

Virginia Tech Themed WordPress Themes

Project Client:
Jennifer Sparrow

Team Members:
Scott Magee
Ken Pham
Matthew Ng

Blacksburg
3/6/2014
VT CS 4624

Objective

- create 3-4 different templates
 - ❑ For use by internal Virginia Tech sites
 - ❑ Gives sites a consistent look & feel
 - ❑ Prevents abuse by others

COLLEGE OF ENGINEERING

Researchers seek ways to bring
high-speed Internet to more homes
and businesses in rural Virginia

WordPress

- Use current drag and drop templates to create child templates

We will be using drag and drop templates to create the vt themed wordpress templates. These templates will be a foundation for the templates that we want to create as they will provide already usable code for us to use. Child templates are when we take a current template and use its current code to create another template

Tools

-BitNami/WordPress

- PHP
- HTML
- CSS
- Notepad++
- Google Chrome(Developer tools)

Child Template

-Overwrite vs override

- Overwrite

- copy all code over to use
- bigger, more control over template

- Override

- Only alter snippets of code affecting child
- Smaller and simpler
- Can make use of parent theme updates

Eclipse

WORDPRESS THEME

Responsive Design. Drag & Drop. Portfolio.

These two picture slides show a current drag and drop template that we will possibly use as it has similar format as current vt sites, and other similar look and feels that we can use to create a consistant look between our templates and other vt templates
