2. CHANGES IN COUNTY EXTENSION ORGANIZATION.....	2.
3. EDUCATIONAL WORK.....	4.
4. AGRICULTURAL CONSERVATION PROGRAM.....	5.
5. FARM MANAGEMENT.....	6.
6. 4-H CLUB WORK.....	8.
7. MISCELLANEOUS.....	9.

#### SUMMARY

Changes in personnel in Extension Organization were the consigning to the county of H. C. Terry as part time Assistant Agent in charge of Club work to replace A. G. Birdsall, who was transferred. Through the cooperation of the Soil Conservation Service and the Extension Division J. G. Rosenberger was placed in the county for three months as Assistant County Agent in charge of terracing.

In connection with the National Program Planning Program a series of three meetings were held in eleven different communities in the county. At these meetings six topics were discussed to familiarize the farmers with the Agricultural conditions in the United States and abroad, thus enabling the county leaders to make a better county program and enable the farmers in general to familiarize themselves with the Agricultural conditions. After this series of meetings two meetings of the county leaders were held and a definite county program was worked out and definite lines and goals established.

As a result of the educational work in connection with the 1937 Adjustment Agricultural Program, 247 additional farms were covered by worksheets which represents an increase of 40.9% in the sign-up. The total payments under the 1936 Program amounted to \$31,971.20 and it is estimated with an increase in the sign-up that the payment for 1937 will be over \$40,000.00. The benefits of the Conservation Program other than payments can hardly be estimated. The farmers have planned their year's work more carefully, increased their acreage of soil improvement crops, used more lime and fertilizer, improved their rotations, taken steps to prevent erosion and carried out other good farming practices. These improvements should have a value in excess of all the payments made in the county.

For the second year Outlook Information was given in community meetings and the farmers are beginning to take considerable interest in this information, many of whom are reporting that it has been profitable to them. The TVA demonstrations farms on which two cars of triple super-phosphate have been used should be a valuable asset to the county and it is planned to make one or two tours to these farms next year. The wool pool was continued this year and 2,932 lbs. of wool was sold for 40¢ a pound. Cooperative shipments of graded lambs and calves were made from the county for the first time. In this manner 450 lambs, 48 old sheep,

and 51 calves were sold for a total of \$4,672.24. One cooperative shipment of cattle was made and the total value of livestock from this and adjoining counties sold through cooperative shipments was \$7,179.15.

In 1936, 56 emergency crop loans were made; in 1937, 65. The field supervisor reports that 96% of the 1936 loans have been collected and that the collection for 1937 have been favorable and he expects to collect practically 100% for both years by the time the tobacco markets close. The farmers are using the local Production Credit Association more as a source of legitimate Agricultural credit.

There were seven organized 4-H Clubs with an enrollment of 185. These clubs turned in 157 completed record books which showed a labor income of \$2,161.99. Special emphasis was placed on getting these club members to attend short courses; twenty-three attended the Hampden-Sydney Short Course, four the State Short Course, and two the Wildlife Conservation Camp at Jamestown. The club members were active in making exhibits at the State and two District Fairs. The quality of their exhibits was better than usual.

Seasonable circular letters prepared by Extension Specialist were mailed the poultry, turkey, sheep, and home garden groups. Bulletins on these subjects were also distributed and a number of requests for personal service work such as culling chickens, docking and castrating lambs etc. were handled. The requests for plans of farm building are increasing in number each year. Through the cooperation of the Virginia Tractor Company and the Soil Conservation Service a terracing outfit and an engineer were secured. This outfit built 99,150 feet of terraces which protected 240 acres of land on 30 farms for an average cost of \$2.58 per acre.

## CHANGES IN COUNTY EXTENSION ORGANIZATION

Two changes in personnel were made during the year. A. G. Birdsell part time Assistant County Agent in charge of 4-H Club work was transferred and E. C. Ferry was assigned to the county to replace him. In September through the cooperation of the Soil Conservation Service and the Extension Division, J. G. Rosenberger was placed in the county as Assistant County Agent in charge of terracing work.

The Buckingham County Extension Program for 1937 was adopted by the County Advisory Committee composed of twenty-five members and the six members of the Board of Supervisors, who served the ex-officio members of the committee. The plan of work as listed below was not adopted until after a series of meetings was held throughout the county and a definite program for the county had been worked out as will be explained in detail later. The plan of work as adopted for 1937 was as follows:

### I- AGRICULTURAL CONSERVATION PROGRAM

- 4- Educational work
- 3- Office and routine work
  1. Filling in work sheets
  2. Checking performance
  3. Detail office work

### II- FARM MANAGEMENT

1. Adjusting farming operations to Agricultural Conservation Program.
2. Farm management problems

### III- 4-H CLUB WORK

#### IV- MISCELLANEOUS WORK

1. Home Gardens
2. Poultry management
3. Better sires
4. Sheep program
5. Financing
  - a. Loans
  - b. Production Credit and Seed Loans
6. Marketing
  - a. Cooperative
  - b. Pool
7. Terracing

#### EDUCATIONAL WORK

To familiarize the farmers with the Agricultural conditions local and abroad, to explain the reason why the 1937 Program was being offered, to get the farmers viewpoint on what corrections should be made in the Program for 1937 and recommendations for a 1938 Program and to work out an Agricultural Program for the county, a series of three meetings was held in eleven different communities in the county. The following specific topics were discussed:

1. What Should be the Farmers Share in the National Income?
2. How do Farm People Live in Comparison With City People?
3. Should Farm Ownership be a Goal of Agricultural Policy?
4. Exports and Imports - How do They Affect the Farmers?
5. Is Increased Efficiency in Farming Always a Good Thing?

## 6. What Part Should Farmers in Your County Take in Making National Agricultural Policy?

After holding the community meetings the local leaders from each of these eleven communities met in a county meeting and drew up recommendations for suggested changes in the 1937 Agricultural Conservation Program and made recommendations for the 1938 Program which were transmitted to the State office. At the second meeting of this committee a soil map of the county was made showing the type of farming adapted to the various sections of the county according to the number of acres of tobacco, wheat, corn, and head of livestock that should be grown in the county in 1946 to maintain the soil fertility of the farms in the county. To reach this 1946 goal a definite goal for 1938 was also established to work toward. The plan of work for 1937 which has already been given was then adopted.

### RESULTS OF THE WORK FOR 1937

#### Agricultural Conservation Program

With the help of the local committeemen thirteen meetings attended by 411 farmers were held to explain the 1937 Program and 1200 copies of circular letters were mailed advertising the meetings and explaining the program. Both the local and State papers were very cooperative in publishing notices of the meetings and carrying an article on the program. As a result of this educational work the number of farmers participated in the program was increased from 603 to 850, an increase of 247.

Due to the fact that the aerial photographs did not get to the county until October 13th, we were very late in checking performance but the field work had been 90% completed on December 1st. It will be two months yet, however, before the office work in connection with all the 1937 applications is completed.

#### Benefits From The Program

The diversion and conserving payments for the 1936 Program amounted to \$29,600.00 to which should be added \$2,371.20 for administrative Expenses, given a total of \$31,971.20 in money received in the county with an increase of 40.9% in the farmers participating in the program for 1937

it is estimated that the total payments received in the county for 1937 will be \$40,000.00 to \$44,000.00.

In the Agent's opinion the farmers of the county have been benefited by the program to an amount in excess of the payments received in other ways. The program and educational work in connection with it has caused the farmers to plan their crop acreage more carefully and to consider the possible demand and prices they will receive for them. They have increased their acreage of soil improving and conserving crops, used more lime and fertilizer, improved their rotations, become conscious of the enormous loss due to soil erosion and taken steps to check it, become more cooperative in community problems and in marketing their crops. No accurate estimate can be made of the value of these changes nor, due to the fact that the office work in connection with checking performance under this year's program has not been completed, can any comparison be given with the 1936 practices that have a tangible value.

#### Other Figures

During the year the Agent devoted a total of 170 days to the 1936 and 1937 Conservation Program and Specialist 14 days. The committeemen worked 107 days, the chief clerk 108, Supervisors 394, office assistants 164 and the one regular stenographer devoted 152 days of her time to the Program. The Agent made 95 farm visits, held 56 meetings, received 1,459 office calls, prepared 36 different circular letters and mailed 21,700 copies of same. Thirty local leaders gave 60 days of their time to the Program.

#### FARM MANAGEMENT

##### Outlook Information

Ten meetings in as many different communities were held at which Outlook Information was given for the different crops and livestock enterprises of importance in the county. This is the second year that this information has been discussed in this manner. The farmers were very much more interested in this information this year than they were last and no subject discussed during the year created more interest than the outlook information except the Conservation Program itself. The farmers are beginning to make their own interpretation of this information and are using

it in planning their operations. They are also asking for later reports all during the year. Quite a number of the farmers have reported that by using this outlook information they were able to sell to a better advantage.

#### T V A

The thirteen farmers conducting TVA unit demonstrations last year continued their demonstrations this year. They received one 30 ton car of Triple Superphosphate which makes a total of two cars used by these farmers. These demonstrators are trying to make their farms real demonstration farms that will be of great value to the county along farm management lines. They are keeping farm records, improving their crop rotations, getting more of their land in conserving crops and improved pasture, checking erosion by terracing, strip cropping, and changing their crop system so that only the more level part of their farms are worked in row crops. These men are also placing special emphasis on such crops as alfalfa and sweet clover. Their results on pasture with phosphate and lime was rather outstanding this year and it is expected that the effect of their other practices will be showing up to such an extent that it will be very much worthwhile to make one or two tours of these farms next year.

#### Marketing

For the past eight or ten years the farmers of the county have been selling their wool through wool pools. This year 2,932 lbs. (about 80% of the wool in the county) was sold in this manner at a very favorable price. For the past three years we have attempted to make cooperative shipments of lambs to Baltimore with varying degrees of success. This year through the cooperation of the Eastern Cooperative Livestock Marketing Association of Baltimore we were able to make direct sales to the packers of grading lambs. In this manner 440 lambs, 41 old sheep, and 58 calves were sold for a total of \$4,672.24. This method of selling has resulted in a considerable saving to the farmers as we have a very poor outlet for our lambs, sales being mostly to "pin hookers" and to other local sources which resulted in unfavorable prices in most cases. We have also made one cooperative shipment of cattle and another shipment is being planned for this winter. The Agents and farmers in the adjoining counties have cooperated in these shipments and the total value of livestock shipments made to date have amounted to \$7,179.15.

## Financing

Very little work in this county has been done on farm credit. In 1936, 56 emergency crop loans were made for a total of \$2,035.00; 96% of which had been repaid on November 19th and the Field Supervisor reports that the remaining 4% is expected to be collected when the tobacco market opens. In 1937 emergency loans were made to 65 farmers for a total of \$2,780.00. A number of these loans were paid before the date due and the collections have been good on the others. More farmers used the local Production Credit Association as a source credit this year than last, and it is anticipated that this organization will be used more and more as a source of legitimate farm credit.

## 4-H CLUB WORK

The 4-H Club work was carried on almost entirely by the Assistant Agent who had charge of club work in this and four adjoining counties.

There were seven organized 4-H Clubs in the county with an enrollment of 185 members; 93 girls and 92 boys. Among the major points stressed during this year's program were:

1. Completion of record books
2. Better club organization
3. Short Course Attendance
4. Selection and exhibits of 4-H Products for fairs.

This year, with 185 members enrolled, there were 137 completed records books turned in to the county Agent's office. This report was not as large as it might have been if more time had been available to contact club members who have moved away or finished school or for other reasons were absent from the club meetings which were held at school. The 137 record books that were turned in showed a net profit of \$2,161.99. It has been the policy of the Assistant County Agent to develop as much leadership as possible among the club members and to let them handle the club meetings whenever possible. This year a County Council was organized in an effort to centralize club work and at the same time make the club members more "county minded" in their club thinking of club work in terms of Buckingham County instead of their individual clubs. Much time was spent

in an effort to get a larger and better representation of club members from Buckingham County to the various short courses. Twenty-three members and two leaders attended the Hampden-Sydney Short Course; four attended the State Short Course in Blacksburg (two were made All-Star Club Members) and two boys attended the Wildlife Conservation Camp at Jamestown. Much interest and enthusiasm has been shown by the club members who attended this year and present indications are that a larger number will attend next year. In my opinion and the opinion of the parents whom I have contacted, the short course is one of the outstanding features of club work.

At the Five County Fair in Farmville Buckingham was well represented and easily won it's share of the club prizes in every department. With seven clubs in the county there were six club booth exhibits at the fair competing against club booths from four other counties, winning four out of five prizes offered by the Fair Association. Exhibits were also shown at the Lynchburg Farm Show and the State Fair in Richmond. Other prizes won in this county were:

1. The County Chilean Nitrate of Soda award
2. The County International Harvester County prize
3. The Elgin watch awarded by the Arcadian Nitrate of Soda Co.

Next year, plans are being made for more intensive club work in this county, the organization of more clubs, larger attendance at short courses, more and better exhibits at fairs, and participation in several contests that were not used in this county this year.

#### MISCELLANEOUS

##### Home Garden

A seasonal circular letter prepared by the Extension Garden specialist was mailed to a special list of home gardeners. These letters covered such topics as preparation and fertilization of the garden, kind, varieties, and planting dates of vegetables to secure an "all year round garden", insects, disease control, the fall and winter garden and other timely topics; quite a number of bulletins were distributed on special vegetables and insects and disease control.

### Poultry

With the help of the poultry specialist nine farm flocks representing 700 birds were culled during the year. Numerous requests for bulletins on poultry and poultry rations for baby chicks and laying flocks were received. The increased demand for plans for brooder houses, range shelters and laying houses, which showed such a big increase last year, was continued this year and the improvement in the poultry housing conditions in the county is becoming noticeable. The circular letter on turkey production prepared by the Extension Poultry Specialist was mailed to the commercial growers in the county. This industry is increasing in the county and the growers are reporting lower mortality rate and better gains in weight. Poultry continues to be the major 4-H Club project in the county.

### Sheep Program

The sheep industry was a major livestock project in the county, special emphasis being placed on docking and castrating and better sires. It is estimated that 485 (80% of the lambs raised) were docked and castrated, that 580 ewes were treated for internal parasite, and that 40% of the growers are using pure bred rams. These better practices have resulted in an estimated saving of \$709.88 to the growers. Circular letters were mailed the sheep men regularly on the treatment on internal parasite; also circular letters on precautions in shearing and handling the wool, and on sheep rations and the value of a green crop for the lambs and sheep in the spring and winter.

### Terracing

Through the cooperation of the Virginia Tractor Company a terracing outfit was secured for the county to be used by the farmers on a rental basis. An engineer was secured to lay off the terraces from the Soil Conservation Service. These two things made the work possible. This outfit started working about the middle of September and in spite of the fact that the unusually wet fall delayed the work 99,150 feet of terracing were built to protect 240 acres of land from erosion, the actual cost per acre of building these terraces being \$2.58. When the work was stopped for the winter there were requests for 200 additional hours of work. As yet no canvassing has been done in one-third of the county. This is the first terracing work that has ever been done in the county on a large scale and it is hoped that the work can be continued in the spring.

# COMBINED ANNUAL REPORT OF COUNTY EXTENSION WORKERS

This report form is for use by county extension agents in making a combined statistical report on all extension work done in the county during the year. Agents resigning during the year should make out this report before quitting the service.

State VIRGINIA County HICKINGHAM

### REPORT OF

<u>MISS. MAFFIE E. DOWNING</u> (Name) <i>Home Demonstration Agent.</i>	From <u>JULY 1,</u> to <u>NOV. 1,</u> 1937
<u>N. C. TERRY</u> <i>4-H Club Agent.</i>	From <u>FEB. 1,</u> to <u>NOV. 2,</u> 1937
<u>R. S. ELLIS</u> <i>Agricultural Agent.</i>	From <u>DEC. 1, 1936</u> to <u>NOV. 30,</u> 1937

READ SUGGESTIONS, PAGES 2 AND 3

Approved:

Date \_\_\_\_\_

## SUGGESTIONS RELATIVE TO THE PREPARATION OF THE COUNTY EXTENSION AGENT'S ANNUAL REPORT

The annual report should be a summary, with analysis and interpretations, for presentation to the people of the county, the State, and the Nation of the extension activities in each county for the year, and the results obtained by the county extension agents assisted by the subject-matter specialists. The making of such a report is of great value to the county extension agents and the people of the county in showing the progress made during the year as a basis for future plans. It is of vital concern also to the State and Nation as a measure of rural progress and a basis for intelligent legislation and financial support of extension work.

At least four copies of the annual report should be made: One copy for the county officials, one copy for the agent's files, one copy for the State extension office, and one copy for the Extension Service, United States Department of Agriculture. *The report to the Washington office should be sent through the State extension office.*

### STATISTICAL SUMMARY

Where two or more agents are employed in a county they should submit a single statistical report showing the combined activities and accomplishments of all county extension agents employed in the county during the year. Results obtained through assistance rendered agents by specialists should also be included. This report shows, insofar as possible, the part each agent has taken in forwarding the extension program. The county totals should be the sum of the activities and accomplishments of individual agents minus duplications due to two or more agents participating in the same activity or accomplishment. The county totals, when properly recorded, show the progress made in the county during the year in forwarding the entire extension program. Negro men and women agents should prepare a combined statistical report separate from that of the white agents.

The statistical summary should be a report of this year's activities and results that can be verified by records on file in the county office. Where records are not available careful estimates are desired. Such estimates should be marked "Est."

### NARRATIVE SUMMARY

A separate narrative report is desired from the leader of each line of work, such as county agricultural agent, home demonstration agent, boys' and girls' club agent, and Negro agent. Where an assistant agent has been employed during a part or all of the year, the report of his or her work should be included with the report of the leader of that line of work. Where an agent in charge of a line of work has quit the service during the year, the information contained in his or her report should be incorporated in the annual report of the agent on duty at the close of the report year, and the latter report so marked.

The narrative report should summarize and interpret, under appropriate subheadings, the outstanding results accomplished and the extension methods used for each project. Every statement should be clear-cut, concise, forceful, and, where possible, reinforced with necessary data from the statistical summary. Use a descriptive style of writing, giving major accomplishments first under each project. Give extension methods fully relating to outstanding results only, and where practicable illustrate with photographs, maps, diagrams, blueprints, or copies of charts and other forms used. Full credit should be given to all cooperating agencies. The lines should be single-spaced, with double space between the paragraphs and reasonably good margins. The pages should be numbered in consecutive order.

The following outline is merely suggestive of how the narrative report may be clearly and systematically presented. Each agent should prepare an outline to fit the situation and the work to be reported.

### SUGGESTIVE OUTLINE OF ANNUAL NARRATIVE REPORT

- I. Cover and title page.
- II. Table of contents.
- III. Summary of activities and accomplishments, preferably of one or two typewritten pages only, placed at the beginning of the narrative report.
- IV. Changes in county extension organization.
  - (1) Form.
  - (2) General policies.
  - (3) Procedure.
- V. County program of work.
  - (1) Factors considered and methods used in determining program of work.
  - (2) Project activities and results.

Under appropriate headings and subheadings present in some detail for each major project or line of work the goals set up, the methods used, the results achieved, and the significance of these results in terms of improved farms and homes and of better community life.
- VI. Outlook and recommendations, including suggestive program of work for next year.

## TERMINOLOGY

To insure reports which convey the intended meaning to others and to facilitate the compilation of satisfactory national statistics on extension, it is extremely important that terms be used in accordance with accepted definitions. The following definitions of extension terms have been approved by the United States Department of Agriculture and the Association of Land Grant Colleges and Universities. Agents should read these definitions before starting to write the annual reports.

### DEFINITIONS OF EXTENSION TERMS

1. A program of work is a statement of the specific projects to be undertaken by the extension agents during a year or a period of years.
2. A plan of work is a definite outline of procedure for carrying out the different phases of the program of work. Such a plan provides specifically for the means to be used and the methods of using them. It also shows what, how much, when, and where the work is to be done.
3. A community is a more or less well-defined group of rural people with common interests and problems. Such a group may include those within a township, trade area, or similar limits. For the purpose of this report a community is one of the several units into which a county is divided for conducting organized extension work.
4. A project leader, local leader, or committeeman is a person who, because of special interest and fitness, is selected to serve as a leader in advancing some phase of the local extension program. A project leader may be either an organization or a subject-matter leader.
5. Demonstrations as contemplated in this report are of two kinds—method demonstrations and result demonstrations. A method demonstration is a demonstration given by an extension worker or other trained leader for the purpose of showing how to carry out a practice. Examples: Demonstrations of how to can fruits and vegetables, mix spray materials, and cull poultry. A result demonstration is a demonstration conducted by a farmer, home maker, boy, or girl under the direct supervision of the extension worker, to show locally the value of a recommended practice. Such a demonstration involves a substantial period of time and records of results and comparisons, and is designed to teach others in addition to the person conducting the demonstration. Examples: Demonstrating that the application of fertilizer to cotton will result in more profitable yields, that underweight of certain children can be corrected through proper diet, that the use of certified seed in growing potatoes is a good investment, or that a large farm business results in a more efficient use of labor. The adoption of a farm or home practice resulting from a demonstration or other teaching activity employed by the extension worker as a means of teaching is not in itself a demonstration.
6. A result demonstrator is an adult, a boy, or a girl who conducts a result demonstration as defined above.
7. A cooperator is a farmer or home maker who agrees to adopt certain recommended practices upon the solicitation of an extension worker. The work is not directly supervised by the extension agent and records are not required, but reports on the success of the practices may be obtained.
8. A 4-H Club is an organized group of boys and/or girls with the objectives of demonstrating improved practices in agriculture or home economics, and of providing desirable training for the members.
9. 4-H Club members enrolled are those boys and girls who actually start the work outlined for the year.
10. 4-H Club members completing are those boys and girls who satisfactorily finish the work outlined for the year.
11. A demonstration meeting is a meeting held to give a method demonstration or to start, inspect, or further a result demonstration.
12. A leader-training meeting is a meeting at which project leaders, local leaders, or committeemen are trained to carry on extension activities in their respective communities.
13. An office call is a call in person by an individual or a group seeking agricultural or home-economics information, as a result of which some definite assistance or information is given. A telephone call differs from an office call in that the assistance or information is given or received by means of the telephone. Telephone calls may be either incoming or outgoing.
14. A farm or home visit is a call by the agent at a farm or home at which some definite information relating to extension work is given or obtained.
15. Days in office should include time spent by the county extension agent in the office, at annual and other extension conferences, and on any other work directly related to office administration.
16. Days in field should include all days spent on official duty other than "days in office."
17. Letters written should include all original letters on official business. (Duplicated letters should not be included.)
18. An extension school is a school usually of 2 to 6 days' duration, arranged by the Extension Service, where practical instruction is given to persons not resident at the college. An extension short course differs from an extension school in that it is usually held at the college or another educational institution and usually for a longer period of time.
19. Records consist of definite information on file in the county office that will enable the agent to verify the data on extension work included in this report.
20. The county extension association or committee is that county organization, whether a membership or a delegate body, which is recognized officially in the conduct of extension work in the county.

## GENERAL ACTIVITIES

Report Only This Year's Extension Activities and Results That Can Be Verified

1. List below the names, titles, and periods of service of the county extension agents whose work is included in this report. Include time of assistants with that of regular agent.

AGENT		Total months of service this year	Days devoted to ag'l-conservation and adjustment programs	Days devoted to field work	Total days in office	Total days in field
		(a)	(b)	(c)	(d)	(e)
Mattie E. Downing (Name)	Home demonstration agent	5		2	45	71
	Asst. home demonstration agent					
N. C. Terry	4-H Club agent	69 da.			8	61
	Assistant county agent in charge of club work					
R. S. Ellis	Agricultural agent	12	170		129	162
J. G. Rosenberger	Assistant agricultural agent	65 da.	-	-	5	60

## 2. County extension association or committee:

- (a) Agricultural extension:  
 (1) Name County Advisory Committee (2) Number of members 25
- (b) Home demonstration:  
 (1) Name Advisory Board (2) Number of members 16
- (c) 4-H Club:  
 (1) Name County Council (2) Number of members 35
3. Number of communities in county where extension work should be conducted Home Dem. Agent - 19
4. Number of above communities in which the extension program has been planned cooperatively by extension agents and local committees County Agent - 10 Home Agent - 12
5. Number of different voluntary county or community project leaders or committeemen actively engaged in forwarding the extension program:  
 (a) Adult work (1) Men 25 (2) Women 20  
 (b) 4-H Club work (1) Men 3 (2) Women 15 (3) Older club boys 2 (4) Older club girls 1
6. Number of different paid local leaders engaged in agricultural-conservation and adjustment programs: (a) Men 24 (b) Women
7. Number of clubs or other groups organized to carry on adult home demonstration work 6
8. Number of members in such clubs or groups 183

ITEM	Home demonstration agents	4-H Club agents	Agricultural agents	County total <sup>1</sup>
	(a)	(b)	(c)	(d)
9. Number of 4-H Clubs	7	7		14
10. Number of different 4-H Club members enrolled	(1) Boys <sup>2</sup>	92		92
	(2) Girls <sup>2</sup>	68	93	161
11. Number of different 4-H Club members completing	(1) Boys <sup>2</sup>	63		63
	(2) Girls <sup>2</sup>	68	74	142

12. Number of different members enrolled in 4-H Club work for:<sup>4</sup>

MEMBERS	1st year	2d year	3d year	4th year	5th year	6th year and over
(a) Boys	42	17	16	6	4	7
(b) Girls	61	41	20	14	4	1

<sup>1</sup> County total should equal sum of preceding three columns minus duplications due to two or more agents participating in the same activity or accomplishment.<sup>2</sup> Report the total number of different boys or girls enrolled in club work. This total should equal the sum of the present enrollments reported on pages 7 to 9, minus duplications due to the same boy or girl carrying on two or more subject-matter lines of work.<sup>3</sup> Same as footnote 2 but refers to completions instead of enrollments.<sup>4</sup> The total for this question should agree with county total, question 10.

34j. Number of above meetings held by agents or local leaders at which discussion group method of presentation was followed			20	41	61	34j

## SUMMARY OF EXTENSION INFLUENCE FOR YEAR

It is highly desirable for extension workers to consider the proportion of farms and farm homes in the county which have been definitely influenced to make some substantial change in farm or home operations as a result of the extension program for men, women, boys, and girls. It is recognized that this information is very difficult for agents to report accurately, so a conservative estimate based upon such records, surveys, and other sources of information as are available will be satisfactory. Such estimates should be marked "Est."

Include results of emergency activities as well as the regular extension program.

35. Number of farms in county	2296	Est.
36. Number of farms on which changes in practices have definitely resulted from the agricultural extension program	800	Est.
37. Number of farm homes in which changes in practices have definitely resulted from the home demonstration program	254	Est.
38. Number of other homes in which changes in practices have definitely resulted from the home demonstration program	112	Est.
39. Number of farm homes with 4-H Club members enrolled	149	Est.
40. Number of other homes with 4-H Club members enrolled	53	Est.
41. Total number of different farm families influenced by some phase of the extension program (Include questions 36, 37, and 39, minus duplications.)	1176	Est.
42. Total number of different other families influenced by some phase of extension program (Include questions 38 and 40, minus duplications.)	155	Est.

<sup>1</sup> County total should equal sum of preceding three columns minus duplications due to two or more agents participating in the same activity or accomplishment.

NOTE.—Questions 35-34 refer to the total number of different activities conducted this year. The totals should equal the sums of the corresponding information reported on following pages minus duplications where the same activity relates to two or more lines of work.
