

## **Acknowledgements**

I would like to thank my advisor Prof. A. A. (Louis) Beex for his helpful suggestions and directions, and his patience in guiding me to finish this work. He has been invaluable in improving everything from my writing and presentation skills to my general personality. Without his help, constant encouragement, and support, this work would not have been possible. I also would like to thank Dr. J. Ball, Dr. R. L. Moose, Dr. J. H. Reed, and Dr. H. F. VanLandingham for their time and effort in reviewing this work.

I would like to thank my colleagues at the DSPRL, John, Sundar, and Pulakesh for their help. I also would like to thank Hughes Network Systems for providing me the financial assistance.

I would like to thank my wife who took care of our beloved two-year old daughter when I was working on this dissertation. I would also like to thank my daughter, she will understand this later, because she keeps me energized with her innocent, funny actions.
