BRIEF NARRATIVE OF HOME DEMONSTRATION WORK IN ALBEMARLE COUNTY, VIRGINIA, FOR THE YEAR 1922. Va

IN CANNING CLUB WORK, sixteen members reported, giving as the total number of containers 4150, the member winning the $300.00 scholarship, having to her credit, 1017 containers.

THE COOKING that is done in winter, combined with the bread work in summer, constitutes the requirements for the club members who are competing for the club scholarship in cooking. The member who won the $300.00 scholarship, completed the winter cooking, as by the club outline, served a formal breakfast to six teachers, made yeast bread, soda and baking powder biscuits, each, twenty-five times, besides keeping the work up all the year in actual practice in the home. Each girl who enrolled for the winter work completed the same.

THE GARDEN WORK, while there were not as many members as in the other demonstrations, was the best that has been done along this line than in any previous year. The scholarship winner, a girl of fourteen years, cultivated, absolutely alone, a garden of 3/4 acre for a family of seven, providing it with vegetables for both winter and summer. The garden was kept in perfect cultivation throughout the season.

THE PRINCIPLE MONEY MAKING CLUB FOR THE BOYS AND GIRLS IS POULTRY. They usually help buy books or clothes, or both, and nearly every club member has a small bank account. If club work has done nothing else for Albemarle County, it has encouraged thrift.

THE ROOM IMPROVEMENT WORK here almost stands in a class alone. Usually the girls are allowed the worst rooms with which to work, and the results are well nigh marvelous in some cases. The girls treat the walls, floors, woodwork and make entirely or remodel furniture and make furnishings. Mr. Ackerman, from Bureau of Ag.

Washington, D. C. took pictures of the $500.00 prize winning room where a great amount of work was done, but with a small expenditure of money. This demonstration is very far reaching, a large number of both girls and women making unsightly rooms into ones of beauty.

Besides the actual knowledge gained from club work, $2000.00 have been given in five $300.00 and one $500.00 scholarships for the best work done. The Superintendent of the C. & O. Railroad gave passes to and from the Virginia State Fair to the girls who did the second best work in the county, also to the Bread Judging Team. Club work brought tot the girls of Albemarle County, in scholarships and prizes $2306.50.

WOMEN'S WORK.

There are four Home Demonstration Clubs in the county - one concentrating its efforts on playground equipment for its new school, another sewing and canning for the Children 's Home, another making an organized effort for the improvement of poultry, and the other helping the Red Cross that the county may be able to have a social worker.

A Better Kitchen Campaign was launched this past year, in which forty-twy women enrolled. Thirty-nine finished the demonstration, which has been the most far reach ing piece of work that has ever been done in Albemarle County. The demand has come for the improvement of another room in the home. Twelve prizes were given by the merchants of Charlottesville which shows the hearty cooperation with which this work was met. The contest closed with a "Get-together" of all contestants and everyone was present except one who had a broken limb. The Chamber of Commerce served refreshments on the occasion, and every corner of the county was represented. Mr. Ackerman, photographer from Bureau of Agriculture took a series of pictures of the kitchens here.

Map of
Albemarle County, Virginia
1922.

To the County Home Demonstration Agents:

It is very important to send in accurate and complete Annual Reports. The future success and support of the Home Demonstration Work depends upon your activities now. It will aid the cooperating authorities greatly to have adequate records of what has been done. The law requires such reports and the lawmakers are greatly interested in the development of all of the extension work.

The statistical part of the Home Demonstration Work has been simplified and condensed. It is hoped that it will be easier for you to make a full and graphic showing of the achievements of your women and girls. Of course it is not expected that every agent will be conducting demonstrations upon every phase of work every year. Do not hesitate, therefore, to have spaces blank where you have no work being done. On the other hand, it will be unjust to your demonstrators and club members to fail to report all of their real results.

Please note that all reports are to be in the offices of the State agents by January 1 of each year. This enables them to prepare their reports promptly and forward copies to the Washington office in the new year. It makes it possible to prepare reports in the United States Department of Agriculture in time for them to do the most possible good.

Do not wait until January 1 to send in your report if it is ready before that time. It should contain data to December 1. It is impossible to fully show the actual development in statistics. It is therefore suggested that you write a narrative report on separate sheets and attach same to this blank.

Send with the report a map of your county showing the number of demonstrators and cooperative agencies. It is suggested that on this map the data for girls' work be recorded in red ink, for women's work in black ink.

Write numbers of girl demonstrators in red and of women demonstrators in black, and if the demonstrators are in organized clubs enclose the figures in a circle of the corresponding color. For example: Demonstrators not in clubs, 1; demonstrators in organized clubs, (8). If both women and girls have organized clubs in one community have two circles with figures enclosed, one in black, one in red ink.

Indicate "community clubs" with a square in black ink, with membership numbers inside, as [30].

Indicate headquarters of county councils and other supporting organizations with stars, showing membership; e. g.

These are minimum suggestions for the map. Other details may well be reported in this graphic form, but it is expected that every agent will send at least a simple map showing the fundamental and essential data indicated.
