

A Comprehensive Experimental Evaluation of Actively Controlled Piezoceramics with Positive Position Feedback for Structural Damping

Andrew P. DeGuilio

Thesis submitted to the Faculty of Virginia Polytechnic Institute and State University in partial fulfillment of the requirements for the degree of

Master of Science
In
Mechanical Engineering

Mehdi Ahmadian, Chair
Daniel J. Inman
Harry H. Robertshaw

April 10, 2000
Blacksburg, Virginia

Keywords: Structural Vibration, PZT, Piezoelectrics, Piezoceramics, Positive Position Feedback (PPF), Shunt-Circuit, Vibration, Structure Health and Damage Detection, Active Control, Experiment, Damping, DeGuilio, Ahmadian
