Vita

Peng Xu

The author was born in Shaoxing, Zhejiang, P. R. China in 1973. He received the B. S. and M. S. degrees in electrical engineering from Zhejiang University, Hangzhou, China in 1994 and 1997 respectively.

Since fall 1997, he has been with Virginia Power Electronics Center (VPEC), now Center for Power Electronics Systems (CPES) at Virginia Polytechnic Institute and State University, Blacksburg, VA. His research interests include low voltage high current power conversion, high-frequency magnetics, distributed power systems, power factor correction techniques, and device characterization.

The author is a member of the IEEE Power Electronics Society. He also served as Vice President of IEEE Power Electronics Society Student Branch at Virginia Tech.
