not claim rights in the raw datasets that may be submitted with an article and the author can make these datasets freely available from other (web) locations.

If supported by the author and journal editor, and when a dataset is hosted in a repository that ensures data integrity and supports long-term preservation and inward linking, Elsevier can further support the discoverability of that dataset by connecting it with the published journal article on ScienceDirect through linking from an article or entity or through article interoperability. For examples of how this could work in practice, see: http://www.stm-assoc.org/2011_12_02_Innovations_Aalbersberg_Connecting_to_data_sets.pdf

For more information on industry positions on this issue supported by Elsevier, see:

Joint Statement from STM and DataCite on the Linkability and Citability of Research Data, June 2012: <http://datacite.org/node/65>

Declaration on STM Publishing, November 2007:
http://www.stm-assoc.org/2007_11_01_Brussels_Declaration.pdf

STM/ALPSP Statement, June 2006:
<http://www.alp.org/Ebusiness/AboutALPSP/ALPSPStatements/Statementdetails.aspx?ID=55>

How can I obtain permission to use my article for other purposes?

Our Subscription User Rights, Access Rights and Licensed Rights pages describe additional usages that can be made of Elsevier-owned material. To secure permission to use material from other Elsevier books, journals, databases or other products, to use your own material for purposes other than those outlined above, or if another author wishes to use all or part of your article as a resource, select:

⇒ [OBTAINING PERMISSION TO USE ELSEVIER MATERIAL](#)

Can I post my published journal article on open websites?

A published journal article is the definitive final record of published research that appears in the journal and embodies all value-adding publisher activities, including copy editing, formatting and, if relevant, pagination, along with the stewardship of the scholarly record.

You can use your branded and formatted published article for all of the personal and institutional purposes described above. However, in order to safeguard the correct scientific record, Elsevier does not permit the posting of published journal articles (either the pdf file provided by Elsevier or HTML files) on any open websites.

As part of its contribution to the stewardship of the scientific literature, Elsevier works with third parties (e.g. national libraries) to preserve its journal articles for posterity and in perpetuity, and invests to drive their usage. Elsevier strictly enforces an absolute guideline on the location of its published journal articles: each branded and formatted published journal article will reside only on a completely controlled site because this is the only way that we as the publisher can guarantee that each published journal article is permanent, authentic and unaltered as part of the ‘minutes of science’.

Since Elsevier adds significant value to the final published journal article, we need to take these steps to ensure that this value is maintained, both for Elsevier and for our authors. However, we view preprints and accepted author manuscripts as less formal versions of the article and we therefore take a more liberal approach towards these, as described in more detail on our [Author Posting Policies](#).

Am I allowed to post my published journal article to websites to fulfil drug regulation authority approval of therapeutic agents?

The posting of the published article to websites to fulfil drug regulation authority approval of therapeutic agents is not permitted. However, Elsevier permits the inclusion of an article title and abstract to fulfil drug regulation authority requirements, provided this is accompanied by a link to the published journal article on Elsevier’s website. There are also reprint and license arrangements available to facilitate medical requirements.

Does Elsevier assist its authors to comply with the manuscript archiving requirements of funding bodies?

Elsevier has established agreements and developed policies to allow authors who publish in Elsevier journals to comply with the manuscript archiving requirements of a variety of funding bodies, including the US-based National Institutes of Health. For more information on existing arrangements, or if you are an institution or funding body and would like to discuss putting in place a new agreement with Elsevier, please see <http://www.elsevier.com/wps/find/authorsview.authors/fundingbodyagreements>

When Elsevier changes its author usage policies, are those changes also retroactive?

Yes, when Elsevier changes its policies to enable greater academic use of journal materials (such as the changes several years ago in our web-posting policies) or to clarify the rights retained by journal authors, Elsevier is prepared to extend those author rights retroactively with respect to articles published in journal issues produced prior to the policy change.

How do I obtain a journal publishing agreement?

You will receive a form automatically by post or e-mail once your article is received by Elsevier's Editorial-Production Department. View a [generic example](#) of the agreement. Some journals will use another variation of this form.

Can you provide me with a PDF file of my article?

Many Elsevier journals are now offering authors e-offprints – free electronic versions of their published articles. E-offprints are watermarked PDF versions, and are usually delivered within 24 hours, much quicker than print

copies. These PDF files may not be posted to open websites. For more information, please see www.elsevier.com/authors/offprints or contact authorsupport@elsevier.com

Who should I contact if I have a query about my journal publishing agreement?

Please note that the rights listed above apply to journal authors only. For information regarding book author rights and for any questions relating to the author rights outlined here, please contact Elsevier's Global Rights department.

Elsevier Global Rights Department

Subscription User Rights

This section provides information on how authorized users under Elsevier's standard academic, government and corporate licenses are permitted to use journal articles on SciVerse ScienceDirect online.

Depending on the type of institution, authorized users may be students, faculty, staff, researchers, employees or independent contractors of the relevant customer, as well as individuals using computer terminals within the library facilities for purposes of personal research, education or other non-corporate use.

Additional usages may have been acquired by your institute or corporation on an individual basis. Please check with your librarian whether you are an authorized user and what usages have been acquired.

Mobile access for subscribers

If your institutional library subscribes to SciVerse ScienceDirect online then you can access exactly the same journals from your Smartphone, Blackberry or tablet device. Now you can always access key content making it easier to browse, search and read articles anywhere in the world.

To download and for more information, see: <http://www.info.sciverse.com/sciverse-mobile-applications/overview>

Permitted Use Under Standard License

Professional use of articles [1-3 above]

Current SciVerse ScienceDirect subscription agreements allow authorized users to access, search, browse and view subscribed content, including journal articles, and to print or download a limited number of articles, abstracts and records.

In general, Elsevier does not allow copying, printing or downloading entire issues of journals or otherwise substantially or systematically reproducing or retaining Elsevier-published articles.

Local database retention of Elsevier-published articles is only permitted if an institution or corporation has made an explicit agreement with Elsevier to acquire retention rights or if the institution or corporation has a digital rights license with a local reproduction rights organization (RRO). For more information on your local RRO and what they can offer, visit the International Federation of Reproduction Rights Organisations' website at www.iffro.org

Links to articles [4 and 5 above]

Any institute with a current ScienceDirect subscription may provide links on the institute's intranet, home page, library website or online catalog to subscribed Elsevier journals or articles. The ScienceDirect info site offers shortcut URLs to help information professionals put in place deep links to subscribed Elsevier journals or articles. For more information, see www.info.sciverse.com/sd/shortcutlinks

Coursepacks and eReserves [6 and 15-17 above]

Any academic or government institute with a current ScienceDirect subscription agreement can incorporate links to subscribed content, including full-text articles, into electronic coursepacks or eReserve lists for use in connection with courses offered for academic credit by the subscribing institute.

For any similar use for a non-accredited course or one offered by a corporation, an institute or corporation must obtain prior written permission from Elsevier and a fee may be required. Anyone interested in such permission should contact the Elsevier Global Rights department at permissions@elsevier.com

Interlibrary loan [7 above]

The interlibrary loan (ILL) policy for electronic journals is included in each institution's ScienceDirect subscription agreement. In short, this allows and provides for the use of electronic journal articles as a source for fulfillment of ILL requests, with some restrictions.

Elsevier grants subscribing institutes the right to use articles from subscribed ScienceDirect content as source material for ILLs subject to the following conditions:

- Each ILL request must come from an academic or other noncommercial, noncorporate research library located in the same country as the subscriber
- Each requested article must be printed by the subscriber (not applicable to US customers) and mailed, faxed or transmitted by Ariel (or a similar ILL system) to the requesting library

If a corporate or commercial entity is seeking a ScienceDirect article, instead of requesting ILL, that entity may use ScienceDirect's Pay per View service on a guest basis. For details, see www.info.sciverse.com/sd/ppv. Please also refer to <http://myelsevier.com>

Scholarly sharing of articles [8 above]

Current ScienceDirect subscription agreements permit authorized users to transmit excerpts of subscribed content, such as an article, by e-mail or in print, to known research colleagues for the purpose of scholarly study or research. Recipients of such scholarly sharing do not themselves have to be affiliated with an institute with a ScienceDirect subscription agreement.

Live reference

If they are both affiliated with the same institute, then a librarian can take a user electronically to any Elsevier article to which that institute has subscribed access. The librarian can also e-mail an Elsevier article, included in the library's subscription, to the user.

If, however, someone is not affiliated with the same institute as the librarian, then that user is not an authorized user at the librarian's institution. The librarian therefore cannot link the user directly to Elsevier articles or e-mail the Elsevier articles to the user. The librarian can, however, explain to the user how to request Elsevier articles through ILL or acquire them through ScienceDirect's Pay per View service.

Use by library guests [14 above]

Any institute with a current ScienceDirect subscription may allow members of the general public to use terminals physically located at that institute's library to access, search, browse, view and print articles in subscribed Elsevier journals. Some libraries impose their own usage restrictions on such 'walk-in users'. Commercial entities that wish to make copies for commercial purposes should obtain prior authorization from Elsevier or a local reproduction rights organization.

Access Rights

This section provides information on access to Elsevier content that is free at the point of use.

Sponsored articles and open access journals

Elsevier offers authors a variety of Creative Commons licences for its author-pays journals and is piloting a range of options. More information on Creative Commons licences can be found at: <http://creativecommons.org/licenses>

However, there may be some individual journals (including those owned by third parties on whose behalf the journal is published by Elsevier) for which Elsevier provides a bespoke user licence.

Open archives

This involves making journal articles from a subscription journal freely available on ScienceDirect after a journal specific embargo period. This can be done in two ways:

1. Journal Level

Here a specific journal makes articles within the journal freely available after a specific time period following publication. Elsevier has a number of journals that offer free access after a limited embargo period.

To see a list of Elsevier open archive journals, [please follow this link](#).

2. Institutional Level

Here selected articles associated with a particular institution are made freely available after a specific time period following publication. Elsevier is running two pilots to understand the uptake and use of this delayed access model. We do not make all articles from that institution available and these pilots have been set up using a list of journals from which articles may be selected for inclusion in the pilot.

Under both models, once the embargo period has passed, the content is available for personal, non-commercial use on the basis of the standard terms and conditions of use for www.sciencedirect.com.

Procedia and third party journals hosted by Elsevier

Elsevier hosts on ScienceDirect certain content that is free at the point of use- principally Procedia and a number of third party journals for which the peer review and publication process is managed by that third party.

This content is available for personal, non-commercial use on the basis of the standard terms and conditions of use for www.sciencedirect.com.

Free walk-in access via public libraries

Any public library or institute with a current ScienceDirect subscription may allow members of the general public to use terminals physically located at that institute's library to access, search, browse, view and print articles in subscribed Elsevier journals. Some libraries impose their own usage restrictions on such 'walk-in users'.

Licensed Rights

Purchase of individual articles

Anyone may use Pay per View on ScienceDirect and purchase individual full-text journal articles. This service allows users to purchase direct access to articles. HTML and PDF access is instant and available for 24 hours on ScienceDirect; in addition, purchased articles can be downloaded and stored locally for future use. Articles from a number of Elsevier's journals are also available as part of DeepDyve (www.deepdyve.com), the largest online rental service for professional and scholarly research articles. use

Reprints of articles

For customers who wish to purchase individual or commercial reprints of an article published by Elsevier, permission can be obtained from Elsevier.

Short quotes and reproduction of material from articles

Anyone may in written work quote from an article published by Elsevier, as long as the quote comprises only a short excerpt such as one or two sentences. An appropriate citation, including the journal title, must be provided.

If the intended use is for scholarly content, noncommercial research or educational purposes, an institution or academic may, without seeking permission from Elsevier, use:

- a single text extract of fewer than 100 words or a series of extracts totaling no more than 300 words
- a maximum of 2 figures from a journal article or a total of 5 from a journal volume

These guidelines reflect Elsevier's endorsement of the International Association of Scientific, Technical & Medical Publishers' 2008 guidelines for quotation and other academic uses of excerpts from journal articles. For more information on these guidelines, see www.stm-assoc.org/document-library/ (see Guidelines for Quotations from Journal Articles).

If the intended use or the material needed differs from the categories described above, Elsevier's prior written permission must be obtained.

Photocopies of articles

National copyright laws generally permit photocopying of an article for personal use.

Elsevier requires permission and a fee for all other photocopying, including multiple or systematic copying, copying for advertising or promotional purposes, copying for resale and copying for all forms of document delivery. Special rates are available for educational institutions (which do not have a subscription with Elsevier) wishing to make photocopies for nonprofit classroom use. (Authors will have the right to use their own material in the classroom as set out in the Author Rights section.)

How to obtain permission from Elsevier

Anyone may request permission via Rightslink, the Copyright Clearance Center's service available at the top of the HTML version of every journal article on ScienceDirect. Alternatively, e-mail requests to permissions@elsevier.com or (for individual or commercial reprints) to reprints@elsevier.com For more information, see:

⇒ **[OBTAINING PERMISSION TO USE ELSEVIER MATERIAL](#)**
