III.

HIGHLAND COUNTY

Highland County is located in the Northwestern part of the State, bounded on the North by Pendleton County, West Virginia, on the West by Pocohontas County, West Virginia, the East by Augusta County, and on the South by Bath County.

Highland has an excellent highway system, with main highways running north, east, south, and west, also numerous primary and secondary roads to all points in the county.

Highland is one of the highest counties in altitude in the State, ranging from 2500 to 4500 feet above sea level. On account of the high altitude, the type of farming is different from the surrounding counties. Due to the cool climate, rainfall, and terrain, it is strictly a livestock county. Some of the best bluegrass in the United States is found in the county. Very little acreage is cultivated and the majority of the meadows have never been tilled. It is estimated that approximately 70% of the county is in timber and cut-over land.

There are three high schools in the county and several graded schools which offer an educational opportunity to all children. With the schools there are many Churches which help to make communities a better place in which to live. Educational, civic, and religious organizations also are helping to build better communities.

Highland County is noted for its production of sheep, cattle, maple syrup and buckwheat. It is also noted for its beautiful scenery, cool climate, and wildlife which attracts many people from without.

IV.

PROJECT ACTIVITIES

(a) Extension Organization

Early in the Spring, the Plan of Work was formulated by the Highland County Planning Board. This Board is composed of farmers representing all agricultural agencies, home demonstration work, and farmers from all sections of the county. There is no limitation to the number of members on the committee. The Plan of Work is a plan of extension work set up by farmers

and agricultural agencies so that the County Agricultural Extension Agent can be of most assistance to all the farmers in the county.

(b) Agronomy

During 1941 more farmers have used lime and phosphate than any year since agricultural extension work has been established in the county.

A total of 392.45 tons of concentrated superphosphate was used under the conservation program. The exact figures for the amount of lime that has been used is not available at this time. Farmers are becoming more and more educated to the value of lime and phosphate on pastures, as well as permanent meadow land.

Fifteen demonstration farms have been set up during the year under the Tennessee Valley Authority. On account of the lateness in receiving the metaphosphate and the severe drought during the summer, a great deal has not been realized from these demonstrations to date. 15

During the year a lime grinding plant has been set up in the county and is now furnishing lime to members of the Triple A and to other farmers in the county.

(c) Livestock

From the recommendations of the Planning Board, it was decided to increase the use of purebred sires. The program has gotten underway but a great deal has not been accomplished during the year. A survey is to be made to determine the number of purebred sires in use in the county. During the year twenty purebred bulls and twenty-five rams were placed in the county, a majority of which were produced here.

The Highland County Marketing Association, under the management of the County Agent, marketed 947 head of lambs, valued at \$7900.18, and 11,850 pounds of wool, valued at \$5929.58.

Prices for all livestock have been most satisfactory for 1941.

It was planned to hold a feeder calf sale during the late Fall, but no favorable location could be secured for this year. A number of farmers have expressed their desire to hold a sale, and plans are now being formulated for 1942.

More farmers have been treating their sheep for internal and external parasites. Farmers were urged to take advantage of the portable cooperative dipping vat which was available in the county, and a large number of sheep were treated for ticks and lice in the Spring and Fall. Several flocks were treated for scabs under the direction of the Virginia State Department of Agriculture.

The County Agent, as in past years, has assisted in the vaccination of calves, treating of sheep, and has furnished what assistance he was able to give in all diseases and injuries of livestock, as well as keeping necessary supplies for vaccination and treating of sheep and cattle.

(d) Poultry

All farmers were urged to have a farm flock and several demonstrations on culling of chickens were given during the year. Special effort has been made to increase poultry production to meet the needs of National Defense through better housing, better sanitation, and better management.

(e) Horticulture

A monthly news letter on gardens was mailed to all farmers and citizens of the county as prepared by the Extension Garden Department. All homes in the county were urged to plant sufficiently large gardens to produce enough food for home consumption throughout the year.

V. ASSISTANCE TO AGRICULTURAL CONSERVATION PROGRAM

The county agent acted as educational advisor to the Agricultural Conservation Association in the county. The organization consisted of three county committeemen and six community committeemen, who were responsible for the enactment of the program. The county agent's office is the main center of the Association. All office facilities and equipment of the Extension Division were available to the Conservation Association at all times.

A larger number of plans of work were submitted in 1941 than in 1940. As stated before, more lime and phosphate was used this year than in previous years. On account of the contracted lime plant being unable to furnish lime, a number of farmers were unable to meet the requirements of the conservation program. A survey has been made by the county and community committeemen to ascertain the production of various commodities of which an increase is needed under the National Defense Program. At the same time, farmers who had not signed Farm Practice Plans were urged to do so before the closing date.

VI. ASSISTANCE TO CREDIT AND LOANING AGENCIES

The agent assisted the farmers in securing necessary information on Production Credit and Emergency Crop and Feed Loans. On account of the type of farming in Highland, there is very little demand for crop and feed loans. Since the Production Credit type of loan fits in with livestock production, quite a few loans are being made of this type.

VII. ASSISTANCE TO THE FARM SECURITY PROGRAM

The County Planning Committee requested that the Farm Security Administration include Highland in the Tenant Purchase set-up for 1942. On account of the number of tenants in the county this was not granted. There is a total of sixteen active and one cooperative farm security borrowers. Since the representative of the Farm Security is located in Augusta, the adjoining county, the agent has assisted the supervisor in securing and making loans. The Extension Organization has acted both in an educational and advisory capacity.

VIII. 4-H CLUB WORK

4-H club work in 1941 was set up on an individual project basis, having as its project Feeder Calf Production. Six members started the project, with four completing. This project was carried more to ascertain if this type of project was suitable to Highland County conditions. The results this year were very promising and it is hoped to develop this type of project as the leading one in the county. The banks in the county donated the prizes for the project along with the Thomas E. Wilson award.

**IX. HIGHLIGHTS OF 1941 AGRICULTURAL EXTENSION WORK
IN HIGHLAND COUNTY**

1. Establishing a lime-plant in the county.
2. Larger use of lime and phosphate.
3. Better marketing conditions.
4. Better educational program informing farmers of the various loaning agencies.
5. Development of 4-H club project for the county.
6. Better and sounder agricultural program for the county.

X. OUTLOOK

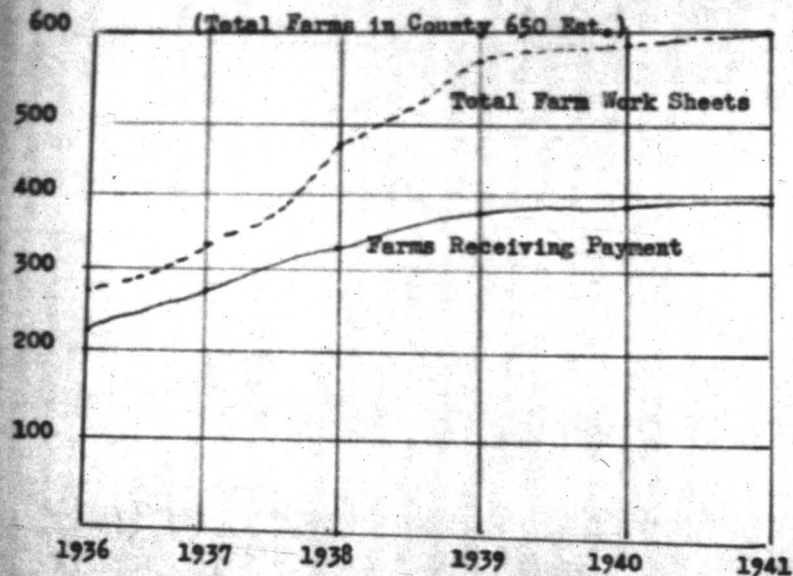

Even with the severe drought of 1941, prospects for a bright outlook for 1942 are very good. With general conditions as they are, a stronger agricultural committee and a much sounder agricultural program for the county can be set up. With this in view and with the help of the various committees and the cooperation of the farmers should lead to a much richer and more abundant farm life.

In conclusion I wish to express my appreciation for the cooperation and support given me by the County Agricultural Conservation Association, all Federal Farm Agencies, the farmers and farm women and for the service they have rendered the agricultural program of Highland County. I also wish to express my appreciation to the Highland Recorder, our county paper, and the Staunton News Leader, for the publicity and support it has given the county agent and farm people in the county.

COMBINED ANNUAL REPORT OF COUNTY EXTENSION WORKERS

This report form is for use by county extension agents in making a combined statistical report on all extension work done in the county during the year. Agents resigning during the year should make out this report before quitting the service.

State Virginia

County Highland

REPORT OF

Virginia B. Babash
(Name) Home Demonstration Agent.

From Mar. 17, 1940 to Nov. 30, 1941

Ettie I. Henry
Assistant Home Demonstration Agent.

From Dec. 1, 1940 to Mar. 31, 1941

4-H Club Agent.

From _____ to _____, 194

Assistant County Agent in charge of Club Work.

From _____ to _____, 194

Frederick Halsinger
Agricultural Agent.

From Dec. 1, 1940 to Dec. 1, 1941

Assistant Agricultural Agent.

From _____ to _____, 194

READ SUGGESTIONS, PAGES 2 AND 3

Date _____

SUGGESTIONS RELATIVE TO THE PREPARATION OF THE COUNTY EXTENSION AGENT'S ANNUAL REPORT

The annual report should be a summary, with analysis and interpretations, for presentation to the people of the county, the State, and the Nation of the extension activities in each county for the year, and the results obtained by the county extension agents assisted by the subject-matter specialists. The making of such a report is of great value to the county extension agents and the people of the county in showing the progress made during the year as a basis for future plans. It is of vital concern also to the State and Nation as a measure of rural progress and a basis for intelligent legislation and financial support of extension work.

At least four copies of the annual report should be made: One copy for the county officials, one copy for the agent's files, one copy for the State extension office, and one copy for the Extension Service, United States Department of Agriculture. *The report to the Washington office should be sent through the State extension office.*

STATISTICAL SUMMARY

Where two or more agents are employed in a county they should submit a single statistical report showing the combined activities and accomplishments of all county extension agents employed in the county during the year. Results obtained through assistance rendered agents by specialists should also be included. This report shows, insofar as possible, the part each agent has taken in forwarding the extension program. The county totals should be the sum of the activities and accomplishments of individual agents *minus duplications due to two or more agents participating in the same activity or accomplishment*. The county totals, when properly recorded, show the progress made in the county during the year in forwarding the entire extension program. Negro men and women agents should prepare a combined statistical report separate from that of the white agents.

The statistical summary should be a report of this year's activities and results that can be verified by records on file in the county office. Where records are not available careful estimates are desired. Such estimates should be marked "Est."

NARRATIVE SUMMARY

A separate narrative report is desired from the leader of each line of work, such as county agricultural agent, home demonstration agent, boys' and girls' club agent, and Negro agent. Where an assistant agent has been employed during a part or all of the year, the report of his or her work should be included with the report of the leader of that line of work. Where an agent in charge of a line of work has quit the service during the year, the information contained in his or her report should be incorporated in the annual report of the agent on duty at the close of the report year, and the latter report so marked.

The narrative report should summarize and interpret, under appropriate subheadings, the outstanding results accomplished and the extension methods used for each project. Every statement should be clear-cut, concise, forceful, and, where possible, reinforced with necessary data from the statistical summary. Use a descriptive style of writing, giving major accomplishments first under each project. Give extension methods fully relating to outstanding results only, and where practicable illustrate with photographs, maps, diagrams, blueprints, or copies of charts and other forms used. Full credit should be given to all cooperating agencies. The lines should be single-spaced, with double space between the paragraphs and reasonably good margins. The pages should be numbered in consecutive order.

The following outline is merely suggestive of how the narrative report may be clearly and systematically presented. Each agent should prepare an outline to fit the situation and the work to be reported.

SUGGESTIVE OUTLINE OF ANNUAL NARRATIVE REPORT

- I. Cover and title page.
- II. Table of contents.
- III. Summary of activities and accomplishments, preferably of one or two typewritten pages only, placed at the beginning of the narrative report.
- IV. Changes in county extension organization made during the year to improve regular procedures or to meet emergencies.
- V. County extension program.
 - (1) Problems determining extension program.
 - (2) Influence of State and National agricultural agencies operating in county upon extension program.
 - (3) Activities and results.

Under appropriate headings present in some detail for each major problem or line of work the goals set up, the methods used, the cooperation received, the coordination effected, the results achieved, and the significance of these results in terms of problem solution.
- VI. Outlook and recommendations.

TERMINOLOGY

To insure reports which convey the intended meaning to others and to facilitate the compilation of satisfactory national statistics on extension, it is extremely important that terms be used in accordance with accepted definitions. The following definitions of extension terms have been approved by the United States Department of Agriculture and the Association of Land Grant Colleges and Universities. Agents should read these definitions before starting to write the annual reports.

DEFINITIONS OF EXTENSION TERMS

1. An extension program is a statement of the specific projects to be undertaken by the extension agents during a year or a period of years.
2. A plan of work is a definite outline of procedure for carrying out the different phases of the program. Such a plan provides specifically for the means to be used and the methods of using them. It also shows what, how much, when, and where the work is to be done.
3. A community is a more or less well-defined group of rural people with common interests and problems. Such a group may include those within a township, trade area, or similar limits. For the purpose of this report a community is one of the several units into which a county is divided for conducting organized extension work.
4. A project leader, local leader, or committeeman is a person who, because of special interest and fitness, is selected to serve as a leader in advancing some phase of the local extension program.—A project leader may be either an organization or a subject-matter leader.
5. Demonstrations as contemplated in this report are of two kinds—method demonstrations and result demonstrations. A method demonstration is a demonstration given by an extension worker or other trained leader for the purpose of showing how to carry out a practice. Examples: Demonstrations of how to can fruits and vegetables, mix spray materials, and cull poultry.
A result demonstration is a demonstration conducted by a farmer, home maker, boy, or girl under the direct supervision of the extension worker, to show locally the value of a recommended practice. Such a demonstration involves a substantial period of time and records of results and comparisons, and is designed to teach others in addition to the person conducting the demonstration. Examples: Demonstrating that the application of fertilizer to cotton will result in more profitable yields, that underdrain of certain children can be corrected through proper diet, that the use of certified seed in growing potatoes is a good investment, or that a large farm business results in a more efficient use of labor.
The adoption of a farm or home practice resulting from a demonstration or other teaching activity employed by the extension worker as a means of teaching is not in itself a demonstration.
6. A result demonstrator is an adult, a boy, or a girl who conducts a result demonstration as defined above.
7. A cooperator is a farmer or home maker who agrees to adopt certain recommended practices upon the solicitation of an extension worker. The work is not directly supervised by the extension agent and records are not required, but reports on the success of the practices may be obtained.
8. A 4-H Club is an organized group of boys and/or girls with the objectives of demonstrating improved practices in agriculture or home economics, and of providing desirable training for the members.
9. 4-H Club members enrolled are those boys and girls who actually start the work outlined for the year.
10. 4-H Club members completing are those boys and girls who satisfactorily finish the work outlined for the year.
11. A demonstration meeting is a meeting held to give a method demonstration or to start, inspect, or further a result demonstration.
12. A leader-training meeting is a meeting at which project leaders, local leaders, or committeemen are trained to carry on extension activities in their respective communities.
13. An office call is a call in person by an individual or a group seeking agricultural or home-economics information, as a result of which some definite assistance or information is given. A telephone call differs from an office call in that the assistance or information is given or received by means of the telephone. Telephone calls may be either incoming or outgoing.
14. A farm or home visit is a call by the agent at a farm or home at which some definite information relating to extension work is given or obtained.
15. Days in office should include time spent by the county extension agent in the office, at annual and other extension conferences, and on any other work directly related to office administration.
16. Days in field should include all days spent on official duty other than "days in office."
17. Letters written should include all original letters on official business. (Duplicated letters should not be included.)
18. An extension school is a school usually of 2 to 6 days' duration, arranged by the Extension Service, where practical instruction is given to persons not resident at the college. An extension short course differs from an extension school in that it is usually held at the college or another educational institution and usually for a longer period of time.
19. Records consist of definite information on file in the county office that will enable the agent to verify the data on extension work included in this report.
20. The county extension association or committee is that county organization, whether a membership or a delegate body, which is recognized officially in the conduct of extension work in the county.

GENERAL ACTIVITIES

Report Only This Year's Extension Activities and Results That Can Be Verified

1. List below the names, titles, and periods of service of the county extension agents whose work is included in this report. Include time of assistants with that of regular agent.

AGENT	Total months of service this year (a)	Days devoted in work with adults (b)	Days devoted to work with 4-H Club and other youth (c)	Total days in office (d)	Total days in field (e)
Virginia B. Rubush (Name) Home demonstration agent	12 1/2	200	100	98	212
ETIE Henry Asst. home demonstration agent					
4-H Club agent Assistant county agent in charge of club work	(3)				
Frederick Halinger Agricultural agent	12	267	10	168 1/2	108 1/2
Assistant agricultural agent					

2. County extension association or committee:

(a) Agricultural extension:

(1) Name Highland Agric. Planning Board(2) Number of members 21

(b) Home demonstration:

(1) Name Co. Home-making Socy(2) Number of members 31

(c) 4-H Club:

(1) Name Co. 4-H Council(2) Number of members 30

3. Number of communities in county where extension work should be conducted
- 34
- 3

4. Number of above communities in which the extension program has been planned cooperatively by extension agents and local committees
- 26
- 4

5. Number of different voluntary county or community project leaders or committeemen actively engaged in forwarding the extension program:

(a) Adult work (1) Men (b) 4-H Club work (1) Men (3) Older club boys 10(2) Women 62(2) Women 12(4) Older club girls

6. Number of different paid local leaders engaged in agricultural-conservation and adjustment programs:

(a) Men 9(b) Women

7. Number of clubs or other groups organized to carry on adult home demonstration work
- 12
- 7

8. Number of members in such clubs or groups
- 241
- 8

ITEM	Home demonstration agents (a)	4-H Club agents (b)	Agricultural agents (c)	County total (d)
9. Number of 4-H Clubs	<u>26</u>			<u>26</u>
10. Number of different 4-H Club members enrolled:	(1) Boys <u>63</u>		<u>7</u>	<u>70</u>
(2) Girls <u>302</u>				<u>302</u>
11. Number of different 4-H Club members completing:	(1) Boys <u>45</u>		<u>5</u>	<u>50</u>
(2) Girls <u>191</u>				<u>191</u>

12. Number of different members enrolled in 4-H Club work for:

MEMBERS	1st year	2d year	3d year	4th year	5th year	6th year and over
(a) Boys	<u>25</u>	<u>27</u>	<u>8</u>	<u>7</u>	<u>1</u>	<u>1</u>
(b) Girls	<u>100</u>	<u>75</u>	<u>66</u>	<u>37</u>	<u>21</u>	<u>3</u>

¹ County total should equal sum of preceding three columns minus duplications due to two or more agents participating in the same activity or accomplishment.

² Report the total number of different boys or girls enrolled in club work. This total should equal the sum of the project enrollments reported on pages 2 to 24, minus duplications due to the same boy or girl carrying on two or more subject-matter lines of work. Do not include boys and girls enrolled late in the year in connection with the succeeding year's program.

³ Same as footnote 2 but refers to completions instead of enrollments.

⁴ The total for this question should agree with county total, question 10.

SUMMARY OF EXTENSION INFLUENCE FOR YEAR

It is highly desirable for extension workers to consider the proportion of farms and farm homes in the county which have been definitely influenced to make some substantial change in farm or home operations as a result of the extension program for man, women, boys, and girls. It is recognized that this information is very difficult for agents to report accurately, so a conservative estimate based upon such records, surveys, and other sources of information as are available will be satisfactory. Such estimates should be marked "Est."

Include results of emergency activities as well as the regular extension program.

35. Number of farms in county	650	35
36. Number of farms on which changes in practices have definitely resulted from the agricultural extension program	40	36
37. Number of farm homes in which changes in practices have definitely resulted from the home demonstration program	450 EST.	37
38. Number of other homes in which changes in practices have definitely resulted from the home demonstration program	150 EST.	38
39. Number of farm homes with 4-H Club members enrolled	210 EST.	39
40. Number of other homes with 4-H Club members enrolled	40 EST.	40
41. Total number of different farm families influenced by some phase of the extension program (Include questions 35, 37, and 39, minus duplications.)	550	41
42. Total number of different other families influenced by some phase of extension program (Include questions 38 and 40, minus duplications.)	150	42

County total should equal sum of preceding three columns minus duplications due to two or more agents participating in the same activity or same person.

NOTE.—Questions 18-34 refer to the total number of different activities conducted this year. The totals should equal the sums of the corresponding information reported on following pages minus duplications where the same activity relates to two or more lines of work.
