1/ Computed from Bureau of the Census data and adjusted to an August 1, 480-lb. net-weight basis. Excludes pre-season ginnings. 2/ Includes pre-season ginning. 3/ Adjusted to August 1-July 31 marketing year. 4/ Difference between ending stocks based on Census data and preceding season's supply less disappearance. 5/ For 1950-73, Loan rates are based on middling 1 1/16 inch micronaire 3.5-4.9; for 1974-87, loan rates are based on strict low middling 1-1/16 inch. 6/ Marketing-year average price. 7/ Updated using WASDE information. 8/ USDA is prohibited by law from publishing cotton price forecasts. 9/ Less than 5,000 bales, domestic measure; less than 5,000 tons, metric. Sources: Cotton and Wool Year Book (Stock #99004). ERS, United States Department of Agriculture. Historical Commodity Data Services 1950-1987. Program Analysis Division, Agriculture Stabilization and Conservation Service, USDA.
