

Division On Extension Work of Virginia Agricultural and
Mechanical College.

Annual Report of County Agricultural Agent J. C. Stiles.

For Hanover County, Virginia, for the year 1926.

Period of Time Covered - Dec. 1st. 1925

To Dec. 1st. 1926.

nothing to index

Narrative Report.

COUNTY AGENT WORK

The County Agent began work for 1926 with the idea that there had not been enough publicity given to the work of the county agent in the past and that more publicity should be given so that farmers would know just what the agent was doing.

With this in mind a weekly article was written for the county paper . In this article it was aimed to tell the out standing things that was farmers were doing that brought success to them in some particular line. Also the general activities of the agent were given, mixed with a few jokes and personal notes about men and women who would not resent but rather appreciate such remarks and whose influence and standing was unquestioned.

Some timely information such as treatment of wheat to prevent smut, seed selection etc. was thrown in at times .

I find that nearly every one reads this kind of dope and have had farmers to ask me when was their turn coming. Have had men to send for me to come by and would find that they only had some particularly successful undertaking that they wanted to show me or tell me about.

This kind of "dope" is read by those who would never read an ordinary article and in addition the editor seems to appreciate it very much.

Two samples of these weekly notes are attached here to.

Such publicity is without doubt worth while.

It has its drawbacks however. The county agent has received more calls, requests for visits, this year than ever before which breaks into any plan of work that may be made. On the whole however, however, I think it pays.

COUNTY AGENT WORK

Poultry work.

There were five Farm Flock Demonstrators who carried their flocks through the year and kept records, made reports etc. according to Extension recommendations. Mr Corman, the poultry Specialist, visited the county and visited these demonstrators with the county agent. Each of the five was visited several times during the year and aided in culling, feeding etc. by the agent. One of these demonstrators, Mrs J. M. Rice of Beaver dam, has been in the work some three or more years. She is a better demonstrator than some of the others and some 10 or more of her neighbors have begun to call on the County Agent for help and to follow his recommendations.

In addition to the above the county agent has received some 30 applications for culling demonstrations all of which have been given.

24 of the flocks culled had a total of 2579 birds. 740 birds were culled out of this number.

Some 19 or more calls were received for information on poultry other than culling and feeding.

Two demonstrations were given in caponizing..

One farmer with 60 birds called on the agent for help in culling and feeding. The agent culled 20 of the 60 birds, leaving only 40 and advised as to feed and general care. The farmer informed the agent about a week later that he had gotten only 1 egg from the 20 and about 18 a day from the 40.

Due to the publicity given to the results of poultry culling the agent continually receives requests for aid in culling the the season for culling has been over for more than two months.

Many requests have been received also as to preventing and treating diseases and insect pests of poultry.

Swine.

One pure bred boar was placed in the county from adjoining county.

There were more calls on the county agent relative to hogs than for any year since the work began in the county.

There were some 30 calls on the agent during the year relative to hogs. About 24 of these were for information as to sick hogs.

37 herds were inoculated against cholera. 359 hogs were treated in all. Some 8 to 10 cases of cholera at least were successfully checked in this way at a probable saving of several thousand dollars to the hog raisers of the county.

Sheep.

Four demonstrations were given in docking and castrating lambs, 37 animals were handled in this way.

The work that has been done in this line in the past has made it necessary for those who sell on the Richmond market to castrate and dock if they wish to get the top price.

Five demonstrations were given in treating sheep for stomach worms. 109 animals in all. The owners of these flocks expressed their satisfaction as to the beneficial results of this treatment. A second treatment was given these flocks in each case by the county agent or the owner. A bottle was marked giving the dose measurement and full instructions left for preparing the solution.

Cattle.

The agent induced three dairymen to join cow testing associations and accompanied one dairyman to another part of the state and aided in picking out 48 head of cattle which he bought.

A great deal of advice was given as to simple treatment of cows for the common troubles that they have.

A great deal of publicity was given to treating and cleaning seed wheat. One miller (The largest in the county) at the request of the County Agent, installed a barrel outfit for treating seed wheat that farmers could use themselves when they came to his mill to have seed wheat cleaned. He also sold copper carbonate dust for 20 cents per pound when some drug stores were charging 60 cents per pound. He handled 175 pounds in this way. One other miller kept the carbonate on hand and cleaned seed wheat and advised farmers to treat. He also was requested to do this by the County Agent. He sold 50 pounds of the carbonate of copper. Probably as much more copper carbonate was purchased by Hanover County Farmers in Richmond. Very few used the barrel outfit installed by the miller as they seemed to prefer treating the wheat themselves at home. Most of them put the wheat in a barrel and rolled it around.

Blue stone solution was used by a great many as they have been using it successfully for a long time. Many were treated with blue stone than with the carbonate dust but some are discarding the blue stone dipping method for the dry dust method. Practically all those who treated last year with the dust had excellent results. Several did not get enough to treat all their seed and the smut could all ways be found where the untreated seed was used. People going through a field would notice the line between the treated and untreated seed as the wheat was being cut. The only injurious effect we noticed from the treated seed was where a farmer seeded near his house and where the drill did not cover the chicken s picked it up. He lost quite a number and it seems that the carbonate on the wheay killed them. There was no injury to the drills so far as have been able to learn.

There were only 10 demonstrators in corn. Five or six others might be classed as demonstrators the they were only indirectly influenced by the county agent. Fewer of these men have gathered yet as it seems to be necessary to get a corn husker now to do the husking and shredding. One of these men who used ideal methods, made an average on 82-1/2 bushels on a 10 acre lot. He paid for husking it and so much per barrel so the measurement was more than likely correct.

Another who used good methods and worked more intensively on a three acre lot made 85 bushels to the acre. Both these men used stable manure freely. They also used the same seed.

They did not however keep an accurate expense account however or a record of the work done.

Alfalfa.

The past two seasons have been very unfavorable ones for alfalfa.

Several growers have become discouraged and given up a part or all of their alfalfa for some other crop.

There are some 15 men still doing good work with this crop.

Some dairymen are claiming that they get more milk from the use of soybeans (hay) for cow feed than alfalfa. The soy beans will grow on poorer land and in many instances seem to give more hay per acre than the alfalfa. They also require less lime.

Soy beans.

The acreage of soy beans has increased very much in the county in past two years. This is probably due in part to the work of the county agent.

The 1926 crop was with doubt the best one ever grown in the county.

We find that where ever a club member has started in beans the parent nearly always continues to grow the crop whether the club member makes a report or not. The Laredo and Virginia varieties have been advocated by the county agent. The soy bean seems likely to take the place of the cow pea for hay. More beans will likely be threshed for ^{grain} ~~hay~~ this year than ever before tho they bid fair to be much cheaper.

Club Work.

The enrollment for the year was as follows.

19 in corn club, 2 in soy beans, 5 in Cure bred pig and 16 in poultry club. Four corn club boys have reported, 2 soy bean boys, 2 in pig club and 2 in poultry club.

The best yield of corn was 50 bushels at a cost of 59-2/3 cents per bushel. Next best yield was 42-1/2 bushels at a cost of 68 cents per bushel.

One soy bean club boy reported a yield of 22 bushels to the acre.

One 2nd year poultry club member reports a net profit of \$23.00.

She began the year with 9 pullets and a cockrell. She has 20 pullets now in addition to the hens and is caring for the home flock along with her own.

The 4th Thrift Club was organized this year by the County Agent with 100 members. The County Bankers Assn cooperated with the County Agent in the organization of this club in the schools of the county.

Record books were prepared by the county agent and the same were printed by the Bankers Assn and distributed by the county agent and the banks.

Pupils from the 6th grade up were enrolled. They are required to keep a record of all receipts and expenses for one year beginning May 1st and ending April 30th.

Prizes or awards are to be made on the following score card

For faithfully and accurately keeping a record of all receipts and

expenses	20%
Proportion of money saved out of money earned	50%
" " " " " " " " given you	20%

Neatness	5%
----------	----

Written story of how I saved	5%
Total	100%

The following prizes are to be awarded annually. 1st. \$15.00, 2nd \$10.00 \$5.00. In addition to above the pupil who makes the best record for four years is to receive a \$250.00 scholarship to one of the state colleges.

77
The Thrift Club was organized with the hope that it would add to the club interest, get a hold on the school pupils and increase enrollment in agricultural projects.

So far it does not seem to have added to the club enrollment.

The almost entire lack of cooperation on the part of the school teachers of the county make it difficult to carry on club work.

There is no opposition to the work, only indifference and no active support from the school superintendent down.

Farm Book Keeping.

Through the cooperation of the leading bank in the county, The Hanover National Bank of Ashland 100 of the farm account books gotten out by the Extension division have been distributed to those who have agreed to keep them. These books contain an offer of \$50.00 in prizes from the Hanover National Bank for the best kept record books. Only some 14 to 15 of these books are being kept in a complete way so far as we know.

Some are doubtless being kept but the farmers keeping them are a bit shy of letting others know their personal affairs.

One farm account school was held in Ashland at the above mentioned Bank. Mr Pickard of the Extension Division came to the school and made a talk and a round table discussion was held.

Many questions were asked by the 12 who attended. Mr Pickard also came to county one day and with the county agent visited those who had requested help in keeping their accounts.

This project is work being classed as a major project for 1927. The bank here has offered to keep farm accounts for \$1.00 per month for those of its customers who will pay by check etc. provided 20 farmers can be induced to go into the project for 1927. An effort is being made to enroll 20 or more in this project if possible.

Office of Cooperative Extension Work,
Washington, D. C.

ANNUAL REPORT OF COUNTY EXTENSION WORKERS

This report form is to be used by county extension agents, such as county agricultural agent, home demonstration agent, club agent, and negro agent, reporting on their respective lines of work.

State Virginia County Harrison
 Report of J. B. Stiles County Agricultural Agent.
(Name) (Title)
 From Dec. 1 - 1925 to Dec. 1st, 1926.

If agent has not been employed entire year, indicate exact period. Agents resigning during the year should make out this report before quitting the service.

SUGGESTIONS RELATIVE TO THE PREPARATION OF THE COUNTY EXTENSION AGENT'S ANNUAL REPORT.

The annual report should be a review, analysis, interpretation, and presentation to the people of the county, the State, and the Nation of the sum total of the extension activities in each county for the year and the results obtained by the county extension agent assisted by the subject-matter specialists. The making of such a report is of great value to the county extension agent and the people of the county in showing the progress made during the year as a basis for future plans. It is of vital concern also to the State and Nation as a measure of rural progress and a basis for intelligent legislation and financial support.

Separate statistical and narrative reports are desired from each county extension agent in charge of a line of work, such as county agent, home demonstration agent, boys' and girls' club agent, and negro agent. Where an assistant agent has been employed a part or all of the year, a report on his or her work should be included with the report of the leader in charge of that line of work. Where an agent in charge of a line of work has quit the service during the year, the information contained in his or her report should be incorporated in the annual report of the agent on duty at the close of the report year, and the latter report so marked. Where two or more extension agents are employed in a county, each in charge of a line of work, care should be exercised to avoid including the same data in the statistical report of more than one agent.

At least four copies of the annual report should be made: One copy for the county officials, one copy for the agent's files, one copy for the State extension office, and one copy for the Extension Service, United States Department of Agriculture. *The report to the Washington office should be sent through the State extension office.*

NARRATIVE SUMMARY.

The narrative report should be a statement in orderly fashion and arranged under appropriate subheadings, of the work done, methods used, and results obtained under each project, as well as of the general work accomplished. Every statement should be clear-cut, concise, forceful, and, where possible, reinforced with ample data from the statistical summary. In the preparation of the part of the report relative to each project, the results reported in the statistical summary for the project should be analyzed, conclusions drawn, and recommendations made. The report may well be illustrated with photographs, maps, diagrams, blue prints, or other forms used in demonstration work. Full credit should be given to all cooperating agencies. The lines should be single-spaced, with double space between the paragraphs, and reasonably good margins left. The pages should be numbered in consecutive order.

The following outline is suggestive of how the narrative report may be clearly and systematically presented:

SUGGESTIVE OUTLINE OF ANNUAL NARRATIVE REPORT.

- I. Cover and title page.
- II. Table of contents.
- III. Status of county extension organization.
 - (1) Form of organization—change and development.
 - (2) Function of local people, committees, or project leaders in developing the program of work.
 - (3) General policies, including relationships to other organizations.
- IV. Program of work, goals established, methods employed, and results achieved.
 - (1) Factors considered and methods used in determining program of work.
 - (2) Project activities and results.

<ol style="list-style-type: none"> (a) Soils (b) Farm crops (Horticulture (c) Home gardens (d) Beautification of home grounds (e) Forestry (f) Rodents, predatory animals, and birds. (g) Animal husbandry (h) Dairy husbandry (i) Home dairy (A) Poultry husbandry (B) Home poultry 	}	(including diseases and insects).
---	---	-----------------------------------

SUGGESTIVE OUTLINE OF ANNUAL NARRATIVE REPORT—Continued.

IV. Program of work, etc.—Continued.

(2) Project activities and results—Continued.

- (1) Rural engineering.
 - (a) Rural engineering—home.
- (2) Agricultural economies, including farm management and marketing.
 - (a) Home marketing.
- (3) Foods.
 - (a) Nutrition.
- (4) Clothing.
 - (a) Home management.
 - (b) House furnishings.
 - (c) Home health and sanitation.
 - (d) Community activities.
 - (e) Miscellaneous.

V. Outlook and recommendations, including suggestive program of work for next year.

VI. Summary of activities and accomplishments, preferably of one or two typewritten pages only, placed at the beginning or end of the narrative report.

STATISTICAL SUMMARY.

To supplement the narrative part of the report, and in order that comparable State and National summaries may be made, it is necessary to include a statistical summary of the work in each county. The following form has been prepared to insure uniformity of reporting. In addition to the questions asked under each subdivision of the report, space is provided to add further data if desired. The statistical summary will grow naturally out of the field and office records.

DEFINITIONS OF TERMS USED IN THIS REPORT.

1. A PROGRAM OF WORK is a definitely outlined plan for extension work.
2. A PROJECT is a definite, systematic, organized plan for carrying out some phase of the extension program of work, providing for what is to be done, how much, when, where, how, and by whom.
3. MISCELLANEOUS WORK includes work which has not yet become a regular part of the program of work—work other than project work.
4. A COMMITTEE, for the purposes of this report, may be any one of the several units into which the county is divided for purposes of conducting organized extension work.
5. A PROJECT LEADER OR LOCAL LEADER is a person, selected because of his or her special interest and fitness, who functions as a leader in advancing some phase of the local program of extension work.
6. A DEMONSTRATION is an example designed to show the practical application of an established fact. Demonstrations as contemplated in this report are of two kinds, method demonstrations and result demonstrations.
 - A method demonstration is a demonstration given by an extension worker or other trained leader to a group for the purpose of showing them how to carry out a practice. Synonym: Lecture demonstration. Examples: Demonstrations of canning, mixing of spray materials, and culling of poultry.
 - A result demonstration is a demonstration carried on by a farmer, farm woman, boy, or girl under the direction of the extension service, involving a substantial period of time, records of results, and comparisons. Examples: Child-feeding, corn-culture, and orchard-management demonstrations.
7. A DEMONSTRATOR is a farmer, farm woman, boy, or girl who, under the direction of the extension service, conducts a result demonstration.
8. MEMBERS COMPLETING should include those who have satisfactorily finished the work outlined for the current year.
9. A DEMONSTRATION MEETING is a meeting held to give a method demonstration or to start, inspect, or further a result demonstration.
10. A TRAINING MEETING is a meeting at which project leaders or local leaders are trained to carry on extension activities in their respective communities.
11. AN OFFICE CALL OR TELEPHONE CALL is a visit or call by a farmer or other person seeking agricultural or home economics information, as a result of which some definite assistance or information is given.
12. A FARM VISIT is a call at a farm by the agent at which some definite information is given or concrete plan of work outlined, or some valuable information obtained from the farmer regarding his work, or the better practice prevailing in his neighborhood.
13. A HOME VISIT is a call at a home by the agent at which some definite information is given or concrete plan of work outlined, or some valuable information obtained from the farm woman regarding her work, or the better practice prevailing in her neighborhood.
14. DAYS IN OFFICE should include time spent by the county agent in his office, at county agent conferences, and any other work directly related to office administration.
15. DAYS IN FIELD should include all days spent on official duty other than those spent in office.
16. LETTERS WRITTEN should include all single letters on official business.

4

DEFINITIONS OF TERMS USED IN THIS REPORT—Continued.

17. A **FARMERS' INSTITUTE** is one of a series of meetings of one to two days' duration, arranged by a central State farmers' institute agency, at which agricultural and home-economics problems are discussed, usually by outside speakers employed for the purpose.
18. An **EXTENSION OR MOVABLE SCHOOL** is an itinerant school usually of two to six days' duration where practical but systematic instruction is given to persons not resident at the college. An **EXTENSION SCHOOL COURSE** differs from an extension school in that it is usually held at the college or other educational institution and usually for a longer period of time, but not exceeding two weeks.
19. **RECORDS** consist of definite information filed in the county office that will enable the agent to verify the data on extension work included in this report.
20. **FARM OR HOME PRACTICE ADOPTED** is a new or improved practice adopted on a farm or in a home during the year as a result of extension teaching. Examples: Spraying of potatoes for disease, canning of fruits and vegetables, use of balanced rations, and hat making.

GENERAL ACTIVITIES.

Report only this year's extension activities and results that are supported by records.

If an assistant agent has been employed during the year, include his or her work with that of the agent.

1. List below the names, titles, and periods of service of the county extension agents whose work is included in this report.

<u>J. B. Stebbins</u> <small>(Name)</small>	<u>County Agricultural Agent</u> <small>(Title)</small>	<u>12</u> <small>(Months of service this year)</small>
_____	_____	_____
2. Number of communities in county where extension work should be conducted. Two 10
3. Number of above communities in which the extension program has been cooperatively worked out by extension agents and people concerned. 0 9
4. Number of voluntary county, community, or local leaders actively engaged in forwarding the extension program with— 4

(a) Juniors _____	<u>Two</u>	<u>2</u>
(b) Adults _____	<u>Three</u>	<u>3</u>
5. Number of clubs carrying on extension work: 5

(a) Junior _____	<u>one</u>	<u>1</u>

6. Membership in above clubs: 6

(a) Boys' <u>Junior's of</u>	<u>26</u>	(c) Men <u>Junior's</u>	<u>20</u>
(b) Girls' <u>Seventeen</u>	<u>17</u>	(d) Women _____	_____
7. Number of club members completing: 7

(a) Boys' <u>Seven</u>	<u>7</u>	(c) Men <u>Two</u>	<u>10</u>
(b) Girls' <u>Two</u>	<u>2</u>	(d) Women <u>Four</u>	<u>4</u>
8. Number of members in junior club work for four or more years: 8

(a) Boys _____	_____	_____
(b) Girls _____	_____	_____

¹ Report the total number of different boys or girls enrolled in club work. This total should equal the sum of the project enrollments reported on pages 8 to 21, less any duplications due to the same boy or girl carrying on two or more subject-matter lines of work.

² Include those boys and girls enrolled in club work as reported under 6 (a) and 6 (b) who have finished the work undertaken or such portion of it as it was planned to finish during the report year.

GENERAL ACTIVITIES—Continued.

9. Number of junior teams trained:	(a) Judging	0	9
	(b) Demonstration	0	
10. Number entering college this year who have been club members.		2	10
11. Total number of farm visits ¹ made in conducting extension work.		438	11
12. Number of different farms visited.		180	12
13. Total number of home ² visits made in conducting extension work.			13
14. Number of different homes visited.			14
15. Number of calls ³ relating to extension work:	(a) Office	202	15
	(b) Telephone	47	
16. Number of days agent spent in office.		87 1/2	16
17. Number of days agent spent in field.		208	17
18. Number of individual letters written.		638	18
19. Number of fairs at which extension exhibits were made:	(a) Community		19
	(b) County	9	
20. Training meetings ⁴ held for local leaders:	(a) Number		20
	(b) Leaders in attendance		
21. Method and result demonstration meetings ⁵ held (do not include meetings reported in number 20):	(a) Number	6	21
	(b) Attendance	28	
22. Farmers' institutes ⁶ held:	(a) Number	1	22
	(b) Attendance	6	
23. Extension schools ⁷ and short courses held:	(a) Number		23
	(b) Attendance		
24. Junior club encampments held:			24
(a) Number			
(b) Attendance by club members:	(1) Boys		
	(2) Girls		
(c) Total attendance			
25. Other extension meetings attended and not previously reported:	(a) Number	57	25
	(b) Attendance	1506	
26. Number of meetings at which were shown:	(a) Lantern slides		26
	(b) Motion pictures		
	(c) Charts		

[Use space below to include other important data.]

¹ Do not count the same visit as both a farm visit and a home visit.
² See definition on page 4.
