ANNUAL NARRATIVE REPORT

Of

EXTENSION WORK IN DINWIDDIE COUNTY VIRGINIA

DECEMBER 1, 1939 to NOVEMBER 30, 1940

Prepared By: B. F. Bedwell, County Agent

THE AGRICULTURAL SITUATION

Agriculture in Dinwiddie County has been on a more satisfactory basis during the past year than it has been since 1935.

Flue-cured tobacco growers got a fair understanding of the situation confronting them, in the fall of 1939, and have been reconciled and fairly well satisfied to operate with allotments established for their farms. It is apparent that a better quality crop has been produced and with adverse weather conditions prevailing during the latter part of the harvesting season, a much larger percent of the crop was saved than would have been with larger acreage planted. The price received so far has been better than was generally expected.

Fire-cured tobacco growers planted close in line with their acreage allotments although no marketing quotas were in effect. The crop was planted with a clean sheet in view of marketing conditions but export outlets for this type of tobacco have closed during the past year as a result of war. The price outlook for this tobacco from the 1940 crop is extremely poor.

Peanut growers started the planting season with a sharp reduction in acreage allotments due to short acreage planted in 1939. Unusually high yields and quality obtained on many farms in 1939 was still fresh in

COUNTY AGENT ANNUAL REPORT

the minds of growers. This, together with reduced allotments of other cash crops, resulted in increased plantings in 1940. A fair crop has been produced and the price situation is about in line with the past three years.

Little interest has been shown in cotton production during the past four years. Two growers produced cotton in excess of their 1940 allotments and five farmers grew cotton without acreage allotments. The yield and quality of the 1940 crop is above normal and the price situation is about in line with the past three years.

Small grain is being produced on more farms and the total production in the county is increasing. The introduction of ten small combines into the county during the past two years probably accounts for this. More good quality lespedeza hay was saved this year than ever before. Farmers are availing themselves of the use of combines to harvest seed from orimson clover, soy beans, cow peas and lespedeza. The 1940 corn crop was about normal with probably a slight increase in acreage harvested.

While no complete figures are available for comparison, it is quite evident that the production of summer legumes, lespedeza, winter legumes and cover crops is rapidly increasing both in acreage and number of farms participating.

Considerable interest is being shown in the production of better quality veals for market and establishment of beef cattle breeds on a number of farms. During the past year, purebred or high grade bulls of beef breeds have been purchased on about twenty farms.

SUMMARY OF ACTIVITIES

Some results have been accomplished in various lines of work during the past year. This paragraph contains a brief summary of activities and a more detailed explanation is given in the following report. The 4-H Club work has been successfully conducted by Samuel B. Land, Assistant Agent in Dinwiddie and three other counties. The Agent has served only in an advisory capacity in this work. In cooperating with other governmental agencies, the agent has had opportunity to learn something of their problems and assist them in arriving at a solution. There has been a demand for assistance in laying out and constructing terraces on a few farms and the first step toward organizing a Soil Conservation

District for Dinwiddie County has been accomplished. An Agricultural Worker's Council was organized and only two meetings held. The county has been mapped according to communities and neighborhoods preparatory to more intensive program planning and the organization of an active board of agriculture. Two serious outbreaks of hog cholera has been encountered and successfully controlled during the past year. The work in connection with the Agricultural Conservation and Adjustment Program has been primarily educational and in an advisory capacity. Full responsibility for the Grant of Aid Program, in which lime and phosphate was furnished in lieu of payments, was assumed by the agent.

4-H CLUB WORK

The 4-H Club program has been conducted by Samuel B. Land, Assistant Agent doing 4-H Club Work in Dinwiddie, Greensville, Lunenburg and Nottoway Counties. It was possible for Mr. Land to spend only one week out of the month in this county but his work has been well planned and very successful. Following is a brief report prepared by Mr. Land:

"The Dinwiddie County boys and the girls that carried boys projects, carried 146 project demonstrations. Of this number, 119 or more than 82% were reported as complete. This was about 11% more completions than last year. The 110 projects completed netted the club members a total of \$4,866.03. Of this amount, \$1,756.30 was made from the 42 corn, peanuts, potatoes, tobacco, and garden projects completed; while \$3,109.73 was made from the 77 swine, dairy cattle, sheep, and poultry projects completed. The gross income from all projects was \$9,383.06; while the total expenses were \$4,517.03. The work in the county was carried on through 7 organized boys projects clubs, 7 community clubs, and the county boys and girls 4-H council.

"The Dinwiddie county council was one of the first groups of boys and girls in club work to begin the move to place a memorial at Jamestown in honor of Mr. F. S. Farrar, the father of club work. There has also been shown this year, outstanding leadership by the officers and an active part by the most of the club members as they have planned a great part of their programs. The Darvills and Midway clubs each sponsored a talent night and beauty contest program last spring in their respective schools. The Darvills Club cleared \$74.00 and the Midway club \$22.00. This money has been used to help send members to various camps and with the expenses of the county council work. The Dinwiddie

and McKenney Clubs sponsored dances at which they cleared small amounts of money to be used to help with the club work in the county. A county 4-H council was re-organized and new officers elected at the beginning of the year. New and stronger regulations were drawn up by the council in regards to the inactive members. Another activity which proved to be much help to club members and also made possible to do more in the organizational meetings was the parliamentary procedure contest in which all clubs in the county had a part. The Darvills Club was awarded a small 4-H Gavel for having the highest score.

Project tours were made at different times of the year by members of the various clubs. Again this year, the Dinwiddie and Greensville County councils sponsored an educational tour to Washington, D. C. on June 23 and 24th. There were 57 boys and girls and 4 leaders that made this tour. Places visited were: Mount Vernon, Bureau of Printing and Engraving, Washington Monument, Smithsonian Institute, The Zoo, The Capitol, The White House, The Congressional Library, The Washington Airport, The Federal Bureau of Public Investigation, The Pan American Building, The Lincoln Memorial, Arlington, and several other important places.

Approximately 50 exhibits were made at the Blackstone, Richmond, and Petersburg Fairs; from which about \$40.00 in prizes was won by the club members of Dinwiddie. Floyd Tucker, Macklin Wray, and Pat Clay represented Dinwiddie County at the State Fair in Poultry Judging. These boys made fairly high scores. Jack Sneed and Glense Tucker of the McKenney Club made up the crop team, while several other members in the county took an interest in the crop judging.

The Dinwiddie boys and girls were well represented at the State Short Course, The District Camp, and The State Conservation Camp, as there were 25 members that attended these club events. Parker Cousins of the Darvills Club was chosen by the State to be one of the two boys from the State to represent Virginia at the National 4-H Camp, in Washington, D. C. last summer. These representatives were selected by their records in club work during the past year. Jack Sneed of the McKenney Club and Mable Zehols of the Darvills Club were selected as All-Stars this summer at the State Short Course.

The Annual Achievement Day was held in the auditorium of the Darvills High School the first week in November. The program began in the morning with the singing of "God Bless America" and the club pledge and motto. A welcome was given by Mr. J. P. Atkinson, principal of the

Darvills School. This was followed with reports of camps, short courses, educational tours, individual club reports, and stunts given by each club. The girls of the county put on a correct dress contest which was followed with lunch hour. Mr. A. V. Watts, club agent of Brunswick County, gave a talk on the chances that club boys and girls had now days with the problems of the world. This was followed by presentation of awards and a moving picture of the life at the District Camp. The following boys were selected as most outstanding of their respective clubs: Bennett McKenney - Darvills, J. C. Ogburn - McKenney, Thomas Rainey - Dinwiddie, and Sidney Spain of the Midway Club. There were about 350 people attending this program.

Primary credit for the Good club work in the county during the past year is due to the fine support and instructions given by the local leaders and principals of the schools. Also the club agent would like to express his appreciation to Mr. Scarborough, Superintendent of Dinwiddie County Schools, and to the McKenney Ruritan Club for their support to the club work."

OTHER GOVERNMENT AGENCIES

As during past years, there has been a close cooperation between extension work and other government agencies. The Seed Loan office, through Mr. W. F. Woolfolk, Field Supervisor, made 345 loans in this county during this year amounting to \$54,480.00. In addition to participating in discussions in the Agricultural Workers Council meetings, the Farm Security Supervisor and the agent has had from one to two conferences each month and at the present time have plans under way to organize the purchasing of a number of lime spreaders on a cooperative basis throughout the county.

While there has been no new construction projects under way by the Rural Electrification Cooperative now serving this county, the interest and welfare of the organization has been before the agent and some time has been devoted to the matter of increasing the load on lines already constructed.

A definite area within the county lying South and West of McKenney was outlined in which a petition was circulated requesting the State Soil Conservation Committee to organize a Soil Conservation District in Dinwiddie County. The petition was completed and submitted to the committee early in October. This work was sponsored by the McKenney Ruritan Club and conducted primarily by Mr. G. V. Nelson, Agricultural Instructor. Work

in connection with the Agricultural Conservation Program will be discussed later in this report.

SOIL CONSERVATION

Terraces have been laid out and later constructed by farm operators on 16 farms protecting about 175 acres of land. While much is being accomplished toward controlling erosion by removing from cultivation the areas most subject to erosion and seeding this land to lespedeza, there is still much need for terracing within the county. Although we have had no terracing unit in operation or C C C Camp doing soil conservation work during the past two years, it appears that more has been accomplished in this direction during this period than at any other time. This is due to the combined efforts of all agencies and especially to publicity which has caused many farmers to become more conscious of their losses and has created a desire within them to do something about it.

PROGRAM PLANNING

Very little actual results have been accomplished in this line of work. The ground work has been laid for a more constructive program for the coming year and for the future. An Agricultural Worker's Council was organized this year comprised of representatives of the various governmental agencies operating in this county and two meetings were held. One of the purposes of this organization was to create a better understanding among the various agencies and the work that each was trying to do. It is felt that this has been done to some extent but much remains to be done toward coordinating the work of each into a program of agriculture for the county.

A representative of the State Extension Division spent a part of three days in the county during the month of November dividing the county into communities and neighborhoods as they now exist. This map, when completed, will serve as a basis for organizing a board of agriculture through which program planning and other lines of agricultural work may be conducted in the future.

HOG CHOLERA

There has been two serious outbreaks of hog cholera during the

past year, -- one early in the year and the other in late Summer and Fall. Six hundred and twenty-seven head of hogs have been treated on 27 farms. The outbreak this Fall scattered over a wide area in three of the four districts in the county. It was successfully checked but not before a serious loss resulted in a few herds. While this work has not been at all extensive it has required more time and attention than it has since 1933.

AGRICULTURAL CONSERVATION PROGRAM

Careful attention has been given to educational work in connection with the Agricultural Conservation Program. Four meetings were held, one in each of the four communities in the county as divided for administrative purposes, at which all farmers were invited to attend. Immediately before referendums were held on various crops in which farmers had opportunity to vote either for or against quotas, intensive educational campaigns were conducted in which practically all interested farmers were reached directly or indirectly. By doing this, information relative to the situation confronting producers of various commodities was gotten before them and a good percentage of growers voted in each referendum.

Out of a total of approximately 1360 eligible flue-cured tobacco growers, including farm operators, tenants and share croppers, 777 votes were cast in the referendum on July 20. A similar procedure was followed in the case of the fire-cured tobacco referendum held on November 23. Out of approximately 460 eligible voters, 320 votes were cast. Educational work has been completed preparatory to holding the cotton referendum on December 7. It is expected that at least 375 votes will be cast out of a possible 450 eligible voters. Checks issued in connection with the 1940 Cotton Price Adjustment Program will be delivered at the various voting places which will greatly stimulate attendance.

Much time was consumed and a careful effort was made to assist all farmers who would agree to participate in the 1940 program to work out Farm Plans which would enable them to draw full payments established for their farms. A total of 1451 farm plans were prepared by the agent, committeemen and clerks assisting, out of a 1925 farms listed. It is believed that in doing a good job in this work that farmers got a better understanding of the program than at any time before.

As a matter of record, the various acreage allotments and harvested acreage during the 1940 program year is given below for the special crops

grown in this county.

<u>Name of Crop</u>	<u>1940 Acreage Allotment</u>	<u>1940 Harvested Acreage</u>
Cotton	1336.7	656.5
Peanuts	5911.8	6632.5
Fire-cured tobacco	883.5	894.2
Flue-cured tobacco	2968.5	2675.0

Included in the peanut acreage given above, 6237.3 acres were measured and the remainder estimated on farms not checked for performance. As previously mentioned in this report, the allotted acreage of peanuts for 1940 was reduced about 1000 acres below the 1939 allotted acreage because of short planting in 1939. The increased planting in 1940 resulted from heavy yields and high quality obtained in 1939 and because allotments for other cash crops were small for this year. This increase will be reflected in reduced payments earned on many farms because of excess peanut acreage harvested. Flue-cured tobacco acreage harvested this year was 293.5 acres less than the allotment for the county. Practically all flue-cured growers tried to plant within their allotment. In doing this some failed to plant the full acreage allowed to their farm. Allotments on many farms was too small to be produced and cured on a profitable basis and no tobacco was planted.

Listed below is a summary of payments received, during the period covered by this report, giving the purpose for which the payment was made, the number and amount of checks received.

<u>Purpose of Payment</u>	<u>No. of Checks Received</u>	<u>Amount</u>
1939 Cotton Price Adjustment	602	\$ 5765.65
1939 Agricultural Conservation	796	25781.35
1940 Cotton Price Adjustment	<u>412</u>	<u>3890.80</u>
Total	1810	\$35437.80

The expense of operating the Dinwiddie County Agricultural Conservation Association during the calendar year of 1940, containing a careful and reasonably accurate estimate for December, amounts to \$7540.45. This compares to an amount of \$7886.77 for 1938 and \$8685.70 for 1939. Below is a summary showing the purpose for which the money was spent.

<u>Purpose of Expense</u>	<u>Persons Employed</u>	<u>Days Service</u>	<u>Amount Paid</u>
County Committee	4	86.5	\$ 346.00
Quota Review Board	3	3.0	12.00
Community Committee	14	69.0	207.00
Referendum Committee	24	35.5	106.50
Office Clerks	8	1056.0	3734.50
County Supervisor	1	128.0	580.50
Field Supervisors	23	658.5	2338.08
Equipment	--	---	1.88
Supplies	--	---	112.58
Telephone	--	---	39.50
Miscellaneous	--	---	61.91
Totals	77	2036.5	\$7540.45

Nine of the personnel employed as referendum committeemen also rendered service as community committeemen and are therefore counted twice. The county supervisor also served as office clerk and one field supervisor has served as office clerk, both of which are counted twice.

Under the miscellaneous item of expense is listed \$19.60 travel paid committeemen attending meetings outside of the county, \$17.40 travel for quota review board in hearing appeals and \$24.91 postage paid in connection with the reorganization of the association.

The agent assumed responsibility for the Grant of Aid Program as an extension project since this was directly in line with the program of work. 2428 tons of lime have been delivered to 267 farms during the period covered by this report. 155 tons of 20% superphosphate were delivered to 99 farms. A carefully planned educational campaign was conducted in an attempt to get farmers to use the lime in such a way as to receive the greatest possible results from its application and to use the phosphate on crops on which credit could be allowed under the program.

CONCLUSION

In conclusion the agent wishes to express his appreciation to those who have assisted in making the work accomplished as outlined in this report possible. While no outstanding results of work of extension nature have been attained, it is believed that some progress has been made. It has been possible to organize the work in connection with the Agricultural Conservation Program on a more effective and economical basis. Most of the

-10-

jobs have been done within the time allotted to them and the necessary reports and forms have been submitted according to schedule. All work at the present time is well up to date and the office is ready to start the duties of a new year as they appear.

COMBINED ANNUAL REPORT OF COUNTY EXTENSION WORKERS

This report form is for use by county extension agents in making a combined statistical report on all extension work done in the county during the year. Agents resigning during the year should make out this report before quitting the service.

State Virginia County Dinwiddie

REPORT OF

<u>Mrs. A. L. Dean</u> (Name) Home Demonstration Agent.	From <u>Dec. 1</u> to <u>Nov. 30</u> , 1940
Assistant Home Demonstration Agent.	From _____ to _____, 1940
<u>Samuel B. Land</u> 4-H Club Agent.	From <u>Dec. 1</u> ^(1/4 time) to <u>Nov. 30</u> , 1940
Assistant County Agent in charge of Club Work.	From _____ to _____, 1940
<u>B. F. Bedwell</u> Agricultural Agent.	From <u>Dec. 1</u> to <u>Nov. 30</u> , 1940
Assistant Agricultural Agent.	From _____ to _____, 1940

READ SUGGESTIONS, PAGES 2 AND 3.

Approved:

Date _____

SUGGESTIONS RELATIVE TO THE PREPARATION OF THE COUNTY EXTENSION AGENT'S ANNUAL REPORT

The annual report should be a summary, with analysis and interpretations, for presentation to the people of the county, the State, and the Nation of the extension activities in each county for the year, and the results obtained by the county extension agents assisted by the subject-matter specialists. The making of such a report is of great value to the county extension agents and the people of the county in showing the progress made during the year as a basis for future plans. It is of vital concern also to the State and Nation as a measure of rural progress and a basis for intelligent legislation and financial support of extension work.

At least four copies of the annual report should be made: One copy for the county officials, one copy for the agent's files, one copy for the State extension office, and one copy for the Extension Service, United States Department of Agriculture. *The report to the Washington office should be sent through the State extension office.*

STATISTICAL SUMMARY

Where two or more agents are employed in a county they should submit a single statistical report showing the combined activities and accomplishments of all county extension agents employed in the county during the year. Results obtained through assistance rendered agents by specialists should also be included. This report shows, insofar as possible, the part each agent has taken in forwarding the extension program. The county totals should be the sum of the activities and accomplishments of individual agents *minus duplications due to two or more agents participating in the same activity or accomplishment.* The county totals, when properly recorded, show the progress made in the county during the year in forwarding the entire extension program. Negro men and women agents should prepare a combined statistical report separate from that of the white agents.

The statistical summary should be a report of this year's activities and results that can be verified by records on file in the county office. Where records are not available careful estimates are desired. Such estimates should be marked "Est."

NARRATIVE SUMMARY

A separate narrative report is desired from the leader of each line of work, such as county agricultural agent, home demonstration agent, boys' and girls' club agent, and Negro agent. Where an assistant agent has been employed during a part or all of the year, the report of his or her work should be included with the report of the leader of that line of work. Where an agent in charge of a line of work has quit the service during the year, the information contained in his or her report should be incorporated in the annual report of the agent on duty at the close of the report year, and the latter report so marked.

The narrative report should summarize and interpret, under appropriate subheadings, the outstanding results accomplished and the extension methods used for each project. Every statement should be clear-cut, concise, forceful, and, where possible, reenforced with necessary data from the statistical summary. Use a descriptive style of writing, giving major accomplishments first under each project. Give extension methods fully relating to outstanding results only, and where practicable illustrate with photographs, maps, diagrams, blueprints, or copies of charts and other forms used. Full credit should be given to all cooperating agencies. The lines should be single-spaced, with double space between the paragraphs and reasonably good margins. The pages should be numbered in consecutive order.

The following outline is merely suggestive of how the narrative report may be clearly and systematically presented. Each agent should prepare an outline to fit the situation and the work to be reported.

SUGGESTIVE OUTLINE OF ANNUAL NARRATIVE REPORT

- I. Cover and title page.
- II. Table of contents.
- III. Summary of activities and accomplishments, preferably of one or two typewritten pages only, placed at the beginning of the narrative report.
- IV. Changes in county extension organization made during the year to improve regular procedures or to meet emergencies.
- V. County extension program.
 - (1) Problems determining extension program.
 - (2) Influence of State and National agricultural agencies operating in county upon extension program.
 - (3) Activities and results.

Under appropriate headings present in some detail for each major problem or line of work the goals set up, the methods used, the cooperation received, the coordination effected, the results achieved, and the significance of these results in terms of problem solution.
- VI. Outlook and recommendations.

TERMINOLOGY

To insure reports which convey the intended meaning to others and to facilitate the compilation of satisfactory national statistics on extension, it is extremely important that terms be used in accordance with accepted definitions. The following definitions of extension terms have been approved by the United States Department of Agriculture and the Association of Land Grant Colleges and Universities. Agents should read these definitions before starting to write the annual reports.

DEFINITIONS OF EXTENSION TERMS

1. An extension program is a statement of the specific projects to be undertaken by the extension agents during a year or a period of years.
2. A plan of work is a definite outline of procedure for carrying out the different phases of the program. Such a plan provides specifically for the means to be used and the methods of using them. It also shows what, how much, when, and where the work is to be done.
3. A community is a more or less well-defined group of rural people with common interests and problems. Such a group may include those within a township, trade area, or similar limits. For the purpose of this report a community is one of the several units into which a county is divided for conducting organized extension work.
4. A project leader, local leader, or committeeman is a person who, because of special interest and fitness, is selected to serve as a leader in advancing some phase of the local extension program. A project leader may be either an organization or a subject-matter leader.
5. Demonstrations as contemplated in this report are of two kinds—method demonstrations and result demonstrations. A method demonstration is a demonstration given by an extension worker or other trained leader for the purpose of showing how to carry out a practice. Example: Demonstrations of how to can fruits and vegetables, mix spray materials, and soil poultry.
6. A result demonstration is a demonstration conducted by a farmer, home maker, boy, or girl under the direct supervision of the extension worker, to show locally the value of a recommended practice. Such a demonstration involves a substantial period of time and records of results and comparisons, and is designed to teach others in addition to the person conducting the demonstration. Example: Demonstrating that the application of fertilizer to cotton will result in more profitable yields, that underweight of certain children can be corrected through proper diet, that the use of certified seed in growing potatoes is a good investment, or that a large farm business results in a more efficient use of labor.
7. The adoption of a farm or home practice resulting from a demonstration or other teaching activity employed by the extension worker as a means of teaching is not in itself a demonstration.
8. A result demonstrator is an adult, a boy, or a girl who conducts a result demonstration as defined above.
9. A cooperator is a farmer or home maker who agrees to adopt certain recommended practices upon the solicitation of an extension worker. The work is not directly supervised by the extension agent and records are not required, but reports on the success of the practices may be obtained.
8. A 4-H Club is an organized group of boys and/or girls with the objectives of demonstrating improved practices in agriculture or home economics, and of providing desirable training for the members.
8. 4-H Club members enrolled are those boys and girls who actually start the work outlined for the year.
10. 4-H Club members completing are those boys and girls who satisfactorily finish the work outlined for the year.
11. A demonstration meeting is a meeting held to give a method demonstration or to start, inspect, or further a result demonstration.
12. A leader-training meeting is a meeting at which project leaders, local leaders, or committeemen are trained to carry on extension activities in their respective communities.
13. An office call is a call in person by an individual or a group seeking agricultural or home-economics information, as a result of which some definite assistance or information is given. A telephone call differs from an office call in that the assistance or information is given or received by means of the telephone. Telephone calls may be either incoming or outgoing.
14. A farm or home visit is a call by the agent at a farm or home at which some definite information relating to extension work is given or obtained.
15. Days in office should include time spent by the county extension agent in the office, at annual and other extension conferences, and on any other work directly related to office administration.
16. Days in field should include all days spent on official duty other than "days in office."
17. Letters written should include all original letters on official business. (Duplicate letters should not be included.)
18. An extension school is a school usually of 2 to 6 days' duration, arranged by the Extension Service, where practical instruction is given to persons not resident at the college. An extension short course differs from an extension school in that it is usually held at the college or another educational institution and usually for a longer period of time.
19. Records consist of definite information on file in the county office that will enable the agent to verify the data on extension work included in this report.
20. The county extension association or committee is that county organization, whether a membership or a delegate body, which is recognized officially in the conduct of extension work in the county.

GENERAL ACTIVITIES

Report Only This Year's Extension Activities and Results That Can Be Verified

1. List below the names, titles, and periods of service of the county extension agents whose work is included in this report. Include time of assistants with that of regular agent.

AGENT	Total months of service this year	Days devoted to work with adults	Days devoted to work with 4-H Club and other youth	Total days in office	Total days in field
	(a)	(b)	(c)	(d)	(e)
<u>Mrs. A. L. Dean</u> (Name) Home demonstration agent	12	147 752	134	76	200
Asst. home demonstration agent					
<u>Samuel B. Land</u> 4-H Club agent	12	4	71	25	50
Assistant county agent in charge of club work					
<u>B. F. Bedwell</u> Agricultural agent	12	293		213	80
Assistant agricultural agent					

2. County extension association or committee:

(a) Agricultural extension:

(1) Name _____

(2) Number of members _____

(b) Home demonstration:

(1) Name Home Making Board

(2) Number of members _____

(c) 4-H Club:

(1) Name Dinwiddie Co. 4-H Club Council

(2) Number of members 70

3. Number of communities in county where extension work should be conducted 10

4. Number of above communities in which the extension program has been planned cooperatively by extension agents and local committees 10

5. Number of different voluntary county or community project leaders or committeemen actively engaged in forwarding the extension program:

(a) Adult work

(1) Men _____

(2) Women 121

(b) 4-H Club work

(1) Men 1

(2) Women 11

(3) Older club boys 1

(4) Older club girls 6

6. Number of different paid local leaders engaged in agricultural-conservation and adjustment programs:

(a) Men 60

(b) Women _____

7. Number of clubs or other groups organized to carry on adult home demonstration work 14

8. Number of members in such clubs or groups 350

ITEM	Home demonstration agents (a)	4-H Club agents (b)	Agricultural agents (c)	County total ¹ (d)
9. Number of 4-H Clubs	<u>14</u>	<u>7</u>		<u>21</u>
10. Number of different 4-H Club members enrolled	(1) Boys ² <u>128</u>	<u>128</u>		<u>128</u>
	(2) Girls ² <u>176</u>	<u>17</u>		<u>176</u>
11. Number of different 4-H Club members completing	(1) Boys ² <u>96</u>	<u>96</u>		<u>96</u>
	(2) Girls ² <u>138</u>	<u>14</u>		<u>138</u>

12. Number of different members enrolled in 4-H Club work for:⁴

MEMBERS	1st year	2d year	3d year	4th year	5th year	6th year and over
(a) Boys	<u>37</u>	<u>36</u>	<u>25</u>	<u>17</u>	<u>7</u>	<u>6</u>
(b) Girls	<u>2853</u>	<u>49</u>	<u>2030</u>	<u>1820</u>	<u>1213</u>	<u>6</u>

¹ County total should equal sum of preceding three columns minus duplications due to two or more agents participating in the same activity or service.

² Report the total number of different boys or girls enrolled in club work. This total should equal the sum of the project enrollments reported on pages 7 to 24, minus duplications due to the same boy or girl carrying on two or more subject-matter lines of work. Do not include boys and girls enrolled late in the year in connection with the succeeding year's program.

³ Same as footnote 2 but refers to completions instead of enrollments.

⁴ The total for this question should agree with county total, question 10.

GENERAL ACTIVITIES—Continued

Report Only This Year's Extension Activities and Results That Can Be Verified

ITEM	Age	10 and under	11	12	13	14	15	16	17	18	19	20 and over			
13. Number of different 4-H Club members enrolled according to age ¹	(a) Boys	14	19	20	14	16	20	11	7	5	2	0	13		
	(b) Girls	26	36	25	27	28	15	9	7	3	0	0			
14. Number of 4-H Club members: ²	(a) In school	204 294											(b) Out of school	107	14

ITEM	Home demonstration agents (a)	4-H Club agents (b)	Agricultural agents (c)	County total* (d)	
15. Number of 4-H Club teams trained	(1) Judging		3	3	15
	(2) Demonstration		1	1	
16. Number of groups ³ other than 4-H Clubs organized for extension work with rural young people 16 years of age and older					16
17. Members in groups reported in question 16	(1) Young men				17
	(2) Young women				
18. Total number of farm or home visits ⁴ made in conducting extension work	593	112	220	925	18
19. Number of different farms or homes visited	49	53	178	280	19
20. Number of calls relating to extension work	(1) Office	235	30	2351	2616
	(2) Telephone	232	36	500	
21. Number of news articles or stories published ⁵	59	22	28	79	21
22. Number of individual letters written	644	102	407	1153	22
23. Number of different circular letters issued (not total copies mailed)	13	25	27	65	23
24. Number of bulletins distributed	1211	340	107	1658	24
25. Number of radio talks broadcast or prepared for broadcasting	5			5	25
26. Number of events at which extension exhibits were shown		4		4	26
27. Training meetings held for local leaders or committeemen	(a) Number	6		6	27
	(b) Men leaders				
	(c) Women leaders	85		85	
	(a) Number	3	2	5	28
	(b) Total attendance of Leaders	68	10	78	
	(c) Total attendance	139	66	199	
28. Method demonstration meetings held (include all method demonstrations in both adult and 4-H Club work given by agents and specialists not reported under question 27)	(1) Number	2778	1700	4478	28
	(2) Total attendance	1528	2	1528	
29. Meetings held at result demonstrations	(1) Number	322	60	382	29
	(2) Total attendance				

¹ The total for this question should agree with county total, question 13.² County total should equal sum of preceding three columns minus duplications due to two or more agents participating in the same activity or occupying positions.³ Do not include groups previously reported under question 9.⁴ Do not count a single visit to both the farm and home as two visits.⁵ Do not count items relating to notices of meetings only.

Notes.—Questions 15-24 refer to the total number of different activities conducted this year. The totals should equal the sums of the corresponding information reported on following pages minus duplications where the same activity relates to two or more lines of work.

GENERAL ACTIVITIES—Continued

Report Only This Year's Extension Activities and Results That Can Be Verified

ITEM		Home demonstration agents (a)	4-H Club agents (b)	Agricultural agents (c)	County total (d)
30. Tours conducted	(1) Adult work	(a) Number	2		2
		(b) Total attendance	166		166
	(2) 4-H Club	(a) Number		3	3
		(b) Total attendance		65	65
31. Achievement days held	(1) Adult work	(a) Number	1		1
		(b) Total attendance	100		100
	(2) 4-H Club	(a) Number	1	1	1
		(b) Total attendance	330	330	330
32. Encampments held (Do not include picnics, rallies, or short courses, as these should be reported under other meetings.)	(1) Farm women	(a) Number			
		(b) Total members attending			
		(c) Total others attending			
	(2) 4-H Club	(a) Number	2	2	2
		(b) Total boys attending		3	3
		(c) Total girls attending	5	5	5
		(d) Total others attending		2	2
33. Other meetings of an extension nature participated in by agents or specialists and not previously reported	(1) Number	48	33	58	129
	(2) Total attendance	5232	5956	2957	14045
34. Meetings held by local leaders or committeemen not participated in by agents or specialists and not reported elsewhere	(1) Adult work	(a) Number	10		10
		(b) Total attendance	97		97
	(2) 4-H Club	(a) Number		5	5
		(b) Total attendance		150	150
34. Number of above meetings (questions 27-34) at which discussion group method of presentation was followed			18		18

SUMMARY OF EXTENSION INFLUENCE FOR YEAR

It is highly desirable for extension workers to consider the proportion of farms and farm homes in the county which have been definitely influenced to make some substantial change in farm or home operations as a result of the extension program for men, women, boys, and girls. It is recognized that this information is very difficult for agents to report accurately, so a conservative estimate based upon such records, surveys, and other sources of information as are available will be satisfactory. Such estimates should be marked "Est."

Include results of emergency activities as well as the regular extension program.

35. Number of farms in county	1844	35
36. Number of farms on which changes in practices have definitely resulted from the agricultural extension program	1250	36
37. Number of farm homes in which changes in practices have definitely resulted from the home demonstration program	312	37
38. Number of other homes in which changes in practices have definitely resulted from the home demonstration program	10	38
39. Number of farm homes with 4-H Club members enrolled	275	39
40. Number of other homes with 4-H Club members enrolled	20	40
41. Total number of different farm families influenced by some phase of the extension program (Include questions 36, 37, and 39, minus duplications.)	1425	41
42. Total number of different other families influenced by some phase of extension program (Include questions 38 and 40, minus duplications.)	275	42

¹ County total should equal sum of preceding three columns minus duplications due to two or more agents participating in the same activity or accomplishment.

NOTE.—Questions 18-34 refer to the total number of different activities conducted this year. The totals should equal the sums of the corresponding information reported on following pages minus duplications where the same activity relates to two or more lines of work.

CEREALS¹

Report Only This Year's Extension Activities and Results That Can Be Verified
