SUMMARY OF 1936 EXTENSION ACTIVITIES

I. NEW SOIL CONSERVATION PROGRAM

Community and County organizations set up according to regulations. This program completed on 280 farms which is estimated to net these farmers this year approximately

\$30,000.00

Fifty 1936 wheat applications completed and payments received for farmers

\$ 2,500.00

Completion of tobacco program under old A.A.A. and payments received by farmers this year

\$ 1,115.53

Completion of Corn-Hog Program and payments received by farmers this year

\$ 4,036.26

The above totals for 1936

\$37,651.79

II. EXTENSION T.V.A. FARM DEVELOPMENT PROGRAM

During the year 1936, 883 tons of T.V.A. fertilizer has been received by 508 Smyth County farmers. This fertilizer conservatively valued at \$40.00 per acre is worth

\$55,320.00

This fertilizer has been used over 908 acres of pasture and meadow land. Nearly all of this land has been seeded to lespedeza as recommended by the County Agent.

III. LIVESTOCK

Increased revenue derived from treating flocks for stomach worms, docking and trimming lambs and cooperative marketing of lambs and wool

\$ 9,967.00

Page 2.

Estimated value of cattle saved by vaccinating for
blackleg and treatment for diseases \$4,200.00.

Estimated revenue derived from marketing cattle co-
operatively \$1,500.00.

Estimated value of 72 purebred sires replaced this
year \$ 930.00.

IV. HORTICULTURE

No estimate of a dollars and cents value of this work
is made. However, the three growers with new orchards
established and the one grower spraying and caring for
his orchard for the first time have reported good results
and their increased interest in fruit growing.

V. 4-H CLUBS

The 58 club members completing their projects show a net
profit of \$446.37 including premiums won on a total invest-
ment of \$1,986.04.

VI. MISCELLANEOUS

No accurate estimate is attempted of the value of securing
Emergency Crop Loans, or the part taken by Agents in Drought
Relief, Rural Resettlement, Barberry Eradication, or in fur-
nishing information and plans for the construction of farm
buildings and control and treatment of livestock and plant
diseases. Daily calls for such information and service come

Page 3.

constantly throughout the year and this office is always ready and willing, with the assistance of the District Agent and Specialists, to cooperate and lend all assistance possible in promoting the welfare of all the citizens of the county.

By actual records kept on other projects listed in this report and conservative estimates of the livestock work, the Agricultural Extension Program in Smyth County for 1936 was worth \$90,015.16 to the residents of the County.

In conducting this work the County Agricultural Agent and Assistant Agent spent 320 days in the office answering 5076 personal calls, 2154 telephone calls, writing 2020 individual letters, 70 circular letters with several thousand copies mailed and preparing 71 newspaper articles. They spent 272 days in the field making 813 farm visits and holding 135 farm meetings with a total attendance of 4418 people. 14,703 miles were travelled officially on duty in conducting the field work.

STATUS OF COUNTY EXTENSION ORGANIZATION

Extension work has been conducted in Smyth County under the direction of a County Advisory Committee and the present Agricultural Agent since 1926. During this period some changes have been made in the personnel of the Advisory Committee due to deaths or to some members not displaying sufficient interest to warrant continued membership.

Beginning early in this year a series of three or more community discussion meetings were held in each of the seven communities in the county with one or more local persons leading these discussions. The Agent attended one of these discussion meetings in each community, toward the last of the series, and asked that a committee of three or more of the most interested and influential citizens be named by the group to represent that particular community on the County Agricultural Advisory Council. After that was completed and the meeting adjourned, those elected were asked to remain to organize the committee, elect a chairman, and to fix a date for the County Planning Meeting. This resulted in the election of new members in each community, retaining only those who in the past has shown an active interest in the development and progress of the County Agricultural Program.

The seven organized community committees mutually agreed to hold the County Planning Meeting in the court house on March 28th.

When this date arrived, twenty-one of the thirty-four members elected (each of the seven communities represented) were present to plan and outline the 1936 County Extension Program.

It may be seen from the above brief sketch that the Agricultural Program for Smyth County grew out of the communities, and was developed entirely by the cooperation of the people through their County Advisory Committee.

COUNTY PROGRAM

I. NEW SOIL CONSERVATION PROGRAM

Goals:

1. That all efforts possible be made to present this program clearly so that farmers could understand it with its advantages of conserving and building crops, its limitations on depleting crops and subsidy payments, and how farmers could participate in it.

Achievements:

1. This was accomplished through the holding of 64 county and community educational and organization meetings, 23 newspaper articles, 24 circular letters and over 1500 office consultations, community and county organizations set up with 280 farmers carrying the program through the year who will receive over \$30,000 payments.

II. EXTENSION T.V.A. FARM IMPROVEMENT PROGRAM

1. To hold meetings of the local association when necessary to keep members informed.

1. Two meetings were held for this purpose.

2. To carry out improved farm practices on 34 farms and keep farm records.

2. This was accomplished through 255 farm visits, 16 circular letters, 1 newspaper article, 749 office calls, 7 meetings, and 1 field demonstration.

3. To hold field demonstration meetings when conditions warrant.
4. To urge farmers carrying out T.V.A. pasture demonstrations to seed legumes in these pastures.
5. To establish and work out new demonstration areas in each of the three water sheds.
3. Due to drought conditions, only one field meeting was held with 55 in attendance.
4. Over 400 farmers have seeded lespedeza or other legumes on their pasture land.
5. Three areas have been established this year with a total acreage of 68711 acres.

III.

LIVESTOCK

1. To secure as many purebred sires for the county as possible.
2. To promote the lamb improvement program including breeding, feeding, parasitic control, docking and castrating, grading and marketing.
3. To give all possible assistance to purebred livestock producers in the production of their animals and in disposal of their surplus stock.
4. To assist the county wool pool committee in directing the county wool pool.
5. To assist dairymen by holding a two-day feeding and breeding school.
1. Farmers assisted in the purchase of 21 bulls, 43 rams and 8 boars.
2. Over 8000 lambs docked and castrated, 7440 ewes treated for stomach worms, 1600 lambs sold cooperatively.
3. Assistance given whenever possible.
4. Assistance given with 56 growers selling 12,590# wool through the pool.
5. Two day school held with assistance of dairy specialists.

IV.

HORTICULTURE

1. To hold pruning demonstrations and if necessary thinning demonstrations.
2. To continue the spray service and notices to every commercial producer in the county.
1. Five pruning demonstrations held. No thinning demonstrations necessary.
2. Spray Service and notices sent periodically to thirty-six growers.

V.

4-H CLUBS

- | | |
|---|---|
| 1. To have two or more organized 4-H Clubs with fifty members completing definite projects. | 1. One 4-H Club organized. Fifty nine members completing definite projects. |
| 2. To secure leaders, hold monthly meetings, and have Club representatives at State Short Course. | 2. Leader secured, seven meetings held, and three 4-H Club representatives attended the State Short Course. |

VI.

MISCELLANEOUS

- | | |
|--|---|
| 1. To assist worthy farmers in using the Production Credit Ass'n., the County Farm Loan Ass'n., and Emergency Crop Loans. | 1. Information and assistance given in filling out applications for loans. |
| 2. To assist with the County Resettlement, the Red Cross, and Emergency Relief Program. | 2. Served as chairman of County Advisory Committee, approved applications and assisted in meetings. |
| 3. To furnish plans for farm buildings and information in controlling orchard, garden, farm crop, poultry, and livestock diseases. | 3. Plans furnished for ten farm buildings constructed this year and information given over 300 farmers on control of animal and plant diseases. |

I. NEW SOIL CONSERVATION PROGRAM

This seemed to be the most difficult farm program we have had for farmers to understand. First we set out holding community educational meetings and mailing circular letters and pamphlets, giving the fundamental and basic facts relative to the need and economic value for such a program. This was followed up with another series of community meetings explaining the Work Sheets, how the individual farmer could set up a base for his farm, and selecting temporary committeemen. The

third series of meetings completed the signing of Work Sheets, elected permanent community committeemen and explained the various ways in which the farmer could qualify for the soil building allowance and diversion payments.

The community and county organizations were completed and committeemen and supervisors instructed in carrying out the field work for checking compliance.

It is estimated that fifteen hundred farmers attended these educational meetings and that every farmer in the county had the opportunity to participate in the program. Many, however, had already made their farm plans for the year before the Soil Conservation Program was launched and could not or did not re-adjust them to meet the program requirements. The final results of this program was the signing of 280 farm applications for payments which is estimated to net these farmers \$30,000.00.

Fifty 1936 wheat applications under the old A.A.A. Program net \$2,500.00.

II. EXTENSION T.V.A.

FARM DEVELOPMENT PROGRAM

A - INTRODUCTION

Since the beginning of 1936 the Extension T.V.A. Program has enjoyed a broader cooperation from people in all communities

in Smyth County. The local T.V.A. committeemen, the demonstration farmers, and the agricultural instructors have given their time willingly, explaining the T.V.A. Program to the farmers, and helping organize the various rural communities in order that our Extension T.V.A. Program might be successfully carried on.

B - AREA DEMONSTRATIONS

The Blue Springs Area project was approved for work in February. The farmers in the Area in the past have found their lands better suited to the raising of grain than to the raising of heavy cattle. The use of T.V.A. phosphate will enable them to keep more and better cattle and thus open up a new phase of farm business for them which was hitherto prohibited because of the high cost of commercial phosphate. The farmers in the Blue Springs Area have used more lime in 1936 than in any other preceding year, and will continue this practice because of the two permanent lime pots constructed in the community. T.V.A. phosphate has been distributed to fifty five farmers in this Area.

The next area approved for the distribution of T.V.A. phosphate was the Nebo-Chatham Hill Area. This Area includes part of the best grazing land in the county. Much of this land has been grazed by heavy cattle until it shows signs of a phosphate deficiency. These farmers realizing that improved and fertile pastures are their main source of income, are especially anxious

to cooperate in the extending of the T.V.A. Program. In this Area forty five farmers are cooperating with the Program and are well pleased with the improvement that can be seen already in their pastures. These farmers are especially interested in watching the results to be obtained from the no-plow farm experiment being started in the county.

Work will not be started in the Atkins Area, which was approved this month, until January 1st. This Area, composed largely of truck farmers and small livestock farms, will be an interesting project. The results obtained will be from more diversified farm businesses than any other in the county.

C - SPOT DEMONSTRATIONS

The Spot Demonstrations have played a very important part in the development of the T.V.A. Extension Program in Smyth County. This phase of the work has served farmers who are eager to treat badly eroded areas at once instead of waiting until the Area Project included them. This work also acquaints the farmers with the Program so that when the Area includes them they understand and are ready to cooperate with the Program in all of its phases.

D - UNIT DEMONSTRATION FARMS

The thirty five Unit Demonstration farms are becoming well established and are carrying on a very worth while and desirable part in the Program. These men, selected because of their will-

ingness to cooperate and to demonstrate for their neighbors offer the best channels for getting across new ideas and improved practices in the several agricultural communities. The analysis and study of these farmers' records at the end of the year will be of benefit to them and to me in planning their farm businesses for the farm year.

E - PASTURE IMPROVEMENT

The use of lespedeza and other legumes has been encouraged on all of the T.V.A. Demonstrations. When demonstrators used lespedeza and clovers with their phosphate in 1935 they have been well pleased with the results this year, despite the drought. Mr. J. C. Copenhaver, one of our unit demonstrators, has stated that his pastures have a carrying capacity 50% greater than before the use of phosphate and lespedeza. Carl B. Davis, another unit demonstrator, has stated that his pastures have doubled their carrying capacity in the past two years. More clovers are evident when the phosphate has been used and the sod generally seems stronger.

F - NO-PLOW FARMS

One no-plow farm has been selected in the county. This demonstration is to be started January 1st and will continue for several years.

G - LIME

Due to the Drought Relief Program both burnt and ground lime have been made available to our farmers at a very reason-

able figure. One of our demonstrators has used over 100 tons of burnt lime since the program started.

H - DEMONSTRATORS KEEPING BETTER LIVESTOCK

Our unit demonstrators generally are keeping better livestock. P. D. McKee, unit demonstrator at Chilhowie, showed a ram at the Southwest Virginia Sheep Show which was placed as Grand Champion. The same ram repeated this honor at the Virginia State Fair.

I - PLANNING ROTATIONS

The farmers are planning their rotations with the idea of removing their cultivated crops from the steep land to the more level land. The farmers are using better seed and farming methods with the idea of reducing the amount of land which has been kept in cultivation.

III. LIVESTOCK

Smyth County ranks high among the counties in the State in livestock production. There has been a steady improvement in both the breeding and feeding programs for the past ten years. Much of this improvement in quality is attributed to the replacement of grade sires with the better quality registered sires. Eighty percent of the farmers in the county use pure bred sires at the head of their flocks and herds. This year seventy two replacements were made as follows: 21 bulls, 43 rams, and 8 boars.

Through eight months of the year regular monthly notices are sent to 310 flock owners reminding them of the necessary sheep treatment for stomach worms and advising them of the time, method and best treatment for their flocks.

Five demonstrations were given by the Agent showing how sheep should be treated for best results. This past year 240 of these flock owners treated 7,440 sheep regularly for stomach worms. Seven demonstrations were given in docking and trimming lambs, two newspaper articles published and two circular letters sent out telling of the advantages of the work. It is estimated that over 8000 lambs were docked and trimmed. 1600 lambs were shipped cooperatively in the county with more than three times this number graded for the eastern markets.

The six purebred flocks of Hampshire sheep have been greatly improved in the last two or three years by the importation of outstanding breeding rams and ewes. Two of these flocks stood high in the Southwest Virginia Sheep Show and one of them exhibited at the Virginia State Fair won blue ribbons and championships in all the classes entered.

The County Wool Pool Committee sold 12,950# of wool for 56 growers at a premium of about 3¢ per pound over the average local market.

While dairying has never developed to any great extent in this county we have five successful dairymen with herds averaging

fifty cows, and a large number of farmers producing milk, cream, and butter for sale. In the hope of assisting these dairymen, the County Agent and the Extension Dairy specialist arranged for a two day dairy feeding and breeding school to be held in the court house. This school was attended by about fifteen people and much valuable information gained by them.

With the opening of the 1936 cattle shipping season information and assistance in marketing was furnished the cattlemen of the County. This office kept in daily touch with the terminal markets and the farmers were posted on prices and advised when to ship certain lots of cattle. In this way the cattle were marketed in an orderly manner throughout the fall and better prices realized. Assistance was given throughout the year in vaccinating calves for blackleg and treating for other diseases in all communities of the county.

IV. HORTICULTURE

Early in the year three pruning demonstrations were held with the assistance of an Extension specialist. Later the Agent was requested to hold two more demonstrations in a nearby community. These meetings were attended by three to five interested growers who carried out the methods of pruning demonstrated in their own orchards. They also practiced orchard cultivation, cover crops and fertilization.

The regular spray service notices and spray calendars were sent to thirty-six growers.

V. 4-H CLUBS

Only one 4-H Club was re-organized with several unorganized members enrolled in the 4-H Club projects. Sixty-one members were enrolled with fifty-eight completing their projects and submitting records. Of the 68 members completing their projects 9 fed 16 baby beeves, 4 fed 9 fattening pigs, and 45 produced or cared for 1641 chickens. With a total investment of \$1986.04 these 58 members made a profit of \$331.37 and won \$115.00 in premium money.

VI. MISCELLANEOUS

The County Agent's office gave advice on amount necessary from emergency crop loans and filled out all applications for these applicants. The Agent served as chairman of the Rural Resettlement Advisory Committee and approved all applications passed on. He served as chairman of the Drought Relief Committee and assisted in carrying out the county lime burning project which resulted in the handling of 1470 tons of lime. Farm plans and blue prints were furnished for ten buildings including barns, poultry houses and silos. Over three hundred farmers were given information on the control and treatment of livestock, poultry, and plant diseases.

COMBINED ANNUAL REPORT OF COUNTY EXTENSION WORKERS

This report form is for use by county extension agents in making a combined statistical report on all extension work done in the county during the year. Agents resigning during the year should make out this report before quitting the service.

State Virginia County Smyth

REPORT OF

(Name) _____
Home Demonstration Agent.

From _____ to _____, 193

J. D. Green
Assistant Agricultural Agent.

From Dec. 1, 1935 to Nov. 30, 1936

P. E. Bird
Agricultural Agent.

From Dec. 1, 1935 to Nov. 30, 1936

READ SUGGESTIONS, PAGES 2 AND 3

Approved:

Date _____ State Extension Director.

SUGGESTIONS RELATIVE TO THE PREPARATION OF THE COUNTY EXTENSION AGENT'S ANNUAL REPORT

The annual report should be a summary, with analysis and interpretations, for presentation to the people of the county, the State, and the Nation of the extension activities in each county for the year, and the results obtained by the county extension agents assisted by the subject-matter specialists. The making of such a report is of great value to the county extension agents and the people of the county in showing the progress made during the year as a basis for future plans. It is of vital concern also to the State and Nation as a measure of rural progress and a basis for intelligent legislation and financial support of extension work.

At least four copies of the annual report should be made: One copy for the county officials, one copy for the agent's files, one copy for the State extension office, and one copy for the Extension Service, United States Department of Agriculture. *The report to the Washington office should be sent through the State extension office.*

STATISTICAL SUMMARY

Where two or more agents are employed in a county they should submit a single statistical report showing the combined activities and accomplishments of all county extension agents employed in the county during the year. Results obtained through assistance rendered agents by specialists should also be included. This report shows, insofar as possible, the part each agent has taken in forwarding the extension program. The county totals should be the sum of the activities and accomplishments of individual agents *minus duplications due to two or more agents participating in the same activity or accomplishment.* The county totals, when properly recorded, show the progress made in the county during the year in forwarding the entire extension program. Negro men and women agents should prepare a combined statistical report separate from that of the white agents.

The statistical summary should be a report of this year's activities and results that can be verified by records on file in the county office. Where records are not available careful estimates are desired. Such estimates should be marked "Est."

NARRATIVE SUMMARY

A separate narrative report is desired from the leader of each line of work, such as county agricultural agent, home demonstration agent, boys' and girls' club agent, and Negro agent. Where an assistant agent has been employed during a part or all of the year, the report of his or her work should be included with the report of the leader of that line of work. Where an agent in charge of a line of work has quit the service during the year, the information contained in his or her report should be incorporated in the annual report of the agent on duty at the close of the report year, and the latter report so marked.

The narrative report should summarize and interpret, under appropriate subheadings, the outstanding results accomplished and the extension methods used for each project. Every statement should be clear, concise, factual, and, where possible, reinforced with necessary data from the statistical summary. Use a descriptive style of writing, giving major accomplishments first under each project. Give extension methods fully relating to outstanding results only, and where practicable illustrate with photographs, maps, diagrams, blueprints, or copies of charts and other forms used. Full credit should be given to all cooperating agencies. The lines should be single-spaced, with double space between the paragraphs and reasonably good margins. The pages should be numbered in consecutive order.

The following outline is merely suggestive of how the narrative report may be clearly and systematically presented. Each agent should prepare an outline to fit the situation and the work to be reported.

SUGGESTIVE OUTLINE OF ANNUAL NARRATIVE REPORT

- I. Cover and title page.
- II. Table of contents.
- III. Summary of activities and accomplishments, preferably of one or two typewritten pages only, placed at the beginning of the narrative report.
- IV. Changes in county extension organization.
 - (1) Form.
 - (2) General policies.
 - (3) Procedure.
- V. County program of work.
 - (1) Factors considered and methods used in determining program of work.
 - (2) Factors considered and results.
 - (3) Project activities and results.

Under appropriate headings and subheadings present in some detail for each major project or line of work the goals set up, the methods used, the results achieved, and the significance of these results in terms of improved farms and homes and of better community life.
- VI. Outlook and recommendations, including suggestive program of work for next year.

TERMINOLOGY

To insure reports which convey the intended meaning to others and to facilitate the compilation of satisfactory national statistics on extension, it is extremely important that terms be used in accordance with accepted definitions. The following definitions of extension terms have been approved by the United States Department of Agriculture and the Association of Land Grant Colleges and Universities. Agents should read these definitions before starting to write the annual reports.

DEFINITIONS OF EXTENSION TERMS

1. A program of work is a statement of the specific projects to be undertaken by the extension agents during a year or a period of years.
2. A plan of work is a definite outline of procedure for carrying out the different phases of the program of work. Such a plan provides specifically for the means to be used and the methods of using them. It also shows what, how much, when, and where the work is to be done.
3. A community is a more or less well-defined group of rural people with common interests and problems. Such a group may include those within a township, trade area, or similar limits. For the purpose of this report a community is one of the several units into which a county is divided for conducting organized extension work.
4. A project leader, local leader, or committeeman is a person who, because of special interest and fitness, is selected to serve as a leader in advancing some phase of the local extension program. A project leader may be either an organization or a subject-matter leader.
5. Demonstrations as contemplated in this report are of two kinds—method demonstrations and result demonstrations. A method demonstration is a demonstration given by an extension worker or other trained leader for the purpose of showing how to carry out a practice. Example: Demonstrations of how to can fruits and vegetables, mix spray materials, and cull poultry.
6. A result demonstration is a demonstration conducted by a farmer, home maker, boy, or girl under the direct supervision of the extension worker, to show locally the value of a recommended practice. Such a demonstration involves a substantial period of time and records of results and comparisons, and is designed to teach others in addition to the person conducting the demonstration. Example: Demonstrating that the application of fertilizer to cotton will result in more profitable yields, that underweight of certain children can be corrected through proper diet, that the use of certified seed in growing potatoes is a good investment, or that a large farm business results in a more efficient use of labor.
7. The adoption of a farm or home practice resulting from a demonstration or other teaching activity employed by the extension worker as a means of teaching is not in itself a demonstration.
8. A result demonstrator is an adult, a boy, or a girl who conducts a result demonstration as defined above.
9. A cooperator is a farmer or home maker who agrees to adopt certain recommended practices upon the solicitation of an extension worker. The work is not directly supervised by the extension agent and records are not required, but reports on the success of the practices may be obtained.
10. A 4-H Club is an organized group of boys and/or girls with the objectives of demonstrating improved practices in agriculture or home economics, and of providing desirable training for the members.
11. 4-H Club members enrolled are those boys and girls who actually start the work outlined for the year.
12. A demonstration meeting is a meeting held to give a method demonstration or to start, inspect, or further a result demonstration.
13. A leader-training meeting is a meeting at which project leaders, local leaders, or committeemen are trained to carry on extension activities in their respective communities.
14. An office call is a call in person by an individual or a group seeking agricultural or home-economics information, as a result of which some definite assistance or information is given. A telephone call differs from an office call in that the assistance or information is given or received by means of the telephone. Telephone calls may be either incoming or outgoing.
15. A farm or home visit is a call by the agent at a farm or home at which some definite information relating to extension work is given or obtained.
16. Days in office should include time spent by the county extension agent in the office, at annual and other extension conferences, and on any other work directly related to office administration.
17. Days in field should include all days spent on official duty other than "days in office."
18. Letters written should include all original letters on official business. (Duplicated letters should not be included.)
19. An extension school is a school usually of 2 to 6 days' duration, arranged by the Extension Service, where practical instruction is given to persons not resident at the college. An extension short course differs from an extension school in that it is usually held at the college or another educational institution and usually for a longer period of time.
20. Records consist of definite information on file in the county office that will enable the agent to verify the data on extension work included in this report.
21. The county extension association or committee is that county organization, whether a membership or a delegate body, which is recognized officially in the conduct of extension work in the county.

GENERAL ACTIVITIES

Report Only This Year's Extension Activities and Results That Can Be Verified

1. List below the names, titles, and periods of service of the county extension agents whose work is included in this report. Include time of assistants with that of regular agent.

AGENT	Typical months of service this year	Days devoted to agr. conservation and adjustment programs	Days devoted to relief work	Total days in office	Total days in field
	(a)	(b)	(c)	(d)	(e)
(Name) Home demonstration agent	(1)	-	-	-	-
Asst. home demonstration agent		-	-	-	-
4-H Club agent	(2)	-	-	-	-
Assistant 4-H Club agent		-	-	-	-
Agricultural agent	(3)	24	150	16	320
Assistant agricultural agent		-	-	-	272

2. County extension association or committee:

- (a) Agricultural extension:
 (1) Name County Advisory Council (2) Number of members 34
- (b) Home demonstration:
 (1) Name _____ (2) Number of members _____
- (c) 4-H Club:
 (1) Name _____ (2) Number of members _____
3. Number of communities in county where extension work should be conducted. 7
4. Number of above communities in which the extension program has been planned cooperatively by extension agents and local committees. 7
5. Number of different voluntary county or community project leaders or committeemen actively engaged in forwarding the extension program:
- | | | | | |
|----------------|--------------------|-------------------|--------------------|-------------------------------|
| (a) Adult work | (1) Men <u>19</u> | (b) 4-H Club work | (1) Men <u>0</u> | (3) Older club boys <u>1</u> |
| | (2) Women <u>0</u> | | (2) Women <u>0</u> | (4) Older club girls <u>0</u> |
6. Number of different paid local leaders engaged in agricultural-conservation and adjustment programs:
- | |
|--------------------|
| (a) Men <u>12</u> |
| (b) Women <u>0</u> |
7. Number of clubs or other groups organized to carry on adult home demonstration work. 0
8. Number of members in such clubs or groups. 0

ITEM	Home demonstration agents	4-H Club agents	Agricultural agents	County total
	(a)	(b)	(c)	(d)
9. Number of 4-H Clubs	-	-	1	-
10. Number of different 4-H Club members enrolled	(1) Boys ²	-	18	-
	(2) Girls ²	-	33	-
11. Number of different 4-H Club members completing	(1) Boys ²	-	27	-
	(2) Girls ²	-	31	-

12. Number of different members enrolled in 4-H Club work for:

MEMBERS	1st year	2d year	3d year	4th year	5th year	6th year and over
(a) Boys	10	2	2	3	3	8
(b) Girls	16	4	1	1	3	8

¹ County total should equal sum of preceding three columns minus duplications due to two or more agents participating in the same activity or accomplishment.

² Report the total number of different boys or girls enrolled in club work. This total should equal the sum of the project enrollments reported on pages 7 to 20, minus duplications due to the same boy or girl carrying on two or more subject-matter lines of work.

³ Same as footnote 2 but refers to completions instead of enrollments.

⁴ The total for this question should agree with county total, question 10.

GENERAL ACTIVITIES—Continued

	(2) Total attendance.....	-	-	55	-	

¹The total for this question should agree with county total, question 14.

²County total should equal sum of preceding three columns minus duplications due to two or more agents participating in the same activity or accomplishment.

³Do not count a single visit to both the farm and home as two visits.

⁴Do not count items relating to notices of meetings only.

⁵Notes.—Questions 15-24 refer to the total number of different activities conducted this year. The totals should equal the sums of the corresponding information reported on following pages minus duplications where the same activity relates to two or more lines of work.

		(b) Total attendance	-	207	-
	(2) 4-H club	(a) Number	-	9	-
		(b) Total attendance	-	306	-

SUMMARY OF EXTENSION INFLUENCE FOR YEAR

It is highly desirable for extension workers to consider the proportion of farms and farm homes in the county which have been definitely influenced to make some substantial change in farm or home operations as a result of the extension program for men, women, boys, and girls. It is recognized that this information is very difficult for agents to report accurately, so a conservative estimate based upon such records, surveys, and other sources of information as are available will be satisfactory. Such estimates should be marked "Est."

Include results of emergency activities as well as the regular extension program.

35. Number of farms in county	1940	35
36. Number of farms on which changes in practices have definitely resulted from the agricultural extension program	720	36
37. Number of farm homes in which changes in practices have definitely resulted from the home demonstration program	0	37
38. Number of other homes in which changes in practices have definitely resulted from the home demonstration program	0	38
39. Number of farm homes with 4-H Club members enrolled	43	39
40. Number of other homes with 4-H Club members enrolled	0	40
41. Total number of different farm families influenced by some phase of the extension program (Include questions 36, 37, and 38, minus duplications.)	752	41
42. Total number of different other families influenced by some phase of extension program (Include questions 38 and 40, minus duplications.)	12	42

¹ County total should equal sum of preceding three columns minus duplications due to two or more agents participating in the same activity or accomplishment.

Note.—Questions 35-42 refer to the total number of different activities conducted this year. The totals should equal the sums of the corresponding information reported on following pages minus duplications where the same activity relates to two or more lines of work.

CEREALS¹
