NARRATIVE REPORT OF EXTENSION WORK IN WESTMORELAND COUNTY DEC. 1ST.

1923 TO NOVEMBER 30TH. 1924.

The County Extension Organization.

In the fall of 1922 the Westmoreland County Board of Supervisors made an appropriation for a County Farm Demonstration Agent. The agent was appointed by the Director of Extension Work and began work in the county Jan. 1st. 1923. The work was new in the county and there was no organization in the county for promoting the work. However there were two general farm organizations in the county, namely the County Farm Bureau and the George Washington Local of the Farmers Union. The agent worked with these two organizations and used the County Board of Supervisors as an Advisory Council. The question of appointing an Advisory Council was taken up with the Board but as they feared it would be hard to get an active council without pay the question was dropped. The agent secured the assistance of two ladies as junior club leaders and two junior clubs were organized. This was the extent of the county extension organization for the first year of the work, 1923. The County Board of Supervisors made the appropriation for the work in 1924.

The work started in 1924 with the same organization and a third junior club leader was obtained and another junior club organized. During the year a committee was called to draw up plans for a model farm to be exhibited at the County Fair. A great deal of interest was shown by the committee and they were asked to act as an Advisory Council, which they agreed to do. Consequently the County Board appointed an Agricultural Advisory Council consisting of two general farmers from each magisterial district, a bankers representative, a canners representative, a commercial poultrymens representative, the Smith-Hughes Teacher and the County Board of Supervisors. This Council is to hold its organization meeting in December at which time it will receive a report of the work done by the Co. Agent for the past year and will formulate a program of work for 1925. After this the Council will hold quarterly meetings to go over the work being done and to plan for new work.

The Co. Agent has cooperated with the farm organizations, the community leagues, and the school authorities whenever the opportunity permitted by helping out with programs and other work. The Co. Agent, the Smith-Hughes Teacher, and the Superintendent of Schools conducted an educational agricultural and school fair to which the County School Board, the Board of Supervisors, the banks, the business men, and the farm organizations contributed the necessary funds and a t which a Community League served dinner. The two farm organizations depend largely on the county agent to furnish programs with the aid of subject matter specialists. A new local of the Farm Bureau was formed and has held nine monthly meetings at which an extension agent has taken part in the program. The Smith-Hughes Teacher and the County Agent work in close cooperation having programs of work which are similar and working out methods of procedure jointly.

Program of Work, Goals Established, Methods Employed,
and Results Obtained.

A definite policy of extension work had not been worked out in the county. A program of work based on the study of the previous year in the county and the counsel of leading men in the different communities was drawn up by the county agent and submitted first to the County Board of Supervisors for their approval and then to the Board of the County Farm Bureau. The program was adopted and the county agent proceeded to put it to work. The main factors considered in the program of work were the improvement of the present practices, particularly in the growth of the principal cash crop, tomatoes, and the need of diversification to furnish more sources of income and to improve the fertility of the soil.

Farm Crops.

The goals set for this project were as follows,-

- a.- Encourage the production of certified soybeans and rye by lectures and personal visits. Demonstrators numerous approaching a general practice.
- b.- Enroll one demonstrator in the use of clover seed of known origin.
- c.- Encourage the production of certified seed corn and enroll two demonstrators to carry out the ear to row test.
- d.- Enroll three demonstrators in the production of certified wheat and two in oats.
- e.- Enroll three demonstrators in the use of adapted alfalfa seed.

The results obtained from this project were as follows,-

a.- The production of soybeans was encouraged by four lectures given at different points in the county, and about four times the usual acreage was planned to have been seeded, however a very backward spring cut the acreage to approximately one half of the intended acreage, and the generally unfavorable season caused low yields and the abandonment of acreage seeded so that the production this year was about the same as that of last year. The marketing agency handling the 1923 crop of soybeans did not give satisfaction, and results were not known in time to affect this year's acreage of soybeans, it made it seem advisable not to ~~push~~ push the production of rye, as it had been planned to handle this in the same way as the soybeans.

b.- One demonstrator was enrolled in the use of known origin clover seed and the demonstration is now under way.

c.- Three demonstrators undertook to produce certified seed corn and carried the demonstration through, though it is doubtful if it will be marketed as such, as the marketing agency has not given satisfaction. The ear to row tests were not carried out, but one seed plot was grown as the result of an ear to row test in 1923.

d.- The demonstrations in the use of certified wheat and oats were carried out and showed increased yields of from four to six bushels respectively.

e.- The demonstrations in the use of known origin alfalfa seed were not undertaken.

Track Crops.

This project is devoted principally to tomatoes with minor attention to sweet potatoes. The goals set were as follows,-

a.- Supervise community tomato plant beds very carefully furnishing needed information and aiding in the placing of plants.

b.- Secure records from as many fields as possible to show results.

c.- Furnish plans for the construction of a sweet potato storage house.

The work done and the results obtained were as follows,-

a.- Three community tomato plant beds of one quarter acre each were supervised. The campaign to increase the yield per acre and thereby the quality of the tomatoes packed in the county was started in December with a series of three meetings to which all of the tomato growers in the county were invited. The specialist then went over the tomato situation in the county and told what had been done by the use of better plants in Maryland and outlined the method to be followed in the county. Circular letters were sent out to all the growers urging better cultural practices and advocating fall plowing as a means of controlling disease. Three growers, one in each district of the county were found who agreed to grow one quarter of an acre of plants each under contract with the growers. The beds were located and plowed in the fall and from thence until the plants were drawn the directions of the county agent and the specialist were followed as far as possible under weather conditions. Much credit is due the owners of the plant beds for their faithfulness and cooperation in the production of the plants. During the winter the plants were discussed at all meetings and the county agent helped in this way to secure contracts from the growers for plants. The beds were seeded on April 22nd. and everything worked fine except that the spring was cold and rainy which retarded the growth of the plants and the month of May was so wet that little could be done to the plants in the way of work or of dusting. Nevertheless all of the beds had a good stand and produced a good quality and quantity of plants.

The growers were highly pleased with the looks of the plants and everything seemed to indicate that the project would be considered highly successful, but just as the plants were ready to go into the field a severe infection of Collar Rot set in on two of the beds, much of it not being in evidence until the plants were reset in the field. Then too the wet season had caused all plants to grow steadily and there being no check in their growth were of a better quality than those usually planted. Plants for about one hundred and twenty acres were furnished and but for the community plant beds there would have been a serious shortage of plants in the county. The work was watched very carefully all during the summer but no very definite check could be gotten on the work. This was due largely to the fact that the infection of Collar Rot had caused much loss of plants and heavy replanting had been necessary, the replants coming from many different sources. Some growers reported negative results, some favorable, and some unfavorable. The consensus of opinion of the leading men of the canning business is that the work will be worth repeating next year, although the results of this year were not outstanding.

This was the largest single project of the year and consumed 36 days of the agents time and 18 days work by specialists. Five hundred copies each of two circular letters were sent out urging better cultural practices.

Field selection of tomato seed was started and three growers and two club members made field selections of seed for the first time. Two demonstrations in the use of wilt resistant varieties were carried out with moderate success, the varieties not being entirely resistant but giving a better yield than the common varieties used.

c.- Plans were furnished for the construction of a sweet potato storage house but the construction has been postponed. In addition to these three demonstrations, in which thirty five bushels of seed sweet potatoes were treated, were given.

Livestock.

The purpose of this project was to diversify farm practices, to encourage interest in better stock and open up new sources of income. The goals set were as follows,-

- a.- Enroll six demonstrators in the care and management of dairy cows.
- b.- Enroll three demonstrators in pork production for market.
- c.- Enroll four demonstrators in cost accounts project showing value of livestock.

The results obtained in this project were as follows,-

- a.- Six demonstrators in the care and management of dairy cows were enrolled. Two of the demonstrations were in their second year and all were very satisfactory. One of the demonstrators built a silo and secured the use of a better purebred bull, another purchased two purebred cows and two purchased cream separators.

Four of the six are buying protein feeds and are feeding balanced grain rations, the other two are making the best possible use of home grown feeds. These demonstrations have stimulated such interest in cream checks and the cream shippers in the county have increased in the past two years from three to twenty one and ten of that number began shipping in 1924.

b.- Two demonstrators were enrolled in the production of market pork and both were very successful. Thirty eight hogs were fattened for market by hogging down corn and soybeans. One lot of hogs averaged 180 pounds at six months and the other lot dressed an average of 95 pounds in seven months. The average profit per hog over feed costs and cost of pigs was \$2.00.

c.- Three demonstrators were enrolled in the keeping of cost accounts to show the value of livestock and all are up to date and will be complete Jan. 1st.

Poultry.

The purpose of this project was "To Make the Farm Flock Pay" The goals set were :-

- a.- To furnish plans for five new poultry houses.
- b.- Enroll demonstrators in the care and management of poultry.
- c.- Hold ten public culling demonstrations.
- d.- Hold a two day school for detailed instructions to poultrymen.

The results of the poultry project are,-

- a.- Plans were furnished and six new houses built by them.
- b.- Six demonstrators in feeding and management have been enrolled and their projects carry over into next year. These demonstrations are showing good results.
- c.- Four public culling demonstrations were held, but owing to rain on two occasions the attendance was small.
- d.- A two day poultry school was held by specialist with twenty seven people in attendance. This was an important factor in encouraging better management of poultry.

Junior Club Work.

The goals for this project were,-

- a.- To enroll \$50 members to carry out projects in livestock, poultry, corn, soybeans, tomatoes, and to conduct four organized clubs.
- b.- Send four delegates to State Short Course.
- c.- Have fifty members attend District Short Course.
- d.- Have club exhibits at Richmond and other fairs.
- e.- Have a county club rally and picnic.

Junior Club Work was conducted along the same lines as the adult projects and in reality is a part of the other projects already given. The results of this work are,-

- a.- Seventy five club members were enrolled in the various projects and were carried out with fair success. The tomato projects were especially good, seven of the eight members enrolled turning in complete reports and one of them being the best and most complete demonstration of the year. Only three organized clubs were conducted in the county, two of these were old clubs and one was organized during the year.
- b.- Four delegates comprising two demonstration teams were sent to the State Short Course.
- c.- Club exhibits were only shown at the county fair. This was due largely to high cost of transportation and distance from a R. R.
- d.- Twenty delegates attended district short course.
- e.- A county picnic was held in July and two demonstrations were given by club members.

County Fair.

An educational Agricultural and School Fair was conducted by the County Agent, the Smith-Rughes Teacher and the Superintendent of Schools was successful. A large number of exhibits in both the school and agricultural departments were on display and about six hundred people were in attendance. Six Hundred and fifty dollars were spent in premiums and other costs of the Fair all of which was contributed from public funds, by banks, by individuals and by organizations. While the Fair was a success the management feels that a greater success could have been achieved by seeking more active cooperation in the various communities. The Fair was carried out as called for by the Plan of Work for the year.

Farm Organizations.

The goal for farm organizations was to assist them with educational programs and other activities, and to seek their aid in promoting the Extension Program, particularly striving to have five locals holding regular monthly meetings.

Twenty meetings of farm organizations were attended at which matters relating to the extension program were discussed and some demonstrators were enrolled thru the organizations. As a whole the organizations were not as active as had been hoped. One new local was organized during the year and held very successful meetings.

Cooperating Marketing Agencies.

The Plan of Work called for the furtherance of cooperating marketing agencies in every way possible in proportion to the local interest shown, in particular looking to the establishment of a branch cleaning station for certified seed and a branch grading station of the Va. Poultry Producers Association.

A great deal of work was done in behalf of establishing these agencies and had the Associations functioned satisfactorily the goal would probably have been reached. As it stands it seems that we are better off for not having attained the goal.

Outlook and Recommendations for 1925.

The outlook for 1925 is better than before. The County Board of Supervisors have made an appropriation for extension work for their term of office, (four years), and the work can now be planned on a more permanent basis, and the assistance of an able advisory council has been obtained which should be of tremendous value in planning and carrying out the work.

The recommendations for 1925 are that a similar plan of work to the 1924 plan be carried out, cutting down the size of tomato plant beds to the interest of the growers in each community and stressing more definitely planned demonstrations with more definite records kept.

Summary.

Extension Work as a whole has shown progress in Westmoreland County during the year 1924. The plan of work drawn up at the beginning of the year has been closely adhered to and although many of the projects have failed in their particular objective it is hoped and believed that the educational effect has been far reaching. The seasonal conditions for the year were very abnormal and did much to interfere with crop demonstrations. The livestock and poultry demonstrations were successful and are winning many followers. Club Work has done a great deal of good in the county and many of the boys and girls are showing excellent interest but the agent has not solved the question of how to get a high percentage of complete reports.

The extension organization has grown during the year to include an Agricultural Advisory Council and appropriation for the work has been made on a four year basis. Twelve demonstrations were carried out in farm and truck crops and much time was spent in encouraging the use of better tomato plants thru community plant beds. This work did not produce the results anticipated but it is believed to be worth repeating. Twenty eight demonstrations in livestock and poultry were carried out with good success. Seventy five members were enrolled in boys and girls club work and projects carried thru the year though the percentage of complete reports received was small. Delegates were sent to State and District Short Courses and a County Picnic was held. An educational county fair was conducted with the help of other agencies and farm organizations were assisted with educational progress.

The work for the coming year should follow the principal projects of the year past and all work should receive the sanction of the Agricultural Advisory Council.

Respectfully submitted,

C. Carter Chase
Co. Agent.

ANNUAL REPORT OF COUNTY EXTENSION WORKERS

This report form is to be used by county extension agents, such as county agricultural agent, home demonstration agent, club agent, and negro agent, reporting on their respective lines of work.

State Virginia County Westmoreland
Report of C. Carter Chase County Farm Demonstration Agent
(Name) (Title)
From Dec. 1st. 1923 to Nov. 30th

If agent has not been employed entire year, indicate exact period. Agent leaving during the year should make out this report before quitting the service.

State or District Supervisor.

State Extension Director.

SUGGESTIONS RELATIVE TO THE PREPARATION OF THE COUNTY EXTENSION AGENT'S ANNUAL REPORT.

The annual report should be a review, analysis, interpretation, and presentation to the people of the county, the State, and the Nation of the sum total of the extension activities in each county for the year and the results obtained by the county extension agent assisted by the subject-matter specialists. The making of such a report is of great value to the county extension agent and the people of the county in showing the progress made during the year as a basis for future plans. It is of vital concern also to the State and Nation as a measure of rural progress and a basis for intelligent legislation and financial support.

Separate statistical and narrative reports are desired from each county extension agent in charge of a line of work, such as county agent, home demonstration agent, boys' and girls' club agent, and negro agent. Where an assistant agent has been employed a part or all of the year, a report on his or her work should be included with the report of the leader in charge of that line of work. Where an agent in charge of a line of work has quit the service during the year, the information contained in his or her report should be incorporated in the annual report of the agent on duty at the close of the report year, and the latter report so marked. Where two or more extension agents are employed in a county, each in charge of a line of work, care should be exercised to avoid including the same data in the statistical report of more than one agent.

At least four copies of the annual report should be made: One copy for the county officials, one copy for the agent's files, one copy for the State extension office, and one copy for the Extension Service, United States Department of Agriculture. *The report to the Washington office should be sent through the State extension office.*

NARRATIVE SUMMARY.

The narrative report should be a statement in orderly fashion and arranged under appropriate subheadings, of the work done, methods used, and results obtained under each project, as well as of the general work accomplished. Every statement should be clear-cut, concise, forceful, and, where possible, reinforced with ample data from the statistical summary. In the preparation of the part of the report relative to each project, the results reported in the statistical summary for the project should be analyzed, conclusions drawn, and recommendations made. The report may well be illustrated with photographs, maps, diagrams, blue prints, or copies of charts and other forms used in demonstration work. Full credit should be given to all cooperating agencies. The lines should be single-spaced, with double space between the paragraphs, and reasonably good margins left. The pages should be numbered in consecutive order.

The following outline is suggestive of how the narrative report may be clearly and systematically presented:

SUGGESTIVE OUTLINE OF ANNUAL NARRATIVE REPORT.

- I. Cover and title page.
- II. Table of contents.
- III. Status of county extension organization.
 - (1) Form of organization—changes and development.
 - (2) Function of local people, committees, or project leaders in developing the program of work.
 - (3) General policies, including relationships to other organizations.
- IV. Program of work, goals established, methods employed, and results achieved.
 - (1) Factors considered and methods used in determining program of work.
 - (2) Project activities and results.

(a) Soils	}	(including diseases and insects).
(b) Farm crops		
(c) Home gardens	}	(including diseases and insects).
Beautification of home grounds		
(d) Forestry	}	(including diseases and insects).
(e) Rodents, predatory animals, and birds.		
(f) Animal husbandry	}	(including diseases and insects).
(g) Dairy husbandry		
Home dairy		
(h) Poultry husbandry		
Home poultry		

SUGGESTIVE OUTLINE OF ANNUAL NARRATIVE REPORT—Continued.

IV. Program of work, etc.—Continued.

(2) Project activities and results—Continued.

- (1) Rural engineering.
 - (a) Rural engineering—home.
 - (b) Agricultural economies, including farm management and marketing.
 - (c) Home marketing.
- (2) Foods.
- (3) Nutrition.
- (4) Clothing.
- (5) Home management.
- (6) Home furnishings.
- (7) Home health and sanitation.
- (8) Community activities.
- (9) Miscellaneous.

V. Outlook and recommendations, including suggestive program of work for next year.

VI. Summary of activities and accomplishments, preferably of one or two typewritten pages only, placed at the beginning or end of the narrative report.

STATISTICAL SUMMARY.

To supplement the narrative part of the report, and in order that comparable State and National summaries may be made, it is necessary to include a statistical summary of the work in each county. The following form has been prepared to insure uniformity of reporting. In addition to the questions asked under each subdivision of the report, space is provided to add further data if desired. The statistical summary will grow naturally out of the field and office records.

DEFINITIONS OF TERMS USED IN THIS REPORT.

1. A PROGRAM OF WORK is a definitely outlined plan for extension work.
2. A PROJECT is a definite, systematic, organized plan for carrying out some phase of the extension program of work, providing for what is to be done, how much, when, where, how, and by whom.
3. MISCELLANEOUS WORK includes work which has not yet become a regular part of the program of work—other than project work.
4. A COMMITTEE, for the purposes of this report, may be any one of the several units into which the county is divided for purposes of conducting organized extension work.
5. A PROJECT LEADER OR LOCAL LEADER is a person, selected because of his or her special interest and fitness, who functions as a leader in advancing some phase of the local program of extension work.
6. A DEMONSTRATION is an example designed to show the practical application of an established fact. Demonstrations as contemplated in this report are of two kinds, method demonstrations and result demonstrations.
 - A method demonstration is a demonstration given by an extension worker or other trained leader to a group for the purpose of showing them how to carry out a practice. Synonym: Lecture demonstration. Examples: Demonstrations of canning, mixing of spray materials, and culling of poultry.
 - A result demonstration is a demonstration carried on by a farmer, farm woman, boy, or girl under the direction of the extension service, involving a substantial period of time, records of results, and comparisons. Examples: Child-feeding, corn-culture, and orchard-management demonstrations.
7. A DEMONSTRATOR is a farmer, farm woman, boy, or girl who, under the direction of the extension service, conducts a result demonstration.
8. MEMBERS COMPLETING should include those who have satisfactorily finished the work outlined for the current year.
9. A DEMONSTRATION MEETING is a meeting held to give a method demonstration or to start, inspect, or further a result demonstration.
10. A TRAINING MEETING is a meeting at which project leaders or local leaders are trained to carry on extension activities in their respective communities.
11. AN OFFICE CALL OR TELEPHONE CALL is a visit or call by a farmer or other person seeking agricultural or home economics information, as a result of which some definite assistance or information is given.
12. A FARM VISIT is a call at a farm by the agent at which some definite information is given or concrete plan of work outlined, or some valuable information obtained from the farmer regarding his work, or the better practice prevailing in his neighborhood.
13. A HOME VISIT is a call at a home by the agent at which some definite information is given or concrete plan of work outlined, or some valuable information obtained from the farm woman regarding her work, or the better practice prevailing in her neighborhood.
14. DAYS IN OFFICE should include time spent by the county agent in his office, at county agent conferences, and any other work directly related to office administration.
15. DAYS IN FIELD should include all days spent on official duty other than those spent in office.
16. LETTERS WRITTEN should include all single letters on official business.

DEFINITIONS OF TERMS USED IN THIS REPORT—Continued.

17. A **FARMERS' INSTITUTE** is one of a series of meetings of one to two days' duration, arranged by a central State farmers' institute agency, at which agricultural and home-economics problems are discussed, usually by outside speakers employed for the purpose.
18. AN **EXTENSION OR MOVABLE SCHOOL** is an itinerant school usually of two to six days' duration where practical but systematic instruction is given to persons not resident at the college. AN **EXTENSION SHORT COURSE** differs from an extension school in that it is usually held at the college or other educational institution and usually for a longer period of time, but not exceeding two weeks.
19. **RECORDS** consist of definite information filed in the county office that will enable the agent to verify the data on extension work included in this report.
20. **FARM OR HOME PRACTICE ADOPTED** is a new or improved practice adopted on a farm or in a home during the year as a result of extension teaching. Examples: Spraying of potatoes for disease, canning of fruits and vegetables, use of balanced rations, and hat making.

GENERAL ACTIVITIES.

Report only this year's extension activities and results that are supported by records.

If an assistant agent has been employed during the year, include his or her work with that of the agent.

1. List below the names, titles, and periods of service of the county extension agents whose work is included in this report 1

D. Curtis Chase / *C. J. ... Agent* *12*
(Name) (Title) (Months of service this year)

2. Number of communities in county where extension work should be conducted *3* 2
3. Number of communities in which the extension program has been cooperatively worked out by extension agents and people concerned *3* 3
4. Number of voluntary county, community, or local leaders actively engaged in forwarding the extension program with— 4

1 The total of this column need not check with question 5, page 5, since one leader may assist with two or more projects.
 2 The information in this column should include the corresponding question on the following pages.

LEGUMES AND FORAGE CROPS.

Report only this year's extension activities and results that are supported by records.

Item.	60	61	62	63	64	65
	Alfalfa.	Hay beans.	Sweet clover.	Cyanus clover.	Clover (red, white, yellow).	Compost.
71. Number of method demonstrations given.						
72. Number of adult result demonstrations started or under way.			1			
73. Number of adult result demonstrations completed or carried through the year.	7	5				
74. Acres involved in these completed demonstrations.	17	50				
75. Increased yield ¹ per acre on demonstrations.	<i>June crop for 2 years</i> tons	bu. tons	tons	tons	tons	bu. tons
76. Number of junior clubs ² .						
77. Number of members enrolled.	(a) Boys.	2	2			
	(b) Girls.					
78. Number of members completing.	(a) Boys.		1			
	(b) Girls.					
79. Number of acres grown by junior club members completing.		1/2				
80. Total yield ¹ of crops grown by junior club members.	tons	10 bu. tons	tons	tons	tons	bu. tons
81. Number of farms planting improved seed for the first time.		4			4	
82. Number of farms practicing seed selection for the first time.						
83. Number of farms inoculating for these crops for the first time.		3			1	
84. Total number of different farms adopting improved practices relative to the legumes and forage crops reported on this page.						
[Use space below to include other important data relating to legumes and forage crops.]						

¹ Indicate whether yield in bushels of seed or tons of cured forage.² States which do not organize clubs on a project basis should not report on this question but should report on enrollment and completion.

LEGUMES AND FORAGE CROPS—Continued.

Report only this year's extension activities and results that are supported by records.

Item.	(A)	(B)	(C)	(D)	(E)	(F)
	Valley beans.	Field beans.	Peas.	Lupines.	Favae.	(a) Other. ¹
71. Number of method demonstrations given.						
72. Number of adult result demonstrations started or under way.						
73. Number of adult result demonstrations completed or carried through the year.						
74. Acres involved in these completed demonstrations.						
75. Increased yield ² per acre on demonstrations.	bu. tons	bu.	bu.	tons	X X X	bu. tons
76. Number of junior clubs ³ .						
77. Number of members enrolled.						
(a) Boys.						
(b) Girls.						
78. Number of members completing.						
(a) Boys.						
(b) Girls.						
79. Number of acres grown by junior club members completing.						
80. Total yield ³ of crops grown by junior club members.	bu. tons	bu.	bu.	tons	X X X	bu. tons
81. Number of farms planting improved seed for the first time.						
82. Number of farms practicing seed selection for the first time.						
83. Number of farms inoculating for these crops for the first time.						
84. Total number of different farms adopting improved practices relative to the legumes and forage crops reported on this page.						
[Use space below to include other important data relating to legumes and forage crops.]						

¹ Indicate crop by name.² Indicate whether yield is bushels of seed or tons of cured forage.³ States which do not organize clubs on a project basis should not report on this question but should report on enrollment and completion.

POTATOES, COTTON, TOBACCO, AND OTHER SPECIAL CROPS.

Report only this year's extension activities and results that are supported by records.

Item.	(a) Irish potatoes.	(b) Sweet potatoes.	(c) Cotton.	(d) Tobacco.	(e) Other Special Crops.
85. Number of method demonstrations given					
86. Number of adult result demonstrations started or under way					
87. Number of adult result demonstrations completed or carried through the year					3
88. Acres involved in these completed demonstrations					120
89. Increased yield per acre on demonstrations	bu.	bu.	lbs. ²	lbs.	
90. Number of junior clubs *					
91. Number of members enrolled	(a) Boys (b) Girls				8
92. Number of members completing work	(a) Boys (b) Girls				7
93. Number of acres grown by junior club members completing					5
94. Total yield of crops grown by junior club members	bu.	bu.	lbs. ²	lbs.	127 1/2 lbs.
95. Number of farms planting improved seed for the first time					
96. Number of farms practicing seed selection for the first time					6
97. Number of farms treating seed for disease for the first time					
98. Number of farms spraying or dusting for diseases and insects for the first time					3
99. Total number of different farms adopting improved practices relative to potatoes, cotton, tobacco, and other special crops reported on this page.					
[Use space below to include other important data relating to potatoes, cotton, tobacco, and other special crops.]					
Three tomato demonstrations consisting of 3 Community Plant Beds of 1/4 acre each, which produced plants for 120 acres. The plants went to about 100 different farms. The plants were well grown and received infestations of Collar Rot and unforunately weather conditions prevented the making of conclusive results.					

* Indicate crop by name.

¹ Report yield of cotton in pounds of seed cotton.² States which do not organize clubs or groups on a project basis should not report on this question but should report on enrollment and completion.

HORTICULTURE

Report only this year's extension activities and results that are supported by records.

Item.	(a)	(b)	(c)	(d)	(e)	(f)	Total
	Tree fruits.	Bush and small fruits.	Grapes.	Market gardening, truck and raising crops.	Home gardens.	Planting of large grounds.	
100. Number of method demonstrations given.							100
101. Number of adult result demonstrations started or under way.							101
102. Number of adult result demonstrations completed or carried through the year.			/				102
103. Acres involved in these completed demonstrations.					X X X	X X X	103
104. Increased yield per acre on demonstrations.	bu.	qts.	lbs.	bu.	X X X	X X X	104
105. Number of junior clubs ¹ .							105
106. Number of members enrolled	(a) Boys.						106
	(b) Girls.						
107. Number of members completing	(a) Boys.						107
	(b) Girls.						
108. Number of acres grown by junior club members completing.						X X X	108
109. Total yield of crops grown by junior club members.	bu.	qts.	lbs.	bu.	bu.	X X X	109
110. Number of farms planting improved stock or seed for the first time.							110
111. Number of farms pruning for the first time.							111
112. Number of units involved in preceding question.	trees	acres	acres	X X X	X X X	X X X	112
113. Number of farms spraying or otherwise treating for diseases and insect pests for the first time.			/				113
114. Number of units involved in preceding question.	acres	acres	acres	acres	X X X	X X X	114
115. Number of farms adopting improved practices relative to the horticultural work reported on this page.							115
[Use space below to include other important data relating to horticulture.]							

¹ States which do not organize clubs or groups on a project basis should not report on this question but should report on enrollment and completion.

FORESTRY.

Report only this year's extension activities and results that are supported by records.

116. Number of method demonstrations given.....	116
117. Number of adult result demonstrations started or under way.....	117
118. Number of adult result demonstrations completed or carried through the year.....	118
119. Number of acres included in these completed demonstrations.....	119
120. Number of junior clubs ¹	120
121. Number of members enrolled.....	121
(a) Boys.....	
(b) Girls.....	122
122. Number of members completing.....	
(a) Boys.....	122
(b) Girls.....	
123. Number of acres handled by junior club members.....	123
124. Number of forest or wood-lot plantings made this year.....	124
125. Acres involved in preceding question.....	125
126. Number of farms assisted in wood-lot management this year.....	126
127. Acres involved in preceding question.....	127
128. Number of farms planting windbreaks this year.....	128
129. Number of farms attempting to control white-pine blister rust for first time.....	129
130. Number of acres involved in preceding question.....	130
131. Total number of farms adopting improved practices relative to the forestry work reported on this page.....	131

[Use space below to include other important data relating to forestry.]

RODENTS AND MISCELLANEOUS² INSECT AND ANIMAL PESTS.

Report only this year's extension activities and results that are supported by records.

Item.	(a)	(b)	(c)	(d)	
	Rodents.	Other animal pests. ³	Grass-hoppers.	Other insects. ⁴	
132. Number of method demonstrations given.....					132
133. Number of result demonstrations started or under way.....					133
134. Number of such demonstrations completed or carried through the year.....					134
135. Number of acres in these completed demonstrations.....					135
136. Total number of farms cooperating in control measures this year.....					136
137. Number of acres involved in preceding question.....					137

¹ States which do not organize clubs on a project basis should not report on this question but should report on enrollment and completion.² Do not include work reported under "Crop" and "Livestock" headings.³ Indicate by name.

LIVESTOCK.

Report only this year's extension activities and results that are supported by records.

Item.	(6)	(7)	(8)	(9)	(10)	(11)
	Dairy cattle	Beef cattle	Pigs	Sheep	Poultry	Other ¹
128. Number of method demonstrations given					4	128
129. Number of adult result demonstrations started or under way	6				5	129
130. Number of adult result demonstrations completed or carried through the year	6		2		9	140
141. Number of animals involved in these completed demonstrations	27		38			141
142. Total profit or saving on demonstrations	675		84			142
143. Number of junior clubs ²						143
144. Number of members enrolled			(a) Boys	27	8	144
			(b) Girls	7	25	
145. Number of members completing			(a) Boys	11	5	145
			(b) Girls	2	9	
146. Number of animals involved in junior club work completed			13			146
147. Number of farms assisted in obtaining purebred sires this year			2		3	147
148. Number of farms assisted in obtaining high-grade or purebred females this year						148
149. Number of farms culling herds or flocks for the first time					5	149
150. Number of animals in such herds or flocks					575	150
151. Number of animals discarded					192	151
152. Number of stallion, bull, ram, or boar circles, clubs, or associations organized during the year						152
153. Number of members in preceding circles, clubs, etc.						153
154. Number of breed associations or clubs organized during the year						154
155. Number of members in these associations or clubs						155

¹ Indicate by name.² States which do not organize clubs on a project basis should not report on this question but should report on enrollment and completion.

RURAL ENGINEERING.

Report only this year's extension activities and results that are supported by records.

167. Number of method demonstrations given	167
168. Number of result demonstrations started or under way	168
169. Number of result demonstrations completed or carried through the year	169
170. Number of farms installing drainage systems this year	170
171. Acres drained	171
172. Number of farms installing irrigation systems this year	172
173. Acres irrigated	173
174. Number of farms constructing terraces or soil dams this year	174
175. Acres on which soil erosion was so prevented	175
176. Number of dwellings constructed this year according to plans furnished	176
177. Number of dwellings remodeled this year according to plans furnished	177
178. Number of sewage-disposal systems installed this year according to plans furnished	178
179. Number of water systems installed this year according to plans furnished	179
180. Number of heating systems installed this year according to plans furnished	180
181. Number of lighting systems installed this year according to plans furnished	181
182. Number of farms on which buildings other than dwellings were constructed or remodeled this year according to plans furnished 6	182
	(a) Barns	
	(b) Hog houses	
183. Number of buildings involved in preceding question	(c) Poultry houses 6	183
	(d) Silos	
	(e) Other	
184. Number of farms clearing land of stumps or boulders this year	184
185. Acres of land so cleared	185
186. Total number of different farms adopting improved practices relative to the rural-engineering work reported on this page 6	186

[Use space below to include other important data relating to rural engineering.]

AGRICULTURAL ECONOMICS—Continued.

Report only this year's extension activities and results that are supported by records.

205. List below this year's results in connection with the cooperative-marketing associations in the county previously organized and with which the extension service counseled or advised. 205

(a) Name of association or group.	(b) Number of members.	Supplies and products handled.	Supplies purchased.		Products sold.	
			(c) Value.	(d) Barter.	(e) Value.	(f) Profit.
N.M.A. Ex. Co.	80	Fertilizer & Seed	\$	\$	\$	\$
TOTAL						

[Use space below to include other important information relating to agricultural economics.]

MISCELLANEOUS.

Report only this year's extension activities and results that are supported by records.

Use this space to include work on any other agricultural project not included in the preceding pages, such as beekeeping, and similar work, i. e., any other information that can be reported statistically and that will help to give a complete account of the year's work.

Item.	(a) Bekeeping.	(b) ¹	(c) ²
206. Number of method demonstrations given.....			206
207. Number of adult result demonstrations started or under way.....			207
208. Number of result demonstrations completed or carried through the year.....			208
209. Number of units in these completed demonstrations.....			209
210. Number of junior clubs ³			210
