TABLE OF CONTENTS.

- I. Status of County Extension Organization.
- (1) Form of Organization.
 - (2) Committees in Developing Program of Work.
 - (3) General Policies.
- II. Program of Work, Goals Established, Methods Employed and Results Achieved.
- (1) Factors Considered and Methods Used in Determining Program of Work.
 - (2) Project Activities and Results.
 - (a) Soils, Including Commercial Fertilizer, Farm Manure, Green Manure Crops, Lime and Rotation of Crops.
 - (b) Farm Crops, Including Cereals, Legumes and Forage Crops, Tobacco and Cotton, also Diseases and Insects.
 - (c) Horticulture, Home Orchards and Vineyards, also Spraying.
 - (d) Forestry, Prevention of Forest Fires and Conservation and Preservation of Young Growing Timber and Wood.
 - (e) Animal Husbandry
 - (f) Dairy Cattle
 - (g) Swine
 - (h) Poultry
 - (i) Bedants.
 - (j) Rural Engineering, Clearing Land of Stumps, Tractors and Farm Machinery, Steel Corn Cribbs, Buildings, etc.
 - (k) Agricultural Economics- Including Farm Management and Marketing.
 - (l) Community Activities, School Leagues and School Cafeteria.
 - (m) Miscellaneous.
- III. Out look and Recommendations, Including Suggestive Program of Work for Next Year.
- IV. Summary of Activities and Accomplishments.

STATUS OF COUNTY EXTENSION ORGANIZATION.

Until probably there has been no County Extension Organization in Henning County. During the Fall of 1922, the County Agent under the recommendation of the Extension Division, after consulting a number of the leading citizens in the County, visited a representative number of farmers, bankers, school men and others, and talked to them in regard to getting out an Agricultural Advisory Board for the County. The idea received favor, and the Advisory Board was officially appointed by Mr. W. F. Moore, Assistant Director of Extension of the State of Virginia.

The Board consists of fourteen farmers, two being appointed from each legislative district in the County, two bankers, two principals of high schools, the Superintendent of Public Instruction, the Rich-Hughes teacher, the Chairman of the Board of Supervisors, the Delegate to the House of Representatives and the County Agent.

The first meeting of the Agricultural Advisory Board was held on November 16th-1 four men being present. A president and secretary were elected, Mr. F. S. Barrer, District Agent was present and outlined the object and purpose of the Board. A round table discussion of the needs and possibilities of the County followed, and committees were appointed on economic production, thrifty, and the production of cotton.

The plan for the next meeting was set for January 18th, 1924, when the five year program for agriculture for the County and the plan of work for the County Agent will be taken up and worked out.

PROGRAM OF WORK, GOALS ESTABLISHED, METHODS EMPLOYED, AND RESULTS OBTAINED.

In making out my Plan of Work for the County for the year 1923 I ever considering the size and extent of the Extension Division the purposes and objects for which it was created and reviewing the needs of the County, and establishing in my mind the available personnel I began as follows: That important thought and aim building better communities and making farmer people happier, by making the farm more profitable.

My of doing so: By working through and with organizations and with individual farmers, and endeavoring to build up leadership. My plan of work included demonstrations with both boys and girls, and adult farmers, in farm steps adapted to this section, livestock and poultry; the general improvement of soils, home orchards, rural engineering and marketing.

Plan of Work for Lunenburg County for 1925.
By E. G. Stokes, County Agent.

Goal Set.	Results Obtained.
I. 6 Organized Boys' and Girls' Clubs in County, Membership 128	4 97
4 Major Projects in Club Work.	4
A. Corn, 30	7
B. Pig (Breeding, (Sow & Litter), 8	14
C. Poultry, 30	34
D. Soy Beans, 10	18
II. Adult Farmers.	
A. Corn, 18	18
B. Alfalfa, 30	18
C. Wheat, 7	4 Certified,
D. Oats, 7	1 "
E. Crimson Clover, 30	14
F. Soy Beans, 30	7
G. Cowpeas, 30	8
H. Orchards (Pruning, 35	30 (Spraying, 5)
I. Vineyards (35	9 1)
J. Pastures, 18	14
K. Linn, 30	35 (15 cows used)
L. Improvement of Soils by use of Legumes and Cover Crops, About double the usual amount of Legumes and Cover Crops were seeded this year.	
M. Better Livestock and Poultry, by the use of Pure bred Sires. 5 Pure Bred Female Dairy Cattle, 5 Pure Bred Dairy Bulls, 11 Pure Bred Sows, 9 Pure Bred Boars and 15 head of Native Poultry and 1 500 Baby Chicks of Standard Bred White Leghorns.	
III. Tobacco Growers' Association. Loyalty Good and membership increasing. Organization and Activity of Locals. Production Program. Diversified Farming and the Production of Home Supplies. Economic Production. Pro- ducing Better Tobacco. Selecting Land Best Adapted to Tobacco, and Mak- ing Plans and Preparations the Preceding Year, by Seeding to Legumes and Cover Crops where necessary. Selecting Variety Best Adapted to Land Early Seeding of Plant-Beds, and Sowing of Tobacco seed. Early Break- ing and thorough Preparation of Land for Planting. Use of High Grade Fertilizer, or Such as is Best Adapted to Land. Prompt and Intensive Cultivation, Using Best methods of Harvesting, Curing and preparing for Marketing.	
IV. Farmers' Union. Cooperating and Working with Farmers' Union.	
V. Cooperating with School Leagues and County Councils of Rural Agencies.

I consider the improvement and building up of soils the foundation of agriculture. No building can stand without a firm foundation; likewise no agricultural section can prosper with poor soils. Lime, Legumes, and acid phosphate, along with farm manure, fallow crops and the proper rotation of crops, are the foundation of successful farming. Considerably more interest is being taken along these lines in the county than ever before.

There were fifteen cars of agricultural lime used in the county this year; while in previous years there have been only used from five to eight cars used. The establishing at three points in the county of storages, where lime may be obtained in small quantities and at any time has aided greatly in the more general use of lime.

There being a fertilizer factory in the county, commercial fertilizer is being used more advantageously and extensively than formerly. Farmers can get practically any analysis of fertilizer they wish, consequently very little home mixing is done. Considerable quantities of Nitrate of Soda is being profitably used for top dressing most farm crops, including corn, cotton, small grains and grasses, and is increasing the yields from 25% to 100%. One farmer reported an increase of from 5 $\frac{1}{2}$ to 7 barrels of corn to the acre, and another reported doubling the yield of cotton, by the use of 200 lbs. of Nitrate of Soda to the acre.

Farm manure is better conserved and more economically used than heretofore. There are six or eight farmers owning manure spreaders in the county.

The value of green manure and fallow crops is being more appreciated, and the seeding of these crops is increasing from 25% to 50% yearly.

The majority of farmers in the county practise some form of crop rotation, but this can be improved.

Farm crops generally are improving both in yield and quality, as the farmers of the county are taking considerably more interest in better seeds. Four farmers are growing certified wheat, one certified oats, and one certified soy beans, besides thirteen club members who grew 56 bushels of certified Virginia soy beans this year from five bushels of seed given them by the Virginia Crop Improvement Association.

The growing of legumes and forage crops is increasing; especially alfalfa, soy beans and peas. Most farmers produce sufficient quantities for home consumption, and a few are selling a small quantity of surplus. I desire to see an acre of alfalfa for every work animal on each farm in the county.

Tobacco is the money crop in South-Side Virginia; but very few farmers, owing to the advanced standard of living, the influx of the automobile, and the auction system of marketing tobacco, are realizing enough money from this crop to keep even with the world.

The scarcity of tobacco plants in the Spring, with the indication of a short crop, induced a dozen farmers in the county to plant 75 acres in cotton this year. The results were very satisfactory, with yields ranging from one half bale to one bale of lint cotton per acre. This is the largest acreage of cotton that has been planted in the county since the Civil War, and marks a new era for diversified farming in this section.

Inoculation and treating of seed, and spraying and poisoning for disease and insects is practiced to a small degree, and will increase as the need demands it.

This is not a commercial orchard and fruit growing section, but interest is increasing in the care of the home orchard and vineyard. The County Agent assisted 50 farmers in pruning 1500 fruit trees and grape vines; five farmers spraying, and two farmers mixing and boiling Lime Sulfur Solution. A number of other farmers pruned and sprayed their orchards, as a result of previous County Agent work.

The County Agent cooperates with the fire warden of the county, in the Forestry Department along educational lines in regard to protection from forest fires, and the preservation and conservation of young growing timber.

Although this section is very suitable for dairying, very little is being done. There is only one herd of registered dairy cattle in the county. This herd consists of 25 Guernseys, six of which are on test. Considerably more interest is being taken by farmers in pure bred cattle. Five females and three bulls have been secured by four different farmers this year.

During the past five years the improvement of hogs in the county has been marked. The improvement is largely due to the results of boys' and girls' club work. There are the excellent hams, the three-fermy and one Poland China, in the county. Within the year 1928 nine pure bred boars and eleven pure bred sows have been secured.

There is a great outlook for poultry in this section.

Within the past three years there have been built up in the county ten nice flocks of poultry, headed by club members having small flocks, consisting of 2800 birds of the most popular standard bred varieties. Fifteen native birds and 1800 baby chicks have been secured this year.

Interest is growing in rural engineering and the use of labor saving farm machinery. Two traveling demonstrations will be put on the first of December, covering twenty acres of land. Two water systems are also planned to be installed, bringing water from springs to the dwellings, by use of hydraulic pumps or other suitable means. Not so much land is being cleared as usual, but farmers are taking a great deal more interest in building up worn-out lands and ridding land of stumps. Four farmers have gotten the stumps out of 46 acres of land. One of the farmers bought a stump puller, which is geared up and operated by a Fordash tractor. A demonstration was held which proved very satisfactory. With this machine it is estimated that the average stump land, that has been cleared for eight or ten years, may be cleared of stumps at the cost of \$15.00 per acre. I assisted one farmer in putting up a steel corn crib this year. Steel cribs and the fast-growing of corn cribs is gaining in popularity in the county. One farmer who raises a great deal of alfalfa is figuring on building a large hay shed, purchasing a power baler so that he can more easily dispose of his alfalfa hay. Five poultry houses and three hog houses were built this year, and thirty a number remodelled and repaired.

The occupation of one school and a number of farmers was secured in the past campaign the past winter. 300 pigs were reported killed, with the estimated saving of \$600. to farmers.

Thirty farm account books were distributed to farmers. Ten farmers were advised relative to loans. Farmers generally are making better use of labor by using more labor saving machinery. The use of tractors is growing—ten being purchased by farmers in the county this year.

The county agent has cooperated with a number of farmers in an advisory way, in regard to securing farm credit. Most of the farm credit in this county has been secured through the Federal Land Bank of Baltimore. More than \$540 000. having been secured by 160 farmers in the county during the past year.

The Farmers' Union of Lunenburg County has a membership of 100, who have bought over \$1 000. worth of goods at a saving of more than \$300. Cooperative buying has not been practiced as extensively as it should, among farmers, but I am glad to say that it is increasing. The Farmers' Union Local at Viteria, Va., have recently completed a line bin, where they keep line stored, so that farmers can get it at any time and in any quantity they wish. This is going to be a great convenience to the farmers of this neighborhood.

The Tobacco Growers' Cooperative Marketing Association of Virginia, North and South Carolina, has a membership of 1400 in this county; also a delivery point at Kenbridge, where they received during the season of 1922-23, the first year of its operation, a little over 8 000 000 lbs. of ~~KANSAS~~ the 1922 crop of tobacco, which was approximately half of the tobacco marketed at Kenbridge, for that season. The Association is also receiving tobacco this season, and is getting better deliveries than it did last. The saving to the farmers, both members and outsiders, on account of the Tobacco Growers' Association, can not be ascertained, because the Association has not as yet made a full settlement to its members; and it is uncertain what the price of tobacco would have been had it not been for the Association. It has been stated in a report of the Federal Reserve Bank, that the tobacco farmers in the three states of Virginia, North and South Carolina will receive, at the close of the first year's operations of the Association, \$40 000 000. more than they would have received, had it not been for the Association.

Practically every school in the county has a school league with which the County Agent has worked and cooperated at every opportunity. The organization of a Parent Teachers' Association in the Kenbridge High School is the biggest project of this kind that has been put on in the county. At my suggestion Mrs. Semmes, State President, came down and organized. The Association has been successfully operating, since its organization, last fall, a cafeteria. For the first month this cafeteria was run on an experimental basis, at which time I lent a good deal

COLLEGE AND POLYTECHNIC INSTITUTE
AND UNITED STATES DEPARTMENT OF
AGRICULTURE, COOPERATION

EXTENSION SERVICE

9

of assistance. The first month justified the employment of a paid worker, whose salary comes out of the proceeds of the cafeteria. I know of no more pleasing sight than to walk in at the noon hour and see 150 children drinking hot cocoa, soup and milk along with their lunches. This Association also raised last session \$400., with which it purchased a very handsome valour stage curtain. I had Mr. F. A. Metz, Extension Specialist, from Blacksburg, Va., here last spring to lay off the grounds. The carrying out of Mr. Metz's plans constituted the Association's big project for the session 1933-34.

The perfecting of the Tobacco Growers' Cooperative Marketing Association, economic production in all lines of farming, a more diversified system of farming, and a more systematic practice of thrift by the whole farm family, are the greatest hope, for a happy, contented and prosperous farming people in this section of the state.

ANNUAL REPORT OF COUNTY EXTENSION WORKERS SPECIAL EDITION

This report form is to be used by county extension agents, such as county agricultural agent, home demonstration agent, club agent, negro agent, etc., reporting on their respective lines of work.

State Virginia County Lunenburg
Report of E. J. Stokes County Demonstration Agent.
(Name) (Title)
From Nov 30, 1922 to Nov 30, 1923.

If agent has not been employed entire year, indicate exact period. Agents resigning during the year should make out this report before quitting the service.

SUGGESTIONS RELATIVE TO THE PREPARATION OF THE COUNTY EXTENSION AGENT'S ANNUAL REPORT.

The annual report should be a review, analysis, interpretation, and presentation to the people of the county, the State, and the Nation of the sum total of the extension activities in each county for the year and the results secured (including assistance rendered by subject-matter specialists). The making of such a report is of great value to the county extension agent and the county people in showing the progress made during the year as a basis for future plans. It is of vital concern also to the State and Nation as a measure of rural progress and a basis for intelligent legislation and financial support. This blank form covers simply the statistical phases of the report, and should be supplemented by a full report in narrative form.

NARRATIVE SUMMARY.

The narrative report should be a statement in orderly fashion and arranged under appropriate subheadings, of the work done, methods used, and results secured under each project, as well as of the general work accomplished. Every statement should be clear-cut, concise, forceful, and, where possible, reinforced with ample data from the statistical summary. In the preparation of the part of the report relative to each project, the results reported in the statistical summary for the project should be analyzed, conclusions drawn, and recommendations made. The report may well be illustrated with photographs, maps, diagrams, blue prints, or copies of charts and other forms used in demonstration work. Full credit should be given to all cooperating agencies. The lines should be single-spaced, with double space between the paragraphs, and reasonably good margins left. The pages should be numbered in consecutive order.

The following outline is suggestive of how the narrative report may be clearly and systematically presented:

SUGGESTIVE OUTLINE OF ANNUAL NARRATIVE REPORT.

- I. Cover and title page.
- II. Table of contents.
- III. Status of county extension organization.
 - (1) Form of organization—distinctive features.
 - (2) Function of local people, committees, or project leaders in developing the program of work.
 - (3) General policies, including relationships to other organizations.
- IV. Program of work, goals established, methods employed and results achieved.
 - (1) Factors considered and methods used in determining program of work.
 - (2) Project activities and results.
 - (a) Soils.
 - (b) Farm crops
 - (c) Horticulture } (including diseases and insects).
 - (d) Forestry
 - (e) Animal husbandry
 - (f) Dairy husbandry } (including diseases and pests).
 - (g) Poultry husbandry
 - (h) Rural engineering.
 - (i) Rodents, predatory animals, and birds.
 - (j) Agricultural economics—including farm management marketing, etc.
 - (k) Foods and nutrition.
 - (l) Clothing and millinery.
 - (m) Home health and sanitation.
 - (n) Household management and home furnishings.
 - (o) Community activities—other than those included under subject-matter headings.
 - (p) Miscellaneous.
- V. Outlook and recommendations, including suggestive program of work for next year.
- VI. Summary of activities and accomplishments in paragraph form, preferably of one or two typewritten pages only, placed at the beginning or end of the narrative report.

STATISTICAL SUMMARY.

To supplement the narrative part of the report, and in order that comparable State and National summaries may be made, it is necessary to include a statistical summary of the work in each county. The following form has been prepared to insure uniformity of reporting. In addition to the questions asked under each subdivision of the report, space is provided to add further data if it is desired. The statistical summary will grow naturally out of the field and office records.

DEFINITIONS OF TERMS USED IN THIS REPORT.

1. A PROGRAM OF WORK is a definitely outlined plan for extension work.
2. A PROJECT is a definite, systematic, organized plan for carrying out some phase of the extension program of work, providing for what is to be done, how much, when, where, and by whom.
3. MISCELLANEOUS WORK includes work which has not yet become a regular part of the program of work—work other than project work.
4. A DEMONSTRATION is an example designed to show the practical application of an established fact. Demonstrations may be of methods or of results.
 Under method demonstrations include lecture demonstrations, practicums, etc., such as demonstrations of canning methods, home-mixing fertilizers, poultry culling, dross-form making, and the like, all involving short periods of time.
 Under result demonstrations include demonstrations in which a substantial period of time is involved, records of results kept, and comparisons made, as in a child-feeding demonstration, corn-culture demonstration, pasture-improvement demonstration, and the like.
5. A DEMONSTRATOR is an adult or junior who, under the direction of the extension service, undertakes to show in his community by example the practical application of an established fact, and who keeps records and reports on the same.
6. A COMMUNITY, for the purposes of this report, may be any one of the several units into which the county is divided for purposes of conducting organized extension work.
7. A PROJECT LEADER OR LOCAL LEADER is a person, selected because of his or her special interest and fitness, who functions in advancing some phase of the local program of extension work.
8. A COMMUNITY CLUB is an organization of men, women, boys, and girls to further community interests and to promote community recreation.
10. AN OFFICE CALL is a visit or a telephone call by a farmer, or other person, seeking agricultural or home economics information, as a result of which some definite assistance or information is given.
11. A DEMONSTRATION MEETING is a meeting held to give, inspect, or further a demonstration.
12. A TRAINING MEETING is a meeting at which project leaders or local leaders are trained to carry on extension activities in their respective communities.
13. A FARM VISIT is a call at a farm by the agent at which some definite information is given or concrete plan of work outlined, or some valuable information obtained from the farmer regarding his work, or the better practice prevailing in his neighborhood.
14. A HOME VISIT is a call at a home by the agent at which some definite information is given or concrete plan of work outlined, or some valuable information obtained from the farm woman regarding her work, or the better practice prevailing in her neighborhood.
15. DAYS IN OFFICE should include time spent by the extension agent in office in connection with extension work.
16. DAYS IN FIELD should include all days spent on official duty other than those spent in office.
17. LETTERS WRITTEN should include all single letters on official business.
18. A FARMERS' INSTITUTE is one of a series of meetings of one to two days' duration, arranged by a central State farmers' institute agency, at which agricultural and home economics problems are discussed, usually by outside speakers employed for the purpose.
19. AN EXTENSION OR MOVABLE SCHOOL is an itinerant school usually of two to six days' duration where practical but systematic instruction is given to persons not resident at the college. A SHORT COURSE differs from an extension school in that it is held at the college or other educational institution and usually for a longer period of time.
20. RECORDS consist of definite information filed in the county office that will enable the agent to verify the data on extension work included in this report.

GENERAL ACTIVITIES.

Report only results of extension activities that are supported by records.

1. List below the names, titles and periods of service of all county extension agents whose work is included in this report.

E. H. Stokes (Name) County Agent (Title) One year (Period of service) 12

2. Total number of communities in county where extension work should be conducted (a) Men Polk County 30
 (b) Women 30
 3. Number of communities in which extension program has been cooperatively worked out by extension agents and people concerned Only 20 out of 30
 4. Number of voluntary county, community or local leaders actively engaged in forwarding the extension program

(a) Adult work Men 2 Women 2
 (b) Junior work Boys 3 Girls 5

5. What is the name of the county organization cooperating in extension work? Agricultural Giving Council

31. Number of such demonstrations completed or carried through the year	52	30
32. Number of acres involved in those completed demonstrations	547	40
33. Total* number of farms influenced by extension work to change practices relative to soil management (include demonstrations)	87	41
34. Acres involved in preceding question	1215	42
35. Number of farms following advice in the use of commercial fertilizer	28	43
36. Acres involved in preceding question	540	44
37. Number of farms home-mixing fertilizers according to advice	0	45
38. Tons of fertilizer so mixed	0	46
39. Number of farms taking better care of farm manure	7	47
40. Number of farms using lime or limestone according to advice	39	48
41. Tons of lime or limestone so used <i>15 tons</i>	500	49
42. Number of farms plowing under cover or other green manure crops for soil improvement according to advice	18	50
43. Acres of cover and green manure crops so plowed under	450	51

[Use space below to include other important data relating to soils.]

The use of lime has been doubted in the county this year on any persons one.

* This question includes the farms listed under questions 33, 34, 37, 40, and 41, but does not necessarily equal the total of these questions since not all soil practices that might be included in question 41 are listed and also one farm might adopt two or more new practices. This is also true of similar questions throughout this report.

5
