STATUS OF COUNTY AGENT WORK 1924.

Present Condition
- - - - -

At this writing I think it safe to say that County Agent work in Princess Anne county is on a firmer footing and is going ahead with more certainty and with the brightest future than at any time in its seven year history for the county. I say this in lieu of the fact, that in a meeting last February the county Board of Supervisors made a clean sweep and did away with the County Health unit and the county and Home demonstration agents. Each unit was to go out as its present contract expired, this put the Health unit out on May 1st, the Home Demonstrator September 1st and the county Agent February 15th of next year.

The other two units are gone but the farmers of the county have brought such a pressure to bear on the Board of Supervisors as to the need of a county agent, that they have decided that my work is very much needed in the county and that it will go in the future as in the past. Hence I say that the work is on a firmer footing than ever before, because the issue of whether the county was to have an agricultural agent or not, has caused many dis-interested farmers to watch my year's work more closely than ever before and they have noted the great service that I have been able to render in cases of Hog Cholera, in Sweet-Potato diseases and in other crop work as well as boys and girls club work. So many who were not interested before have come forward this year and asked that the County retain the services of a county agent.

Advisory Board
- - - - -

The longer I stay in county agent work the more essential I find it is to have a good strong advisory council working with me in the county in order to do the most efficient work, for unless the County Agent has someone in each community to fall back on for advice and to help make out his Plan of Work that will fit into each community, he is liable to do the wrong thing and thus cause more harm to the work than if he had stayed out altogether. But when a plan of work is made for a community and by a leader in that community who knows the needs of his people, there are more chances that all the people will take hold and help to put the thing or projects across.

My Advisory Council consist of eleven members from as many communities in the county, and seven of this number has always taken an active interest in all work in the county and especially in their respective communities, and have always advised and met with me to assist in formulating Plans of Work that would fit and benefit the most people.

I feel that it is entirely due to my advisory council that county agent work has been continued in Princess Anne when all other units have been discontinued, for it was these men who brought the farmers to a realization of what they were losing should the work not be continued and through this realization the farmers have let their supervisor know in no uncertain terms, that they wanted the work kept.

I would never attempt again to carry on demonstration work without the best advisory council that I could get organized. For any man who attempts to shoulder the entire responsibility himself in doing county agent work is greatly handicapped and cannot possibly last as long in a county as he would if he worked 100% with all the people through a leader in each community who is a member of his advisory board.

Farm Bureau

—*—*—*—*—*—

The Farm Bureau Federation still has an active organization in the county, and I do not hesitate to say, that this organization have been an agency for doing agriculture and county agent work more real good than all other agencies combined, for. It was through the Farm Bureau that my advisory council was first organized and the right men secured, it was the direct cause of about 300 tons of open formula fertilizer being bought in a cooperative way by farmers in the county, it was responsible for a large number of potato growers buying certified seed in a cooperative way, it was responsible for the Back Bay Package corporation, which is farmer owned and made last season more than 40,000 potato barrels for its members at a saving of 5¢ per barrel, it is responsible for 36 farmers selling their wool through the State Wool Growers Association and which netted them about 15¢ per pound more than the local market would pay and its last accomplishment is the grading, inspecting and selling their potatoes under a brand name, more than 8000 barrels were sold in this way, netting the growers 20¢ per barrel more than ungraded and uninspected stock.

I have given this organization all of the assistance possible in their work and hope that its accomplishments are just beginning.

Program of Work

In writing this, the seventh annual report of county agent work in Princess Anne County, I feel that it will be found much fuller and show better and more results accomplished than any report made to you in previous years. While it has been a most discouraging year for farmers due to an extremely bad season and poor prices, I feel that I have been able to render them a real service in my efforts to help them with their problems.

I have made this report on the outline of my Plan of Work that was formulated by my Advisory Council for this year. The goal for each project and the results accomplished are taken in order.

Project No. 1, Club Work

GOAL; To organize seven 4-H clubs, enroll 70 members in corn, potato, cotton, pig and dairy calf club work, coach two demonstration teams, take 25 boys to Tri-County Short Course, hold six community picnics with parents present, send three boys to State Short Course and get 90% of reports at end of year.

RESULTS; Seven 4-H clubs organized and held monthly meetings throughout year. 72 boys and girls enrolled as follows.

30 boys in corn club, 23 of these have turned in complete reports which shows an average yield of 45-1/2 bushels per acre, the highest yield being 73 bushels and the lowest 15, these boys made an average net profit of \$32.50 each above all expenses, counting labor and rent of land.

Seven boys in potato club, all of these have turned in complete reports which shows an average yield of 53 bushels each and an average net profit above all expenses of \$37.89. This work was with one barrel of seed and not on acre basis.

In his acre of corn,
and proud of it.

Five boys in cotton club, two of these acres were entirely ruined by rain and was not worked, the other three sent in complete reports showing that they averaged 1033 pounds of seed cotton per acre and \$51.43 net profit after paying all expenses.

Five boys and girls in dairy calf club, all of these have sent in complete reports which shows an average net profit of \$32.20 after paying for all feed and deducting first value of calf.

Nine boys and girls in sow a litter club, all of these have turned in complete reports which shows that they raised 61 pigs this year and made an average net profit of \$39.29 after paying for all feed and deducting first value of sow.

23 boys and girls in purebred breeding pig club, 17 of these have sent in complete reports which shows that they made an average net profit of \$7.89 after paying for pig and all feed used. Four of these pigs were shown at the State Fair and won one second, three firsts, two champion and one grand champion duroc pig in show.

Total profit made by all club members.....	\$1812.51
Total prize money won by all club members.	\$ 313.30
Grand total all profit.....	\$2125.81

Fourteen members attended county Short Course.
One county picnic held with parents present.
Two members sent to State Short Course.
85% of all reports have been recieved.

Project No. 2, Hogs

~~-----~~

GOAL; To place 10 purebred boars in county during year, hold three demonstrations in economical feeding, start four permanent pastures, hold ten demonstrations in treating pigs for worms and fifteen demonstrations in using Anti-Hog Cholera Serum.

RESULTS; Five purebred boars placed besides ones delivered to club members.

Two feeding demonstrations started and one completed with excellent results.

Four permanent pastures started with one being used this year, giving excellent results.

Fifteen demonstrations in treating pigs for worms held, and 422 pigs were treated, all reports show that pigs made such faster gains after being treated.

Thirtynine demonstrations in using Anti-Hog Cholera Serum held and 851 hogs were treated. It is hard to say how much this work has saved the farmers this year, for instead of letting cholera spread it was kept confined to one section by using serum and few hogs were lost by the disease.

Project No. 3, Sheep.

GOAL; To place ten purebred rams in county during year, hold three lamb feeding demonstrations, start one pure bred flock and sell 50% of wool through Wool Growers Association.

(Studying Pork Production) -

RESULTS; Have assisted in placing eight pure bred or high grade rams during year.

Two lamb feeding demonstrations held and which showed excellent results as it permitted lambs to be sold on an earlier market and for better price.

One purebred flock arranged for.

No new members were signed up in Wool Growers Association but old members received quicker returns and better prices than last year.

Project No.4, Dairy Cows

GOAL; To place cows on 15 farms where there are now none and encourage more dairying in the county.

RESULTS; Have done but very little work on this project this year, but have assisted a few farmers in securing good family cows and furnished plans for one model dairy barn.

Project No. 5, Poultry

GOAL; To hold ten culling, feeding and record demonstrations

RESULTS; Nine culling demonstrations held, handling in all 846 birds and eliminating of this number 250 as poor producers and allowing better feed and care of the producing hens.

Ten farmers are feeding for egg production as instructed and 12 are keeping records of their flocks.

Eight standard bred cockrels placed and plans were furnished for erecting five uptodate poultry houses.

- 8 -

One farmer for whom I culled and gave feeding instructions, reported that his hens had laid for the first time during the winter months and that the eggs sold brought enough to pay all the taxes on his farm above cost of feed and extra attention.

Project No. 6, Corn
-2-2-2-2-2-2-2-2-

GOAL; To hold three demonstrations in growing certified seed, ten demonstrations in using a pure or selected seed and ten demonstrations in proper use of fertilizer.

RESULTS; No demonstrations held in growing certified seed corn this year.

Eight demonstrations in using selected seed held and I personally selected and delivered 20 bushels of this seed corn to these farmers, results very satisfactory considering very poor season.

Twenty other farmers used fertilizer for corn as I directed.

Project No. 7, Cotton
-2-2-2-2-2-2-2-2-

GOAL; To hold five meetings for purpose of giving instructions in growing cotton and hold five demonstrations with a pure seed of an early variety and proper cultivation and use of fertilizer.

RESULTS; Two meetings held with good attendance and excellent interest.

Five demonstrations with a pure seed of an early variety held, three of these were bad due to excessive rains and diseases but the other two are good and promise to yield much better than other varieties in county, although actual results cannot be given at this time as picking is still under way. Arrangements have been made to keep this seed pure for use in county next year.

Project No. 8, Potatoes
-2-2-2-2-2-2-2-2-

GOAL; To hold twenty demonstrations in selecting and treating seed sweetpotatoes before bedding, ten demonstrations with certified irish potato seed, three demonstrations with irish cobbler seed from eight different sections of country, two in treating irish potato seed and to build one sweet potato storage house.

RESULTS; 20 demonstrators in selecting and treating seed sweet potatoes secured, four of these never used treatment furnished, 21 of rest have sent in reports showing that sprouts from treated seed were planted on 66 acres and made an average yield of 177 bushels per acre or a total of 11,662 bushels and shows an increase over untreated seed of 2,863 bushels, these at \$1. per bushel amounts to \$2,863 that these 21 farmers gained by treating their seed.

About 20 farmers used certified irish potato seed with excellent results.

Three demonstrations with different strains of irish cobbler seed held, these showed some interesting facts but this work would have to be continued for several more years to get any definite results or to show the best sections for us to buy seed from.

One demonstration in treating irish potato seed held with good results.

One potato storage house built and has successfully cured 1200 bushels of sweet potatoes, one other house under way but could not finish in time for this crop and plans for two other houses furnished.

Project No. 9, Legumes

~~-----~~

(Studying Farm Machinery on Annual Farm Tour)

GOAL; to hold four demonstrations in growing certified soy beans, five in soy beans for hog pastures, five new alfalfa and two alsike clover demonstrations.

RESULTS; Had four farmers to grow certified soy beans but only one to have crop certified this year.

Held two demonstrations in growing soy beans for hog pastures with excellent results.

Five alfalfa demonstrations doing well, averaging 25% better than other alfalfa in county.

Two new alfalfa and two alsike clover demonstrations started.

Project No. 10, Small Grain

GOAL; To hold two demonstrations in growing certified abruzzi rye and two in treating seed oats for smut.

RESULTS; Had two farmers to grow certified abruzzi rye and one to grow certified wheat and oats, entire crop was sold at an advance price for seed.

One demonstration in treating seed oats for smut, but results were uncertain.

Project No. 11, Home Orchards

GOAL; To hold 15 pruning demonstrations, ten spraying and six fertilizer demonstrations for better fruit.

RESULTS; I held pruning demonstrations in 17 orchards which contained about 1800 trees of all kinds and pruned myself 292 trees in teaching this work.

Spraying demonstrations were given in ten orchards spraying myself 84 trees in getting this work started and which resulted in 424 fruit trees being sprayed for the first time. The results of this spraying was very good as good sound fruit was produced for the owners instead of inferior stuff as before.

Made 200 fig cuttings for one farmer who is starting a fig orchard, results very good.

Supervised the planting of 102 trees and advised fertilizer for five orchards.

Statistical Report

Visits made to demonstrators 402.
Visits made to club members 161.
Visits made to other farmers 180.
Visits made to business men 47.
Club meetings held 61, Attendance 1404.
Farmers meetings held 11, attendance 558.
Other meetings attended in interest of work 14.
Different farms visited this year 152.
Days spent in field work 243.
Miles traveled in doing county agent work 8,563.
Official letters mailed 461.
Office consultations 449.
Circular letters prepared 11, copies circulated 1,935.
Farmers bulletins distributed 443.
Farm record books given out 14.
Building plans furnished 10.
Visits by specialist and district agent 28.
Articles published in news papers 19.
Days spent in office work 60.

Miscellaneous Work

Put on Live-at-Home campaign throughout county last spring and which resulted in 41 farmers signing pledges to grow sufficient food and feed for family and livestock to carry them for one year without buying, these crops to be put ahead of all money crops this year.

Planned and conducted an Educational and Recreational Farm Tour on August 27th, this tour lead to three outstanding farms in county where farm machinery dairying and pork production were studied, and then to the Virginia Truck Experiment Station where the crowd enjoyed an old fashion picnic dinner and was addressed by prominent State Speakers including the Director of Extension Work. About 100 automobiles were in line when the Experiment Station was reached carrying around 450 men, women and children. The day was enjoyed by all and many expressed a desire to make it an annual affair.

Line of automobiles arriving at Virginia Truck Experiment Station on Annual Farm Tour Aug. 27th.

(Winners in the Virginia Ton-Litter Contest
Weight at 180 days 2345 pounds)

Supervised the feeding of one litter of pigs that were entered in the Virginia Ton-Litter Contest, this litter consisted of 12 purebred Duroc Jersey pigs and which weighed at 180 days old 2345 pounds and was the winner of the state contest over 70 litters entered, beating the nearest competitor by 421 pounds.

Collected and displayed an agricultural County Exhibit at the Norfolk and State Fairs. This work takes a lot of my time but is the best possible way to advertise the agriculture of a county.

Cooperated and assisted Farm Bureau with its work all that time would permit and was responsible for its getting the State Department of Agriculture to send men to the Pungo section to inspect potatoes that were to be sold under brand name. About 40 cars were inspected and sold in this way and which netted the growers about 20% more per barrel than ungraded and un-inspected stock.

Outlook and Recommendations for 1925
~~-----~~

The outlook for county agent work in Princess Anne county for 1925 promises to be one of great importance and good results accomplished, as a process of education has been going on for the past few years on some major projects and I believe that next year will bring about some great developments that will count much for agriculture and general progress of the county.

Farmers, generally speaking, have come to a realization that a county agent can be of service to him in his farm work, and through past demonstrations he has learned that certain things are good for him to do in an economical way. Thus I make the statement that 1925 will see more real demonstrations practiced on a large number of farms than ever before and the county agent kept very busy seeing that all are conducted in the right way.

So in thinking about the work for the coming year I feel that there are several projects that are going to need careful and considerable time devoted to them if the best results are to be obtained.

The most important of these are the, Marketing of farm produce, the combatting of diseases of sweet potatoes by better storage, seed selection and treatment before bedding, the proper cultivation and fertilization of cotton, a more general use of certified or known origin seed for all large crops grown in county, better feeding methods and the combatting of worms and cholera of hogs, the enrolling of more real farm boys and girls in agricultural clubs and more demonstrations in the better practice and care of the Home Orchard.

Much time has already been given to the above named projects and I hope to push each one with added force during the coming year as well as other lesser projects will be given due consideration.

Also the County Board of Agriculture that was started last winter and dropped before being organized, when the Board of Supervisors decided to abolish the work, will be taken up again and made to function if possible.

Some Outstanding Accomplishments

Some of the outstanding results that have been accomplished in seven years of County Agent work in Princess Anne County.

- 1st, Then, There was not any boys and girls agricultural club work going on in the county. Now there are seven organized 4-H clubs in as many schools, with a membership of 72 boys and girls carrying on the different club projects in my work besides the members in the Home Demonstration work. Also an annual Short Course is held each summer at Fort Story to give the boys an opportunity to learn more about their club projects and in making good citizens.
- 2nd, Then. There were no purebred hogs to speak of in the county and none that could win a prize at any fair. Now there are four outstanding breeders in the county whose herds are made up with as good blood lines as can be found in the breeds and have matched honors with the best breeders in the State for the past three years at the State Fair. Besides these purebred hogs are well scattered over the entire county, while the marsh type and razor backs are fast disappearing.
- 3rd, Then. There were no pure bred sheep in the county. Now we have three purebred flocks with a majority of the farmers who raise sheep either using purebred or high grade rams to head their flocks. Also six years ago farmers were taking any price offered for their wool by buyers in Norfolk, but now we have 36 selling their wool cooperatively through the state Wool Growers Association.
- 4th, Then. There was not any farm organization of any kind in the county. Now, for the past three years we have had the Farm Bureau. This organization is directly responsible for a large number of farmers buying their potato and other fertilizer of a known formula in a cooperative way, the buying cooperatively and using certified seed potatoes, the manufacturing of their own potato barrels as is done in the Back Bay section, and the grading, inspecting and selling of their potatoes under a brand name as was done in Pungo last season.
- 5th, Then. A large per cent of the sweetpotato crop was lost each year through poor storage and by disease. Now a large number of farmers are annually treating and selecting their seed. Also there are now two modern storage houses in the County.

6th, Then. The use of certified or known origin seed was unknown in Princess Anne. Now we have several farmers growing a large quantity of certified seed for the seed trade, and besides a large quantity of certified seed are used in the county each year and a majority of the farmers are paying more attention to the seed they plant than ever before, for they have learned that seed is the most important factor in the production of crops as a good crop cannot be produced from poor seed.

7th, In 1919 the acreage planted to corn in Princess Anne was 31,746 and which produced a crop of 537,517 bushels, or an average of 17 bushels per acre, this valued at 80¢ per bushel amounts to \$430,011.

- In 1923 the acreage was 31,800 or about the same as in 1919, but produced a crop of 890,500 bushels and an average of 28 bushels per acre. This valued at 80¢ per bushel shows an increase over 1919 of \$282,889.

The average yield of corn in Princess Anne from 1916 to 1920 was 17.2 bushels per acre, while the average yield for 1921, 1922 and 1923 was 24 bushels or an increase of seven bushels over the averaged periods.

Great progress along all agricultural lines has been made over the whole country during the past few years, and I have not written this paper in an effort to leave the impression that I have been responsible for all that have been accomplished in Princess Anne, but I wanted to show what has actually taken place since the work was started here. I have, however been active in bringing about the above results and if County Agent work will be given credit for only a small fraction of the progress that has been made it can readily be seen that the work has well paid the county.

Respectfully Submitted

H. W. Ozlin,
County Agent.

ANNUAL REPORT OF COUNTY EXTENSION WORKERS

This report form is to be used by county extension agents, such as county agricultural agent, home demonstration agent, club agent, and negro agent, reporting on their respective lines of work.

State Virginia County Prince George
 Report of H. W. Ogden County County Agent
 From November 30th 1923 to December 1st 1924.

If agent has not been employed entire year, indicate exact period. Agents resigning during the year should make out this report before quitting the service.

COUNTY AGENT WORK

FIRST CHECK	TRN	FILED

State Extension Director.

SUGGESTIONS RELATIVE TO THE PREPARATION OF THE COUNTY EXTENSION AGENT'S ANNUAL REPORT.

The annual report should be a review, analysis, interpretation, and presentation to the people of the county, the State, and the Nation of the sum total of the extension activities in each county for the year and the results obtained by the county extension agent assisted by the subject-matter specialists. The making of such a report is of great value to the county extension agent and the people of the county in showing the progress made during the year as a basis for future plans. It is of vital concern also to the State and Nation as a measure of rural progress and a basis for intelligent legislation and financial support.

Separate statistical and narrative reports are desired from each county extension agent in charge of a line of work, such as county agent, home demonstration agent, boys' and girls' club agent, and negro agent. Where an assistant agent has been employed a part or all of the year, a report on his or her work should be included with the report of the leader in charge of that line of work. Where an agent in charge of a line of work has quit the service during the year, the information contained in his or her report should be incorporated in the annual report of the agent on duty at the close of the report year, and the latter report so marked. Where two or more extension agents are employed in a county, each in charge of a line of work, care should be exercised to avoid including the same data in the statistical report of more than one agent.

At least four copies of the annual report should be made: One copy for the county officials, one copy for the agent's files, one copy for the State extension office, and one copy for the Extension Service, United States Department of Agriculture. The report to the Washington office should be sent through the State extension office.

NARRATIVE SUMMARY.

The narrative report should be a statement in orderly fashion and arranged under appropriate subheadings, of the work done, methods used, and results obtained under each project, as well as of the general work accomplished. Every statement should be clear-cut, concise, forceful, and, where possible, reinforced with ample data from the statistical summary. In the preparation of the part of the report relative to each project, the results reported in the statistical summary for the project should be analyzed, conclusions drawn, and recommendations made. The report may well be illustrated with photographs, maps, diagrams, blue prints, or copies of charts and other forms used in demonstration work. Full credit should be given to all cooperating agencies. The lines should be single-spaced, with double space between the paragraphs, and reasonably good margins left. The pages should be numbered in consecutive order.

The following outline is suggestive of how the narrative report may be clearly and systematically presented:

SUGGESTIVE OUTLINE OF ANNUAL NARRATIVE REPORT.

- I. Cover and title page.
 - II. Table of contents.
 - III. Status of county extension organization.
 - (1) Form of organization—changes and development.
 - (2) Function of local people, committees, or project leaders in developing the program of work.
 - (3) General policies, including relationships to other organizations.
 - IV. Program of work, goals established, methods employed, and results achieved.
 - (1) Factors considered and methods used in determining program of work.
 - (2) Project activities and results.
 - (a) Soils
 - (b) Farm crops
 - (c) Horticulture
 - (c) Home gardens
 - Beautification of home grounds
 - (d) Forestry
 - (e) Rodents, predatory animals, and birds.
 - (f) Animal husbandry
 - (g) Dairy husbandry
 - Home dairy
 - (g) Poultry husbandry
 - Home poultry
- (including diseases and insects).

SUGGESTIVE OUTLINE OF ANNUAL NARRATIVE REPORT—Continued.

IV. Program of work, etc.—Continued.

(2) Project activities and results—Continued.

- (i) Rural engineering.
- (j) Rural engineering—home.
- (k) Agricultural economies, including farm management and marketing.
- (l) Home marketing.
- (m) Foods.
- (n) Nutrition.
- (o) Clothing.
- (p) Home management.
- (q) Home furnishings.
- (r) Home health and sanitation.
- (s) Community activities.
- (t) Miscellaneous.

V. Outlook and recommendations, including suggestive program of work for next year.

VI. Summary of activities and accomplishments, preferably of one or two typewritten pages only, placed at the beginning or end of the narrative report.

STATISTICAL SUMMARY.

To supplement the narrative part of the report, and in order that comparable State and National summaries may be made, it is necessary to include a statistical summary of the work in each county. The following form has been prepared to insure uniformity of reporting. In addition to the questions asked under each subdivision of the report, space is provided to add further data if desired. The statistical summary will grow naturally out of the field and office records.

DEFINITIONS OF TERMS USED IN THIS REPORT.

1. A PROGRAM OF WORK is a definitely outlined plan for extension work.
2. A PROJECT is a definite, systematic, organized plan for carrying out some phase of the extension program of work, providing for what is to be done, how much, when, where, how, and by whom.
3. MISCELLANEOUS WORK includes work which has not yet become a regular part of the program of work—work other than project work.
4. A COMMUNITY, for the purposes of this report, may be any one of the several units into which the county is divided for purposes of conducting organized extension work.
5. A PROJECT LEADER OR LOCAL LEADER is a person, selected because of his or her special interest and fitness, who functions as a leader in advancing some phase of the local program of extension work.
6. A DEMONSTRATION is an example designed to show the practical application of an established fact. Demonstrations as contemplated in this report are of two kinds, method demonstrations and result demonstrations.
 - A method demonstration is a demonstration given by an extension worker or other trained leader to a group for the purpose of showing them how to carry out a practice. Synonym: Lecture demonstration. Examples: Demonstrations of canning, mixing of spray materials, and culling of poultry.
 - A result demonstration is a demonstration carried on by a farmer, farm woman, boy, or girl under the direction of the extension service, involving a substantial period of time, records of results, and comparisons. Examples: Child-feeding, corn-culture, and orchard-management demonstrations.
7. A DEMONSTRATOR is a farmer, farm woman, boy, or girl who, under the direction of the extension service, conducts a result demonstration.
8. MEMBERS COMPLETING should include those who have satisfactorily finished the work outlined for the current year.
9. A DEMONSTRATION MEETING is a meeting held to give a method demonstration or to start, inspect, or further a result demonstration.
10. A TRAINING MEETING is a meeting at which project leaders or local leaders are trained to carry on extension activities in their respective communities.
11. AN OFFICE CALL OR TELEPHONE CALL is a visit or call by a farmer or other person seeking agricultural or home economics information, as a result of which some definite assistance or information is given.
12. A FARM VISIT is a call at a farm by the agent at which some definite information is given or concrete plan of work outlined, or some valuable information obtained from the farmer regarding his work, or the better practice prevailing in his neighborhood.
13. A HOME VISIT is a call at a home by the agent at which some definite information is given or concrete plan of work outlined, or some valuable information obtained from the farm woman regarding her work, or the better practice prevailing in her neighborhood.
14. DAYS IN OFFICE should include time spent by the county agent in his office, at county agent conferences, and any other work directly related to office administration.
15. DAYS IN FIELD should include all days spent on official duty other than those spent in office.
16. LETTERS WRITTEN should include all single letters on official business.

GENERAL ACTIVITIES—Continued.

9. Number of junior judging or demonstration teams trained		3	9	
10. Number entering college this year who have been club members		4	10	
11. Total number of farm visits ¹ made in conducting extension work		594	11	
12. Number of different farms visited		152	12	
13. Total number of home ² visits made in conducting extension work		0	13	
14. Number of different homes visited		0	14	
15. Number of calls ² relating to extension work	(a) Office	406	15	
	(b) Telephone	47		
16. Number of days agent spent in office		60	16	
17. Number of days agent spent in field		243	17	
18. Number of individual letters written		458	18	
19. Number of fairs at which extension exhibits were made	(a) State Community	1	19	
	(b) County	1		
20. Training meetings ² held for local leaders	(a) Number	3	20	
	(b) Leaders in attendance	23

The total of this column need not check with question 6, page 1, since one helper may assist with two or more projects.
 The illustrations in this column should not be filed out until the corresponding questions on the following pages.

FARM-DEMONSTRATION WORK.

SOILS.¹

Report only this year's extension activities and results that are supported by records.

45. Number of method demonstrations given	1	45
46. Number of result demonstrations started or under way	3	46
47. Number of result demonstrations completed or carried through the year	0	47
48. Number of acres involved in these completed demonstrations	0	48
49. Number of farms adopting improved practices in the use of commercial fertilizer this year	92	49
50. Tons involved in preceding question	292	50
51. Number of farms taking better care of farm manures this year	3	51
52. Number of farms using lime or limestone for the first time	2	52
53. Tons of lime or limestone so used	54	53
54. Number of farms plowing under cover or other green manure crops for the first time	6	54
55. Acres of cover and green manure crops so plowed under	24	55
56. Total number of different farms adopting improved practices, relative to the soils work reported on this page	9	56

[Use space below to include other important data relating to soils.]

One field where I conducted a soil demonstration was in such a low state of cultivation that no crop could be grown & make a profit, the owner believed that his soil was carrying a disease that affected all his crops. I had this tested out and found that the soil was affected & exhausted of plant food. I directed that the land be plowed 18 inches deep, apply stable manure and turn under all the soy beans that would grow on the land. This was done and the next crop, potatoes, were 100% better than any previous crop for the past five years.

¹ For drainage, irrigation, land clearing, and terracing see "Rural Engineering," page 16.

POTATOES, COTTON, TOBACCO, AND OTHER SPECIAL CROPS.

Report only this year's extension activities and results that are supported by records.

Item.	(1) Irish potatoes.	(2) Sweet potatoes.	(3) Cotton.	(4) Tobacco.	(5) Other.
85. Number of method demonstrations given.....	3	3	3		
86. Number of adult result demonstrations started or under way.....	20	29	3		
87. Number of adult result demonstrations completed or carried through the year.....	20	21	3		
88. Acres involved in these completed demonstrations.....	90	66	11		
89. Increased yield per acre on demonstrations.....	10 bu.	45 bu.	100 lbs.*	lbs.	
90. Number of junior clubs *.....					
91. Number of members enrolled.....	(a) Boys 7		5		
	(b) Girls				
92. Number of members completing work.....	(a) Boys 7		3		
	(b) Girls				
93. Number of acres grown by junior club members com- pleting.....	2		3		
94. Total yield of crops grown by junior club members.....	571 bu.	bu.	399 lbs.*	lbs.	
95. Number of farms planting improved seed for the first time.....	20	11	3		
96. Number of farms practicing seed selection for the first time.....	0	21	2		
97. Number of farms treating seed for disease for the first time.....	1	21	0		
98. Number of farms spraying or dusting for diseases and insects for the first time.....	20	0	0		
99. Total number of different farms adopting improved practices relative to potatoes, cotton, tobacco, and other special crops reported on this page.....	20	26	3		
[Use space below to include other important data relating to potatoes, cotton, tobacco, and other special crops.]					

* Indicate crop by name.

* Report yield of cotton in pounds of seed cotton.

* States which do not organize clubs or groups on a project basis should not report on this question but should report on enrollment and completion.

HORTICULTURE.

Report only this year's extension activities and results that are supported by records.

Item.	(4)	(5)	(6)	(6)	(6)	(7)		
	Tree fruits.	Bush and small fruits.	Grapes.	Market gardening, truck and raising crops.	Home gardens.	Demarcation of home grounds.
