County fair association

The County(Advisory board)fair Association is made up of a representative group of farmers from the various communities of Chesterfield county. The object of this association is to develop the resources of the farms and homes of Chesterfield county; to assist the County agent and the various communities in developing and putting over the county program of work. Fifty \$50.00 dollars were given to the County training school to pay for a loan which is to be used for educational purpose and two hundred and ten(\$210) dollars were given towards the county agents salary.

Meetings of the association were held semi-annually - during the months of April and October. Plans for the county fair were worked out in detail. The annual County fair and farmers' conference were held under the auspices of the fair association.

Community clubs

Three farm community clubs are active in the county. Each of these clubs prepared a program of work, consisting of their individual problems, which are being solved by community demonstrations. Clubs are located as follow:

(a) Union branch club				Geo. W. Brown, Pres.	Beach, R.#1
No. dem.	started in	corn	3	No. dem.	completed
"	"	"	hay	"	"
"	"	"	garden	"	"
"	"	"	cotton	"	"

(c) Centralia club				Clarence Friend, Pres.	Richmond R.#7
No. dem.	started in	corn	2	No. dem.	completed
"	"	"	hay	"	"
"	"	"	garden	"	"
					4
					2

The farmers of Centralia club purchased cooperatively one car of lime and a pure bred Duroc boar. The boar is being used for community breeding.

Farmers' conference

The county farmers' conference was held at the Virginia Normal and Industrial Institute on May 22. The farmers from Chesterfield Dinwiddie, Prince George and Sussex counties featured the conference. The program started 10:40 a.m. with Prof. C. W. Owens, in chair. After opening the meeting, the first thirty minutes were given over to round table talks on farm problems. Dr. J. M. Gandy, Pres. of the Institute, gave the words of welcome. In the president's preliminary discourse he pictured to the farmers the possibilities that lie in their power to serve the State and Nation as well as themselves well.

Mr. Walton, Instructor in poultry husbandry, Virginia Normal & Industrial Institute gave a demonstration in poultry culling. Mr. Walton's demonstration was good and to the point. Every person present could easily have taken in valuable information as best how to care for and cull poultry. Miss Lizzie A. Jenkins, Hampton Institute, spoke on home conveniences. Her address was well taken by the men as well as by the women. After Miss Jenkins' address was over, the women held a sectional meeting and Mr. Walton conducted a round-table discussion on poultry culling that the women, who wanted to ask questions might do so. Miss Mabel Wiley, Nurse, Virginia Normal & Industrial Institute, gave a demonstration in home nursing. The demonstration was very interesting as well as advantageous. J. R. Thomas, Smith Hughes teacher, Virginia Normal & Industrial Institute, addressed the group of men on soil improvement with legumes. Mr. Thomas' address was one of the best of its kind ever given. C. J. Hartman, Farm manager, Virginia Normal & Industrial Institute, spoke on producing feed for the farm. Mr. Hartman emphasized the point of farming by a principle rather than a habit. Better methods of tillage, better varieties of seed and rotation of crops were his strong points.

The whole student body was present in the afternoon. Dr. F. D. Patterson, Veterinarian, Virginia Normal & Industrial Institute, spoke on the diseases of livestock. Mr. J. B. Pierce, Field agent U. S. Department of agriculture, spoke on the extension program of work. Mr. Pierce's address was very interesting as well as instructive.

One hundred and ten farmers, eleven county agents and three districts agents were in attendance at this conference.

Farmers tour

The county farmers' tour was made on Sept. 7th. Forty two farmers and their wives from the various sections of the county met at the farm of Joseph Briggs, Chester, on the Richmond and Petersburg Turnpike. The day was beautiful and otherwise suited the occasion. Six ford cars and one truck were loaded to its capacity with the jolly farmers and their wives. The tour cover covered seven different communities, and one farmer was visited in each community. Visits were as follow: Allen Reese, Chester, saw twenty acres of peanuts in fine condition. Edward Friend, Richmond #7, saw year round garden that had twelve varieties of vegetables growing and in good condition. Walter Chestnut, Chesterfield Court House, saw five acres of corn, which yield 40 bu. per acre, notwithstanding other corn in community yield less than 15 bu. per acre. Chestnut attributes his success largely to his methods of cultivation. He turned under german clover and rye, and gave the land an application of lime. W. D. Goode, Beach, saw a small well kept farm, growing soy bean hay, corn, peanuts, cowpeas, hogs and poultry. Mrs B. J. Banks, Chesterfield Court House, saw improvements on the old-type methods of house keeping and home making. J. H. Branch, Richmond, #9, saw farm implements well taken care of and Duroc Jersey hogs. Finally, Geo. Winston, Richmond #9, and saw barn full of hay and buy's club project.

This tour enabled the farmers and their wives, who participated in it to visit seven farms in seven different communities of the county. They turned their faces homeward 5 o'clock, and many said that they had never spent a day that gave them more real inspiration or more practical information.

County fair

The Chesterfield County's seventh annual fair was especially good. The leading products displayed were corn, peanuts, white and sweet potatoes, cotton, tobacco, cowpeas, navy beans, turnips and hay. Approximately 600 samples of products were on display. The exhibits of poultry were good. Twenty two coops were displayed. Barred Plymouth Rocks, Rhode Island Reds and White Wyandottes were the leading breeds exhibited. Live stock exhibits were good, though only sixteen displays were made. Canned goods, dainty cooked goods and fancy hand work were displayed in abundance. Approximately 500 exhibits were made.

The junior agricultural exhibits were equally as educational as they have been heretofore. There exhibits consisted of corn, peanuts, potatoes, poultry, hogs and a written Record of their demonstration. These exhibits were the outstanding features of their class at the fair. The county schools had their building filled to its capacity. Each school had on display products produced by its pupils. Hand and industrial work were the outstanding features displayed. Four farm booths were displayed at the fair. Each gave a true picture of the type of farm it represented. The blue ribbon booth had 33 exhibits on display and the second had 32. Two hundred (\$200) dollars were paid the premium winners at the Chesterfield county fair; one hundred (\$100) dollars of this were given by the County board of supervisors and the remainder was taken from the admission fee to the county fair. The total attendance to the county fair was twelve hundred.

Four district and county agents visited the fair and assisted in judging the products. Among them were Miss Lizzie A. Jenkins, Hampton Institute, Messrs J. L. Charity, Richmond, Alexander Scott, Prince George, and G. E. Cliver, Urewe.

Purchasing lime

The Centralia farm community club purchased cooperatively one car of 30 tons of pulverized lime, which cost \$142.50. The approximate saving on this transaction was \$112.50. Members secured lime in quantities varying from $\frac{1}{2}$ to 4 tons. As the results of the use of lime, eighteen farmers reports an increase in production. Phil. Lewis, Chester, used lime on oats and gets an increase of $\frac{1}{2}$ ton per acre on ground where failure in crop has been heretofore. Robt. Hatchell Chester, used lime on a part of Virginia peanut crop, and gets an increase of 8 bu. per acre over ground where no lime was used. Walter Cheatham, Chesterfield Court House, gets 25 bu. of corn per acre, more than the community's average. He attributes apart of this to the use of lime.

Hog breeding association

The Centralia farm community club purchased a pure bred Duroc jersey boar and placed same in community for breeding purpose. The boar is supervised by a special committee, who designates some member of the club to keep boar in possession where service to the community farmers may be given conveniently. Walter Branch, Centralia, has charge of boar at present. Boar has served three sows this fall.

Corn

Seven demonstrations were conducted in five different communities. The total yield from these seven demonstrations were 1527 bu. of corn, which is an average of 36 1/2 bu. per acre. Robt. Hatchell, Chester, #1, and Walter Branch, Centralia, seeded four and three acres respectively to corn. Hatchell harvested 160 bu. of corn and Branch 125. Hatchell's good yield is the results of good methods. Branch's increase in yield is the results of the use of rye as a fallow, barn yard manure, 1200 lbs of lime per acre and good cultivation.

Hay

Eleven demonstrations in five different communities were given in growing clover, mixed grasses, oats, soy beans, and cowpeas totalling twenty-eight acres. The total number of tons harvest 66 or nearly 2 1/2 tons per acre. W. D. Goode, Beach #1, harvested 5 tons of soy bean hay and thrashed enough soy bean seed for next year. Goode's success in growing hay lies in his system of farming. Soy beans were seeded behind a crop of crimson clover. Goode's next year's corn shift will be where soy bean hay was harvested.

Year round garden

Three communities of the county made a special effort to grow a year round garden. "a good well kept home garden on every farm" was their slogan. As the results 50 farmers have nearer a year round garden than ever before. Edward Friend, Richmond #7, has a garden that lives up to its name in full. Vegetables grown in this garden are as follow: Mustard, kale, turnips, snaps, peas, beets, car carrot, onions, sweet corn, pole beans, bunch beans, navy beans, cowpeas, white potatoes, sweet potatoes, cucumbers, tomatoes, squash, cabbage, musk melons and water melons.

Poultry breeding center

A poultry breeding center has been started on the farm of Walter Branch, Centralia. Forty high grade Plymouth Rocks were used in the breeding center. The year's production in eggs is 4814 or slightly over 400 dozen. This breeding center was developed in the county to produce conveniently for the farmers Barred Plymouth Rocks for breeding. Eggs as well as cockerels are being produced for breeding. "The chief objection we have against our flock of birds is, they will not sit" was the statement of Mrs Branch to Mr. F. S. Gammeck, Poultry Specialist, Hampton Institute, while on his inspection tour last Summer to see poultry breeding centers of Virginia.

Farm makers clubs

There are seven farm makers clubs doing active club work with in the following communities of Chesterfield county.

(Name)	President	Address
Chester club	Velmont Lewis	Chester #3
Centralia "	Edward Cheatham	Chesterfield C. H.
Drewrys Bluff club	Lindwood Branch	Drewrys Bluff
Nash "	Daniel Patron	Beach #1
Union Branch "	Ernest Surley	"
Mt. Nebo "	Josh Bonner	Richmond #9
Hallsboro "	Luther Harris	Hallsboro

These clubs have assisted in carrying out the club program of work for the year. Each club held three meetings and discussions were made relative to carrying out its local program of work. The credit is due largely to the influence of these clubs that 67 members were successful in completing their year's work. These clubs made plans for holding the county club rally, selected delegates for the state short course, and raised \$96.00 to pay expenses of delegates to and from the State short course, Hampton Institute. The short course funds were raised by the clubs sharing the profit from the sales of candy sold by club members and the profit from lawn parties.

Clubs were represented at the State short course by delegates as follow; Chester club 4, Centralia 4, Drewrys Bluff 5, Nash 2, Union Branch 6, and Mt. Nebo 6.

County rally

The farm makers club rally was held on the banks of the swift creek on Aug. 12, with an attendance of 70 members. The rally was held on the banks of the stream that members might have an excess to its natural coolness that goes with water and swamp trees. The features of the day were stunts and games. Mr. J. R. Thomas, Virginia Normal & Industrial Institute and Miss Adelle Dabney, County training school assisted with the games and stunts. The members brought their own lunch, which was served together. Ice-cream was served free by the county agent.

Members from five of the seven clubs attended the rally. This being their first and only opportunity of the year to meet and acquaint themselves with each other, and participate in stunts and games together, much enthusiasm was manifested by each one present. They went to their various homes as happy as they could be over the day's outing.

State short course

The junior agricultural short course took place at Hampton Institute on Aug. 18-22. Two hundred and nine boys and girls and junior club leaders attended this short course. Chesterfield county sent down a delegation of twenty nine. Delegates that attended this short were benefited by intensive instruction in seed corn selection, poultry culling and home makers' club activities. The Chesterfield county corn judging team won the fourth place in the State contest.

State Fair

The Chesterfield county farm makers' boys exhibited thirteen samples of corn and peanuts at the Va. state fair, Richmond and Tide water fair Suffolk. The following members won prizes: Velmont Lewis, Mac. Winston

... on corn. Freddie Lewis, Clarence
Wertha Reese on spanish peanuts. The total amount
members at State and Tide water fairs was \$22.66.

Jr. club corn

Seven demonstrations were completed, getting 288 bu. of corn. McField Winston, Richmond, #9, and Linwood Branch, Brewrys Bluff, have outstanding demonstrations. "Mac" produces 50 bu. and Linwood 45 bu. per acre. Both members seeded corn behind a fallow of crimson clover and used 300 lbs. 3-8-3 fertilizer per acre.

Jr. club peanuts

Six demonstrations were conducted with a yield of 210 bu. and an average of 35 bu. per acre. Melvin and Wertha Reese, Chester, harvested 40 bu. per acre respectively. 200 lbs of 2-8-2 fertilizer was used per acre.

Jr. club pigs

Six members completed pig fattening demonstrations during the year. The total weight of hogs when demonstrations were, 1038 lbs or an average of 173 lbs. The average number of pounds put on through demonstrations were 119. Kirkwood Harris, Brewrys Bluff, used a Grade Durco jersey pig in demonstration. His pig put on 116 lbs. during the fattening period, and Jno. T. Harris, Hallsboro, raised a Berkshire that put on 130 lbs.

Jr. club poultry

Forty two demonstrations were completed in poultry raising among the junior workers. Plymouth Rocks and Rhode Island Reds are in lead, although there are quite a few White Plymouth Rocks and Wyandottes raised. The club total production in poultry for the year was 487 birds. Josh Bonner, Pres. Mt. Hebo club, Richmond #9, raised 20 wyandottes. His profit was \$16.00. Angella Winston, Richmond #9, raised 28 Wyandottes. Her profit was \$21.30 Agnes Branch, Brewrys Bluff, raised 41 Barred Plymouth Rocks and her profit was \$33.00.

ANNUAL REPORT OF COUNTY EXTENSION WORKERS

This report form is to be used by county extension agents, such as county agricultural agent, home demonstration agent, club agent, and negro agent, reporting on their respective lines of work.

State Virginia County Chesterfield
 Report of R. F. Jones County Local Agent Agent.
(Name) (Title)
 From Dec. 1, 1924 Nov. 30, 1925.

If agent has not been employed entire year, indicate exact period. Agents resigning during the year should make out this report before quitting the service.

READ DEFINITIONS, PAGES 3 AND 4

NEGRO EXTENSION WORK
COUNTY AGENT WORK

Approved:

Date Dec. 9, 1925

John J. Charity
District Supervisor.

Date _____

State Extension Director.

SUGGESTIONS RELATIVE TO THE PREPARATION OF THE COUNTY EXTENSION AGENT'S ANNUAL REPORT.

The annual report should be a review, analysis, interpretation, and presentation to the people of the county, the State, and the Nation of the sum total of the extension activities in each county for the year and the results obtained by the county extension agent assisted by the subject-matter specialists. The making of such a report is of great value to the county extension agent and the people of the county in showing the progress made during the year as a basis for future plans. It is of vital concern also to the State and Nation as a measure of rural progress and a basis for intelligent legislation and financial support.

Separate statistical and narrative reports are desired from each county extension agent in charge of a line of work, such as county agent, home demonstration agent, boys' and girls' club agent, and negro agent. Where an assistant agent has been employed a part or all of the year, a report on his or her work should be included with the report of the leader in charge of that line of work. Where an agent in charge of a line of work has quit the service during the year, the information contained in his or her report should be incorporated in the annual report of the agent on duty at the close of the report year, and the latter report so marked. Where two or more extension agents are employed in a county, each in charge of a line of work, care should be exercised to avoid including the same data in the statistical report of more than one agent.

At least four copies of the annual report should be made: One copy for the county officials, one copy for the agent's files, one copy for the State extension office, and one copy for the Extension Service, United States Department of Agriculture. The report to the Washington office should be sent through the State extension office.

NARRATIVE SUMMARY.

The narrative report should be a statement in orderly fashion and arranged under appropriate subheadings, of the work done, methods used, and results obtained under each project, as well as of the general work accomplished. Every statement should be clear-cut, concise, forceful, and, where possible, reinforced with ample data from the statistical summary. In the preparation of the part of the report relative to each project, the results reported in the statistical summary for the project should be analyzed, conclusions drawn, and recommendations made. The report may well be illustrated with photographs, maps, diagrams, blue prints, or copies of charts and other forms used in demonstration work. Full credit should be given to all cooperating agencies. The lines should be single-spaced, with double space between the paragraphs, and reasonably good margins left. The pages should be numbered in consecutive order.

The following outline is suggestive of how the narrative report may be clearly and systematically presented:

SUGGESTIVE OUTLINE OF ANNUAL NARRATIVE REPORT.

- I. Cover and title page.
- II. Table of contents.
- III. Status of county extension organization.
 - (1) Form of organization—changes and development.
 - (2) Function of local people, committees, or project leaders in developing the program of work.
 - (3) General policies, including relationships to other organizations.
- IV. Program of work, goals established, methods employed, and results achieved.
 - (1) Factors considered and methods used in determining program of work.
 - (2) Project activities and results.
 - (a) Soils
 - (b) Farm crops
 - (c) Horticulture
Home gardens
Besettification of home grounds
 - (d) Forestry
 - (e) Rodents, predatory animals, and birds.
 - (f) Animal husbandry
 - (g) Dairy husbandry
Home dairy
Poultry husbandry
 - (h) Home poultry

(including diseases and insects).

SUGGESTIVE OUTLINE OF ANNUAL NARRATIVE REPORT—Continued.

IV. Program of work, etc.—Continued.

(2) Project activities and results—Continued.

- (k) Rural engineering.
- (l) Rural engineering—home.
- (m) Agricultural economics, including farm management and marketing.
- (n) Home marketing.
- (o) Foods.
- (p) Nutrition.
- (q) Clothing.
- (r) Home management.
- (s) House furnishings.
- (t) Home health and sanitation.
- (u) Community activities.
- (v) Miscellaneous.

V. Outlook and recommendations, including suggestive program of work for next year.

VI. Summary of activities and accomplishments, preferably of one or two typewritten pages only, placed at the beginning or end of the narrative report.

STATISTICAL SUMMARY.

To supplement the narrative part of the report, and in order that comparable State and National summaries may be made, it is necessary to include a statistical summary of the work in each county. The following form has been prepared to insure uniformity of reporting. In addition to the questions asked under each subdivision of the report, space is provided to add further data if desired. The statistical summary will grow naturally out of the field and office records.

DEFINITIONS OF TERMS USED IN THIS REPORT.

1. A PROGRAM OF WORK is a definitely outlined plan for extension work.
2. A PROJECT is a definite, systematic, organized plan for carrying out some phase of the extension program of work, providing for what is to be done, how much, when, where, how, and by whom.
3. MISCELLANEOUS WORK includes work which has not yet become a regular part of the program of work—work other than project work.
4. A COMMUNITY, for the purposes of this report, may be any one of the several units into which the county is divided for purposes of conducting organized extension work.
5. A PROJECT LEADER OR LOCAL LEADER is a person, selected because of his or her special interest and fitness, who functions as a leader in advancing some phase of the local program of extension work.
6. A DEMONSTRATION is an example designed to show the practical application of an established fact. Demonstrations as contemplated in this report are of two kinds, method demonstrations and result demonstrations.
 - A method demonstration is a demonstration given by an extension worker or other trained leader to a group for the purpose of showing them how to carry out a practice. Synonym: Lecture demonstration. Examples: Demonstrations of canning, mixing of spray materials, and culling of poultry.
 - A result demonstration is a demonstration carried on by a farmer, farm woman, boy, or girl under the direction of the extension service, involving a substantial period of time, records of results, and comparisons. Examples: Child-feeding, corn-culture, and orchard-management demonstrations.
7. A DEMONSTRATOR is a farmer, farm woman, boy, or girl who, under the direction of the extension service, conducts a result demonstration.
8. MEMBERS COMPLETING should include those who have satisfactorily finished the work outlined for the current year.
9. A DEMONSTRATION MEETING is a meeting held to give a method demonstration or to start, inspect, or further a result demonstration.
10. A TRAINING MEETING is a meeting at which project leaders or local leaders are trained to carry on extension activities in their respective communities.
11. AN OFFICE CALL OR TELEPHONE CALL is a visit or call by a farmer or other person seeking agricultural or home economics information, as a result of which some definite assistance or information is given.
12. A FARM VISIT is a call at a farm by the agent at which some definite information is given or concrete plan of work outlined, or some valuable information obtained from the farmer regarding his work, or the better practice prevailing in his neighborhood.
13. A HOME VISIT is a call at a home by the agent at which some definite information is given or concrete plan of work outlined, or some valuable information obtained from the farm woman regarding her work, or the better practice prevailing in her neighborhood.
14. DAYS IN OFFICE should include time spent by the county agent in his office, at county agent conferences, and any other work directly related to office administration.
15. DAYS IN FIELD should include all days spent on official duty other than those spent in office.
16. LETTERS WRITTEN should include all single letters on official business.

4

DEFINITIONS OF TERMS USED IN THIS REPORT—Continued.

17. A **FARMERS' INSTITUTE** is one of a series of meetings of one to two days' duration, arranged by a central State farmers' institute agency, at which agricultural and home-economics problems are discussed, usually by outside speakers employed for the purpose.
18. AN **EXTENSION OR MOVABLE SCHOOL** is an itinerant school usually of two to six days' duration where practical but systematic instruction is given to persons not resident at the college. AN **EXTENSION SHORT COURSE** differs from an extension school in that it is usually held at the college or other educational institution and usually for a longer period of time, but not exceeding two weeks.
19. **RECORDS** consist of definite information filed in the county office that will enable the agent to verify the data on extension work included in this report.
20. **FAIR OR HOME PRACTICE ADOPTED** is a new or improved practice adopted on a farm or in a home during the year as a result of extension teaching. Examples: Spraying of potatoes for disease, canning of fruits and vegetables, use of balanced rations, and hat making.

GENERAL ACTIVITIES.

Report only this year's extension activities and results that are supported by records.

If an assistant agent has been employed during the year, include his or her work with that of the agent.

1. List below the names, titles, and periods of service of the county extension agents whose work is included in this report. 1
