INTRODUCTION

The content of this report is a complete narrative summary of the extension program of Warwick, York and Elizabeth City counties for the year 1938, containing the aims and goals of the program.

The extension office is composed of county agent and council of farmers who co-operate in working out program for year. The work at all times is to improve farm life on the peninsula; for better soils, orchards, dairies, poultry, pastures, truck crops, hogs, and all other farm problems. The county agent at all times works with men and women who are capable of studying local and county-wide conditions in an intelligent manner, and their recommendations are always worthy of consideration.

The close cooperation of several town and county organizations have been a source of great satisfaction and help to the agent in working out the extension program. The county supervisors of three counties, who have supported the work, City Council of Newport News, Chamber of Commerce, banks of Peninsula, Rotary and Kiwanis clubs, all have worked to further the interest of the farmer in this section. Program of work for the year is generally worked up in winter and followed as carefully as possible during the summer.

At all times the city people in Newport News and Hampton and other towns are helped whenever they ask for it, in caring for lawns, trees, shrubs, gardens, etc. Many city calls are made by the agent during the year.

The Farm Bureau, Farmers' Union and Colony Co-op, work to the fullest at all times with agent in agricultural problems on peninsula, for better farming, and living conditions for all the peninsula.

We realize the better the farm the more culture that farm family can enjoy.

LIVESTOCK

Dairy is largest of all livestock on Peninsula, and greater returns to our farmers than any other livestock work. We have been working here for better barns, equipment, silos, pastures and more and better cows and bulls.

This year repairs were made on 12 dairy barns. Eight silos were added. Two new barns were constructed, and great deal of new equipment added to dairies. General improvements were made on twenty seven dairy farms. Bang's disease has about been cleaned out and most herds have new replacements. By better bulls being introduced, more farmers are raising replacements rather than buying them. Two hundred replacements have been purchased this year; all have been excellent cows, many have been registered. The Guernsey herds are improving faster than other herds. Six registered bulls have come into our herds this year.

Dairy farmers are learning each year the importance of pastures. In the last year 349 acres were put in pastures.

A great deal of interest has been taken this year in molasses ensilage. Five silos have been filled with molasses ensilage with excellent results.

The dairy work on lower peninsula has gone ahead rapidly. The new barns and dairy houses with two milking parlors, and fine new equipment, with new silos filled with well cured ensilage, farms well balanced with many pastures, with high grade cattle grazing on them, has been spelling success for the dairy farmers of Warwick, York and Elizabeth City counties.

More pigs have been inoculated this year than ever before, showing our campaign for the work has been listened to and set to practice. One veterinarian reported to me 15,000 pigs inoculated by him alone this year. County agent work has encouraged treatment for all pigs, and has cooperated with veterinarians to make fair charge for work that is within reach of all. This has been accomplished by very close cooperation and work planned ahead by county agent. In far off sections farmers have been taught by veterinarians and county agent how to do the work in order to serve the farmers. Material is ordered for them by county agent. In all cases the three treatments are given at one time. I have heard of very few hogs dying this past year, so the work has been successful.

More sheep have been added this year by farmers with success. A few sheep on higher lands have paid well, as lambs sell for high price here.

More interest has been shown this year in fur animals. Four new farmers have taken on musk rabbit raising. We have two farmers raising mink and three farmers raising fox. This enterprise may grow into something worth while as we go along.

H O R T I C U L T U R E

Peach orchards lead in this section with 28,000 trees and more to be put out this year. Peaches have made money for our farmers and paved way for new industry in horticulture.

Last year thirty-two first class stands were in operation along highways, selling peaches of all grades; some of the very fancy ones were put up in attractive baskets and sold to tourist for fancy prices. The bulk of the crop was shipped to Baltimore and Washington. This crop alone brought the farmers over \$21,000.

Three new power sprayers, four tractors and, six trucks were purchased for peach orchards. Several hundred pounds of spray material, baskets, etc., were purchased on cooperative plans.

Apple orchards have paid well here due to excellent local markets and varieties of apples grown that markets desire. Local apples are in great demand, about 12,000 trees are now in bearing and few more will be added to this planting next year.

Small fruits have been increased to great advantage, raspberries and boysenberries have been in great demand.

The horticulture work has improved orchards and small fruits and by thorough demonstration work has given farmers chance to sell fine fruit.

This demonstration work covers fertilization, spraying, pruning, fruit thinning, proper packing, and marketing advice.

Over 100 pruning demonstrations were given in the past year. Thirty-one spraying demonstrations have been given and twenty-five orchards were given special fertilization in demonstration work. Over one hundred other orchard calls have been made in which advice was given in thinning, packing and marketing.

We send out each month 400 notices on spraying and special orchard care.

Great interest is shown each year in more thorough spraying and all around care of orchards and small fruits.

POULTRY

During 1938, fourteen poultry houses have been constructed to house 500 birds and over. Two battery brooder houses have been constructed to house 20,000 birds, and two smaller ones. Two houses have been constructed and equipped with laying battery cages for 300 birds each. The poultry business has increased here the last year by 20,000 layers and 40,000 broilers.

This increase has been possible by making the first to engage in poultry raising successful. Sanitation of yards and houses has been taught through-out the year; strict sanitation will save the poultryman money.

Worming of all pullets before housing for winter is encouraged and demonstrated at all times; this practice is followed now by every up-to-date poultryman. More birds are vaccinated each year to prevent roup and chickenpox. Over 30,000 birds were treated this year.

Several have taken up raising turkeys with success. 9,000 turkeys were raised this year. Ducks and guineas are also profitable here.

The poultry business represents several thousand dollars a year and, great care is taken at all times to eliminate disease by demonstration of proper feeding and care of birds. 184 farmers have been taught proper culling during 1938.

TRUCK CROPS

Truck farmers have not been doing so well in the last few years; the markets seem flooded with many kinds of vegetables. Where we used to ship several thousand packages of lettuce, spinach, kale, cabbage, etc., we now grow very little more than we can use on local markets. Cantaloups being the only crop we ship making profitable returns. To improve market conditions we are trying out new packages, new methods of marketing, new varieties of crops. This last year, we made special package for carrots and beets which "took" on the Baltimore market. If new methods are needed to sell vegetables we hope to find them.

Each year we have more insects and bacterial diseases to combat which the truck grower must meet and fight. We were forced to cut the truck acreage 20% or more during 1936. Several farmers have put out small peach orchards and small fruits to try to improve conditions. Several fields of asparagus have been put out to very profitable advantage.

Have had eleven demonstrations during the summer on various crops showing better growing methods. All eleven were completed and demonstrated a great service. Demonstrations were given in treating seed, of which most all truck crop seed now are being treated before sowing.

Most all truck crop growers test all soils, at least once in three years. From results of these tests, ten cars of lime have been used by truck farmers during 1936.

By cutting acreage of all crops and using better cultural methods, more thorough spraying and careful fertilization, smaller packages, better graded, many solve a market condition of importance.

We are working along practical lines to improve, some way, the truck farmers ills by getting more and better returns to him.

SOILS

Farmers in Warwick, York and Elizabeth City counties realize the importance of keeping soils fertile. Each year more attention is paid to drainage and putting in plantings of green crops to be turned under to enrich soils. Several miles of ditches have been opened on farms during 1938; it would be difficult to give actual mileage, but it would be around fifty-two miles.

Educational work in the use of lime and the sowing of green crops to be turned under, has greatly increased the plantings of crimson clover, lespedeza, cowpeas and soybeans. Thirty cars of lime have been used on farms this year. Additional plantings of clover, alfalfa and pastures demand the use of more lime. Phosphorus and potash are being applied more each year from soil test education.

All corn demonstrations were ruined this year by very heavy rains. Other crops were grown to complete filling silos. Soybeans, cowpeas and what corn we had, were treated with molasses on several farms for silo filling. Tile drainage was used on four farms this year, 221 acres being tile drained.

Soils are being tested more each year; the use of lime on farms is going forward rapidly. Many more fields are kept green by cover crops during the winter; pastures have doubled the last three years and are being cared for by top dressing with commercial fertilizers.

Ten years ago many cars of hay were shipped into these counties; better farm practices have eliminated these shipments of hay.

SOIL CONSERVATION

We have had 1,045 farmers sign up for soil conservation work, and take interest in program.

During the year soils from 1,240 farms have been sampled, and information furnished as to phosphorus, potash and lime the land requires, for best farming results.

Lime was applied on 634 of these farms, and all farmers applied commercial fertilizers and humus to as many acres possible. In the course of three years, a great improvement will be made in these farms, and a better understanding of proper and successful rotation of crops.

891 tons of lime and 732 tons of fertilizers have been used during past year in soil conservation work alone.

Each year more cover crops are added to farms, and green manure turned under to improve land. 342 farmers increased cover crop plantings this year and increased the acreage of green manure crops turned under.

EMERGENCY WORK

The last few years county agent has been called on to assist with many new farm problems, such as debt committees, seed loans, production loans, and farm federal loans. All these new loans have helped the farmer, and the county agent has been called on to put them in force.

The seed loan has been a great help to the farmers in these counties. It has been very easy to get in a short time, and has assisted farmers to purchase seed and fertilizers in spring when funds are low with many small farmers.

Fifty-five took advantage of the seed loan this year. Seven Production Credit loans have been made, and three farm Federal loans.

The Resettlement work has had three farms where aid has been given. The farmers here seem to be more contented each year, as conditions are much better than they were.

I have been called on by banks to assist in making loans to farmers. The Light and Power Company has used my office for advising right of ways for erecting power lines in counties. Warwick, York and Elizabeth City counties now have power in every section where farmers can get it. This office has given great deal advise this summer on county ditching, or taxed ditches of which great deal of work has been accomplished. The U. S. Government has used office on several occasions on grass mixtures, grading and landscape work.

The tax boards have also asked advise on many occasions.

4-H CLUB WORK

4-H Club work goes ahead each year and leaves good record to build on. This year we had 225 in clubs with 199 completing project work. More work would have been completed but for very rainy season drowning out many gardens and crops.

Nature study has accomplished much this year. The clubs have taken 57 nature hikes with average of 16 members going on each hike. Habits of birds have been studied, wild flower collections made and plants, habits, etc., studied. Trees and forestry have been studied also.

I have had leaders to teach sewing. Two clubs have completed costumes, thirty-one suits in all.

Canning and handicraft also have been taught by leaders. All other work has been handled by county agent.

All 4-H club meetings are held at night in homes of members when convenient. When not, they are held in some public place in community. Meetings are held at night to have parents and thus take part in program. In this way communities are built up and better understanding of conditions are studied by children.

Then too, having night meetings give the children a chance for social work such as preparing refreshments, playing games, etc.

At these meetings we have had parent nights, banking talks by bankers, art talks by artist, music by musicians, and various other subjects. Our meetings are well attended and are leading to the erection of community houses.

During the year the 4-H club members are asked to render program to Kiwanis Club or others, which is gladly done.

Club members visit off and on during the year other clubs near by and take part in program, either by giving talks or some musical selection.

During the summer all 4-H clubs join together for achievement day and fair, 2,000 people attending.

This year 125 club members had exhibits at fair, all of various nature. During the afternoon a play was put on by club members, followed by horse and pony show which was appreciated by all.

During the summer 87 boys and girls attended camps and short courses.

\$111. in money and several other prizes have been won by club members.

Many club members are greatly interested in nature study and better things in life to build character, and better farms and home life.

MISCELLANEOUS WORK

During the year, 72 farms and city places have been advised best methods of ridding premises of rats and other rodents. I know of many individual farms where 75 or more rats were killed in one day.

I am sure several hundred rats and mice have been killed during the year from advice given out by county agent's office.

The county agent's office has also given much advice about being on guard against termites, and ways to get rid of them.

Treating wood and timbers to rid them of many different wood borers has also been given to many who asked for it.

Ninty-five Japanese beetle traps were operated by county agent during the summer in Newport News, to keep this beetle in check so it will not multiply rapidly and swarm to farms.

All 4-H club children are taught to recognize the Japanese beetle and other destructive insects and bugs and methods of control.

By careful work we have been able to keep the Japanese beetle in one section and control it fairly well. It hasn't multiplied in five years, and two years we caught very few beetles.

Have written weekly agriculture letter for local press during the year, and 149 other agriculture articles.

The county agent's office has encouraged on every farm the protection of birds. Everything possible is being taught to encourage children on farms and in cities the real value of birds and why they should be protected. Birds are one of the largest insect destroyers we have and they must be protected and given a chance to multiply and serve all.

Have assisted boy Scouts during the year in nature study, and have examined them on various farm subjects for their court work.

Have given twelve talks to garden clubs, school leagues, Kiwanis clubs, etc., during year. Also assisted in four public landscape plantings.

Date

SUGGESTIONS RELATIVE TO THE PREPARATION OF THE COUNTY EXTENSION AGENT'S ANNUAL REPORT

The annual report should be a summary, with analysis and interpretations, for presentation to the people of the county, the State, and the Nation of the extension activities in each county for the year, and the results obtained by the county extension agents assisted by the subject-matter specialists. The making of such a report is of great value to the county extension agents and the people of the county in showing the progress made during the year as a basis for future plans. It is of vital concern also to the State and Nation as a measure of rural progress and a basis for intelligent legislation and financial support of extension work.

At least four copies of the annual report should be made: One copy for the county officials, one copy for the agent's files, one copy for the State extension office, and one copy for the Extension Service, United States Department of Agriculture. *The report to the Washington office should be sent through the State extension office.*

STATISTICAL SUMMARY

Where two or more agents are employed in a county they should submit a single statistical report showing the combined activities and accomplishments of all county extension agents employed in the county during the year. Results obtained through assistance rendered agents by specialists should also be included. This report shows, insofar as possible, the part each agent has taken in forwarding the extension program. The county totals should be the sum of the activities and accomplishments of individual agents *minus duplications due to two or more agents participating in the same activity or accomplishment.* The county totals, when properly recorded, show the progress made in the county during the year in forwarding the entire extension program. Negro men and women agents should prepare a combined statistical report separate from that of the white agents.

The statistical summary should be a report of this year's activities and results that can be verified by records on file in the county office. Where records are not available careful estimates are desired. Such estimates should be marked "Est."

NARRATIVE SUMMARY

A separate narrative report is desired from the leader of each line of work, such as county agricultural agent, home demonstration agent, boys' and girls' club agent, and Negro agent. Where an assistant agent has been employed during a part or all of the year, the report of his or her work should be included with the report of the leader of that line of work. Where an agent in charge of a line of work has quit the service during the year, the information contained in his or her report should be incorporated in the annual report of the agent on duty at the close of the report year, and the latter report so marked.

The narrative report should summarize and interpret, under appropriate subheadings, the outstanding results accomplished and the extension methods used for each project. Every statement should be clear-cut, concise, forceful, and, where possible, reinforced with necessary data from the statistical summary. Use a descriptive style of writing, giving major accomplishments first under each project. Give extension methods fully relating to outstanding results only, and where practicable illustrate with photographs, maps, diagrams, blueprints, or copies of charts and other forms used. Full credit should be given to all cooperating agencies. The lines should be single-spaced, with double space between the paragraphs and reasonably good margins. The pages should be numbered in consecutive order.

The following outline is merely suggestive of how the narrative report may be clearly and systematically presented. Each agent should prepare an outline to fit the situation and the work to be reported.

SUGGESTIVE OUTLINE OF ANNUAL NARRATIVE REPORT

- I. Cover and title page.
- II. Table of contents.
- III. Summary of activities and accomplishments, preferably of one or two typewritten pages only, placed at the beginning of the narrative report.
- IV. Changes in county extension organization.
 - (1) Form.
 - (2) General policies.
 - (3) Procedure.
- V. County program of work.
 - (1) Factors considered and methods used in determining program of work.
 - (2) Project activities and results.

Under appropriate headings and subheadings present in some detail for each major project or line of work the goals set up, the methods used, the results achieved, and the significance of these results in terms of improved farms and homes and of better community life.
- VI. Outlook and recommendations, including suggestive program of work for next year.

TERMINOLOGY

To insure reports which convey the intended meaning to others and to facilitate the compilation of satisfactory national statistics on extension, it is extremely important that terms be used in accordance with accepted definitions. The following definitions of extension terms have been approved by the United States Department of Agriculture and the Association of Land Grant Colleges and Universities. Agents should read these definitions before starting to write the annual reports.

DEFINITIONS OF EXTENSION TERMS

1. A program of work is a statement of the specific projects to be undertaken by the extension agents during a year or a period of years.
2. A plan of work is a definite outline of procedure for carrying out the different phases of the program of work. Such a plan provides specifically for the means to be used and the methods of using them. It also shows what, how much, when, and where the work is to be done.
3. A community is a more or less well-defined group of rural people with common interests and problems. Such a group may include those within a township, trade area, or similar limits. For the purpose of this report a community is one of the several units into which a county is divided for conducting organized extension work.
4. A project leader, local leader, or committeeman is a person who, because of special interest and fitness, is selected to serve as a leader in advancing some phase of the local extension program. A project leader may be either an organization or a subject-matter leader.
5. Demonstrations as contemplated in this report are of two kinds—method demonstrations and result demonstrations. A method demonstration is a demonstration given by an extension worker or other trained leader for the purpose of showing how to carry out a practice. Examples: Demonstrations of how to can fruits and vegetables, mix spray materials, and cull poultry. A result demonstration is a demonstration conducted by a farmer, home maker, boy, or girl under the direct supervision of the extension worker, to show locally the value of a recommended practice. Such a demonstration involves a substantial period of time and records of results and comparisons, and is designed to teach others in addition to the person conducting the demonstration. Examples: Demonstrating that the application of fertilizer to cotton will result in more profitable yields, that underweight of certain children can be corrected through proper diet, that the use of certified seed in growing potatoes is a good investment, or that a large farm business results in a more efficient use of labor. The adoption of a farm or home practice resulting from a demonstration or other teaching activity employed by the extension worker as a means of teaching is not in itself a demonstration.
6. A result demonstrator is an adult, a boy, or a girl who conducts a result demonstration as defined above.
7. A cooperator is a farmer or home maker who agrees to adopt certain recommended practices upon the solicitation of an extension worker. The work is not directly supervised by the extension agent and records are not required, but reports on the success of the practices may be obtained.
8. A 4-H Club is an organized group of boys and/or girls with the objectives of demonstrating improved practices in agriculture or home economics, and of providing desirable training for the members.
9. 4-H Club members enrolled are those boys and girls who actually start the work outlined for the year.
10. 4-H Club members completing are those boys and girls who satisfactorily finish the work outlined for the year.
11. A demonstration meeting is a meeting held to give a method demonstration or to start, inspect, or further a result demonstration.
12. A leader-training meeting is a meeting at which project leaders, local leaders, or committeemen are trained to carry on extension activities in their respective communities.
13. An office call is a call in person by an individual or a group seeking agricultural or home-economics information, as a result of which some definite assistance or information is given. A telephone call differs from an office call in that the assistance or information is given or received by means of the telephone. Telephone calls may be either incoming or outgoing.
14. A farm or home visit is a call by the agent at a farm or home at which some definite information relating to extension work is given or obtained.
15. Days in office should include time spent by the county extension agent in the office, at annual and other extension conferences, and on any other work directly related to office administration.
16. Days in field should include all days spent on official duty other than "days in office."
17. Letters written should include all original letters on official business. (Duplicated letters should not be included.)
18. An extension school is a school usually of 2 to 6 days' duration, arranged by the Extension Service, where practical instruction is given to persons not resident at the college. An extension short course differs from an extension school in that it is usually held at the college or another educational institution and usually for a longer period of time.
19. Records consist of definite information on file in the county office that will enable the agent to verify the data on extension work included in this report.
20. The county extension association or committee is that county organization, whether a membership or a delegate body, which is recognized officially in the conduct of extension work in the county.

GENERAL ACTIVITIES

Report Only This Year's Extension Activities and Results That Can Be Verified

1. List below the names, titles, and periods of service of the county extension agents whose work is included in this report. Include time of assistants with that of regular agent.

AGENT	Total months of service this year (a)	Days devoted to agr't-conservation and adjustment programs (b)	Days devoted to relief work (c)	Total days in office (d)	Total days in field (e)	
						(a)
(Name) Home demonstration agent.....	(1)					
Ast. home demonstration agent.....						
4-H Club agent.....	(2)					
Assistant county agent in charge of club work.....						
Agricultural agent.....	(3)	12	52	4	89	215
Assistant agricultural agent.....	(3)					

2. County extension association or committee:

(a) Agricultural extension:

(1) Name Farm Bureau - Farmstead Unit - Colony

(2) Number of members 643

(b) Home demonstration:

(1) Name.....

(2) Number of members.....

(c) 4-H Club:

(1) Name.....

(2) Number of members.....

3. Number of communities in county where extension work should be conducted..... 12 3

4. Number of above communities in which the extension program has been planned cooperatively by extension agents and local committees..... 12 4

5. Number of different voluntary county or community project leaders or committeemen actively engaged in forwarding the extension program:

(a) Adult work { (1) Men 44
(2) Women 11

(b) 4-H Club work { (1) Men 4 (3) Older club boys 6
(2) Women 16 (4) Older club girls 21

6. Number of different paid local leaders engaged in agricultural-conservation and adjustment programs.....

{ (a) Men 5
(b) Women 4

7. Number of clubs or other groups organized to carry on adult home demonstration work..... 7

8. Number of members in such clubs or groups..... 8

ITEM	Home demonstration agents (a)	4-H Club agents (b)	Agricultural agents (c)	County total ¹ (d)
9. Number of 4-H Clubs.....			9	9
10. Number of different 4-H Club members enrolled.....	{ (1) Boys ² (2) Girls ²		89	89
			136	136
11. Number of different 4-H Club members completing.....	{ (1) Boys ² (2) Girls ²		83	83
			116	116

12. Number of different members enrolled in 4-H Club work for:⁴

MEMBERS	1st year	2d year	3d year	4th year	5th year	6th year and over
(a) Boys.....	45	27	8	1	4	4
(b) Girls.....	83	31	11	5	2	4

¹ County total should equal sum of preceding three columns minus duplications due to two or more agents participating in the same activity or accomplishment.

² Report the total number of different boys or girls enrolled in club work. This total should equal the sum of the project enrollments reported on pages 7 to 24, minus duplications due to the same boy or girl carrying on two or more subject-matter lines of work. Do not include boys and girls enrolled late in the year in connection with the succeeding year's program.

³ Same as footnote 2 but refers to completions instead of enrollments.

⁴ The total for this question should agree with county total, question 10.

GENERAL ACTIVITIES—Continued

Report Only This Year's Extension Activities and Results That Can Be Verified

ITEM	Age	10 and under	11	12	13	14	15	16	17	18	19	20 and over	
13. Number of different 4-H Club members enrolled according to age ¹	(a) Boys	7	11	10	15	12	7	11	7	8	1		13
	(b) Girls	17	16	16	16	22	25	13	5	5		7	

14. Number of 4-H Club members:¹ (a) In school 215 (b) Out of school 10 14

ITEM	Home demonstration agents (a)	4-H Club agents (b)	Agricultural agents (c)	County total ¹ (d)	
15. Number of 4-H Club teams trained	(1) Judging		2	2	15
	(2) Demonstration		10	10	
16. Number of groups other than 4-H Clubs organized for extension work with rural young people 16 years of age and older			1	1	16
17. Members in groups reported in question 16	(1) Young men		5	5	17
	(2) Young women		12	12	
18. Total number of farm or home visits ² made in conducting extension work			1519 852	852	18
19. Number of different farms or homes visited			495	495	19
20. Number of calls relating to extension work	(1) Office		1502	1502	20
	(2) Telephone		2241	2241	
21. Number of news articles or stories published ⁴			149	149	21
22. Number of individual letters written			4871	4871	22
23. Number of different circular letters issued (not total copies mailed)			364 364	364	23
24. Number of bulletins distributed			1168	1168	24
25. Number of radio talks broadcast or prepared for broadcasting			2	2	25
26. Number of events at which extension exhibits were shown			19	19	26
27. Training meetings held for local leaders or committeemen	(1) Adult work	(a) Number	15	15	27
		(b) Men leaders	91	91	
		(c) Women leaders	4	4	
(2) 4-H Club	(a) Number	27	27	27	
	(b) Leaders	194	194		
28. Method demonstration meetings held (include all method demonstrations in both adult and 4-H Club work given by agents and specialists not reported under question 27)	(1) Number		41 41	41	28
	(2) Total attendance		139	139	
29. Meetings held at result demonstrations	(1) Number		10	10	29
	(2) Total attendance		160	160	

¹ The total for this question should agree with county total, question 10.² County total should equal sum of preceding three columns minus duplications due to two or more agents participating in the same activity or accomplishment.³ Do not count a single visit to both the farm and home as two visits.⁴ Do not count items relating to notices of meetings only.

Notes.—Questions 18-24 refer to the total number of different activities conducted this year. The totals should equal the sums of the corresponding information reported on following pages minus duplications where the same activity relates to two or more lines of work.

GENERAL ACTIVITIES—Continued

Report Only This Year's Extension Activities and Results That Can Be Verified

ITEM		Home demonstration agents (a)	4-H Club agents (b)	Agricultural agents (c)	County total ¹ (d)

34. Meetings held by local leaders or committeemen not participated in by agents or specialists and not reported elsewhere	(1) Adult work	(a) Number		3	3	34
		(b) Total attendance		19	19	
	(2) 4-H club	(a) Number		21	21	
		(b) Total attendance		349	349	
34j. Number of above meetings held by agents or local leaders at which discussion group method of presentation was followed			5	5	34j	

SUMMARY OF EXTENSION INFLUENCE FOR YEAR

It is highly desirable for extension workers to consider the proportion of farms and farm homes in the county which have been definitely influenced to make some substantial change in farm or home operations as a result of the extension program for men, women, boys, and girls. It is recognized that this information is very difficult for agents to report accurately, so a conservative estimate based upon such records, surveys, and other sources of information as are available will be satisfactory. Such estimates should be marked "Est."

Include results of emergency activities as well as the regular extension program.

35. Number of farms in county	Warwick 394; York 670; Elizabeth City 425	35
36. Number of farms on which changes in practices have definitely resulted from the agricultural extension program		36
37. Number of farm homes in which changes in practices have definitely resulted from the home demonstration program		37
38. Number of other homes in which changes in practices have definitely resulted from the home demonstration program		38
39. Number of farm homes with 4-H Club members enrolled	186	39
40. Number of other homes with 4-H Club members enrolled	39	40
41. Total number of different farm families influenced by some phase of the extension program (Include questions 36, 37, and 39, minus duplications.)	486	41
42. Total number of different other families influenced by some phase of extension program (Include questions 38 and 40, minus duplications.)	39	42

¹ County total should equal sum of preceding three columns minus duplications due to two or more agents participating in the same activity or accomplishment.

NOTE.—Questions 35-34 refer to the total number of different activities conducted this year. The totals should equal the sums of the corresponding information reported on following pages minus duplications where the same activity relates to two or more lines of work.
