## SUMMARY OF ACTIVITIES AND ACCOMPLISHMENTS

The beginning of the Extension year found the agent busy with details of completing the wheat acreage reduction program. The wheat program was closely followed by the corn-hog program, which required the constant attention of the agent until and into the wheat compliance program started. The corn-hog compliance program followed, and through this program ran wheat compliance corrections and completions.

The assistant agents also were kept busy with the A A A programs until September, when the assistant was delegated to organize Boy's 4H Clubs in cooperation with the H D agent, for the 1935 Extension year. This organization work has been done, with approximately 100 boys signed up now.

Extension work in 1934 was confined mostly to acreage reduction programs as a necessity, utilizing meetings to further such helpful crops as Korean lespedeza, while farmer's attention as a whole was directed to replacement crops of the most use.

As a feasible Boy's 4H project for 1934 under the restricted time that could be given, the agent introduced edible soy beans in two communities, with ten boys. Results were so practical the project was included in 1935 program for 4H boys, and a goodly number of farmers have seen the practical value of at least one variety for poor soil, and will plant in 1935.

Soil testing was carried on mainly during the fall. Farmers supplied new equipment for ascertaining available potash, so that the office is fairly well equipped for effective work in soil improvement.

As a whole the time and efforts of the agents were used mainly in the A A A programs, and connected Extension work as based on the plan of work, was not carried out.

### The County Extension Organization

There were no changes in the county Extension program. Our 106 community committeemen in 12 communities functioned well when called upon in the educational campaigns of the A A A programs

### County Program Of Work

The program as planned in moderate detail could not be carried out, unless the A A A programs equipped their organizations to handle the work. This did not seem to be desired, so the time of the agents was pretty fully occupied with the many details involved in our farmer population.

Office calls were greatly increased, while farm visits were greatly reduced, as a natural sequence of the situation. Since the A A A programs are bringing into the county approximately \$152,500, our committees believed the programs were of first importance, and carried much educational material of practical value, in the recovery program for farmers.

### THE MAJOR PROJECT

Improvement in beef cattle practices and using market news information was carried on through a weekly summary in our main county newspaper. Approximately 50 farmers used the information personally from office calls, and the entire county had the benefit of the weekly news. The fall meeting for the 1935 outlook will be held in December. Our eight Key men are still kept informed daily, weekly, and monthly, on all livestock outlook information.

### SECONDARY PROJECTS

KORRAN LESPEDEZA as a pasture improver and soil saver was pushed at all A A A meetings and through the press. The result was, our farmers seeded over 10 tons of seed, and none but satisfactory results are found in our many farmer contacts. One farmer made 22 tons of hay from 19 acres, and threshed 5000 pounds of seed from 9 acres. This farmer got his urge and information at a Corn-Hog meeting. The financial results per acre, exceed any farm operation here, except successful dairy operations.

### ALFALFA GROWING

This project in the plan of work was like others, furthered through the press, at A A A meetings, and office calls, with a few farm visits to show how soils are properly examined and tested for suitability and plant food contents. Our soil work is done in connection with crop work, as a practical application crop production.

One alfalfa farmer from 175 acres has \$7,000 worth of hay to the credit of his 386 acre farm this year. Last year the same farmer netted \$3,000 from 135 acres of alfalfa. All of the original and continued guidance came from the local Extension service, and the operation is cited to those who are interested. Three farms were completely investigated for subsoil suitability for alfalfa, and plant food contents.

Soil tests were made on 39 farms ; 78 fields, for lime content ( pH ). 48 fields were tested for available phosphorus, and 19 for available potash. The latter testing equipment was installed late in the fall.

### GARDEN PEST CONTROL

Working with the Relief Garden leader, 175 gardens were supplied with proper and possible control materials. The agent introduced Rotenone, by placing small supplies with 40 people in all parts of the county. The makers of this insecticide donated 100 pounds for demonstrations. All users found the material highly effective, and particularly suited to vegetables that require attention when pods leaves, or fruits are formed. The material is non-poisonous to humans.

### DAIRY HERD IMPROVEMENT

The agent devoted available time and attention to maintaining morale among association members, so that for the first time in 12 years of record, not one resignation has occurred for the ensuing testing year. Two policy meetings were held with the directors.

### CARE OF BOXWOOD

The program was fully carried out ; all plantings having at any time shown presence of the miner, were fumigated or sprayed at the proper time.

### FORESTRY

13 acres more were added to last year's 12 acres of forest tree seedling planting, making a solid young forest of 25 acres. The plan provides for 10 acres more planting in 1935 to complete a demonstration for Northern Virginia that will be interesting when some of us have passed to our reward.

### SOCIAL-ECONOMIC SURVEY

This survey sponsored by the C W A, and aided by the agent, covered by typical cross sections, 2/5 of the homes in the county. The schedules have been tabulated, and partly summarized, covering approximately 1200 homes. The findings were to have been used to properly locate a park area on lands unsuited to cereal farming. The results are to be used in the H D agent's 1935 project for home improvement.

### 4H Club Work

Ten boys were started with two varieties each, of edible soy beans, supplied by Mr. W. J. Morse of the Bureau Of Plant Industry. This project was not completed as to records, as the families ate most of the beans green. Each Dad has seen to it that all available seed produced, is kept for 1935.

Our project has revealed that on soils too poor to grow corn, the Hahto variety at least, produces excellent crops of seed. For human food, both green and dried, these beans have made a distinct hit. For production of seed to be fed to any kind of livestock, particularly feed for hogs on poor soil, many farmers have seen a distinct use for the Hahto in particular. The agent at all Corn-Hog referendum meetings displayed typical plants loaded with green pods. The plants were handed to a representative farmer who took them home to try as table food. The approval seems to be about 100%. The agents here believe that the small project has opened up a new and highly valuable crop project for all farmers. We have already been trying out the binder on soy beans for hay and seed, with considerable success. The 1935 plan of work will feature these beans for hog pastures and grain feed to be used before finishing with corn. Many gardens will in 1935 include edible soy beans.

## COMBINED ANNUAL REPORT OF COUNTY EXTENSION WORKERS

This report form is for use by county extension agents in making a combined statistical report on all extension work done in the county during the year. Agents resigning during the year should make out this report before quitting the service.

State Virginia County Loudoun

#### REPORT OF

Matilda Garner  
(Name) Home Demonstration Agent.

From Dec. 1, 1934 to Nov. 30, 1934

Wm. H. Coker III  
4-H Club Agent.

From Feb. 8, '34 to Nov. 30, 1934

J. R. Linner  
Agricultural Agent.

From Dec. 1, 1934 to Nov. 30, 1934

H. S. Barksdale

Dec. 1, 1934 Feb. 5, 1934

READ SUGGESTIONS, PAGES 2 AND 3

### COUNTY AGENT ANNUAL REPORT

Approved: \_\_\_\_\_

Date \_\_\_\_\_

## SUGGESTIONS RELATIVE TO THE PREPARATION OF THE COUNTY EXTENSION AGENT'S ANNUAL REPORT

The annual report should be a summary, with analysis and interpretations, for presentation to the people of the county, the State, and the Nation of the extension activities in each county for the year, and the results obtained by the county extension agents assisted by the subject-matter specialists. The making of such a report is of great value to the county extension agents and the people of the county in showing the progress made during the year as a basis for future plans. It is of vital concern also to the State and Nation as a measure of rural progress and a basis for intelligent legislation and financial support of extension work.

At least four copies of the annual report should be made: One copy for the county officials, one copy for the agent's files, one copy for the State extension office, and one copy for the Extension Service, United States Department of Agriculture. *The report to the Washington office should be sent through the State extension office.*

### STATISTICAL SUMMARY

Where two or more agents are employed in a county they should submit a single statistical report showing the combined activities and accomplishments of all county extension agents employed in the county during the year. Results obtained through assistance rendered agents by specialists should also be included. This report shows, insofar as possible, the part each agent has taken in forwarding the extension program. ~~The county totals should be the sum of the activities and accomplishments of individual agents minus duplications due to two or more agents participating in the same activity or accomplishment.~~ The county totals, when properly recorded, show the progress made in the county during the year in forwarding the entire extension program. Negro men and women agents should prepare a combined statistical report separate from that of the white agents.

The statistical summary should be a report of this year's activities and results that can be verified by records on file in the county office. Where records are not available careful estimates are desired. Such estimates should be marked "Est."

### NARRATIVE SUMMARY

A separate narrative report is desired from the leader of each line of work, such as county agricultural agent, home demonstration agent, boys' and girls' club agent, and Negro agent. Where an assistant agent has been employed during a part or all of the year, the report of his or her work should be included with the report of the leader of that line of work. Where an agent in charge of a line of work has quit the service during the year, the information contained in his or her report should be incorporated in the annual report of the agent on duty at the close of the report year, and the latter report so marked.

The narrative report should summarize and interpret, under appropriate subheadings, the outstanding results accomplished and the extension methods used for each project. Every statement should be clear-cut, concise, forceful, and, where possible, reenforced with necessary data from the statistical summary. Use a descriptive style of writing, giving major accomplishments first under each project. Give extension methods fully relating to outstanding results only, and where practicable illustrate with photographs, maps, diagrams, blueprints, or copies of charts and other forms used. Full credit should be given to all cooperating agencies. The lines should be single-spaced, with double space between the paragraphs and reasonably good margins. The pages should be numbered in consecutive order.

The following outline is merely suggestive of how the narrative report may be clearly and systematically presented. Each agent should prepare an outline to fit the situation and the work to be reported.

### SUGGESTIVE OUTLINE OF ANNUAL NARRATIVE REPORT

- I. Cover and title page.
- II. Table of contents.
- III. Summary of activities and accomplishments, preferably of one or two typewritten pages only, placed at the beginning of the narrative report.
- IV. Changes in county extension organization.
  - (1) Form.
  - (2) General policies.
  - (3) Procedure.
- V. County program of work.
  - (1) Factors considered and methods used in determining program of work.
  - (2) Project activities and results.
 

*Under appropriate headings and subheadings present in some detail for each major project or line of work the goals set up, the methods used, the results achieved, and the significance of these results in terms of improved farms and homes and of better community life.*
- VI. Outlook and recommendations, including suggestive program of work for next year.

## TERMINOLOGY

To insure reports which convey the intended meaning to others and to facilitate the compilation of satisfactory national statistics on extension, it is extremely important that terms be used in accordance with accepted definitions. The following definitions of extension terms have been approved by the United States Department of Agriculture and the Association of Land Grant Colleges and Universities. Agents should read these definitions before starting to write the annual reports.

## DEFINITIONS OF EXTENSION TERMS

1. A program of work is a statement of the specific projects to be undertaken by the extension agents during a year or a period of years.
2. A plan of work is a definite outline of procedure for carrying out the different phases of the program of work. Such a plan provides specifically for the means to be used and the methods of using them. It also shows what, how much, when, and where the work is to be done.
3. A community is a more or less well-defined group of rural people with common interests and problems. Such a group may include those within a township, trade area, or similar limits. For the purpose of this report a community is one of the several units into which a county is divided for conducting organized extension work.
4. A project leader, local leader, or committeeman is a person who, because of special interest and fitness, is selected to serve as a leader in advancing some phase of the local extension program. A project leader may be either an organization or a subject-matter leader.
5. Demonstrations as contemplated in this report are of two kinds—method demonstrations and result demonstrations. A method demonstration is a demonstration given by an extension worker or other trained leader for the purpose of showing how to carry out a practice. Examples: Demonstrations of how to can fruits and vegetables, mix spray materials, and cull poultry.  
A result demonstration is a demonstration conducted by a farmer, home maker, boy, or girl under the direct supervision of the extension worker, to show locally the value of a recommended practice. Such a demonstration involves a substantial period of time and records of results and comparisons, and is designed to teach others in addition to the person conducting the demonstration. Examples: Demonstrating that the application of fertilizer to cotton will result in more profitable yields, that underweight of certain children can be corrected through proper diet, that the use of certified seed in growing potatoes is a good investment, or that a large farm business results in a more efficient use of labor.
6. A result demonstrator is an adult, a boy, or a girl who conducts a result demonstration as defined above.
7. A cooperator is a farmer or home maker who agrees to adopt certain recommended practices upon the solicitation of an extension worker. The work is not directly supervised by the extension agent and records are not required, but reports on the success of the practices may be obtained.
8. A 4-H Club is an organized group of boys and/or girls with the objectives of demonstrating improved practices in agriculture or home economics, and of providing desirable training for the members.
9. 4-H Club members enrolled are those boys and girls who actually start the work outlined for the year.
10. 4-H Club members completing are those boys and girls who satisfactorily finish the work outlined for the year.
11. A demonstration meeting is a meeting held to give a method demonstration or to start, inspect, or further a result demonstration.
12. A leader-training meeting is a meeting at which project leaders, local leaders, or committeemen are trained to carry on extension activities in their respective communities.
13. An office call is a call in person by an individual or a group seeking agricultural or home-economics information, as a result of which some definite assistance or information is given. A telephone call differs from an office call in that the assistance or information is given or received by means of the telephone. Telephone calls may be either incoming or outgoing.
14. A farm or home visit is a call by the agent at a farm or home at which some definite information relating to extension work is given or obtained.
15. Days in office should include time spent by the county extension agent in the office, at annual and other extension conferences, and on any other work directly related to office administration.
16. Days in field should include all days spent on official duty other than "days in office."
17. Letters written should include all original letters on official business. (Duplicated letters should not be included.)
18. An extension school is a school usually of 2 to 6 days' duration, arranged by the Extension Service, where practical instruction is given to persons not resident at the college. An extension short course differs from an extension school in that it is usually held at the college or another educational institution and usually for a longer period of time.
19. Records consist of definite information on file in the county office that will enable the agent to verify the data on extension work included in this report.
20. The county extension association or committee is that county organization, whether a membership or a delegate body, which is recognized officially in the conduct of extension work in the county.

## GENERAL ACTIVITIES

Report Only This Year's Extension Activities and Results That Can Be Verified

1. List below the names, titles, and periods of service of the county extension agents whose work is included in this report. Include time of assistants with that of regular agent.

AGENT	Total months of service this year	Days devoted to A. A. A. work	Days devoted to relief work	Total days in office	Total days in field
	(a)	(b)	(c)	(d)	(e)
<i>Melika Garner</i> (Name) Home demonstration agent	12		15	108	175
Asst. home demonstration agent					
4-H Club agent					
<i>H. S. Barkdale</i> Assistant <del>home</del> club agent	12	512	5	526	99
<i>J. R. Rhinnet</i> Agricultural agent					
<i>W. H. Gocherill</i> Assistant agricultural agent					

2. County extension association or committee:
- (a) Agricultural extension: *County Extension* (2) Number of members *106*
- (b) Home demonstration: *County Advisory Board* (2) Number of members *22*
- (c) 4-H Club: *4H Club Council* (2) Number of members *36*
3. Number of communities in county where extension work should be conducted *12* 3
4. Number of above communities in which the extension program has been planned cooperatively by extension agents and local committees *9* 4
5. Number of different voluntary county or community project leaders or committeemen actively engaged in forwarding the extension program:
- (a) Adult work (1) Men *106* (2) Women *32* (b) 4-H Club work (1) Men *2* (2) Women *13* (3) Older club boys (4) Older club girls
6. Number of different paid local leaders engaged in A. A. A. program, or in relief work: (a) Men *0* (b) Women *14* 6
7. Number of clubs or other groups organized to carry on adult home demonstration work *9* 7
8. Number of members in such clubs or groups *519* 8

ITEM	Home demonstration agents (a)	4-H Club agents (b)	Agricultural agents (c)	County total (d)
9. Number of 4-H Clubs <i>13</i>				<i>13</i>
10. Number of different 4-H Club members enrolled: (1) Boys <i>21</i> (2) Girls <i>153</i>			<i>10</i>	<i>31</i> <i>153</i>
11. Number of different 4-H Club members completing: (1) Boys <i>17</i> (2) Girls <i>127</i>				<i>17</i> <i>127</i>

12. Number of different members enrolled in 4-H Club work for:

MEMBERS	1st year	2d year	3d year	4th year	5th year	6th year and over
(a) Boys <i>31</i>						
(b) Girls <i>99</i>	<i>38</i>	<i>4</i>	<i>8</i>	<i>4</i>		

<sup>1</sup> County total should equal sum of preceding three columns minus duplications due to two or more agents participating in the same activity or accomplishment.

<sup>2</sup> Report the total number of different boys or girls enrolled in club work. This total should equal the sum of the project enrollments reported on pages 7 to 26, minus duplications due to the same boy or girl carrying on two or more subject-matter lines of work.

<sup>3</sup> Same as footnote 2 but refers to completions instead of enrollments.

<sup>4</sup> The total for this question should agree with county total, question 10.

		(b) Total attendance	128			

## SUMMARY OF EXTENSION INFLUENCE FOR YEAR

It is highly desirable for extension workers to consider the proportion of farms and farm homes in the county which have been definitely influenced to make some substantial change in farm or home operations as a result of the extension program for men, women, boys, and girls. It is recognized that this information is very difficult for agents to report accurately, so a conservative estimate based upon such records, surveys, and other sources of information as are available will be satisfactory. Such estimates should be marked "Est."

Include results of emergency activities as well as the regular extension program.

35. Number of farms in county	1645	35
36. Number of farms on which changes in practices have definitely resulted from the agricultural extension program	500	36
37. Number of farm homes in which changes in practices have definitely resulted from the home demonstration program	EST. 519	37
38. Number of other homes in which changes in practices have definitely resulted from the home demonstration program	EST. 200	38
39. Number of farm homes with 4-H Club members enrolled	109	39
40. Number of other homes with 4-H Club members enrolled	32	40
41. Total number of different farm families influenced by some phase of the extension program (Include questions 36, 37, and 38, minus duplications.)	EST. 1000	41
42. Total number of different other families influenced by some phase of extension program (Include questions 38 and 40, minus duplications.)	EST. 125	42

\*County total should equal sum of preceding three columns minus duplications due to two or more agents participating in the same activity or accomplishment.

Notes.—Questions 35-34 refer to the total number of different activities conducted this year. The totals should equal the sums of the corresponding information reported on following pages minus duplications where the same activity relates to two or more lines of work.
