INTRODUCTION -

Henry County is fast developing into one of the leading counties, both of Virginia and the South, in the manufacture of furniture, allied industries and textiles, thereby playing havoc with the old order of agriculture and under the strain of taxation as applied under present system, is forcing many people off the farms to work in the factories.

While this industrial development is creating a good year round market for many products that can be produced locally, it is a very slow educational process to change the one-crop, tobacco farmer into some different line of diversified farming.

One reason is he can usually make a tobacco crop in a comparatively short period of the year, and leave the balance- and when he decides to quit tobacco the improved roads enable him to work at the factories and live on the farm some twenty miles distant.

This causes an unrest and dissatisfaction as regards working on the farm which is partly responsible for the lack of interest by the boys in 4-H Club Work, also boys are employed at factories at good wages and as soon as they are old enough to make good at some club project they quit the farm also and labor in factories.

Opportunities in dairying and allied farming are apparently bright and more interest is developing along this line than ever before, but there is room for more.

The failure of the Tri-State Tobacco Association coupled with good prices for this type of tobacco last year has made a very complicated situation when the organization of groups or even communities into any kind of vehicle to carry on extension work and those farmers who are trying out the dairy or poultry lines either live in too many sections or not enough in one section to make up a group and beyond purchasing feeds in car lots they are not anxious to co-operate unless they are on the long end.

HENRY COUNTY BOARD OF AGRICULTURE

The Henry County Board of Agriculture has at present time, forty one members and was organized in January 1926, after which committees on most important lines of agriculture in the county, met with the county agent and mapped out a long term program and made recommendations as to specific practices and crop rotations, also assisting the establishing of some lines of livestock as dairy and poultry, which program was followed and report made to the Board of Agriculture at a meeting on January 25, 1927, said report being approved.

At this meeting, after certain recommendations having been made by the county agent, and backed up with testimonials of some farmers practicing dairy and poultry development, it was decided to concentrate as much as practicable on selling the dairying and poultry raising idea as an asset to monthly income and the soil building program, since the labor situation demands that high yields be made to make a profit over cost of production, good soils are a necessity to stay in business.

At this meeting the Board of Agriculture appointed a committee of three whose duty it was to request the Supervisors to plan for the continuance of Extension work by placing same in budget. The members also assisted in many ways throughout the year by helping with demonstrations, meetings and the county fair.

SUMMARY OF PROJECTS AND RESULTS FOR 1927.

ALL

Goals established	Results
SOILS-	
10 Fertilizer demonstrations	8 completed
25 Lime	17 "
Farm Crops-	
25 Wheat	17 "
25 Soy-bean	21 "
25 Corn	29 "
10 Pea	16 "
10 Clover	6 "
10 Alfalfa	6 "
5 Permanent pasture	6 "
Horticulture-	
15 Pruning	17 "
10 Spraying	8 "
3 Small fruit and berries	4 "
8 Garden	25 "
Livestock-	
10 Fat pig	8 "
5 Sow and litter	4 "
5 Dairy bulls	6 "
10 Grade cows	8 "
Club Work-	
2 New Clubs	3 "
50 Members	42 "
2 Demonstration teams	9 "
10 Boys at State Short Course	4 "
8 " " Dist. " "	4 "
1 County picnic	1 "
Meetings in relation to projects-	
1 Farmers Institute	1 Held
1 Board of Agriculture	1 "
1 County Fair Asso.	2 "
1 " Club Council	2 "

23- Considerable interest in developing in soil improvement through the use of lime and legumes and year after year more cover crops are being seeded and while many are taken off for hay in the spring it is a much better practice than leaving the soil bare during the winter months. Some few farmers are working to, or using a regular crop rotation.

Lime- Many outstanding results from the use of lime in different sections has done much to increase the use of lime and quite a number of farmers are planning to get lime in this winter and spring.

One demonstration in cow peas where six tons of ground lime was spread in fall of 25, the peas following wheat this year, was evidence sufficient to "sell" three cars of lime to four neighbors this fall. This lime was applied right through the middle of a field about three quarters acre wide and four long. The peas were from eighteen to twenty four inches taller and better in every way, yielding at least one ton more hay per acre than the peas on either side, which had identical preparation and fertilizer and treatment in every way except the lime.

Another similar result in the stand of clover and grass seeded in the wheat this spring in another section of the county, in this case a car of lime was used last fall on 16 1/2 acres the remainder of the field left unlimed, now the limed portion is one dark green mass of clover and grass and the unlimed part has no clover and very little grass and is covered with a brown frost bitten poverty grass.

Fertilizers- As a whole heavier applications of fertilizer ^{are} being used on tobacco and in some cases on wheat, which in most cases have paid a profit. One or two rather extravagant claims have been made as to increase in yield of wheat where top dressed with nitrate this spring.

There has been some complaint in regard to fertilizers not giving results this year over check plots with no fertilizer, however, evidence to substantiate this claim is rather indefinite and the fertilizers were purchased from two different sources, also acid soils or some other unbalanced condition may have been responsible for this claim.

Corn - The plan of having a few club members and farmers grow certified seed corn for sale has not made much progress and I either got the wrong man or haven't sold the plan to them properly, far beyond getting them to use certified seed, I haven't gotten very far. Of course this helps get better seed corn used but looks like when you try to have some corn certified it is always planted too close to a neighbor or roasting ear patch or some other hindrance.

Wheat- The increase in the number of farmers treating seed wheat to control smut this fall was surprisingly good as the percent of wheat having smut this spring was very low. One farmer produced certified V.P.I. 131, which is among the best in the State so I am told by the boys who ought to know. This farmer sold to a Danville Seed Firm at 25¢ per bu. premium over milling wheat prices, with all expenses of sacks, freight and bin inspection paid by firm. Two other farmers are trying to grow certified seed wheat this season.

Soy Beans- The soy bean is coming into its own place and is directly credited with the smallest tonnage of imported hay sold to farmers in the 26-27 season in the memory of the oldest feed dealers here. Laredo beans, due largely to some results in 1926, also the price of seed, were the leading variety grown by most of the farmers.

The Laredo makes more hay per acre and also retains the leaves better than the Virginia, in some cases the tobacco farmers prefer the Virginia due to its ripening some two weeks ahead of Laredos.

Cow Peas- The low price of seed caused quite an increase in the acreage seeded to peas this year and the crop of hay as a whole was fair. Time of planting and weather conditions brought about some very varied differences in the results with peas. The early planted peas made a small vine growth and a good grain yield, while the late plantings made fine vine growth and in many instances, practically no pods.

Red Clover- High priced seed and unfavorable weather, coupled with diseases the past two years, is causing many farmers to quit clover and use substitutes, mainly peas and beans. Some clover seeded this spring is looking good, also some farmers seeded clover alone this fall, which due to good growing weather, is showing up well at this time.

Alfalfa- Some alfalfa has given good yields this year, others, seeded on lean soil has yielded practically nothing altho the stand is pretty good- This is the reason that the Agronomy Committee advises seeding alfalfa, only on soils that will produce fifty bushels of corn per acre.

Horticulture- Most of the young orchards are being pruned and sprayed and cultivated, many are growing soy beans, vetch and peas as an inter-row crop. Phosphate, Soda and tobacco stems are the fertilizers used.

The late freeze this year, somewhat chilled the interest as well as the crop of fruit as only some varieties on high points had any fruit.

Nearly all peach growers are gassing borers with Paradol, which is proving a great boon in fighting this pest.

Some half dozen farmers are trying out a few raspberries, either planting this fall or preparing the soil ready to plant early in the spring.

Straw-berries are now grown in sufficient quantity to supply the local demand from date of ripening to end of season. Berries produced in this section have good flavor and texture.

Livestock- More and better dairy cows is the slogan that we are working on- the increase in dairy products produced and marketed locally is something like 40% over a year ago, and we haven't started.

Two twenty cow dairy barns have gone up this year and practically no good grade dairy heifers have been sold for veal and several pure bred Guernsey bulls and bull calves are now owned by farmers- all of which goes to prove that we have started them thinking along dairy lines anyway.

Farmers are now furnishing the local ice cream plant all the whole milk used and some sweet cream, something that a year or two ago, was not even thought of.

There has been quite an increase in the butter furnished the towns and villages by the farm women, much of which is being put up in pound cartons, properly wrapped and sanitary. This is largely a result of the requirements set out in the fair catalogue for butter exhibited at the fair, a great improvement over the old cumbersome method of moulding.

The milk for health campaign put on here this spring helped center attention on the milk situation and increased demand for milk and milk products. The different meetings and talks about feeding and care of dairy cows has made possible the purchasing of open formula feeds in car lots by farmers, as well as increasing the tonnage of dairy feed being used by the average farmer.

One farmer invested \$ 120.00 in sheep last fall, lost three, yet the lamb crop this spring paid over half of the investment.

(8)

Club-work- While club work is an uphill proposition for me, I am now beginning to think that some different tactics must be tried if club work is a success.

The present attitude of both parent and boys toward farming is a means to some other end rather than farming as a business and this condition makes it hard to do very much with club work here.

County Fair- The county fair here is in reality an extension project, and is one of the best assets we have to make the work go under the present management. The quality of exhibits in many departments was better than formerly and the most noticeable increase was in the number of garden displays, a phase of farming that plays a large part in the profits of a farm as well as the health of the family. In many of these displays not only were the summer and fall vegetables represented but many of the winter vegetables.

Washington, D. C.

ANNUAL REPORT OF COUNTY EXTENSION WORKERS

This report form is to be used by county extension agents, such as county agricultural agent, home demonstration agent, club agent, and negro agent, reporting on their respective lines of work.

State Virginia County Henry
Report of J. M. Jones County Ag. Agent
(Name) (Title)
From December 1st 1926 to November 30th, 1927.(Date) (Date)

If agent has not been employed entire year, indicate exact period. Agents resigning during the year should make out this report before quitting the service.

READ DEFINITIONS, PAGES 3 AND 4

COUNTY AGENT WORK

Approved: _____

Date _____ State or District Supervisor.

Date _____ State Extension Director.

SUGGESTIONS RELATIVE TO THE PREPARATION OF THE COUNTY EXTENSION AGENT'S ANNUAL REPORT.

The annual report should be a review, analysis, interpretation, and presentation to the people of the county, the State, and the Nation of the sum total of the extension activities in each county for the year and the results obtained by the county extension agent assisted by the subject-matter specialists. The making of such a report is of great value to the county extension agent and the people of the county in showing the progress made during the year as a basis for future plans. It is of vital concern also to the State and Nation as a measure of rural progress and a basis for intelligent legislation and financial support.

Separate statistical and narrative reports are desired from each county extension agent in charge of a line of work, such as county agent, home demonstration agent, boys' and girls' club agent, and negro agent. Where an assistant agent has been employed a part or all of the year, a report on his or her work should be included with the report of the leader in charge of that line of work. Where an agent in charge of a line of work has quit the service during the year, the information contained in his or her report should be incorporated in the annual report of the agent on duty at the close of the report year, and the latter report so marked. Where two or more extension agents are employed in a county, each in charge of a line of work, care should be exercised to avoid including the same data in the statistical report of more than one agent.

At least four copies of the annual report should be made: One copy for the county officials, one copy for the agent's files, one copy for the State extension office, and one copy for the Extension Service, United States Department of Agriculture. *The report to the Washington office should be sent through the State extension office.*

NARRATIVE SUMMARY:

The narrative report should be a statement in orderly fashion and arranged under appropriate subheadings, of the work done, methods used, and results obtained under each project, as well as of the general work accomplished. Every statement should be clear-cut, concise, forceful, and, where possible, reinforced with ample data from the statistical summary. In the preparation of the part of the report relative to each project, the results reported in the statistical summary for the project should be analyzed, conclusions drawn, and recommendations made. The report may well be illustrated with photographs, maps, diagrams, blue prints, or copies of charts and other forms used in demonstration work. Full credit should be given to all cooperating agencies. The lines should be single-spaced, with double space between the paragraphs, and reasonably good margins left. The pages should be numbered in consecutive order.

The following outline is suggestive of how the narrative report may be clearly and systematically presented:

SUGGESTIVE OUTLINE OF ANNUAL NARRATIVE REPORT.

- I. Cover and title page.
- II. Table of contents.
- III. Status of county extension organization.
 - (1) Form of organization—changes and development.
 - (2) Function of local people, committees, or project leaders in developing the program of work.
 - (3) General policies, including relationships to other organizations.
- IV. Program of work, goals established, methods employed, and results achieved.
 - (1) Factors considered and methods used in determining program of work.
 - (2) Project activities and results.

- (t) Miscellaneous.

V. Outlook and recommendations, including suggestive program of work for next year.

VI. Summary of activities and accomplishments, preferably of one or two typewritten pages only, placed at the beginning or end of the narrative report.

STATISTICAL SUMMARY.

To supplement the narrative part of the report, and in order that comparable State and National summaries may be made, it is necessary to include a statistical summary of the work in each county. The following form has been prepared to insure uniformity of reporting. In addition to the questions asked under each subdivision of the report, space is provided to add further data if desired. The statistical summary will grow naturally out of the field and office records.

DEFINITIONS OF TERMS USED IN THIS REPORT.

1. A PROGRAM OF WORK is a definitely outlined plan for extension work.
2. A PROJECT is a definite, systematic, organized plan for carrying out some phase of the extension program of work, providing for what is to be done, how much, when, where, how, and by whom.
3. MISCELLANEOUS WORK includes work which has not yet become a regular part of the program of work—work other than project work.
4. A COMMUNITY, for the purposes of this report, may be any one of the several units into which the county is divided for purposes of conducting organized extension work.
5. A PROJECT LEADER OR LOCAL LEADER is a person, selected because of his or her special interest and fitness, who functions as a leader in advancing some phase of the local program of extension work.
6. A DEMONSTRATION is an example designed to show the practical application of an established fact. Demonstrations as contemplated in this report are of two kinds, method demonstrations and result demonstrations.
 - A method demonstration is a demonstration given by an extension worker or other trained leader to a group for the purpose of showing them how to carry out a practice. Synonym: Lecture demonstration. Examples: Demonstrations of casing, mixing of spray materials, and culling of poultry.
 - A result demonstration is a demonstration carried on by a farmer, farm woman, boy, or girl under the direction of the extension service, involving a substantial period of time, records of results, and comparisons. Examples: Child-feeding, corn-culture, and orchard-management demonstrations.
7. A DEMONSTRATOR is a farmer, farm woman, boy, or girl who, under the direction of the extension service, conducts a result demonstration.
8. MEMBERS COMPLETING should include those who have satisfactorily finished the work outlined for the current year.
9. A DEMONSTRATION MEETING is a meeting held to give a method demonstration or to start, inspect, or further a result demonstration.
10. A TRAINING MEETING is a meeting at which project leaders or local leaders are trained to carry on extension activities in their respective communities.
11. AN OFFICE CALL OR TELEPHONE CALL is a visit or call by a farmer or other person seeking agricultural or home economics information, as a result of which some definite assistance or information is given.
12. A FARM VISIT is a call at a farm by the agent at which some definite information is given or concrete plan of work outlined, or some valuable information obtained from the farmer regarding his work, or the better practice prevailing in his neighborhood.
13. A HOME VISIT is a call at a home by the agent at which some definite information is given or concrete plan of work outlined, or some valuable information obtained from the farm woman regarding her work, or the better practice prevailing in her neighborhood.
14. DAYS IN OFFICE should include time spent by the county agent in his office, at county agent conferences, and any other work directly related to office administration.
15. DAYS IN FIELD should include all days spent on official duty other than those spent in office.
16. LETTERS WRITTEN should include all single letters on official business.

4

DEFINITIONS OF TERMS USED IN THIS REPORT—Continued.

17. A **FARMERS' INSTITUTE** is one of a series of meetings of one to two days' duration, arranged by a central State farmers' institute agency, at which agricultural and home-economics problems are discussed, usually by outside speakers employed for the purpose.
18. AN **EXTENSION OR MOVABLE SCHOOL** is an itinerant school usually of two to six days' duration where practical but systematic instruction is given to persons not resident at the college. An extension course differs from an extension school in that it is usually held at the college or other educational institution and usually for a longer period of time, but not exceeding two weeks.
19. **RECORDS** consist of definite information filed in the county office that will enable the agent to verify the data on extension work included in this report.
20. **FARM OR HOME PRACTICE ADOPTED** is a new or improved practice adopted on a farm or in a home during the year as a result of extension teaching. Examples: Spraying of potatoes for disease, canning of fruits and vegetables, use of balanced rations, and hat making.

GENERAL ACTIVITIES.

Report only this year's extension activities and results that are supported by records.

If an assistant agent has been employed during the year, include his or her work with that of the agent.

1. List below the names, titles, and periods of service of the county extension agents whose work is included in this report.

<u>J. Hick Jones</u>	<u>County Agent</u>	<u>12</u>	
(Name)	(Title)	(Months of service this year)	

11. County association, if any, fostering extension work.

(a) Name	<u>Henry County Board of Agriculture</u>	<u>1</u>	
(b) Number of members		<u>41</u>	

2. Number of communities in county where extension work should be conducted. 2

21

3. Number of above communities in which the extension program has been cooperatively worked out by extension agents and people concerned. 3

11

4. Number of voluntary county, community, or local leaders actively engaged in forwarding the extension program with— 4

(a) Juniors		<u>2</u>	
(b) Adults		<u>12</u>	

5. Number of clubs carrying on extension work: 5

(a) Junior		<u>11</u>	
(b) Adult			

6. Membership in above clubs: 6

(a) Boys'	<u>42</u>	(c) Men	
(b) Girls'		(d) Women	

7. Number of club members completing: 7

(a) Boys'	<u>29</u>	(c) Men	
(b) Girls'		(d) Women	

8. Number of members in junior club work for four or more years: 8

(a) Boys			
(b) Girls			

* Report the total number of different boys or girls enrolled in club work. This total should equal the sum of the present enrollments reported on page 8-20. See any deductions due to the same boy or girl carrying on two or more extension courses this year.

† Include those boys and girls enrolled in club work as reported under 4(a) and 4(b) who have finished the work undertaken on each portion of it as it was planned to finish during the report year.

8-24-28

GENERAL ACTIVITIES—Continued.

9.	Number of junior teams trained	(a) Judging _____	_____	9
		(b) Demonstration _____	_____	
10.	Number entering college this year who may have been club members		1	10
11.	Total number of farm visits ¹ made in conducting extension work		727	11
12.	Number of different farms visited		235	12
13.	Total number of home ² visits made in conducting extension work			13
14.	Number of different homes visited			14
15.	Number of calls ³ relating to extension work	(a) Office _____	310	15
		(b) Telephone _____	154	
16.	Number of days agent spent in office		62	16
17.	Number of days agent spent in field		236	17
17½.	Number of news articles prepared for press ⁴		28	17½
18.	Number of individual letters written		307	18
18½.	Number of bulletins distributed		800	18½
19.	Number of fairs at which extension exhibits were made	(a) Community _____	1	19
		(b) County _____		
20.	Training meetings held for local leaders	(a) Junior work	(1) Number _____	20
			(2) Leaders in attendance _____	
		(b) Adult work	(1) Number _____	
			(2) Leaders in attendance _____	
21.	Method and result demonstration meetings ⁵ held (do not include meetings reported in number 20)	(a) Number _____	17	21
		(b) Attendance _____	174	
22.	Farmers' institutes held	(a) Number _____	1	22
		(b) Number of sessions _____	4	
		(c) Attendance _____	135	
23.	Extension schools ⁶ and short courses held	(a) Number _____	1	23
		(b) Attendance _____	4	
24.	Encampments held	(a) Junior	(1) Number _____	24
			(2) Attendance by club members _____	
			(3) Total attendance _____	
		(b) Farm women	(1) Number _____	
		(2) Attendance by club members _____		
		(3) Total attendance _____		
25.	Other extension meetings attended and not previously reported	(a) Number _____	9	25
		(b) Attendance _____	743	
26.	Number of meetings at which were shown	(a) Lantern slides _____		26
		(b) Motion pictures _____		
		(c) Charts _____		

¹ Do not count the same visit as both a farm visit and a home visit.² See definition on page 1.⁴ Include county and State press, agricultural journals, and home magazines. Do not count items relating to notices of meetings only.

PROGRAM SUMMARY

List below information on each project of the program of work for the year. If an assistant agent has been employed during the year, include his or her time with that of the agent. This page should not be filled out until the questions on the following pages have been answered.

Title of project.	Number of com- munities partici- pating. ¹	Number of local leaders participating. ²	Days specimens collected.	Days agent devoted to project.
