ANNUAL NARRATIVE REPORT

1928

ROCKBRIDGE COUNTY VIRGINIA M. G. LEWIS, COUNTY AGENT

I. STATUS OF COUNTY EXTENSION ORGANIZATION

Extension work in Rockbridge county is conducted largely thru the County Agricultural Advisory Council and the Four-H Clubs as local units. There is at present but one active adult local unit in the county. This local organization functions as a Community League under the Cooperative Education Association of Virginia and during the past several years has devoted its attentions largely to improving and providing funds for the District High School. One other high school has a fairly active school league.

The Farmers' Union which was once very active as a general county wide organization has largely ceased to function. Local meetings are still held once or twice a year in certain sections of the county in the name of the Farmers' Union, but for the sole purpose of making up cooperative orders for fertilizers, seeds and other staple farm supplies. Very little if any other activity is entered into at these meetings.

The County Agricultural Advisory Council is composed of three representative farmers from each of the six managerial districts of the county, the presidents of the County Bankers Association, the Chamber of Commerce, the County Ministerial Association, the County Four-H Club organization. Among the farmer members are the Presidents of the County Farmers' Exchange, the Livestock Marketing Association, the Sheep and Wool Association, the Dairy Herd Improvement Association, the Farmers' Mutual Fire Insurance Association and the County Fair. The County Board of Supervisors and the Superintendent of Schools are Ex-officio members. The entire group is organized into seven committees: Agronomy, Livestock, Poultry, Horticulture, Agricultural Economics, Agricultural Engineering, and Four-H Clubs.

Function of Local people in Developing the Program for Extension Work:- The Advisory Council meets four times each year. A meeting is held in December (usually on the first Monday) largely for the purpose of receiving a report of the county agent and the several committees of the Council on activities during the past year. A summary of these reports is then placed before the County Board of Supervisors, before they are asked to act on an appropriation from county funds for extension work for the coming year.

The second meeting is held usually in February for completing the program of work for the year. In the meantime committee meetings are held for the purpose of preparing this program. Each of the above named committees meet separately with the county agent for the purpose of planning the work in their respective departments. This material is brought together to be revised and approved by the entire council, thus becoming the plan of work for the year.

Two other meetings of the entire council are usually held during the year. These are largely progress meetings and are important in keeping the plan of work before the members of the council and in keeping them interested in carrying it out.

Relation to Other Organizations:- The Four-H Clubs while an Extension Organization in that they are quite largely dependent on the activities of the county agent are at the same time conducted as nearly as possible by and for the young people of the community. At the same time they exert a very great influence on the adults as has been many times demonstrated in various parts of the county. Much thought and attention is now being given to establishing active local adult organizations in each community of the county as soon as possible. This topic is discussed more fully under Section V. of this report, "Outlook and Recommendations".

Both the Livestock Marketing Association and the Farmers' Cooperative Exchange are valuable cooperating agencies. The latter has been of great value in providing a source of supply for newly introduced materials such as insecticides, feeds and fertilizers or analyses recommended. The former organization is of great value in furthering livestock improvement work, both the better sires and the better feeding and management work. It is possible to make accurate comparisons of profit and loss

obtained from improved as compared with obsolete methods in livestock production. The Manager of the Association has given valuable cooperation in this connection. The Dairy Herd Improvement Association is likewise a valuable cooperating agency.

The Chamber of commerce as well as the Rotary and Kiwanis clubs have rendered valuable assistance and cooperation on several occasions.

II. PROGRAM OF WORK - GOALS AND RESULTS

No very great changes were made in the program of work followed the previous year, activities being based largely on the five year program which was started three years ago. Accomplishments during the year, however have not been as great due to having no assistant agent and no office help. During the fiscal year ending November 30 1927 an assistant county agent was employed in the county for a period of *seven* months and the services of an office secretary were available during the entire year. This help was greatly missed during the present year.

As above outlined the program of work was prepared by the several committees of the Advisory Council and finally approved by the entire council. The goals set and results achieved as nearly as accurate data are available are summarized as follows:

I. SOILS

Soils work is of course very closely associated with crops work. The chief activity along this line during the year has been increasing the use of lime and correct analysis fertilizers. Twelve local meetings were held for this purpose. At each of these meetings samples of soil were not in by farmers and tested for acidity, and recommendations made as to lime requirement. Thirteen other method demonstrations were given in addition to those given at the meetings.

Thirty-seven result demonstrations are now in progress resulting from work during the past few years, along this line. Twenty-one fertilizer demonstrations have been completed or are now under way, making a total of fifty-eight result demonstrations in all.

A number of these demonstrations are giving very outstanding results and are attracting wide attention. One demonstration in which over twice the usual amount of high analysis, was based on corn according to recommendations, paid over 200 percent on the investment in fertilizer and has attracted the interest of a number of farmers and others. The amount of fertilizer used by the majority of farmers in the county lacks a great deal of meeting needs.

On a number of lime demonstration fields the use of lime according to recommendations of the county agent has shown very outstanding results, the difference being that of a very satisfactory crop on the limed area and near or complete failure on the unlimed areas in cases where clovers were limed.

2. FARM CROPS

Farm crops work has been largely with legumes, the chief purpose being to increase the proportionate acreage to that of other crops in the county, and introduce methods on which success depends. The need for introducing such methods and convincing the majority of farmers of their importance is very great.

In connection with legume crop work considerable time and attention has been given ~~been devoted~~ to introducing improved seed of adapted varieties. Some attention has also been given to introducing seed of improved and better adapted varieties of small grains.

The goals set and results achieved are as follows. These goals and results include also the lime work discussed under soils:

GOAL	RESULT
Forty lime and marl demonstrations in connection with as many legume crop demonstrations.	Fifty-eight such demonstrations have been completed or are under way.
Twenty alfalfa demonstrations.	Thirty in progress.
Thirty-five sweet clover result demonstrations.	Forty-two completed or in progress.
Thirty other clover demonstrations.	Thirty-five in progress.
Twelve pasture improvement demonstrations.	Sixteen such demonstrations in progress.

3. HORTICULTURE

Horticulture work has not received a great amount of attention but has been conducted only to such an extent as necessary to meet the special requests of interested farmers, largely apple orchardists.

Goals set by the Horticulture Committee of the Advisory Council and results obtained are as follows:

GOALS	RESULTS
Encourage more general use of V.F.I. Spray service by all orchardists and others producing fruits.	Carried out as far as possible without office help needed in conducting the publicity campaign.
Fruit Growers generally be encouraged to fertilize their trees.	Carried out as above
One day packing school to be held in the county.	Held at Kinnear Orchard, the attendance was small.

A considerable amount of horticultural work was done as a result of demands of the farmers of the county which was not included in the program of work. This included three method demonstrations in pruning tree fruits, three pruning demonstrations with bush fruits and one with grapes.

MEXICAN BEAN BEETLE CONTROL

This is probably the most important horticultural work carried on in the county during the year. This being the second year of the beetle's occurrence in the county, a number of farmers and gardeners have not yet learned how to use control measures successfully. Therefore, there has been much demand for information and advice in this connection. Beans are not an important commercial crop in any part of the county, but are a very important crop for home use. On the majority of farms, beans are an important article of food and green beans are used in practically every farm home in the county during several months of the season. Much educational work is yet needed in connection with controlling the Mexican bean beetle as many farmers have not yet obtained satisfactory results due to rather careless and inefficient application of the insecticide.

In addition to the above horticultural work, a number of special requests were filled for information on various phases of home garden management and the planning and care of home grounds.

4. FORESTRY

No forestry work was included in the program of work for the years adopted by the Advisory Council. However, several requests for work along this line were filled, particularly cutting and management of farm woodlots. Three requests were filled with the cooperation of the Farm Forestry Specialist, for assistance in estimation of timber. The farm forestry junior class started in the spring of 1927 in cooperation with the Farm Forestry Specialist of the Extension Service and the District Forest Ranger, in charge of this District or the Natural Bridge Forest, did very good work during the early part of the year. Tho the work was not fully completed by the majority of the boys enrolled, they were given valuable instruction and all of the boys undoubtedly got many new and worthwhile ideas of importance in forestry and of certain factors in forest management.

5. ROBBERT CONTROL

Two method demonstrations were given in woodchuck control. Seven result demonstrations were conducted during the year in this work. At least 20 other farmers cooperated in this work with the advice of the county agent.

6. ANIMAL HUSBANDRY

As in past years in Rockbridge county, animal husbandry extension work has been a very important part of the program. According to the program the work has centered largely onto two main projects, viz. market lamb improvement and pure bred sires.

1. Market lamb improvement work has been conducted by holding twelve method demonstrations for instructing sheepmen in trimming lambs, treating sheep for stomach worm control, and conducting thirty result demonstrations which include the above named methods combined with proper feeding and management.

In May four market lamb grading demonstrations were held in cooperation with the specialists in livestock marketing from the Sate Bureau of Markets and the Bureau of Markets of the U.S.D.A. The meetings were arranged in a general way in the four quarters of the county and were quite well attended. Since the meetings were held many references have been made by farmers to the information received at these demonstrations, and undoubtedly considerable progress has been made in improving the quality of market lambs produced in the county.

Much attention has also been given to the pure bred sire campaign with sheep. No less than twenty pure bred rams of good type have been brot into the county during the past year and many of these have replaced animals of very inferior type.

In the early spring a campaign was launched in cooperation with the animal husbandry department of the Extension Division to obtain a complete and up-to-date "bull census" of the county. Circular letters were sent to all of the school teachers in the county with which was enclosed a list of the cattle owners in the community covered by the school, with the request that the teacher find from her pupils just which ones owned bulls and the breed of such bull. The results were very gratifying and the information obtained formed a very valuable basis for the completed bull census. After these replies were received and when time permitted during the next several months the reports were verified in the field and several ownership mistakes corrected.

The Agricultural Engineering Department gave valuable cooperation in the preparation of maps of the six hagerterial districts, on which are now being pasted small cuts of bulls representing those owned in each respective district. These maps when ~~practically~~ completed will be posted in a central and conspicuous place in each district. It is believed that this work will do much to stimulate interest in replacing the inferior type bulls with animals of the best type pure breeds.

7. DAIRY HUSBANDRY

Cream Improvement.- Since cream production is the most important branch of the dairy industry in the county and interest has greatly increased during the past few years as a result of opening satisfactory market outlets for both sour and sweet cream, this commodity has received most attention in dairy extension work. Very few farmers in the county are thoroughly familiar with methods of producing a good grade of cream. A series of local meetings were held early in May in cooperation with the Dairy Manufacturers Specialist of the State Extension Service for the purpose of interesting cream producers in improving the quality of their product by practicing better methods of care and management. These meetings were followed up by circular letters on garlic control, home cooling devices, etc. and by personal contact with the producers as far as possible.

7

The manager of the largest local creamery states that the quality of the cream received during the past year or so is much improved. Undoubtedly this work and similar work done in 1927, therefore, is having some influence.

Better Sires Work has also been an important feature of the dairy extension program. Twelve pure bred dairy bulls with high producing records were brot into the county during the year, several of them replacding very inferior type bulls.

Many farmers have been advised during the year in feeding better balanced rations and in the production of crops suitable for preparing such rations at the lowest possible cost. No less than thirty farmers have made certain changes along this line as a direct result of extension work during the year.

5. POULTRY HUSBANDRY

1. Culling for Egg production has been an important feature of Poultry Extension. Sixteen poultry culling demonstrations were held during the year. In addition a number of farmers and poultry club members who have quite thoroughly learned culling methods have assisted neighbors and demonstrated culling. One farm woman at whose home a culling demonstration was given a few years ago and who has practiced culling in her own flock since, culled for six neighbors without charge during the past year.

2. Better Feeding.- Few farmers give careful attention to feeds given the farm poultry flock with the result that much is wasted and poor results obtained on the large majority of farms. No less than eighty farm flock owners have made changes recommended by the county agent during the past year.

3. Better Housing.- The large majority of farms a few years ago had very inferior type poultry houses entirely unsuited to the best methods of farm flock management. This year twelve farmers were furnished plans which were carried out in building or remodeling poultry houses. Many others were remodeled or constructed according to suggestions made by the county agent or others who have previously built houses recommended by same.

4. Better Breeding.- Under this heading will be included work done in connection with farm flock certification and improving the quality of eggs furnished to hatcheries.

Two commercial hatcheries are now in operation in the county. Both have given very valuable assistance in interesting farmers in improving the breeding of their flocks, and producing good hatching eggs. No effort has been spared to cooperate with the State Division of Markets in farm flock certification and testing for white diarrhea. Six flock owners were assisted in securing good type pure bred male birds during the year.

9. AGRICULTURAL ENGINEERING

Comparatively little time has been given to Agricultural Engineering work due to the pressing demand for other lines of work. However several requests have been filled, most of them for building plans. A number of farmers have been advised in the purchase of farm machinery and equipment. Other work such as control of soil erosion, etc. has demanded some time and attention. Two farmers were advised in improving the entire layout of their farm, location of fences and farm roads.

10. AGRICULTURAL ECONOMICS

Goals set and results achieved in Agricultural Economics work were as follows:

GOAL	RESULT
Supervise fifteen farm management and farm account demonstrations.	Seventeen such accounts were kept thru the year.
Develop at least one successful community organization.	One fairly well developed.

Twenty-six farm account books were distributed, and most of the nine which were not kept thru the year were used to some extent. Lack of sufficient time or office help has made it difficult to follow up this work as fully as needed.

The organization referred to in the first paragraph of this report operates as a Community League. An effort has been made this year to widen the scope of activity of the organization and increase its membership, making it a general community wide organization of the type needed in every community. This work will be continued another year extending the work into other communities.

Considerable time and attention has been given to cooperation with existing organizations, viz. the Live-stock marketing Association, the Sheep and Wool Growers' Association and the Farmers' Exchange. Each of these institutions have done very valuable work during the past year.

Probably the most time and attention was given to the county wool pool of any work of this nature. The new plan of pooling on a county basis was started by the State Division of Markets this season. The wool marketing specialist was largely instrumental in managing and selling the pool, while the county agent had an active part in interesting the growers in the method of selling. The pool was very successful, sales amounting to \$14,444.84 making a net saving to growers above prices paid by buyers of not less than \$13,336.

11. MISCELLANEOUS WORK

Many requests of a miscellaneous nature and which are not included under any of the above headings, are received each year and filled in the best manner possible. For example such requests the past year called for gathering information for the State Game and Fish Commissioner (who happens to be a resident of the county) on the most suitable farms in the county for making game preserves, and assisting in arranging with the farmers concerned; getting up groups of farmers and others concerned to attend educational meetings and conventions such as the State Dairymen's Association, the Crop Improvement Association, the State Farmers' Institutesales of pure bred livestock etc.

Considerable time was also spent in assisting in revising the county fair premium list and in the management of the educational part of the county fair, particularly the planning and arranging of exhibits, etc. About two weeks time were required for preparing and putting up and looking after a county exhibit at the State Fair.

12. Four-H CLUB WORK

The Four-H Clubs have received a large amount of time and attention during the past year as in previous years. They have been an important agency in putting across the other work described above.

Goals set and results achieved in this work the past year were as follows:

GOAL

Perfect fourteen local clubs with efficient leaders and with efficient project leaders in cases where enrollment warrants.

Develop two demonstration teams in each local club.

Attendance at State Short course to be not less than twenty-five with five local leaders.

Special training to be given all members who wish to enter livestock and other judging contests.

Hold one county rally and one county short course.

RESULT

Thirteen such clubs carried thru the year.

Not entirely achieved there being four clubs without demonstration teams. Other clubs have one or more.

Eighteen members and one local leader attended.

Three teams were trained via. Livestock, Corn Judging and dairy judging.

Both were successfully held with good attendance.

The percent of reports received this year from club members was much higher than in previous years. Ninety-five percent of the members enrolled at the beginning of the year submitted complete reports.

The county short course was interfered with to a considerable extent by very adverse weather conditions. Exceedingly heavy rains causing the highest water in the past thirty years in the stream on which the encampment was held, caused great inconvenience and some loss of property. However as soon as the water subsided the regular camp routing was resumed and continued thru the scheduled time.

III. OUTLOOK AND RECOMMENDATIONS

The same opening statement as used under this heading in the Narrative Report of Extension Work in Rockbridge county for the fiscal year 1927 applies equally well at this time, viz. "Obviously one of the greatest needs of the county is active local organizations of adults thru which Extension work may be conducted most effectively".

Considerable time and attention has been given these problems during the past year, but without very gratifying results thus far. Plans started at the beginning of the

year could not fully be carried out because of lack of help which was expected to be available at the beginning of the year. The specialist in rural organization work was not available except for the early part of the year and the lack of office help was also a handicap.

However a much better understanding of the situation in the county has been gained during the year and with the help of the State specialist the coming year, it is hoped to make much more progress.

In a general way the work outlined in the Five-year Program will be followed again this year, giving special attention to the community organization work, and to the further development of local Four-H Club organizations therewith. The better sires campaign and the soil improvement work will doubtless continue to be an important feature of the work depending upon the approval of the Advisory Council.

IV. SUMMARY

The five most important features of Extension Work in Rockbridge county during the fiscal year 1928 were Four-H Club Work, Livestock Improvement stressing market lamb improvement and pure bred sires, soil improvement, stressing lime and legumes, poultry improvement and dairy work, stressing pure bred sires and cream improvement.

The outstanding achievements in these five general lines of work during the year may be summarized as follows:

Four-H Club Work. - As a whole the most successful club work was done this year of any previous year, especially as to the percent of members completing their work and the number of complete reports received. Several of the local organizations were strengthened and are now functioning more effectively than at the beginning of the year.

In Livestock Improvement work the outstanding achievements are the placing of sixteen pure bred bulls, three boars, fifteen rams and 30 pure bred poultry sires; interesting many sheepmen in giving better attention to market lambs, and making a complete bull census of the county placing maps in each managerial district showing same.

Soil Improvement work included thirty seven recult demonstrations with lime and twenty-one fertilizer demonstrations; twenty-five method demonstrations of testing soil for acidity, and a general circular letter and publicity campaign to interest farmers generally in more lime and proper fertilization.

Increasing the proportionate acreage of legumes to other crops grown in the county was also important.

Poultry Improvement work included holding sixteen poultry culling demonstrations, the construction of at least twelve poultry houses according to plans furnished, improving the rations fed on not less than eighty farms and the purchase of thirty improved poultry sires.

Dairy Improvement work included the placing of five high producing pure bred bulls, and a general cream improvement campaign, which according to the manager of the larger local creamery is getting results.

ANNUAL REPORT OF COUNTY EXTENSION WORKERS

This report form is to be used by county extension agents, such as county agricultural agent, home demonstration agent, club agent, and negro agent, reporting on their respective lines of work.

State VIRGINIA County ROCKBRIDGE
Report of M. G. Lewis County _____ Agent _____
(Name) (Title)
From December 1, 1927 to November 30, 1928.

If agent has not been employed entire year, indicate exact period. Agents resigning during the year should make out this report before quitting the service.

	MADE	VERIFIED

Approved:

Date _____ State or District Supervisor.

Date _____ State Extension Director.

2

**SUGGESTIONS RELATIVE TO THE PREPARATION OF THE COUNTY EXTENSION
AGENT'S ANNUAL REPORT.**

The annual report should be a review, analysis, interpretation, and presentation to the people of the county, the State, and the Nation of the sum total of the extension activities in each county for the year and the results obtained by the county extension agent assisted by the subject-matter specialists. The making of such a report is of great value to the county extension agent and the people of the county in showing the progress made during the year as a basis for future plans. It is of vital concern also to the State and Nation as a measure of rural progress and a basis for intelligent legislation and financial support.

Separate statistical and narrative reports are desired from each county extension agent in charge of a line of work, such as county agent, home demonstration agent, boys' and girls' club agent, and negro agent. Where an assistant agent has been employed a part or all of the year, a report on his or her work should be included with the report of the leader in charge of that line of work. Where an agent in charge of a line of work has quit the service during the year, the information contained in his or her report should be incorporated in the annual report of the agent on duty at the close of the report year, and the latter report so marked. Where two or more extension agents are employed in a county, each in charge of a line of work, care should be exercised to avoid including the same data in the statistical report of more than one agent.

At least four copies of the annual report should be made: One copy for the county officials, one copy for the agent's files, one copy for the State extension office, and one copy for the Extension Service, United States Department of Agriculture. The report to the Washington office should be sent through the State extension office.

NARRATIVE SUMMARY.

The narrative report should be a statement in orderly fashion and arranged under appropriate subheadings, of the work done, methods used, and results obtained under each project, as well as of the general work accomplished. Every statement should be clear-cut, concise, forceful, and, where possible, reinforced with ample data from the statistical summary. In the preparation of the part of the report relative to each project, the results reported in the statistical summary for the project should be analyzed, conclusions drawn, and recommendations made. The report may well be illustrated with photographs, maps, diagrams, blue prints, or copies of charts and other forms used in demonstration work. Full credit should be given to all cooperating agencies. The lines should be single-spaced, with double space between the paragraphs, and reasonably good margins left. The pages should be numbered in consecutive order.

The following outline is suggestive of how the narrative report may be clearly and systematically presented:

SUGGESTIVE OUTLINE OF ANNUAL NARRATIVE REPORT.

- I. Cover and title page.
- II. Table of contents.
- III. Status of county extension organization.
 - (1) Form of organization—changes and development.
 - (2) Function of local people, committees, or project leaders in developing the program of work.
 - (3) General policies, including relationships to other organizations.
- IV. Program of work, goals established, methods employed, and results achieved.
 - (1) Factors considered and methods used in determining program of work.
 - (2) Project activities and results.
 - (a) Soils
 - (b) Farm crops
 - (c) Horticulture
 - (d) Home gardens
 - (e) Beautification of home grounds
 - (f) Forestry
 - (g) Rodents, predatory animals, and birds.
 - (h) Animal husbandry
 - (i) Dairy husbandry
 - (j) Home dairy
 - (k) Poultry husbandry
 - (l) Home poultry

(Including diseases and insects).

(Including diseases and insects).

SUGGESTIVE OUTLINE OF ANNUAL NARRATIVE REPORT—Continued.

IV. Program of work, etc.—Continued.

(2) Project activities and results—Continued.

- (a) Agricultural engineering.
- (b) Agricultural engineering—home.
- (c) Agricultural economics, including farm management and marketing.
- (d) Home marketing.
- (e) Foods.
- (f) Nutrition.
- (g) Clothing.
- (h) Home management.
- (i) Home furnishings.
- (j) Home health and sanitation.
- (k) Community activities.
- (l) Miscellaneous.

V. Outlook and recommendations, including suggestive program of work for next year.

VI. Summary of activities and accomplishments, preferably of one or two typewritten pages only, placed at the beginning or end of the narrative report.

STATISTICAL SUMMARY.

To supplement the narrative part of the report, and in order that comparable State and National summaries may be made, it is necessary to include a statistical summary of the work in each county. The following form has been prepared to insure uniformity of reporting. In addition to the questions asked under each subdivision of the report, space is provided to add further data if desired. The statistical summary will grow naturally out of the field and office records.

DEFINITIONS OF TERMS USED IN THIS REPORT.

1. A PROGRAM OF WORK is a definitely outlined plan for extension work.
2. A PROJECT is a definite, systematic, organized plan for carrying out some phase of the extension program of work, providing for what is to be done, how much, when, where, how, and by whom.
3. MISCELLANEOUS WORK includes work which has not yet become a regular part of the program of work—work other than project work.
4. A COMMUNITY, for the purposes of this report, may be any one of the several units into which the county is divided for purposes of conducting organized extension work.
5. A PROJECT LEADER OR LOCAL LEADER is a person, selected because of his or her special interest and fitness, who functions as a leader in advancing some phase of the local program of extension work.
6. A DEMONSTRATION is an example designed to show the practical application of an established fact. Demonstrations as contemplated in this report are of two kinds, method demonstrations and result demonstrations.
7. A method demonstration is a demonstration given by an extension worker or other trained leader to a group for the purpose of showing them how to carry out a practice. Synonym: Lecture demonstration. Examples: Demonstrations of canning, mixing of spray materials, and culling of poultry.
8. A result demonstration is a demonstration carried on by a farmer, farm woman, boy, or girl under the direction of the extension service, involving a substantial period of time, records of results, and comparisons. Example: Child-feeding, corn-culture, and orchard-management demonstrations.
9. A DEMONSTRATOR is a farmer, farm woman, boy, or girl who, under the direction of the extension service, conducts a result demonstration.
10. MEMBERS COMPLETING SHOULD include those who have satisfactorily finished the work outlined for the current year.
11. A DEMONSTRATION MEETING is a meeting held to give a method demonstration or to start, inspect, or further a result demonstration.
12. A TRAINING MEETING is a meeting at which project leaders or local leaders are trained to carry on extension activities in their respective communities.
13. AN OFFICE CALL OR TELEPHONE CALL is a visit or call by a farmer or other person seeking agricultural or home economics information, as a result of which some definite assistance or information is given.
14. A FARM VISIT is a call at a farm by the agent at which some definite information is given or concrete plan of work outlined, or some valuable information obtained from the farmer regarding his work, or the better practice prevailing in his neighborhood.
15. A HOME VISIT is a call at a home by the agent at which some definite information is given or concrete plan of work outlined, or some valuable information obtained from the farm woman regarding her work, or the better practice prevailing in her neighborhood.
16. DAYS IN OFFICE should include time spent by the county agent in his office, at county agent conferences, and any other work directly related to office administration.
17. DAYS IN FIELD should include all days spent on official duty other than those spent in office.
18. LETTERS WRITTEN should include all single letters on official business.

DEFINITIONS OF TERMS USED IN THIS REPORT—Continued.

27. A **FARMERS' INSTITUTE** is one of a series of meetings of one to two days' duration, arranged by a central State farmers' institute agency, at which agricultural and home-economics problems are discussed, usually by outside speakers employed for the purpose.
28. AN **EXTENSION OR MOVABLE SCHOOL** is an itinerant school usually of two to six days' duration where practical but systematic instruction is given to persons not resident at the college. AN **EXTENSION SCHOOL COURSE** differs from an extension school in that it is usually held at the college or other educational institution and usually for a longer period of time, but not exceeding two weeks.
29. **RECORDS** consist of definite information filed in the county office that will enable the agent to verify the data on extension work included in this report.
30. **FARM OR HOME PRACTICES ADOPTED** is a new or improved practice adopted on a farm or in a home during the year as a result of extension teaching. Examples: Spraying of potatoes for disease, canning of fruits and vegetables, use of balanced rations, and hat making.

GENERAL ACTIVITIES.

Report only this year's extension activities and results that are supported by records.

If an assistant agent has been employed during the year, include his or her work with that of the agent.

1. List below the names, titles, and periods of service of the county extension agents whose work is included in this report.

<u>M. G. Lewis</u> (Name)	<u>County Agent</u> (Title)	<u>12</u> (Months of service this year)
_____	_____	_____
_____	_____	_____

2. County association, if any, fostering extension work. 11

(a) Name Agricultural Advisory Council 1

(b) Number of members 24

3. Number of communities in county where extension work should be conducted 2

21

4. Number of above communities in which the extension program has been cooperatively worked out by extension agents and people concerned 3

18

5. Number of voluntary county, community, or local leaders actively engaged in forwarding the extension program with— 4

(a) Juniors 12

(b) Adults 30

6. Number of clubs carrying on extension work: 6

(a) Junior 13

(b) Adult 4

7. Membership in above clubs: 6

(a) Boys' 134 (b) Men 200

(c) Girls' 104 (d) Women 20

8. Number of club members completing: 7

(a) Boys' 128 (b) Men 200

(c) Girls' 98 (d) Women 20

9. Number of members in junior club work for four or more years: 8

(a) Boys 31

(b) Girls 27

*Report the total number of different boys or girls enrolled in club work. This total should equal the sum of the present enrollments reported on page 2 and 3. See any deductions due to the same boy or girl carrying on two or more subject-matter lines of work.

**Include those boys and girls enrolled in club work as reported under 6(a) and 6(b) who have finished the work satisfaction or each portion of it as it was planned to finish during the report year.

8-22

* The individual entries in this column should not exceed entry for question 2, page 4.

* The individual entries in this column should not exceed entry for question 1, page 4.

* Boys' and girls' club work should be distributed among the proper subject-matter headings and not entered as a separate project.

FARM-DEMONSTRATION WORK.

SOILS.¹

Report only this year's extension activities and results that are supported by records.

45. Number of method demonstrations given. (See definition 6, page 3.)	30	45
46. Number of result demonstrations started or under way. (See definition 6, page 3.)	58	46
47. Number of result demonstrations completed or carried through the year.	58	47
48. Number of acres involved in these completed demonstrations.	520	48
49. Number of farms adopting improved practices in the use of commercial fertilizer this year.	28	49
50. Tons involved in preceding question.	88	50
51. Number of farms taking better care of farm manures this year.	12	51
52. Number of farms using lime or limestone for the first time.	65	52
53. Tons of lime or limestone so used.	250	53
54. Number of farms plowing under cover or other green manure crops for the first time.	450	54
55. Acres of cover and green manure crops so plowed under.	2000	55
55½. Number of farms adopting other improved soil practices this year. (Specify below.)		55½
56. Total number of different farms adopting improved practices, relative to the soils work reported on this page. (Include questions 47, 49, 51, 52, 54, and 55½ less duplications.)	450	56

The most important feature of soil improvement work this year has been increased use of lime and the increased acreage of green crops, particularly sweet clover & alfalfa.

However, only a start has been made towards meeting the needs of the farmers of the county in this direction. A careful survey was conducted the past summer of alfalfa in the county, showing that the acreage has been gradually decreasing for the past several years, but that failures are numerous due to wrong methods in preparation, quality of seed & methods used, showing that further extension work along this line is much needed.

¹ For drainage, irrigation, land clearing, and terracing see "Agricultural Engineering," page 18.

CEREALS¹

Report only this year's extension activities and results that are supported by funds.

Item	00	00	00	00	00	00	Total ²

69a. Number of farms adopting other improved practices for the first time. (Specify below.)	5	12	0	0	10	0	69a
70. Total number of different farms adopting improved practices relative to the cereal work reported on this page. (Include questions 59, 64, 67, 68, 69, and 69a less duplications.)	155	140	75	35	120	0	70

The first outbreak of cereal smut of wheat occurred in this county 3 years ago. The following year most of the seed in the township was lost, was killed, largely according to instructions with the result that little smut occurred since this time. There has been a tendency to discontinue seed treatment. Considerable attention must be given each year to keep up interest in treating seed.

¹ Report fall-crops the year they are harvested.² Includes crop by acres.³ Items which do not require clubs on a project basis should not report on this question but should report on enrollment and completion.⁴ Includes those who have finished the work undertaken, or such portion of it as it was planned to finish during the report year.

LEGUMES AND FORAGE CROPS.

Report only this year's extension activities and results that are supported by records.

146. Number of farms adopting other improved livestock practices this year. (Specify below.)	25			20	2		146
146. Total number of different farms adopting improved practices relative to the livestock work reported on pages 14 and 15. (Include questions 140, 145, 147, 148, 149, 153, 155, 157, 158, 160, 161, 162, 163, 164, 165, and 166; less duplications.)	40	22	80	60	400		146
<p>195 1/2 under dairy cattle refers to improved methods of handling & marketing cream. Sheep 20 a more farmers were influenced to give more attention to placing a better quality & size of lambs on the market by holding underyed superior lambs until fully developed.</p>							

* Indicate by asterisk.

6-508

AGRICULTURAL ENGINEERING.

Report only this year's extension activities and results that are supported by records.

167. Number of method demonstrations given.....	1	167	
168. Number of result demonstrations started or under way.....	2	168	
169. Number of result demonstrations completed or carried through the year.....	2	169	
170. Number of farms installing drainage systems this year.....	1	170	
171. Acres drained.....	8	171	
172. Number of farms installing irrigation systems this year.....	0	172	
173. Acres irrigated.....	0	173	
174. Number of farms constructing terraces or soil dams this year.....	15	174	
175. Acres on which soil erosion was so prevented.....	50	175	
176. Number of dwellings constructed this year according to plans furnished.....	2	176	
177. Number of dwellings remodeled this year according to plans furnished.....	0	177	
178. Number of sewage-disposal systems installed this year according to plans furnished.....	0	178	
179. Number of water systems installed this year according to plans furnished.....	3	179	
180. Number of heating systems installed this year according to plans furnished.....	0	180	
181. Number of lighting systems installed this year according to plans furnished.....	0	181	
181 $\frac{1}{2}$. Number of farms following suggestions on maintenance and repair of machinery.....	20	181 $\frac{1}{2}$	
181 $\frac{1}{4}$. Number of farms employing better types of machinery recommended by extension agent.....	15	181 $\frac{1}{4}$	
	(a) Cultivators.....	7	
	(b) Plows.....	2	
181 $\frac{1}{2}$. Number of machines involved in question 181 $\frac{1}{4}$	(c) Tractors and gas engines.....	1	181 $\frac{1}{2}$
	(d) Sprayers.....	2	
	(e) Harvesters and threshers.....	0	
	(f) Other <i>Harrows</i>	8	
182. Number of farms on which buildings other than dwellings were constructed or remodeled this year according to plans furnished.....		182	
	(a) Barns.....	5	
	(b) Hog houses.....	4	
183. Number of buildings involved in preceding question.....	(c) Poultry houses.....	12	183
	(d) Silos.....	3	
	(e) Other.....	5	
184. Number of farms clearing land of stumps or boulders this year.....	2	184	
185. Acres of land so cleared.....	7	185	
185 $\frac{1}{2}$. Number of farms adopting other improved practices for the first time. (Specify below.).....	2	185 $\frac{1}{2}$	
186. Total number of different farms adopting improved practices relative to the agricultural engineering work reported on this page. (Include questions 169, 170, 172, 174, 176, 177, 178, 179, 180, 181, 181 $\frac{1}{2}$, 181 $\frac{1}{4}$, 182, 184, and 185 $\frac{1}{2}$ less duplications.).....	20	186	

17x Under requests for the type of work were referred to the county Board of Health
185 $\frac{1}{2}$ The farmers were advised on improving the layout of fields farm roads fences etc!

AGRICULTURAL ECONOMICS—Continued.

Report only this year's extension activities and results that are supported by records.

206. List below this year's results in connection with the cooperative-marketing associations in the county previously organized and with which the extension service counseled or advised.

Name of association or group.	Number of members.	Supplies and products handled.	Supplies purchased.		Products sold.	
			50 Value.	50 Spring.	50 Value.	50 Prod.
<i>Knitstock Marketing Assn</i>	<i>160</i>	<i>600 Knitstock</i>	<i>0</i>	<i>0</i>	<i>46,500.00</i>	<i>5,800</i>
<i>Sheep & Wool Assoc</i>	<i>162</i>	<i>Wool</i>			<i>14,440.42</i>	<i>1,335</i>
<i>See duplication</i>	<i>392</i>				<i>111,241.42</i>	<i>7,135</i>
Total						

207. Total number of different farms adopting improved marketing practices (include entries for questions 204 (b) and 205 (b) less duplications plus other farms not in cooperative associations) 250 207

COMMUNITY ACTIVITIES AND MISCELLANEOUS.

Report only this year's extension activities and results that are supported by records.

Use this space to include work on any other agricultural project not included in the preceding pages, such as bee-keeping, and similar work, i. e., any other information that can be reported statistically and that will help to give a complete account of the year's work.

No.	50	50	50 ¹	
	Extension.	Home Ext.	Comm. Club	
208. Number of method demonstrations given			<i>3</i>	208
209. Number of adult result demonstrations started or under way			<i>3</i>	209
210. Number of result demonstrations completed or carried through the year			<i>2</i>	210
211. Number of units in these completed demonstrations			<i>240</i>	211
212. Number of junior clubs ²				212

	(2) Girls			
214. Number of members completing	(1) Boys			214
	(2) Girls			
215. Number of units involved in junior club work completed				215
216. Total number of different farms adopting improved practices relative to the miscellaneous work reported on this page			<i>2</i>	216
[Use space below to include other important data relating to miscellaneous work.]				
<i>Above figures refer to work in introducing entertainment programs in local community clubs.</i>				

¹ Includes camps over seasons.² Clubs which do not organize clubs or groups on a project need not report on this question but should report an enrollment and completion.

HOME-DEMONSTRATION WORK.

FOODS.

Report only this year's extension activities and results that are supported by records.

FOOD PREPARATION.

215. Number of project clubs or groups ¹	(a) Women.....	215
	(b) Juniors.....	
216. Number of members enrolled in food preparation.....	(a) Women.....	216
	(b) Girls.....	
	(c) Boys.....	
217. Number of members completing ²	(a) Women.....	217
	(b) Girls.....	
	(c) Boys.....	
218. Number of method demonstrations given. (See definition 6, page 2.).....		218
219. Number of result demonstrations started or under way. (See definition 6, page 2.).....	(a) Women.....	219
	(b) Girls.....	
	(c) Boys.....	
220. Number of result demonstrations completed or carried through the year.....	(a) Women.....	220
	(b) Girls.....	
	(c) Boys.....	
221. Number of individuals adopting improved practices in bread making this year.....	(a) Women.....	221
	(b) Girls.....	
	(c) Boys.....	
222. Number of individuals adopting improved practices in meat cookery this year.....	(a) Women.....	222
	(b) Girls.....	
	(c) Boys.....	
223. Number of individuals adopting improved practices in vegetable cookery this year.....	(a) Women.....	223
	(b) Girls.....	
	(c) Boys.....	
224. Number of individuals adopting improved practices in preparation of dairy-product dishes this year.....	(a) Women.....	224
	(b) Girls.....	
	(c) Boys.....	
225. Number of individuals adopting improved practices in meal preparation and service this year.....	(a) Women.....	225
	(b) Girls.....	
	(c) Boys.....	
226. Number of homes budgeting the family food supply for the first time.....		226
227. Total number of different homes adopting improved practices relative to the food-preparation work reported on this page. (Include entries for questions 220, 221, 222, 223, 224, 225, and 226 less duplications.).....		227

[Use space below to include other important data relating to food preparation.]

¹ Clubs which do not organize clubs or groups on a project basis should not report on this question but should report on enrollment and completion.² Include those who have finished the work undertaken, or such portion of it as it was planned to finish during the report year.

FOODS—Continued.

Report only this year's extension activities and results that are supported by records.

FOOD PRESERVATION.

228. Number of project clubs or groups ¹	(a) Women.....	} 228
	(b) Juniors.....	
229. Number of members enrolled in food preservation.....	(a) Women.....	} 229
	(b) Girls.....	
	(c) Boys.....	
230. Number of members completing.....	(a) Women.....	} 230
	(b) Girls.....

242. Number of method demonstrations given.....		242
243. Number of result demonstrations started or under way.....	(a) Women.....	243
	(b) Girls.....	
	(c) Boys.....	
244. Number of result demonstrations completed or carried through the year.....	(a) Women.....	244
	(b) Girls.....	
	(c) Boys.....	
245. Number of individuals balancing family meals according to approved methods for the first time.....	(a) Women.....	245
	(b) Girls.....	
	(c) Boys.....	
246. Number of individuals preparing better school lunches for the first time.....	(a) Women.....	246
	(b) Girls.....	
	(c) Boys.....	
247. Number of schools induced to serve a hot dish or school lunch for the first time.....		247
248. Number of children involved in preceding question.....		248
249. Number of homes carrying out improved practices in child feeding for the first time.....		249
250. Number of children involved in preceding question.....		250
251. Total number of different homes adopting improved practices relative to the nutrition work reported on this page.....		251

[Use space below to include other important data relating to nutrition.]

¹ Homes which do not organize clubs or groups on a project basis should not report on this question but should report on enrollment and completion.

CLOTHING.

Report only this year's extension activities and results that are supported by records.

252. Number of project clubs or groups ¹	(a) Women.....	252
	(b) Juniors.....	
253. Number of members enrolled in clothing work.....	(a) Women.....	253
	(b) Girls.....	
	(c) Boys.....	
254. Number of members completing.....	(a) Women.....	254
	(b) Girls.....	
	(c) Boys.....	
255. Number of method demonstrations given.....		255
256. Number of result demonstrations started & under way.....	(a) Women.....	256
	(b) Girls.....	
	(c) Boys.....	
257. Number of result demonstrations completed or carried through the year.....	(a) Women.....	257
	(b) Girls.....	
	(c) Boys.....	
258. Number of individuals adopting improved practices in selection and construction.....	(a) Women.....	258
	(b) Girls.....	
	(c) Boys.....	
259. Number of individuals adopting improved practices in renovation and remodeling.....	(a) Women.....	259
	(b) Girls.....	
	(c) Boys.....	
260. Number of individuals adopting improved practices in millinery.....	(a) Women.....	260
	(b) Girls.....	
261. Number of individuals adopting improved practices in costume designing.....	(a) Women.....	261
	(b) Girls.....	
262. Number of individuals adopting improved practices in infant wardrobe planning.....	(a) Women.....	262
	(b) Girls.....	
263. Number of individuals adopting improved practices in children's wardrobe planning.....	(a) Women.....	263
	(b) Girls.....	
264. Number of individuals adopting improved practices in adult wardrobe planning.....	(a) Women.....	264
	(b) Girls.....	
265. Total number of different homes adopting improved practices relative to the clothing work reported on this page.....		265
266. Number of dress forms made this year by.....	(a) Women.....	266
	(b) Girls.....	
267. Number of dresses and coats made this year by.....	(a) Women.....	267
	(b) Girls.....	
268. Number of undergarments made this year by.....	(a) Women.....	268
	(b) Girls.....	
269. Number of hats made this year by.....	(a) Women.....	269
	(b) Girls.....	

[Use space below to include other important data relating to clothing.]

¹ Clubs which do not organize clubs or groups on a project basis should not report on this question but should report on enrollment and completion.

HOME MANAGEMENT.

Report only this year's extension activities and results that are supported by records.

270. Number of project clubs or groups ¹	(a) Women	270
	(b) Juniors	
271. Number of members enrolled in home management	(a) Women	271
	(b) Girls	
	(c) Boys	
272. Number of members completing	(a) Women	272
	(b) Girls	
	(c) Boys	
273. Number of method demonstrations given		273
274. Number of result demonstrations started or under way	(a) Women	274
	(b) Girls	
275. Number of result demonstrations completed or carried through the year	(a) Women	275
	(b) Girls	
276. Number of individuals following a systematized plan of household work for the first time	(a) Women	276
	(b) Girls	
277. Number of homes obtaining additional labor-saving equipment this year		277
278. Number of kitchens planned and rearranged for convenience this year		278
279. Number of individuals following improved laundry practices for the first time	(a) Women	279
	(b) Girls	
280. Number of individuals making budgets and keeping accounts for the first time	(a) Women	280
	(b) Girls	
281. Total number of different homes adopting improved practices relative to the home-management work reported on this page		281
282. List below the number of labor-saving appliances involved in question 277:		282
(a) Hand washing machines	(f) Kitchen cabinets	
(b) Power washing machines	(g) Electric or gasoline irons	
(c) Fireless cookers	(h) Pressure cookers	
(d) Kitchen sinks	(i) Insless refrigerators	
(e) Power vacuum cleaners	(j) Other	

[Use space below to include other important data relating to home management.]

¹ Homes which do not organize clubs or groups on a project basis should not report on this question but should report on enrollment and completion.

HOUSE FURNISHINGS.

Report only this year's extension activities and results that are supported by records.

283. Number of project clubs or groups ¹	(a) Women	283
	(b) Juniors	
284. Number of members enrolled in house furnishings	(a) Women	284
	(b) Girls	
	(c) Boys	
285. Number of members completing	(a) Women	285
	(b) Girls	
	(c) Boys	
286. Number of method demonstrations given		286
287. Number of result demonstrations started or under way	(a) Women	287
	(b) Girls	
	(c) Boys	
288. Number of result demonstrations completed or carried through the year	(a) Women	288
	(b) Girls	
	(c) Boys	
289. Number of individuals adopting improved practices in selection and arrangement of furnishings this year	(a) Women	289
	(b) Girls	
	(c) Boys	
290. Number of individuals adopting improved practices in the repairing and remodeling of furnishings this year	(a) Women	290
	(b) Girls	
	(c) Boys	
291. Number of individuals adopting improved practices in wall, woodwork, and floor treatment this year	(a) Women	291
	(b) Girls	
	(c) Boys	
292. Number of rooms involved in questions 289, 290, and 291	(a) Bedrooms	292
	(b) Living rooms	
	(c) Dining rooms	
	(d) Other rooms	
293. Total number of different homes adopting improved practices relative to the house-furnishing work reported on this page		293

[Use space below to include other important data relating to house furnishings.]

¹ Clubs which do not organize clubs or groups on a project basis should not report on this question but should report on enrollment and completion.

HOME HEALTH—SANITATION.

Report only this year's extension activities and results that are supported by records.

284. Number of project clubs or groups	(a) Women _____	284
	(b) Juniors _____	
285. Number of members enrolled in home health and sanitation	(a) Women _____	285
	(b) Girls _____	
	(c) Boys _____	
286. Number of members completing	(a) Women _____	286
	(b) Girls _____	
	(c) Boys _____	
287. Number of method demonstrations given	_____	287
288. Number of result demonstrations started or under way	(a) Women _____	288
	(b) Girls _____	
	(c) Boys _____	
289. Number of result demonstrations completed or carried through the year	(a) Women _____	289
	(b) Girls _____	
	(c) Boys _____	

HEALTH.²

290. Number of homes adopting recommended health practices this year	_____	290
291. Number of individuals adopting recommended practices in—	_____	291
(a) Use of health score card _____	(f) Care of skin and hair _____	
(b) Good posture _____	(g) Home nursing _____	
(c) Prevention of colds _____	(h) First aid _____	
(d) Good elimination _____	(i) _____	
(e) Care of teeth _____	(j) _____	

292. Is your health program coordinated with the work of State and county health authorities?	(a) Yes _____	292
	(b) No _____	

SANITATION.

293. Number of homes installing sanitary closets or outhouses this year according to plans furnished	_____	293
294. Number of homes screened for the first time	_____	294
295. Number of homes following other methods of controlling flies, mosquitoes, and other insects for the first time	_____	295
296. Total number of different homes adopting improved practices relative to the sanitation work reported on this page	_____	296

[Use space below to include other important data relating to home health and sanitation.]

¹ Homes which do not organize clubs or groups on a project basis should not report on this question but should report on enrollment and completion.² It is assumed that this work is conducted in cooperation with State and county health authorities.

AGRICULTURAL ENGINEERING—HOME.

Report only this year's extension activities and results that are supported by records.

Do not list information which has been previously reported on page 15.

307. Number of method demonstrations given.....	307
308. Number of result demonstrations started or under way.....	308
309. Number of result demonstrations completed or carried through the year.....	309
310. Number of dwellings constructed this year according to plans furnished.....	310
311. Number of dwellings remodelled this year according to plans furnished.....	311
312. Number of sewage-disposal systems installed this year according to plans furnished.....	312
313. Number of water systems installed this year according to plans furnished.....	313
314. Number of heating systems installed this year according to plans furnished.....	314
315. Number of lighting systems installed this year according to plans furnished.....	315
316. Number of poultry houses constructed this year according to plans furnished.....	316
317. Total number of different homes adopting improved practices relative to the agricultural engineering work reported on this page.....	317

[Use space below to include other important data relating to agricultural engineering.]

BEAUTIFICATION OF HOME GROUNDS.

Report only this year's extension activities and results that are supported by records.

Do not list information which has been previously reported on page 12.

318. Number of project clubs or groups ¹	(a) Women.....	318
	(b) Juniors.....	
319. Number of members enrolled in beautification of home grounds.....	(a) Women.....	319
	(b) Girls.....	
	(c) Boys.....	
320. Number of members completing.....	(a) Women.....	320
	(b) Girls.....	
	(c) Boys.....	
321. Number of method demonstrations given.....		321
322. Number of result demonstrations started or under way.....	(a) Women.....	322
