STATUS OF COUNTY EXTENSION WORK

THE "Warren County Agricultural Advisory Council" is the name of the Extension organization in this County. It has as members twenty farmers, two business men, one lady and the County Agent; a total of twenty-four members. Every type of farming and business interest of the County is represented in this body.

The purpose of this organization is to work out plans of progress for developing the county agriculturally and educationally, and to assist the Agent in putting the plans across. This Board is divided into six subcommittees; Animal Husbandry, Agronomy, Poultry, Horticulture, Organization and Publicity. The Council is of untold value to the County Agent.

Extension work was started in this County January 1, 1922; the present Agent began work February 1, 1925.

Extension work in Warren County is supported by an appropriation made by Board of Supervisors, supplemented by State and Federal Funds. The County Agent is the only representative of the Extension division in the County.

To assist in the work, the Directors of the Extension Division keeps in constant touch with the Agent through the Assistant Director and District Agent. The State Club Agent renders assistance in Club Work while the Specialists of the Division are always available and render valuable assistance. The majority of the farmers in the County seem to appreciate the work.

Most of the business men of Front Royal are ready and willing to co-operate with the Agent at all times.

The Rotary Club has backed the work of the County Agent and the Agent feels that the support of this organization has meant a lot to the work.

The Citizens National Bank has given the Agent most loyal support and has done everything possible to push the work in the County.

The two newspapers give splendid support and are largely responsible for the success of the work.

The Vocational Agricultural teacher has cooperated with the Agent in every way possible and has been a great help to the Agent.

1934 plan of work

Club Work

GOALS

To have four regularly organized clubs with a minimum of fifty members.

RESULTS

No club work has been done in the county this year. The advisory council advised against it on account of low prices of livestock and crops, and additional work due to the A.A.A.

Adult Work

| | |
|---------------------------|--------------------------------|
| Corn -----10-----8 | Lime -----15-----6 |
| Wheat -----10-----20 | Orchard-----5-----5 |
| Soybeans-----5-----2 | Tomato -----10-----3 |
| Sweet Clover-----15-----5 | Clover & Grass-----5-----12 |
| Alfalfa-----15-----10 | Pastures -----4-----4 |
| Fertilizer-----5-----10 | Lespedeza-----10-----12 |

Livestock

1. Better Sire Project.

(a) Bull Replacements ----10 -----6

(b) Ram Replacements-----15-----25

(c) Boar Replacements-----8 -----5

2. Docking and castrating lambs ----- 75% -----90%

3. Treating sheep for stomach worms ----- 50% -----60%

4. Lamb grading demonstration -- Some work done by County Agent, but not stamped.

Horticulture

1. Pruning demonstration 4-----7

2. Cultivation 4-----8

3. Spray Service to all Fruit growers.) This was sent to all

4. Encourage growing legumes in orchards.) This was done.

Organization

1. Help organization with educational progress) This was done.

2. Help granges increase membership) This was done.

Poultry

1. Improve housing conditions 5-----6

2. Feeding 10-----10

3. Culling 10-----6

4. Scrub Sires replaced 20 (A number will be replaced.

5. Raising turkeys in brooders 2-----9

Eight demonstrations were carried on following the Axtell method

ANIMAL HUSBANDRY

Better sires, docking and castrating lambs, treating sheep for stomach worms were the projects outlined for the animal husbandry program. The goals set in the better sire projects were to replace ten bulls fifteen rams, and eight boars, six bulls, twenty-five rams and five boars were replaced with pure bred animals.

This work was started nine years ago and it has been a most satisfactory project. The improvements in the livestock in the county is very noticeable. More bulls could have been placed this year but the farmers haven't the money to buy pure bred animals. Five farmers have increased their cow herds this year. This is being advised by the Agent.

The quality of the flocks in the county have been greatly improved by the Hampshire rams that have been brought into the county for the past nine years. A number of the breeders have been saving ewe lambs sired by these rams and they are building up very fine flocks of high grade ewes.

Four thousand five hundred lambs have been docked and castrated this year and about two thousand five hundred sheep have been treated for stomach worms. There have been fewer sheep lost in the county this year and I think this is due largely to treating them for stomach worms. A lot of this work is being done now by the sheep owners themselves. About 90% of the total lamb crop was trimmed this. Loss due to dogs this year has been very heavy.

The work done for the past nine years encouraging farmers to breed their mares to the U. S. Remount stallions is resulting in a large increase in the number of half-bred colts being raised in the county. They are bringing more money into the county than any other class of livestock.

The Agent has done ~~not~~ much work for six years to encourage the farmers to feed these colts better and grow them out faster, as the colts with size are the ones that bring the price. The demand has not been as strong for the past two years and the prices ~~paid~~ have been much lower. This is due to heavy financial losses on stocks, and not an over-production of colts. The Agent has been urging the farmers to breed more draft horses ever since he has been in the county. The demand has been strong for them. They have sold for very good prices. Two more Percheron stallions were brought in the county this year, and more mares were bred to draft stallions than a number of years previous. One farmer refused \$100.00 ~~a piece~~ for high-grade weanling draft colts.

each

HORTICULTURE

The plan of work called for four pruning demonstrations: Seven were given by the County Agent. The demonstrations were well attended.

Quite a number of the growers are cultivating a part of their orchards and a marked improvement is shown in the size and quality of their fruit.

Three growers have been running hogs in their orchards for several years and it is equivalent to clean cultivation. The hogs root up the ground very thoroughly around the trees, looking for apples, and on account of the increased growth of grass, etc., due to the fertilizer used around the trees. In orchards where hogs are grazed they have no trouble with mice and very little trouble with rabbits.

A large percent of the fruit growers have reached the point where they realize that it is as important to fertilize their orchards to get a maximum crop as it is to get a maximum crop of anything else. Nitrate of Soda alone and a mixture of one pound of Nitrate of Soda to two pounds of 16% Super Phosphate are the forms used by most of the fruit growers in this county. A number of the growers are using legumes in their orchards and the increase of growth on their trees is very noticeable.

Fruit growers have realized the importance of thinning their crop, and this was practiced by the growers where it was necessary this year.

The Agent sends out spray information to all of the fruit growers in the county and this service is greatly appreciated. The recommendations are followed very carefully by most of the growers.

Most of the growers realize the importance of spraying but the Agent is sure that the sprays would not be put on at the proper time if the cards were not sent out.

AGRONOMY

A survey has been made during the past eight years and it has been found that the average yield of all farm crops is very low and a wide difference between the yield of the best farmers and the poorer ones. On a number of the best farms the yield of corn is from twelve to fifteen barrels per acre while the average for the whole county is seven.

There has been a marked improvement in the kind of seed corn used in the County. The immaturity of the corn crop in 1930 made it necessary for most of the farmers to buy their seed corn in the year 1931 and a large number of them were persuaded to buy certified (Reids Yellow Dent and Leaming) they have been well pleased with it and for the past two years more attention has been paid to the selection of good seed corn. The crop was greatly reduced this year on upland due to the drought.

WHEAT On the best farms the yield of wheat per acre is from twenty to thirty five bushels. While on the poor farms it isn't more than eight. The county average is about sixteen bushels per acre. The use of certified seed (V.P.I. 131) and the treating of seed wheat for Stinking Smut, is increasing the yield and also the quality of the wheat in the county. The wheat crop in the county was very good this year, and free from smut. A lot of damage was done in the stack and mow by weevil before the wheat was thrashed.

ALFALFA The acreage has increased very much during the past eight years. There are approximately 3500 acres of alfalfa in the County. The demonstrator for the past five years has harvested annually about 80 tons from fifteen acres. The Agent is trying to get every farmer in the county to have at least five acres in Alfalfa.

Sweet Clover, is increasing in popularity each year. The farmers are using it more for pasture than for hay. This is what the Agent advises.

CLOVER: The Agent was assisted by the Agronomy and Animal Husbandry Department in putting on a clover campaign two years ago. Four meetings were held; three of which were well attended and a number of news articles were published in the two papers on clover and its uses. This campaign did a lot of good. While most of the farmers grow clover, they have been more careful to use known origin seed. The farmers have also been convinced of the importance of using legumes hay in the ration for live stock. Especially is this true in the feeding of sheep. The clover crop in this county was unusually good this year and a few of the farmers saved the second crop for seed.

SOYBEANS have been grown by an increasing number of farmers: both for hay and green manure to turn under. They are being grown for seed by eight farmers in the county and they find that it is a paying crop, as well as a soil improver.

LESPEDEZA This is the third year it was sown in the County. Four farmers seeded about eighty acres. Lespedeza is gaining in popularity in the county, and a great many farmers are planning to plant it next spring. Several farmers have grown small seed plots of Lespedeza Sericea, they saved their seed and plan to increase their acreage next year. Due to the high price of grass seed a large quantity of Lespedeza will be sown in the Spring. Very satisfactory results have been obtained by the use of Lespedeza and where there was sufficient moisture good hay crops were harvested. An increasing number of farmers are using it to heal up galled spots in the pasture and to stop soil erosion in the pasture.

POULTRY

The poultry industry in this County has not increased very much in the past year. There are a number of commercial poultrymen in the county who have made a study of it and have been very successful.

More attention is being paid to the quality of birds in the flocks and the number of Standard bred birds has increased very materially. The Agent has held five culling demonstrations this year but most of the culling is done by the flock owners themselves. Eggs have been selling for a good price this Fall and this has been a big help on a lot of farms. Chickens well housed and properly fed have made more net profit than anything on the farms.

The Agent has also done quite a lot of work for five years with turkeys; treating them for worms, etc.

Eight demonstrators have raised turkeys for six years by the Artell method. They have been pleased with the results. This is the seventh year that this method has been used in the County and I think more people will use it. The turkey crop this year is very good, but the price is very low.

ORGANIZATION

Help organizations with educational programs:

Much to the regret of the Agent during the past year the three subordinate granges and the Pamona grange have ceased to function. Plans are being made to organize a subordinate grange for the County and the Agent thinks there will be enough interested members to keep this alive.

The Agent meets with all of them as often as possible and helps with the program.

These organizations have been a great help to the Agent in getting across his plan of work, and he will spare no effort in getting a strong subordinate grange at the County seat.

The Warren County Wheat Production Control Association was organized under the supervision of the County Agent. One hundred and forty one farmers signed the wheat contracts to reduce their wheat acreage. The number of contracts signed represent 5331 acres and 91682 bushels of wheat.

Corn-Hog Production Control Association was organized under the supervision of the County Agent. 194 farmers signed Corn-Hog contracts to reduce the corn acreage and the number of hogs produces for market.

The Corn-Hog and Wheat Programs of the A.A.A. has taken up about 40% of the Agents time. He traveled 5460 miles, made 335 home visits, had 890 office visits and 675 telephone calls.

The Agent thinks that time spent in connection with the A. A. A. programs has meant more to the farmers of Warren County than any other enterprice, for it has brought \$37,337.77 to the farmers of the County through this years program.

MISCELLANEOUS

The work in this county is personal service to a large extent. While this is considered a primitive method of doing extension work, it seems that it is impossible to get away from it in this county.

Due to the lack of a Veterinarian in the County the Agent is called on to treat sick and crippled animals almost daily and often has to go to the adjoining counties.

The Agent has treated 90 cases of Hemorrhagic Septicemia in cattle and 21 cases in hogs, 40 cases in sheep, 12 cases of Pneumonia in cattle and has lost 3; 140 cows and cattle sick with digestive troubles; 7 lost; 37 cases of milk fever; 82 horses sick with digestive troubles, has lost 5; 8 horses sun stroke, lost 2; operated on 67 animals for various troubles; 28 obstetrical cases with cows, 7 with mares, 12 with ewes, and 8 with sows; treated 64 hogs sick with digestive troubles; castrated 80 colts, 175 bulls, 135 pigs; socked and castrated 1050 lambs; vaccinated 500 hogs; vaccinated 150 calves; treated 1500 sheep for stomach worms; 1000 pigs for stomach worms.

The Agent has been called out 40 Sundays and 48 nights to treat sick animals.

The veterinary work done by the Agent is estimated to have saved the farmers of the County from fifteen to twenty thousand dollars per year.

This takes a lot of the Agent's time but is service that is appreciated more than any work that he does.

The Agent has traveled 15717 miles in the discharge of official duty in the County during the year.

CONCLUSION: For Warren County, the same plan of work, with possibly a few minor changes, will be recommended for extension work in 1935.

COMBINED ANNUAL REPORT OF COUNTY EXTENSION WORKERS

This report form is for use by county extension agents in making a combined statistical report on all extension work done in the county during the year. Agents resigning during the year should make out this report before quitting the service.

READ SUGGESTIONS, PAGES 2 AND 3

COUNTY AGENT ANNUAL REPORT

Approved: _____

Date _____ State Extension Director.

SUGGESTIONS RELATIVE TO THE PREPARATION OF THE COUNTY EXTENSION AGENTS' ANNUAL REPORT

The annual report should be a summary, with analysis and interpretations, for presentation to the people of the county, the State, and the Nation of the extension activities in each county for the year, and the results obtained by the county extension agents assisted by the subject-matter specialists. The making of such a report is of great value to the county extension agents and the people of the county in showing the progress made during the year as a basis for future plans. It is of vital concern also to the State and Nation as a measure of rural progress and a basis for intelligent legislation and financial support of extension work.

At least four copies of the annual report should be made: One copy for the county officials, one copy for the agent's files, one copy for the State extension office, and one copy for the Extension Service, United States Department of Agriculture. *The report to the Washington office should be sent through the State extension office.*

STATISTICAL SUMMARY

Where two or more agents are employed in a county they should submit a single statistical report showing the combined activities and accomplishments of all county extension agents employed in the county during the year. Results obtained through assistance rendered agents by specialists should also be included. This report shows, insofar as possible, the part each agent has taken in forwarding the extension program. The county totals should be the sum of the activities and accomplishments of individual agents minus *duplications due to two or more agents participating in the same activity or accomplishment*. The county totals, when properly recorded, show the progress made in the county during the year in forwarding the entire extension program. Negro men and women agents should prepare a combined statistical report separate from that of the white agents.

The statistical summary should be a report of this year's activities and results that can be verified by records on file in the county office. Where records are not available careful estimates are desired. Such estimates should be marked "Est."

NARRATIVE SUMMARY

A separate narrative report is desired from the leader of each line of work, such as county agricultural agent, home demonstration agent, boys' and girls' club agent, and Negro agent. Where an assistant agent has been employed during a part or all of the year, the report of his or her work should be included with the report of the leader of that line of work. Where an agent in charge of a line of work has quit the service during the year, the information contained in his or her report should be incorporated in the annual report of the agent on duty at the close of the report year, and the latter report so marked.

The narrative report should summarize and interpret, under appropriate subheadings, the outstanding results accomplished and the extension methods used for each project. Every statement should be clear-cut, concise, forceful and, where possible, reinforced with necessary data from the statistical summary. *Use a descriptive style of writing, giving major accomplishments first under each project.* Give extension methods fully relating to outstanding results only, and where practicable illustrate with photographs, maps, diagrams, blueprints, or copies of charts and other forms used. Full credit should be given to all cooperating agencies. The lines should be single-spaced, with double space between the paragraphs and reasonably good margins. The pages should be numbered in consecutive order.

The following outline is merely suggestive of how the narrative report may be clearly and systematically presented. Each agent should prepare an outline to fit the situation and the work to be reported.

SUGGESTIVE OUTLINE OF ANNUAL NARRATIVE REPORT

- I. Cover and title page.
- II. Table of contents.
- III. Summary of activities and accomplishments, preferably of case or two typewritten pages only, placed at the beginning of the narrative report.
- IV. Changes in county extension organization.
 - (1) Form.
 - (2) General policies.
 - (3) Procedure.
- V. County program of work.
 - (1) Factors considered and methods used in determining program of work.
 - (2) Project activities and results.

Under appropriate headings and subheadings present in some detail for each major project or line of work the goals set up, the methods used, the results achieved, and the significance of these results in terms of improved farms and homes and of better community life.
- VI. Outlook and recommendations, including suggestive program of work for next year.

TERMINOLOGY

To insure reports which convey the intended meaning to others and to facilitate the compilation of satisfactory national statistics on extension, it is extremely important that terms be used in accordance with accepted definitions. The following definitions of extension terms have been approved by the United States Department of Agriculture and the Association of Land Grant Colleges and Universities. Agents should read these definitions before starting to write the annual reports.

DEFINITIONS OF EXTENSION TERMS

1. A program of work is a statement of the specific projects to be undertaken by the extension agents during a year or a period of years.
2. A plan of work is a definite outline of procedure for carrying out the different phases of the program of work. Such a plan provides specifically for the means to be used and the methods of using them. It also shows what, how, when, and where the work is to be done.
3. A community is a more or less well-defined group of rural people with common interests and problems. Such a group may include those within a township, trade area, or similar limits. For the purpose of this report a community is one of the several units into which a county is divided for conducting organized extension work.
4. A project leader, local leader, or committeeman is a person who, because of special interest and fitness, is selected to serve as a leader in advancing some phase of the local extension program. A project leader may be either an organization or a subject-matter leader.
5. Demonstrations as contemplated in this report are of two kinds—method demonstrations and result demonstrations. A method demonstration is a demonstration given by an extension worker or other trained leader for the purpose of showing how to carry out a practice. Example: Demonstrations of how to can fruits and vegetables, mix spray materials, and sell poultry.
6. A result demonstration is a demonstration conducted by a farmer, home maker, boy, or girl under the direct supervision of the extension worker, to show locally the value of a recommended practice. Such a demonstration involves a substantial period of time and records of results and comparisons, and is designed to teach others in addition to the person conducting the demonstration. Example: Demonstrating that the application of fertilizer to cotton will result in more profitable yields, that underripen of certain children can be corrected through proper diet, that the use of overtilled seed in growing potatoes is a good investment, or that a large farm business results in a more efficient use of labor.
7. The adoption of a farm or home practice resulting from a demonstration or other teaching activity employed by the extension worker as a means of teaching is not in itself a demonstration.
8. A result demonstrator is an adult, a boy, or a girl who conducts a result demonstration as defined above.
9. A cooperater is a farmer or home maker who agrees to adopt certain recommended practices upon the solicitation of an extension worker. The work is not directly supervised by the extension agent and records are not required, but reports on the success of the practices may be obtained.
10. A 4-H Club is an organized group of boys and/or girls with the objective of demonstrating improved practices in agriculture or home economics, and of providing desirable training for the members.
11. 4-H Club members enrolled are those boys and girls who actually start the work outlined for the year.
12. 4-H Club members competing are those boys and girls who satisfactorily finish the work outlined for the year.
13. A demonstration meeting is a meeting held to give a method demonstration or to start, inspect, or further a result demonstration.
14. A leader-training meeting is a meeting at which project leaders, local leaders, or committeemen are trained to carry on extension activities in their respective communities.
15. An office call is a call in person by an individual or a group seeking agricultural or home-economics information, as a result of which some definite assistance or information is given. A telephone call differs from an office call in that the assistance or information is given or received by means of the telephone. Telephone calls may be either incoming or outgoing.
16. A farm or home visit is a call by the agent at a farm or home at which some definite information relating to extension work is given or obtained.
17. Days in office should include time spent by the county extension agent in the office, at annual and other extension conferences, and on any other work directly related to office administration.
18. Days in field should include all days spent on official duty other than "days in office."
19. Letters written should include all original letters on official business. (Duplicate letters should not be included.)
20. An extension school is a school usually of 2 to 6 days' duration, arranged by the Extension Service, where practical instruction is given to persons not residents at the college. An extension short course differs from an extension school in that it is usually held at the college or another educational institution and usually for a longer period of time.
21. Records consist of definite information on file in the county office that will enable the agent to verify the data on extension work included in this report.
22. The county extension association or committee is that county organization, whether a membership or a delegate body, which is recognized officially in the conduct of extension work in the county.

GENERAL ACTIVITIES

Report Only This Year's Extension Activities and Results That Can Be Verified

1. List below the names, titles, and periods of service of the county extension agents whose work is included in this report. Include time of assistants with that of regular agent.

| AGENT | Total months of service this year | Days devoted to A.A.A. work | Days devoted to relief work | Total days in office | Total days in field |
|---|-----------------------------------|-----------------------------|-----------------------------|----------------------|---------------------|
| | (a) | (b) | (c) | (d) | (e) |
| (Name) Home demonstration agent..... | | | | | |
| Asst. home demonstration agent..... | | | | | |
| 4-H Club agent..... | | | | | |
| Assistant 4-H Club agent..... | | | | | |
| <i>D.M. Cloyd</i> Agricultural agent..... | 12 | 120 | 30 | 156 | 147 |
| Assistant agricultural agent..... | | | | 36 | 117 |

2. County extension association or committee:
- (a) Agricultural extension:
 (1) Name *Warren County agricultural advisory comm.* (2) Number of members *22*
- (b) Home demonstration:
 (1) Name..... (2) Number of members.....
- (c) 4-H Club:
 (1) Name..... (2) Number of members.....
3. Number of communities in county where extension work should be conducted..... 10
4. Number of above communities in which the extension program has been planned cooperatively by extension agents and local committees..... 10
5. Number of different voluntary county or community project leaders or committeemen actively engaged in forwarding the extension program: *36*
- (a) Adult work { (1) Men..... (2) Women..... }
 (b) 4-H Club work { (1) Men..... (2) Women..... }
 (3) Older club boys..... (4) Older club girls.....
6. Number of different paid local leaders engaged in A.A.A. program, or in relief work: { (a) Men..... *23* }
 { (b) Women..... }
7. Number of clubs or other groups organized to carry on adult home demonstration work..... *2*
8. Number of members in such clubs or groups..... *200*

| ITEM | Home demonstration agents (a) | 4-H Club agents (b) | Agricultural agents (c) | County total (d) |
|--|--------------------------------|---------------------|-------------------------|------------------|
| 9. Number of 4-H Clubs..... | | | | 9 |
| 10. Number of different 4-H Club members enrolled..... | { (1) Boys ¹ | | | 10 |
| | { (2) Girls ² | | | |
| 11. Number of different 4-H Club members completing..... | { (1) Boys ¹ | | | 11 |
| | { (2) Girls ² | | | |

12. Number of different members enrolled in 4-H Club work for:⁴

| MEMBERS | 1st year | 2d year | 3d year | 4th year | 5th year | 6th year and over |
|----------------|----------|---------|---------|----------|----------|-------------------|
| (a) Boys..... | | | | | | |
| (b) Girls..... | | | | | | |

¹ County total should equal sum of preceding three columns minus duplications due to two or more agents participating in the same activity or accomplishment.

² Report the total number of different boys or girls enrolled in club work. This total should equal the sum of the project enrollments reported on page 7 to 24, minus duplications due to the same boy or girl carrying on two or more subject-matter lines of work.

³ Same as footnote 2 but refers to completions instead of enrollments.

⁴ The total for this question should agree with county total, question 10.

| | | (b) Total attendance | | | |
| | (2) 4-H club | (a) Number | | | |
| | | (b) Total attendance | | | |

SUMMARY OF EXTENSION INFLUENCE FOR YEAR

It is highly desirable for extension workers to consider the proportion of farms and farm homes in the county which have been definitely influenced to make some substantial change in farm or home operations as a result of the extension program for men, women, boys, and girls. It is recognized that this information is very difficult for agents to report accurately, so a conservative estimate based upon such records, surveys, and other sources of information as are available will be satisfactory. Such estimates should be marked "Est."

Include results of emergency activities as well as the regular extension program.

| | | |
|--|-----|----|
| 35. Number of farms in county | 530 | 35 |
| 36. Number of farms on which changes in practices have definitely resulted from the agricultural extension program | 308 | 36 |
| 37. Number of farm homes in which changes in practices have definitely resulted from the home demonstration program | | 37 |
| 38. Number of other homes in which changes in practices have definitely resulted from the home demonstration program | | 38 |
| 39. Number of farm homes with 4-H Club members enrolled | | 39 |
| 40. Number of other homes with 4-H Club members enrolled | | 40 |
| 41. Total number of different farm families influenced by some phase of the extension program (Include questions 36, 37, and 38, minus duplications.) | 300 | 41 |
| 42. Total number of different other families influenced by some phase of extension program (Include questions 39 and 40, minus duplications.) | 90 | 42 |

¹ County total should equal sum of preceding three columns minus duplications due to two or more agents participating in the same activity or accomplishment.

NOTE.—Questions 35-42 refer to the total number of different activities conducted this year. The totals should equal the sums of the corresponding information reported on following pages minus duplications where the same activity relates to two or more lines of work.
