Annual Narrative Report

COUNTY AGENT WORK

of

Extension Work in Agriculture

For

Stafford County Virginia

December 1st 1924-November 30, 1925.

Jno. W. C. Catlett, County Agent.

Jno. V. C. Callett, County Agent.

I am still without an active working Advisory Council so that my years work has been based on a plan worked out mostly by myself but approved by Mr. Gisenberry and a good many of the farmers in the county and I believe that the county is a little nearer ready for something like a County Agent's advisory Council than it has been at all and I don't believe the new agent will experience a great deal of difficulty in getting one started to functioning. As to general farm organization it looks to me as the county is just as far from looking with favor on that as at any time since I have been here. They claim that the Farmers Union of some years ago died of its own weight and that the Farm Bureau did likewise and then the egg association failed &c. &c. It is an undisputed fact that the vast majority of the more intelligent people of the county are dependent upon politics for their living and consequently they do not look with favor upon farm organization and do not lead these movements as they should but tell you afterwards that with such and such a person at the head of the organization it was bound to fail &c.

For all that I like the county and the good people in the county and I believe that there are better times ahead for Stafford County and I don't believe that she will be seen without a County Agent again and I believe some of the present Club Members in the County are going to be the men who put Stafford on the map in years to come and give her the schools and other things she should have.

I have worked along the same line as the two previous years as I believe as I did when I first came to the County that the future of this County as well as others in this section of Virginia hinges on just two or three things:

Soil improvement, Better crops brought about by this improvement and the use of better seed, more and better livestock properly taken care of, Dairy Cattle, Sheep, Hogs and Poultry. This improvement in livestock to be brought about by the use of better sires all good pure breeds and the bringing in as they learn more about caring for them of an occasional pure bred female for the Club members and for the adults.

The development of a good County Fair, ours seems to afford common ground for all our people it seems they will come nearer getting together on that than any other one thing.

hence my plan of work.

Club Work

1. Corn Club

a. Ten boys in corn club using selected and certified seed corn and cultivated properly.

2. Dairy Club.

a. three fourth year members caring for a cow and caring for a bred heifer and calf.

b. Two third year members caring for a cow and calf and if we succeed in starting a cow testing association putting them on association test.

c. Four second year members caring for a bred heifer bred to Chichester's best bulls.

d. At least five new calf club members starting with a pure bred Guernsey calf.

3. Pig Club.

a. Four third year members three with two litters each and one with one litter all pure breeds keeping accurate records on them and using grazing crops feeding them. One feeding out a pen of five which he bred himself. Three of those owning their pure bred bears.

b. Three second year members caring for sow and litter one feeding out a pen of five hogs and caring for his bear in addition.

c. Get at least ten new breeding pig club members using pure bred durocs, Poland Chinas and Berkshires.

4. Soy Beans.

Ten members growing at least one acre of Virginias innoculating their seed fertilizing and working properly.

5. Organization.

One good organized club in each magisterial District in the County with a regular monthly program. Six boys at the Short Course at Blacksburg and fifteen boys at the Short Course at Fredericksburg.

OLD DELAWARE
MAY 1918

Following up our lime schools of last year I have urged our farmers to use more lime and get prices from all the lime manufacturers so that I heard of shipping lime in here and the state plant at Staunton besides so that I could tell a man exactly what a certain lime would cost him at his depot as a result I got three different communities to order a car of lime each in the spring several farmers joining in a car load shipments some of it to be used on Sweet Clover, some to be used on land that was going into corn and then grain this fall and grass in the spring some on land that was to be seeded to soy beans in the spring and then to grass this fall five farms represented in the three cars two from the State Plant at Staunton and one from the O.C. Barber Co. There was considerable criticism of the large sacks from the State Plant but most people very much pleased with the quality of goods.

This fall I urged every man whom I saw that was thinking of seeding any grass to lime first and if he were using alfalfa or any clover to be sure to inoculate his seed. Four different communities ordered cars of lime three or more farmers going in on each car and three of them used State Plant lime which one bought from the Standard people on account of getting a smaller sack. Besides these car orders there were several people who wanted smaller quantities not close enough together to go in on a car and I introduced them to the Farmers store in Fredericksburg which carries a supply of Barber lime in stock. I am very certain that the county is more sold to the idea of using lime than it has been at any time during the last three years. There were two hundred tons of lime or a little more in these orders and there are other farms adjoining in some cases some of these farms who ordered and used lime after some of these fellows had broken the ice.

I had three Sweet Clover demonstrations started this year two fields of twenty acres and one of ten both the larger fields went thru in pretty good shape one of them cutting about a ton of hay to the acre and the other with some fair grazing while the third went by the board entirely due to late seeding and the dry weather. The other legume crops are constantly becoming more popular in the county and I have had two farmers to tell me they never expected to plant corn again without having first seeded the land to crimson clover for plowing down for the crop they made a much larger yield of corn and a far better quality grain than the fellows who planted corn on either the old sod of herds grass or the fellows who seeded land that had stood thru the winter with no cover crop on it.

I had a chance to do some work on wheat and this fall to the on oats I did not get anything more done than I have in past years. It just happened that when I went to town to meet Mr. Godkin when he came to help me out on this proposition that I fell in with Mr. L.H. Walker from King George so after talking to Mr. Godkin a few minutes we decided we would run down to the grain elevator and talk a few minutes with the manager. We was glad to see us and told us of his troubles with smutty wheat this year and finally decided to handle the copper carbonate dust for treating wheat and a lot of material was put out. One man made a home made mixer for treating the grain and treated for all of his neighbors who would bring their wheat to his place.

I found it much easier to interest farmers in good seed corn this year than I ever did before partly due to the results gotten on a few demonstrations last year and partly due to the fact that there was very little corn in the county from the 1924 crop that was fit for seed. On white and yellow corn I had twenty farmers whom I had assisted in getting good seed in the spring besides Fifteen Club boys all of the latter except one or two carried their projects thru the there were about five who did not turn in their record books and the fathers of several of these boys have already selected their seed for next years crop from the Boy's acre. It was very gratifying that at our County Fair every corn prize was won by these men who had gotten good seed corn with my

...ance in the spring we had a corn shelling contest at the County Fair for the first time a prize for the ten ears of corn shelling the most corn by weight all of the prizes went to the standard varieties of seed corn, first to Casey's Pure Bred, second to Reids Yellow Dent and third to Boone County. The sample of Casey's that won first shelled twelve and a half pounds while a sample of just ordinary nondescript stuff that has generally been grown in the county shelled seven pounds.

On one farm I tried to persuade a tenant to use some good white corn for seed at a cost of about three dollars a bushel, he could not see it and it just happened that the farm was sold about planting time and the gentleman who bought was to get the landlords share of the crop. He told the young fellow to go to a certain place and get a bushel of Casey's Pure Bred corn to plant a certain $\$1$ field more if necessary that he wanted some good seed for next year. The young man did as he directed and then worked the corn as I suggested to him and got fourteen barrels to the acre from the field planted with Casey's and about six or seven to the acre from the field planted with his native stuff. He tells me now that in the future he will only use good seed corn.

The hardest people to get to try something new are the tomato growers. There is one canery in our County and two years ago I am sure that at least twenty five per cent of the crop was caught by the frost. There was some improvement last year and there was some this year nothing like as many caught by frost but it is certainly hard to interest our people in using a higher grade of fertilizer and cultivating the weeds and grass out of this crop the it brings in a good deal of money at the time of the year that there is not a great deal of it coming to the general farmer.

This, of course has been a hard year on our hay crop alfalfa as well as other things but the Alfalfa fields started last year with certified seed on limed land and the seed gotten in early and inoculated showed up way ahead of the fields that were not so well handled. The crop is becoming much more popular among our dairymen too. A gentleman whom I had never been able to interest in anything came to see me on evening along around the last of August and told me he wanted me to help him to grow some alfalfa that I had gotten some clover seed for a neighbor of his that had produced the best crop of clover seen in that part of the county for many years and he wanted me to get some alfalfa seed from the same place. I gave him the address of the Virginia Seed Service and told him to order ten bushels of their Highland Crown Utah seed and to get two ten acre bottles of culture from Mr. Keiner and apply a ten of lime to the acre and having already plowed his land well and harrowed it to disc it well make a real seed bed and after applying the lime on the disced surface to run the smoothing harrow or the spike tooth. I did not much care which and sow his seed (inoculated). I saw the gentleman a week ago and he tells me he has perfect stand of Alfalfa.

I think that one of the things that holds more in store for this county is than anything else is the dairy industry so I have tried to push that. I tried to get a Cow Testing Association started in the Spring but unfortunately got some mighty good men in the thing who did not want to comply with the rules which our dairy division lays down for that work so just let the thing go after putting a good deal of time on it. Since that have been asked to help Caroline county supply the necessary members for one and King George has a few men who wish to get in so it has been in our minds to get it started this month at any rate it should come early in the new year.

As usual I have been able to persuade a few men who were using scrub bulls to let them go and put good pure bred Guernseys in their places five went to the butcher this year and good pure bred went in their places. I recommend Guernseys for this county because there are more of them here than anything else

good bulls but do not usually put up with the service of any one who wishes their services. These new sows also purchased one nice pure bred female each this year. I helped one man out with his feeding troubles or got him to feed his sows and he tells me his production has about doubled.

I have also persuaded several farmers to get their hogs out of the old pen and feed some more and also to graze some of them on a small acre or using some land that was already fenced and all of them are pleased with the plan and say they can raise hogs profitably that way.

As my report shows I have done about the usual amount of work on the orchards in the county and have gotten two new home orchards started this year. This has been a very difficult year to get any worth while comparison on the orchards spraying and not spraying as we had a frost here the twenty-fifth of May and in fact freezing weather for a day or two and some of the men who were following the spray calendar and who had pruned and fertilized their trees got nothing but the best quality fruit at our County Fair, in fact, I believe all of the fruit that got in the money was from orchards where I have given assistance with the help of the Horticulturists from Blacksburg.

There are very few sheep in the county and only two flocks that I have been able to do anything with one of these I persuaded to get a pure bred Hampshire ram in 1924 and he got a mighty fine crop of lambs in the spring the best he ever had he said and sold them for a dollar per head more than he got for his lambs in 1924 and got them off earlier. Another flock I got to get a pure bred Shropshire ram this fall and to treat their sheep with bluestone for stomach worms.

I have never felt exactly that ~~the~~ I was responsible for the poultry work in the county but have always helped the Home Demonstration Agents out with it or tried but that has been hard work to accomplish much with here the we have some very good poultrymen and women with some mighty good stock of Reds, S.C.R. I and S.C. White Leghorn and a few Very good Barred Rocks. I have culled two flocks during the year and one lady told me after we culled out seventy five from a flock of two hundred that she was getting more eggs than she had before. I was sure and told her at the time that some of them had never laid and never would. This, of course, was a "Rain bow flock".

Club work this year has gone about as well as usual and I know that the quality of stuff produced has been better than what our club members have been doing. As evidence the record at the State Fair three hundred twenty dollars won in prizes, first prize Jersey calf, first, second, third, prize Guernsey bred heifers, first prize Champion and grand Champion Poland China on Sr. Sow, second prize Jr. Duroc sow, first and second prize Sr. Berkshire sow, first second and fourth Jr. Poland China sows, in the large white corn class corn club ninth, tenth and eleventh places.

Club work has been directly responsible for two out of the five replacement of ~~scrub~~ scrub bulls with pure bred. Their dadys bought the pure bred bulls because the little boy had bought a pure bred Guernsey calf last year one of them with his club work savings. The attention of all of them has been directed to ~~the~~ to better stock thru club work. As evidence the record of Kathryn Lusante made with her pure bred Guernsey Cow in 1923. The cow bought as calf won some prizes at the fairs as a calf and heifer and then when she freshened with a heifer calf in the spring of '23 she put her on official test and made 491 lbs. fat from 888 lbs. milk. she is being tested this year not officially and making a much better record the first calf is now fresh and on official test with the calf just two weeks old is milking thirty three lbs. milk per day on twice a day milking.

Manche Truelow has her cow on official test and in two hundred forty-two days she had produced 9374.6 lbs. milk and 409.83lbs fat.

There are pure bred hogs on twenty five farms in the county as a result of club work and every one of these farms is taking better care of hogs and handling them in more economical fashion than they had been doing before the kids took up club work.

The fact that the we put good seed corn on twenty farms this year is largely due to the fact that our boys have been showing beter corn at the County Fair than their "dads" and the number of boys interested in this project has been increasing each year.

The County Fair still brings more of our people together than any other one project and they take more interest in it than any other one thing.

Respectfully submitted.

Jno. W. C. Catlett

Jno. W. C. Catlett
County Agent.

COOPERATIVE EXTENSION WORK IN AGRICULTURE AND HOME ECONOMICS

ANNUAL REPORT OF COUNTY EXTENSION WORKERS

This report form is to be used by county extension agents, such as county agricultural agent, home demonstration agent, club agent, and negro agent, reporting on their respective lines of work.

State Virginia County Stafford
Report of John W. C. Bell County County Agent
(Name) (Title)
From December 1st 1924 to November 30th, 1925.

If agent has not been employed entire year, indicate exact period. Agents resigning during the year should make out this report before quitting the service.

State Extension Director.

SUGGESTIONS RELATIVE TO THE PREPARATION OF THE COUNTY EXTENSION AGENT'S ANNUAL REPORT.

The annual report should be a review, analysis, interpretation, and presentation to the people of the county, the State, and the Nation of the sum total of the extension activities in each county for the year and the results obtained by the county extension agent assisted by the subject-matter specialists. The making of such a report is of great value to the county extension agent and the people of the county in showing the progress made during the year as a basis for future plans. It is of vital concern also to the State and Nation as a measure of rural progress and a basis for intelligent legislation and financial support.

Separate statistical and narrative reports are desired from each county extension agent in charge of a line of work, such as county agent, home demonstration agent, boys' and girls' club agent, and negro agent. Where an assistant agent has been employed a part or all of the year, a report on his or her work should be included with the report of the leader in charge of that line of work. Where an agent in charge of a line of work has quit the service during the year, the information contained in his or her report should be incorporated in the annual report of the agent on duty at the close of the report year, and the latter report so marked. Where two or more extension agents are employed in a county, each in charge of a line of work, care should be exercised to avoid including the same data in the statistical report of more than one agent.

At least four copies of the annual report should be made: One copy for the county officials, one copy for the agent's files, one copy for the State extension office, and one copy for the Extension Service, United States Department of Agriculture. *The report to the Washington office should be sent through the State extension office.*

NARRATIVE SUMMARY.

The narrative report should be a statement in orderly fashion and arranged under appropriate subheadings, of the work done, methods used, and results obtained under each project, as well as of the general work accomplished. Every statement should be clear-cut, concise, forceful, and, where possible, reinforced with ample data from the statistical summary. In the preparation of the part of the report relative to each project, the results reported in the statistical summary for the project should be analyzed, conclusions drawn, and recommendations made. The report may well be illustrated with photographs, maps, diagrams, blue prints, or copies of charts and other forms used in demonstration work. Full credit should be given to all cooperating agencies. The lines should be single-spaced, with double space between the paragraphs, and reasonably good margins left. The pages should be numbered in consecutive order.

The following outline is suggestive of how the narrative report may be clearly and systematically presented:

SUGGESTIVE OUTLINE OF ANNUAL NARRATIVE REPORT.

- I. Cover and title page.
- II. Table of contents.
- III. Status of county extension organization.
 - (1) Form of organization—changes and development.
 - (2) Function of local people, committees, or project leaders in developing the program of work.
 - (3) General policies, including relationships to other organizations.
- IV. Program of work, goals established, methods employed, and results achieved.
 - (1) Factors considered and methods used in determining program of work.
 - (2) Project activities and results.

<ol style="list-style-type: none"> (a) Soils (b) Farm crops <ul style="list-style-type: none"> (Horticulture (c) Home gardens <ul style="list-style-type: none"> (Beautification of home grounds (d) Forestry (e) Rodents, predatory animals, and birds. (f) Animal husbandry <ul style="list-style-type: none"> (Dairy husbandry (g) Home dairy <ul style="list-style-type: none"> (Poultry husbandry (Home poultry 	}	(including diseases and insects).
--	---	-----------------------------------

SUGGESTIVE OUTLINE OF ANNUAL NARRATIVE REPORT—Continued.

IV. Program of work, etc.—Continued.

(2) Project activities and results—Continued.

- (i) Rural engineering.
Rural engineering—home.
- (j) Agricultural economics, including farm management and marketing.
Home marketing.
- (k) Foods.
- (l) Nutrition.
- (m) Clothing.
- (n) Home management.
- (o) House furnishings.
- (p) Home health and sanitation.
- (q) Community activities.
- (r) Miscellaneous.

V. Outlook and recommendations, including suggestive program of work for next year.

VI. Summary of activities and accomplishments, preferably of one or two typewritten pages only, placed at the beginning or end of the narrative report.

STATISTICAL SUMMARY.

To supplement the narrative part of the report, and in order that comparable State and National summaries may be made, it is necessary to include a statistical summary of the work in each county. The following form has been prepared to insure uniformity of reporting. In addition to the questions asked under each subdivision of the report, space is provided to add further data if desired. The statistical summary will grow naturally out of the field and office records.

DEFINITIONS OF TERMS USED IN THIS REPORT.

1. A PROGRAM OF WORK is a definitely outlined plan for extension work.
2. A PROJECT is a definite, systematic, organized plan for carrying out some phase of the extension program of work, providing for what is to be done, how much, when, where, how, and by whom.
3. MISCELLANEOUS WORK includes work which has not yet become a regular part of the program of work—work other than project work.
4. A COMMUNITY, for the purposes of this report, may be any one of the several units into which the county is divided for purposes of conducting organized extension work.
5. A PROJECT LEADER OR LOCAL LEADER is a person, selected because of his or her special interest and fitness, who functions as a leader in advancing some phase of the local program of extension work.
6. A DEMONSTRATION is an example designed to show the practical application of an established fact. Demonstrations as contemplated in this report are of two kinds, method demonstrations and result demonstrations.
 - A method demonstration is a demonstration given by an extension worker or other trained leader to a group for the purpose of showing them how to carry out a practice. Synonym: Lecture demonstration. Examples: Demonstrations of canning, mixing of spray materials, and culling of poultry.
 - A result demonstration is a demonstration carried on by a farmer, farm woman, boy, or girl under the direction of the extension service, involving a substantial period of time, records of results, and comparisons. Examples: Child-feeding, corn-culture, and orchard-management demonstrations.
7. A DEMONSTRATOR is a farmer, farm woman, boy, or girl who, under the direction of the extension service, conducts a result demonstration.
8. MEMBERS COMPLETING should include those who have satisfactorily finished the work outlined for the current year.
9. A DEMONSTRATION MEETING is a meeting held to give a method demonstration or to start, inspect, or further a result demonstration.
10. A TRAINING MEETING is a meeting at which project leaders or local leaders are trained to carry on extension activities in their respective communities.
11. AN OFFICE CALL OR TELEPHONE CALL is a visit or call by a farmer or other person seeking agricultural or home economics information, as a result of which some definite assistance or information is given.
12. A FARM VISIT is a call at a farm by the agent at which some definite information is given or concrete plan of work outlined, or some valuable information obtained from the farmer regarding his work, or the better practice prevailing in his neighborhood.
13. A HOME VISIT is a call at a home by the agent at which some definite information is given or concrete plan of work outlined, or some valuable information obtained from the farm woman regarding her work, or the better practice prevailing in her neighborhood.
14. DAYS IN OFFICE should include time spent by the county agent in his office, at county agent conferences, and any other work directly related to office administration.
15. DAYS IN FIELD should include all days spent on official duty other than those spent in office.
16. LETTERS WRITTEN should include all single letters on official business.

DEFINITIONS OF TERMS USED IN THIS REPORT—Continued.

17. A **FARMERS' INSTITUTE** is one of a series of meetings of one to two days' duration, arranged by a central State farmers' institute agency, at which agricultural and home-economics problems are discussed, usually by outside speakers employed for the purpose.
18. AN **EXTENSION OR MOVABLE SCHOOL** is an itinerant school usually of two to six days' duration where practical but systematic instruction is given to persons not resident at the college. AN **EXTENSION SMOKE COOKER** differs from an extension school in that it is usually held at the college or other educational institution and usually for a longer period of time, but not exceeding two weeks.
19. **RECORDS** consist of definite information filed in the county office that will enable the agent to verify the data on extension work included in this report.
20. **FARM OR HOME PRACTICE ADOPTED** is a new or improved practice adopted on a farm or in a home during the year as a result of extension teaching. Examples: Spraying of potatoes for disease, canning of fruits and vegetables, use of balanced rations, and hat making.

GENERAL ACTIVITIES.

Report only this year's extension activities and results that are supported by records.

If an assistant agent has been employed during the year, include his or her work with that of the agent.

1. List below the names, titles, and periods of service of the county extension agents whose work is included in this report. 1

report of J. W. C. Catlett County Agent Turlock
(Name) (Title) (Months of service this year.)

2. Number of communities in county where extension work should be conducted. 24 2

3. Number of above communities in which the extension program has been cooperatively worked out by extension agents and people concerned. — 3

4. Number of voluntary county, community, or local leaders actively engaged in forwarding the extension program with— 4 4

(a) Juniors _____

(b) Adults _____

5. Number of clubs carrying on extension work: 4 5

(a) Junior _____

(b) Adult _____

6. Membership in above clubs: 33 6
