

Acknowledgement

Thanks to Dr John Randolph and Dr Lee R. Skabelund for the guidance in the process of this major paper. The development of this paper is impossible without the topic introduction and reviews from Dr. Randolph. Thanks especially to Dr. Skabelund for the detailed review and helpful suggestions and corrections for this paper.

Table of Contents

Table of Contents	iv
List of Figures	vi
Chapter One: Introduction	1
1.1 Background and Problem Statement	1
1.2 Goals, Objectives and Methodology	2
1.2.1. Goal	2
1.2.2. Objectives	2
1.2.3. Methodology	2
1.3 An Overview of the Paper	2
Chapter Two: Theoretical Background	4
2.1 Definition	4
2.2 Watershed Restoration/Management	6
2.3 Riparian Restoration	6
2.4 In-stream Restoration	8
2.5 Case Studies	9
2.5.1. Bluewater Creek Watershed Management, New Mexico	10
2.5.2. Lititz Run Watershed, City of Lancaster, Pennsylvania	12
2.5.3. Kingstowne Stream Restoration Project, Fairfax, Virginia	13
Chapter Three: Urban Stream Restoration Planning	15
3.1 Overview	15
3.2 Organizing the Process	16
3.3 Identifying Problems and Opportunities	17
3.3.1 Data Collection	17
3.3.2 Problem Analysis: The Reference Approach	18
3.4 Developing Goals and Objectives for Stream Restoration/Rehabilitation Efforts	19
3.4.1 Define the Desired Future Condition	19
3.4.2 Identify Scale Considerations	19
3.4.3 Identify Restoration/Rehabilitation Constraints and Issues	19
3.4.4 Define Restoration/Rehabilitation Goals and Objectives	20
3.5 Stream Restoration/Rehabilitation Alternatives and Design	20
3.5.1 Cause Management or Symptom Treatment	21
3.5.2 Scale Consideration	21
3.5.3 Other Supporting Analyses for Selecting Alternatives	21
3.5.4 Alternative Selection Components	22
3.5.5 Restoration Detailed Design	22
3.6 Restoration/Rehabilitation Implementation	22
3.6.1 Securing Funding for Restoration/Rehabilitation Implementation	23
3.6.2 Identifying Tools to Facilitate Restoration/Rehabilitation Implementation	23
3.6.3 Dividing Restoration/Rehabilitation Responsibilities	24
3.6.4 Installing Restoration/Rehabilitation Measures	24
3.7 Restoration/Rehabilitation Evaluation, Monitoring, and Management	24
3.7.1 Define Measurable Objectives	25
3.7.2 Design Restoration/Rehabilitation Evaluation,	

Monitoring, and Management Program	25
Chapter Four: Stroubles Creek Restoration Process Plan	27
4.1 The Stroubles Creek Background Information	27
4.1.1 The Stroubles Creek Watershed	27
4.1.2 Historic Studies on the Stroubles Creek	28
4.1.3 Thoughts on the Stroubles Creek	28
4.2 Process Organization	30
4.2.1 Setting Boundaries	30
4.2.2 Forming an Advisory Group	30
4.2.3 Establishing Technical Teams	31
4.2.4 Identifying Funding Sources	31
4.2.5 Establishing Points of Contact and a Decision Structure	31
4.2.6 Facilitating Involvement and Information Sharing Among Participants	32
4.2.7 Documenting the Process.	32
4.3 Problems and Opportunity Analysis ³²	
4.3.1 Data Collection	32
4.3.2 Definition of Existing Stream Corridor Conditions and the Causes of Disturbance	33
4.3.3 Analyze the Problems of the Stroubles Creek by the Reference Approach	34
4.3.4 Determination of Management Role on Stream Recovery	35
4.3.5 Problems and Opportunity Statement	35
4.4 Goals and Objectives	36
4.4.1 Define Restoration/Rehabilitation Vision Statement for the Stroubles Creek	36
4.4.2 Identify Constraints and Issues.	36
4.4.3 Define Goals and Objectives.	36
4.5 Restoration/Rehabilitation Design	36
4.5.1 Design Elements of the Stroubles Creek Restoration/Rehabilitation	36
4.5.2 Components of the Stroubles Creek Restoration/Rehabilitation Design	37
4.6 Implementation and Installation	38
4.6.1 Secure Funding for the Stroubles Creek Restoration/Rehabilitation	38
4.6.2 Identify Regulatory and Non-Regulatory Tools to Facilitate Implementation	38
4.6.3 Assign Restoration/Rehabilitation Responsibilities	38
4.6.4 Implementation Considerations	38
4.7 Evaluation, Monitoring and Management	38
4.7.1 Evaluating and Monitoring Success	39
4.7.2 Long Term Protection and Management	39
Chapter Five: Summary and Conclusion	40
Bibliography	43
