

A Radial Basis Function Approach to a Color Image Classification Problem in a Real Time Industrial Application

FERAT SAHIN

Thesis submitted to the Faculty of the
Virginia Polytechnic Institute and State University in partial
fulfillment of the requirements for the degree of

Master of Science
in
Electrical Engineering

John S. Bay, Chair
A. Lynn Abbott
Hugh F. VanLandingham

June 27, 1997
Blacksburg, Virginia

Keywords: Radial basis functions, radial basis function networks, *k*-means algorithm,
pattern recognition, color quantization, image processing, learning classifier systems.
