

Development of Polymeric Nanocarriers for Dual Magnetic Resonance Imaging and Drug Delivery

Nipon Pothayee

Dissertation Submitted to the Faculty of the Virginia Polytechnic Institute and State
University in Partial Fulfillment of the Requirements for the Degree of

Doctor of Philosophy
In
Macromolecular Science and Engineering

Judy S. Riffle
Richey M. Davis
Kevin J. Edgar
Richard S. Turner
Nammalwar Sriranganathan

September 24, 2013
Blacksburg, VA

keywords; magnetite, manganese, block, graft ionomers, contrast agents, drug delivery

PERMISSION/LICENSE IS GRANTED FOR YOUR ORDER AT NO CHARGE

This type of permission/license, instead of the standard Terms & Conditions, is sent to you because no fee is being charged for your order. Please note the following:

- Permission is granted for your request in both print and electronic formats, and translations.
- If figures and/or tables were requested, they may be adapted or used in part.
- Please print this page for your records and send a copy of it to your publisher/graduate school.
- Appropriate credit for the requested material should be given as follows: "Reprinted (adapted) with permission from (COMPLETE REFERENCE CITATION). Copyright (YEAR) American Chemical Society." Insert appropriate information in place of the capitalized words.
- One-time permission is granted only for the use specified in your request. No additional uses are granted (such as derivative works or other editions). For any other uses, please submit a new request.

Acknowledgements to be used by RSC authors

Authors of RSC books and journal articles can reproduce material (for example a figure) from the RSC publication in a non-RSC publication, including theses, without formally requesting permission providing that the correct acknowledgement is given to the RSC publication. This permission extends to reproduction of large portions of text or the whole article or book chapter when being reproduced in a thesis.

The acknowledgement to be used depends on the RSC publication in which the material was published and the form of the acknowledgements is as follows:

- For material being reproduced from an article in *New Journal of Chemistry* the acknowledgement should be in the form:
 - [Original citation] - Reproduced by permission of The Royal Society of Chemistry (RSC) on behalf of the Centre National de la Recherche Scientifique (CNRS) and the RSC
- For material being reproduced from an article *Photochemical & Photobiological Sciences* the acknowledgement should be in the form:
 - [Original citation] - Reproduced by permission of The Royal Society of Chemistry (RSC) on behalf of the European Society for Photobiology, the European Photochemistry Association, and RSC
- For material being reproduced from an article in *Physical Chemistry Chemical Physics* the acknowledgement should be in the form:
 - [Original citation] - Reproduced by permission of the PCCP Owner Societies
- For material reproduced from books and any other journal the acknowledgement should be in the form:
 - [Original citation] - Reproduced by permission of The Royal Society of Chemistry

The acknowledgement should also include a hyperlink to the article on the RSC website.

The form of the acknowledgement is also specified in the RSC agreement/licence signed by the corresponding author.

Except in cases of republication in a thesis, this express permission does not cover the reproduction of large portions of text from the RSC publication or reproduction of the whole article or book chapter.

A publisher of a non-RSC publication can use this document as proof that permission is granted to use the material in the non-RSC publication.
