COUNTY EXTENSION ORGANIZATION.

Extension Work in Louisa County functions through a county organization composed of men who are leaders in their respective communities. This organization includes farmers, teachers, and business men.

The county is divided into seven communities each with a local organization which includes the leading farm men and women. These locals consider problems peculiar to their communities and efforts are made to better conditions through community gatherings, demonstrations, etc.

There is a close relationship between these community units and the county unit.

We have in the County the following other farmers organizations: Farmers Union, Tobacco Growers Cooperative Assn., Wool Growers Assn., Poultry Producers Assn., and Farm Loan (Federal) Assn., which cooperate with the Extension Organization whole heartedly. In fact these other organizations owe their existence in a large measure to Extension work. In addition there are numerous local or community cooperative organizations which are a result of Extension Work.

PROGRAM OF WORK .

This includes such major projects as COMMODITY MARKETING, CERTIFIED SEED PRODUCTION, HOME PRODUCTION OF GRAIN AND FORAGE, SOIL IMPROVEMENT, LIVESTOCK AND POULTRY, BOYS AND GIRLS CLUB WORK, AND ORCHARD.

Commodity Marketing; additional members were needed for the Tobacco and Wool selling associations; one hundred for the former and twenty for the latter was the goal set for 1933. These goals were reached through activities of the membership of each organization led by the county agent.

Home Production of Grain and Forage: This county has never produced enough of the above for home consumption. I could not hope to over come this in one year but my idea was to begin with an intensive campaign to increase the production of these important crops. The results have been more than satisfactory. More grain, annual legumes, perennial grasses, alfalfa and clovers were planted this year than in the history of the county. The Extension people in the county hope to have the county producing a surplus in five years.

Certified Seed Production: realizing the great need for better seed I put on a campaign for growing certified seed for sale this year by a number of leading farmers. The results have been gratifying to our committee and profitable to the demonstrators who produced the seed. The influence of beginning this important work will be far reaching in the future. This work enables many farmers to obtain the best possible seed at home and grown under conditions, climatic and otherwise, that give best results.

2

Soil Improvement: Knowing that the foundation of profitable agriculture is fertile soil I have endeavored to teach and preach soil improvement.

This work has been carried on through fertilizer, lime, cover crop and crop rotation demonstrations. I have given method demonstrations in healing galls, stopping gullies, and draining wet land; instructing farmers in the better care of manure and in the spreading of straw, cornstalks, and other refuse on thin spots of land. The subject of soil improvement has been taken up and discussed in practically every farmers meeting held in the county. The work has progressed well this year and the outlook for the future improvement of the soil is bright.

Livestock, Having the best hog market in the East right at us I have endeavored to increase the hog for market production. This has been somewhat difficult owing to the low price of pork but progress has been made.

Demonstrations in feeding porkers, brood sows, and breeding stock have been run with good results and a good foundation laid for future work.

Purebred boars and sows have been purchased and the breeding stock generally improved.

Beef cattle have been a hard proposition this year owing to low prices. The production of beef cattle has been an important factor in farming in one community in the county and some good work was done with these farmers such as feeding demonstrations, and the use of purebredsires.

We have in the county six commercial dairies. Two of these were induced to join a cow testing association in an adjoining county, and one was induced to purchase a better bull. A campaign was put on to get all farmers to carry more cows and ship cream. The results of this campaign were good. Sixty one farmers are shipping cream once or twice a week. Only about twenty seven were shipping before. I have ~~EMERSON~~ given method demonstrations of testing milk and thus enabling them to get rid of the unprofitable cows. I have had them run feeding demonstrations, and with others I have worked feeding formulae so as much home grown feed as possible could be used.

Poultry is a growing industry in this county and I have put much work on that line of farming this year. I was instrumental in culling thirty-eight flocks this fall. Result demonstrations have been run with gratifying results. Feed formulae have been worked out for a number of farm flocks and money saved to the owners in several instances where home produced feed could be used in place of feed that they had been buying at high prices. New and approved poultry houses have been built and others remodeled. There needed purebred males have been purchased. Methods of control of insect pests have been established in practically every farm flock. The county Extension people consider this important work and it has been made a major project.

3

Orchard: In one section of the county fruit growing is quite an industry and the work has been encouraged to the extent of making this one of my major projects. Six result demonstrations were run this year and I gave several method demonstrations of pruning and spraying, and one of planting a new orchard. Meetings have been held at some of these orchards and packing demonstrations have been given. Discussions included varieties, cultural methods, and pest-control.

Club Work: In club work this year I had three projects which I considered of most importance in this particular county, Corn, Breeding Pig, and Poultry. About sixty per cent of the members completed their projects with a substantial profit, turned in good reports and compositions and all told made real progress. Of the remaining forty per cent some of them made partial reports, some dropped out through sickness, and some through discouragement. Some of my members exhibited at as many as three fairs winning prizes at all. One poultry club boy won first on pen of birds at a County fair, first at a District fair, and third at The State fair.

Others did nearly as well. I find that club work in many instances opens the way to work with adults that have been inclined to hold aloof from extension work. Some of the best demonstrators and cooperators that I have on my list have been reached directly or indirectly through club work. In my four years of county agent work I had never been able to reach two men until this year and it was done through their boys going into club work.

Tobacco: This is a tobacco producing county being in the Sun Cured belt of Virginia and while I call tobacco work minor project I have given considerable work to bettering conditions among tobacco growers. That part of the work that has to do with the cooperative marketing of tobacco has the most prominent place on my program but this paragraph has to do with the production of tobacco. I have endeavored to get the tobacco farmers to grow more food and feed at home and to adopt better cultural methods for tobacco. When it comes to curing their product I don't believe the average tobacco farmer can be helped by any one for he seems to know that end of his business, but he can be helped with his fertilizing and cultural problems. I had sixteen result demonstrations this year and the increase over the average was 220 lbs. per acre. Last spring I obtained five pounds of pure seed of the variety commonly grown from the Caroline Exp. Station and distributed to nearly two hundred farmers. This alone improved the quality of the crop to a considerable extent. Many farmers treated seed for disease and took other precautions to have disease free tobacco. The time spent with tobacco farmers has been worth while.

Miscellaneous: This includes many phases of county agent work. Below I set forth some of the things that have been accomplished.

Home Gardens: This work has been carried to every farmer and there is not a farm in the county without its home garden. Demonstrations on fertilizing, diseases, and insect pests have been run in every community.

Bee keeping: This includes demonstrations on care and handling, transferring to modern hives, control of parasites and diseases, and introduction of purebred queens.

Anti-rat Campaign: this was put on last January pressed intensively for one week and resulted in a fair clean-up of rats in the county. The campaign has been continued since whenever an appearance of rats occurs. I have urged the building of ratproof cribs and granaries and worked with the poultrymen in controlling rats.

Purebred Sire Campaign: this has been conducted at all times and with good results. The scrub sire is almost a thing of the past in this county and is slated to go entirely.

County fair: This important work has not been neglected. I have charge of exhibits and they will rank with any county fair in the state. In addition to county fair work I put on as usual a county agricultural exhibit at the Va. State Fair which won second place, losing first place by four tenths of one point.

Farm Manufacturing: This includes method demonstrations in vinegar making, Tobacco stick making, sorghum making, curing meats etc.

Emergency work: this includes treating sick animals, vaccinating to prevent diseases, butchering, and cutting out the carcasses and the hundreds of other things the County Agent is called upon to do or instructions how it should be done.

ANNUAL REPORT OF COUNTY EXTENSION WORKERS
SPECIAL EDITION

This report form is to be used by county extension agents, such as county agricultural agent, home demonstration agent, club agent, negro agent, etc., reporting on their respective lines of work.

State Virginia County Louisa
Report of G. B. Willis County Agricultural Agent.
(Name) (Title)
From Nov. 30, 1922 to Nov 30th, 1923.

If agent has not been employed entire year, indicate exact period. Agents resigning during the year should make out this report before quitting the service.

SUGGESTIONS RELATIVE TO THE PREPARATION OF THE COUNTY EXTENSION AGENT'S ANNUAL REPORT.

The annual report should be a review, analysis, interpretation, and presentation to the people of the county, the State, and the Nation of the sum total of the extension activities in each county for the year and the results secured (including assistance rendered by subject-matter specialists). The making of such a report is of great value to the county extension agent and the county people in showing the progress made during the year as a basis for future plans. It is of vital concern also to the State and Nation as a measure of rural progress and a basis for intelligent legislation and financial support. This blank form covers simply the statistical phases of the report, and should be supplemented by a full report in narrative form.

NARRATIVE SUMMARY.

The narrative report should be a statement in orderly fashion and arranged under appropriate subheadings, of the work done, methods used, and results secured under each project, as well as of the general work accomplished. Every statement should be clear-cut, concise, forceful, and, where possible, reinforced with ample data from the statistical summary. In the preparation of the part of the report relative to each project, the results reported in the statistical summary for the project should be analyzed, conclusions drawn, and recommendations made. The report may well be illustrated with photographs, maps, diagrams, blue prints, or copies of charts and other forms used in demonstration work. Full credit should be given to all cooperating agencies. The lines should be single-spaced, with double space between the paragraphs, and reasonably good margins left. The pages should be numbered in consecutive order.

The following outline is suggestive of how the narrative report may be clearly and systematically presented:

SUGGESTIVE OUTLINE OF ANNUAL NARRATIVE REPORT.

- I. Cover and title page.
- II. Table of contents.
- III. Status of county extension organization.
 - (1) Form of organization—distinctive features.
 - (2) Function of local people, committees, or project leaders in developing the program of work.
 - (3) General policies, including relationships to other organizations.
- IV. Program of work, goals established, methods employed and results achieved.
 - (1) Factors considered and methods used in determining program of work.
 - (2) Project activities and results.
 - (a) Soils.
 - (b) Farm crops
 - (c) Horticulture } (including diseases and insects).
 - (d) Forestry
 - (e) Animal husbandry
 - (f) Dairy husbandry } (including diseases and pests).
 - (g) Poultry husbandry
 - (h) Rural engineering.
 - (i) Rodents, predatory animals, and birds.
 - (j) Agricultural economics—including farm management marketing, etc.
 - (k) Foods and nutrition.
 - (l) Clothing and millinery.
 - (m) Home health and sanitation.
 - (n) Household management and home furnishings.
 - (o) Community activities—other than those included under subject-matter headings.
 - (p) Miscellaneous.
- V. Outlook and recommendations, including suggestive program of work for next year.
- VI. Summary of activities and accomplishments in paragraph form, preferably of one or two typewritten pages only, placed at the beginning or end of the narrative report.

STATISTICAL SUMMARY.

To supplement the narrative part of the report, and in order that comparable State and National summaries may be made, it is necessary to include a statistical summary of the work in each county. The following form has been prepared to insure uniformity of reporting. In addition to the questions asked under each subdivision of the report, space is provided to add further data if it is desired. The statistical summary will grow naturally out of the field and office records.

DEFINITIONS OF TERMS USED IN THIS REPORT.

1. A PROGRAM OF WORK is a definitely outlined plan for extension work.
2. A PROJECT is a definite, systematic, organized plan for carrying out some phase of the extension program of work, providing for what is to be done, how much, when, where, and by whom.
3. MISCELLANEOUS WORK includes work which has not yet become a regular part of the program of work—work other than project work.
4. A DEMONSTRATION is an example designed to show the practical application of an established fact. Demonstrations may be of methods or of results.
Under method demonstrations include lecture demonstrations, practicums, etc., such as demonstrations of canning methods, home-mixing fertilizers, poultry culling, dress-form making, and the like, all involving short periods of time.
Under result demonstrations include demonstrations in which a substantial period of time is involved, records of results kept, and comparisons made, as in a child-feeding demonstration, corn-culture demonstration, pasture-improvement demonstration, and the like.
5. A DEMONSTRATOR is an adult or junior who, under the direction of the extension service, undertakes to show in his community by example the practical application of an established fact, and who keeps records and reports on the same.
6. A COMMUNITY, for the purposes of this report, may be any one of the several units into which the county is divided for purposes of conducting organized extension work.
7. A PROJECT LEADER OR LOCAL LEADER is a person, selected because of his or her special interest and fitness, who functions in advancing some phase of the local program of extension work.
8. A COMMUNITY CLUB is an organization of men, women, boys, and girls to further community interests and to promote community recreation.
9. AN OFFICE CALL is a visit or a telephone call by a farmer, or other person, seeking agricultural or home economics information, as a result of which some definite assistance or information is given.
10. A DEMONSTRATION MEETING is a meeting held to give, inspect, or further a demonstration.
11. A TRAINING MEETING is a meeting at which project leaders or local leaders are trained to carry on extension activities in their respective communities.
12. A FARM VISIT is a call at a farm by the agent at which some definite information is given or concrete plan of work outlined, or some valuable information obtained from the farmer regarding his work, or the better practice prevailing in his neighborhood.
13. A HOME VISIT is a call at a home by the agent at which some definite information is given or concrete plan of work outlined, or some valuable information obtained from the farm woman regarding her work, or the better practice prevailing in her neighborhood.
14. DAYS IN OFFICE should include time spent by the extension agent in office in connection with extension work.
15. DAYS IN FIELD should include all days spent on official duty other than those spent in office.
16. LETTERS WRITTEN should include all single letters on official business.
17. A FARMERS' INSTITUTE is one of a series of meetings of one to two days' duration, arranged by a central State farmers' Institute agency, at which agricultural and home economics problems are discussed, usually by outside speakers employed for the purpose.
18. AN EXTENSION OR MOVABLE SCHOOL is an itinerant school usually of two to six days' duration where practical but systematic instruction is given to persons not resident at the college. A SURET CO-COURSE differs from an extension school in that it is held at the college or other educational institution and usually for a longer period of time.
19. RECORDS consist of definite information filed in the county office that will enable the agent to verify the data on extension work included in this report.

4
GENERAL ACTIVITIES.

Report only results of extension activities that are supported by records.

1. List below the names, titles, and periods of service of all county extension agents whose work is included in this report. 12

J. B. Willis (Name) County Agent (Title) 1 year (Period of service)

2. Total number of communities in county where extension work should be conducted (a) Men 7 (b) Women _____
3. Number of communities in which the extension program has been cooperatively worked out by extension agents and people concerned _____ 4
4. Number of voluntary county, community, or local leaders actively engaged in forwarding the extension program (a) Adult work 7 Men 6 Women 1 (b) Junior work _____ Boys 3 Girls _____

† Miscellaneous includes emergency and other work which can not be categorized in advance.

FARM DEMONSTRATION WORK.
SOILS.

Report only results of extension activities that are supported by records.

38. Number of result demonstrations started or under way	175	38
39. Number of such demonstrations completed or carried through the year	156	39
40. Number of acres involved in those completed demonstrations	320	40
41. Total* number of farms influenced by extension work to change practices relative to soil management (include demonstrators)	267	41
42. Acres involved in preceding question	14,000	42
43. Number of farms following advice in the use of commercial fertilizer	167	43
44. Acres involved in preceding question	8,000	44
45. Number of farms home-mixing fertilizers according to advice	49	45
46. Tons of fertilizer so mixed	147	46
47. Number of farms taking better care of farm manures	46	47
48. Number of farms using lime or limestone according to advice	58	48
49. Tons of lime or limestone so used	500	49
50. Number of farms plowing under cover or other green manure crops for soil improvement according to advice	67	50
51. Acres of cover and green manure crops so plowed under	320	51

[Use space below to include other important data relating to soils.]

* This question includes the farms listed under questions 42, 43, 47, 48, and 50, but does not necessarily equal the total of those quantities where not all soil practices that might be included in question 41 are listed and also one farm might adopt two or more new practices. This is also true of similar questions throughout this report.

CEREALS.

Report only results of extension activities that are supported by records.

Item.	(1) Oats.	(2) Wheat.	(3) Corn.	(4) Rye.	(5) Barley.	(6) Other.*
32. Number of adult result demonstrations started or under way	16	6	4	8	2	32
33. Number of such adult demonstrations completed or carried through the year	17	6	4	7	2	33
34. Acres involved in these completed demonstrations	80	54	18	30	12	34

<i>Two dairymen in this County belong to Verangue County Calf Testing Assn.</i>							

RURAL ENGINEERING.

Report only results of extension activities that are supported by records.

177. Number of result demonstrations started or under way	4	177
178. Number of such demonstrations completed or carried through the year	4	178
179. Acres or other units involved in these completed demonstrations	26	179
180. Total profit or saving on demonstrations resulting from better practices	46.00	180
181. Number of farms installing drainage systems	7	181
182. Acres drained	51	182
183. Number of farms installing irrigation systems		183
184. Acres irrigated		184
185. Number of farms constructing terraces or soil dams		185
186. Acres on which soil erosion was so prevented	2	186
187. Number of dwellings constructed according to plans furnished		187
188. Number of dwellings remodeled according to plans furnished		188
189. Number of sewage disposal systems installed	3	189
190. Number of water systems installed	9	190
191. Number of heating systems installed		191
192. Number of lighting systems installed	14	192
193. Number of farms on which buildings other than dwellings were constructed or remodeled according to plans furnished	17	193
194. Number of buildings involved in preceding question	(a) Barns 2	194
	(b) Hog houses 5	
	(c) Poultry houses 6	
	(d) Silos 3	
	(e) Other Corncrib 1	
195. Number of farms assisted in the care and operation of machinery (tractors, power sprayers, milking machines, etc.)	21	195
196. Number of farms clearing land	78	196
197. Acres of land so cleared	157	197

[Use space below to include other important data relating to rural engineering.]

RODENTS AND MISCELLANEOUS* INSECT AND ANIMAL PESTS.

Report only results of extension activities that are supported by records.

Item.	Rodents.	Other animal pests.	Crustaceans.	Other insects.	
185. Number of result demonstrations started or under way	56			12	185
186. Number of such demonstrations completed or carried through the year					186
188. Number of acres in those completed demonstrations					188
191. Total saving or profit on demonstrations resulting from better practices	\$	\$	\$	\$	191
192. Total number of farms adopting control measures	236				192
193. Number of acres involved					193
194. Number of pounds of poison bait used	600				194
[Use space below to include other important data relating to rodents and miscellaneous insect and animal pests.]					

AGRICULTURAL ECONOMICS.

Report only results of extension activities that are supported by records.

FARM MANAGEMENT.

205. Number of farm account books distributed	18				205
206. Number of farmers keeping records in such account books throughout the year				14	206
207. Number of farmers assisted in summarizing and interpreting their accounts				9	207
208. Number of farmers making changes in their business as result of keeping accounts				3	208
209. Number of other farmers adopting cropping, live-stock or complete farming systems according to recommendations				21	209
210. Number of boys' and girls' farm account clubs					210
211. Number of members enrolled	(a) Boys				211
	(b) Girls				
212. Number of members completing	(a) Boys				212
	(b) Girls				
213. Number of farmers advised relative to loans				2	213
214. Number of farm management and farm account schools held					214
215. Number of farmers assisted in keeping cost of production records				19	215

LABOR.

216. Number of farmers making better use of labor				14	216
217. Number of farmers securing tractors, sprayers, milking machines, or other machinery to economize labor				59	217

* Do not include work reported under "Crop" and "Live Stock" headings.

† Indicate by name.

8-2725

HOME DEMONSTRATION WORK.

FOODS AND NUTRITION.

Report only results of extension activities that are supported by records.

228.1. Number of members enrolled in food and nutrition work 228.1

(a) Women _____
(b) Girls _____

FOOD SELECTION.

Item.	Women.	Girls.	
229. Number of result demonstrations started or under way.			229
230. Number of such demonstrations completed or carried through the year.			230
231.1. Number of method demonstrations.			231.1
232. Total* number of homes influenced by extension service to serve better selected food (include demonstrators)			232
233. Number of homes using more fruits in the diet.			233
234. Number of homes using more green vegetables in the diet.			234
235. Number of homes using more milk and other dairy products in the diet.			235
237. Number of homes using more poultry products in the diet.			237
238. Number of homes using more unrefined cereal products in the diet.			238

[Use space below to include other important data relating to food selection.]

FOOD PREPARATION.

Item.	(a)		(b)		(c)		(d)		
	Revolving.		Meal preparation.		School lunches.		Other.....		
	Women.	Girls.	Women.	Girls.	Women.	Girls.	Women.	Girls.
