SUMMARY

The program as outlined by the National County Planning Committee was followed this year in getting the farmerstothink about national problems and in outlining the plan of work for the year. This program consisted in having community discussion groups in the various communities where vital farm problems were discussed. Each community discussed six problems in their meeting and at the last meeting each group was asked to give an estimate of the production of the various crops in the county in 1936 and what this production should be to maintain soil fertility and prevent erosion. After this community meeting was held the discussion leader from each community was asked to attend a county meeting and make a detailed report of these recommendations and to make a plan of work for the agent.

The first major project recommended in the agent's plan of work was for the agent to work with any program to take the place of the invalid A.A.A. To start the Agricultural Conservation Program educational meetings, attended by 532 farmers, were held to explain the program and temporary committeemen were appointed and trained to take work sheets. By closing date 504 work sheets had been executed and approved covering 19,897 acres of land. The program has been a decided success and a great stimulus to better farm practices. It is estimated that the use of ground limestone has been increased 594 tons over last year, that 1200 acres of more legume and clover crops were seeded, and 16% superphosphate was used on 400 more acres of pasture and legumes as a top dressing than last year as a result of the program. Due to unfavorable weather conditions the program also acted as crop insurance. It is estimated that the total payment under this program will be \$27,000.00 for 1936.

The launching of the Conservation Program required so much of the agent's time during the first part of theyear no definite goals

were developed for Farm Management, the second major project. However, all personal work with the farmers in connection with the program and even explanation of the program were farm management problems. In this way an unusually good opportunity to do general farm management was offered the agent. Through cooperation of the T.V.A. a 30 ton car of superphosphate was secured and the 15 farmers using this fertilizer have agreed to keep records on these farms and to allow them to be used as demonstration farms for the benefit of the other farmers in the county.

Mr. A. G. Birdsall, Assistant County Agent, had charge of the last major project, 4-H Club Work. There were seven organized clubs in the county with an enrollment of 149 boys and girls. These club members conducted 183 projects with 94.5% completion. The value of good seed, and standard bred poultry was emphasized in the work and demonstrated by exhibits in three farm shows, the club members winning \$25.50 in prizes. The Hampden Sydney Short Course was attended by 32 members and the State Short Course by five members. Two boys attended the State Wild Life Camp at Jamestown. The total income from these projects was important and in most cases very gratifying this year but the most important factor in the work was the training these young people received along social, and economic lines and in training for leadership.

Under miscellaneous work the agent was able to help along a number of lines. Through the cooperation of the garden specialist, monthly garden letters were mailed to 175 gardeners and numbers of bulletins on diseases, insects and special vegetables were distributed. Through the cooperation of the poultry department monthly letters to the turkey growers were mailed. Plans for poultry houses and equipment were supplied to an unusually large number of farms this year. Specialists on farm buildings and water supply jobs spent 4 days in the county to take care of requests for assistance.

The better seed program was carried out in connection with the goal of exhibits at the Five County Fair. The sheep and lamb program is the stimulus to purebred sires and 12 registered animals were brought into the county last year. The agent assisted in the cooperative marketing of about \$70,000.00 of produce from the county. Other work has included the completion of the A.A.A. program with payments to farmers of about \$21,510.00, helping secure credit through seed and Production Credit Loans, drought relief, tobacco grading referendum, cooperation with Resettlement and N.Y.A. workers, work on rural electric lines and terracing.

CHANGES IN COUNTY EXTENSION ORGANIZATION

With the inauguration of the National County Planning Program with discussion groups in each community it was necessary to make changes in and additions to the membership of the County Agricultural Committee. Last year this committee was composed of the six community committeemen from each of the six organized communities in the county, the county committeeman of the three A.A.A. associations, and the members of the County Board of Supervisors as ex-officio members. To carry out the County Planning Program it was found that it would be advisable to divide the county into seven communities and to change the meeting place of two others. New committeemen were added to form the new community and to take the places of those who had become inactive or had resigned.

Mr. J. B. Farrar, part time Assistant Agent, resigned in February and Mr. A. G. Birdsall was appointed to take his place and have charge of club work in Buckingham and three other counties. F

Formally the plan of work was adopted at the annual meeting of the County Agricultural Committee. This year the procedure as outlined by the National Planning Board was followed. According to this suggestion each community would discuss in a public meeting six suggested topics from a list of about eighteen. The topics discussed, two at each meeting for three meetings, are listed below:

1. What is the chief cause of the farm depression?
2. Do farmers want the Federal Government to help them deal with farm problems?
3. The farmer and the consumer of farm products,- what, if any, are their responsibilities to one another?
4. Do farmers want high tariffs on farm products? On industrial products?
5. Farm prices-how are they made?

6. Will crop adjustment be necessary or desirable in years to come?

At the third community meeting those present were asked to answer the two following questions:

1. What will be the production of the various farm commodities in this county in 1936, assuming normal weather conditions and present farm practices?
2. What would be the production of these same commodities in 1936, if farming practices were changed so as to maintain soil fertility and prevent soil erosion?

The chairman of each community meeting secured the opinion of the farmers at the local meeting in regard to these two questions. Then at a county meeting of all the chairmen these two questions were again discussed and answered. These community chairman then filled in a questionnaire indicating what per-cent increase or decrease should be made in each crop grown in the county and the same was done for livestock and livestock products.

Then after discussing pertinent farm questions locally and at county meetings and making recommendations for crops and livestock in the county these same men were asked to make recommendations for a plan of work for 1936 for the agent to follow. They recommended three major projects and a miscellaneous project to cover minor activities.

SOIL CONSERVATION PROGRAM

The first major project as recommended by the committee was for the agent to work with any program developed by the U.S. Department of Agriculture to take the place of the invalid A.I.A.

When the Agricultural Conservation Program was started the agent helped get the program organized in the county and led the educational work in connection with the program. Temporary committeemen were

appointed and trained to take work sheets. Educational meetings were held to explain the program and 522 farmers attended these meetings. When the final date for accepting work sheets for 1936 was reached 604 approved work sheets had been received. The farmers as a whole seem to be well pleased with the Conservation Program and it has given a stimulus to better farming practices never before witnessed by the agent in the same length of time. We have records to show that 494 more tons of lime have been used this year than last and it is estimated that at least 100 tons were used of which we have no record. Except for the fact that the farmers could not get lime due to the unusually large numbers of orders at the plants 200 tons more would have been used.

It is estimated that the Conservation Program caused an increase of 1200 acres seeded to legumes and winter cover crops over the average for the past five years. The increase in seedings was especially pronounced in alfalfa, lespedeza, crimson clover, and Austrian winter peas, the latter being practically a new crop in the county. Another practically new practice was the use of 16% superphosphate on permanent pasture which was used on about 100 acres. About 500 acres of legumes were also top dressed with this fertilizer which represents a big increase in the practice. The program also gave a stimulus to terracing and subsoiling both of which are a very desirable practice in this county.

Payments under the program for taking land out of soil depleting crops has served the purpose of crop insurance in the county this year. Due to unusual weather conditions the farmers were not able to plow or plant all of the land they had intended and for the first time in a long time a number of wheat crops were not harvested. In a few instances tobacco crops were abandoned so the payments they will receive under the program will be equivalent to crop insurance. This payment was especially attractive to the dark tobacco growers whose markets have been burdened with over production and should result in an increased total net return for the tobacco crop in the county and state. The payment will enable some farmers to change their type of farming from a depleting system whereby they can continue to pay for their farms and at the same time improve them. This same principle also applies to all farms to a greater or less extent.

In carrying out the Agricultural Adjustment Program the following steps have been completed. Six hundred and four work sheets have been completed, covering 19,897 acres of land. The performance on each of the farms under the program has been checked by supervisors and a second check made on 65% of these farms which had not earned their soil building allowance or had not met their minimum or diversion requirements when the first check was made. These performance reports have been checked in the office and application for grants are being signed by the interested parties. The agent found that correspondence in connection with the Conservation Program was unusually heavy. The program was new and covered so many features that a large number of personal letters was required every day and the number of circular letters required was greater than usual. So the office work in connection with the first year of the program was heavy.

FARM MANAGEMENT

In discussing the second major project for the agent's plan of work the committee was of the opinion that if a new program was developed to take the place of the A.A.A. this program would require a large percent of the agent's time. After some discussion they recommended Farm Management as the second project as they felt sure it would fit in with any program that would be offered the farmers and at the same time it would be a very worthwhile project if no program was developed.

As the Agricultural Conservation Program was developed about the first of the year the agent did not have time to develop any definite plans along this line. But as had been anticipated by the committee Farm Management projects did fit in ideally with the Conservation Program as soil conservation and improvement are the most vital of farm management problems. In fact the educational meetings to explain the conservation program were really talks on farm management, the idea being to explain how the program would enable the farmer to change or improve his farming system and practices so as to conserve and protect his soil, the factors involved being to reduce the acreage of soil depleting crops and to increase the acreage of conserving crops such as legumes and perennial grasses, the protection of the soil from erosion by shifting hilly land to pastures or meadows, and the use of terraces.

The value of lime and superphosphate was also emphasized as agents to secure better growth from legumes and grasses and thus in turn to secure higher yields from the money crops on the farm.

Many of the letters from farmers asking information about the program and how to fit their farming operations to it were dealing in farm management problems. The same was true for most farm visits.

In addition to work done along farm management lines in connection with the conservation program 15 demonstration farms have been selected. Through the cooperation of the T.V.A., which organization allowed Buckingham County one 30 ton car of superphosphate, thirteen farmers have agreed to keep records on their farms for five years and to allow their farms to be used for demonstration purposes. They have agreed not only to carry on demonstrations with the T.V.A. fertilizer but to operate their farms according to approved farming methods as recommended by the Extension Division, to increase their acreage of alfalfa and to do everything possible to prevent erosion on their farms. These demonstrations should be of great service to their fellow farmers in the county in the next few years.

FOUR H- CLUB

The Assistant County Agent has given one fourth of his time to 4-H Club work in Buckingham. This time began the first of March, leaving Bedford County and accepting the position left vacant by Mr. J. B. Farrar, former Assistant County Agent.

There are seven organized Clubs of boys and girls carrying on 4-H Club work in the county. The seven clubs are: Arvonis, Buckingham, Centenary, Curdsville, Dillwyn, Rock Springs and Sunnyside. One hundred and forty-nine boys and girls carried one hundred and eighty-three projects. One hundred and thirty-nine members completed one hundred and seventy-three projects which is 93.1% completion of members and 94.5% completion of projects.

The names of the projects, number of members enrolled, and the number completing are:

<u>Project</u>	<u>Enrolled</u>	<u>Completed</u>
Corn	24	23
Garden	19	17
Snap	1	1
Potatoes	6	10
Tobacco	2	2
Flowers	2	2
Fat Pig	26	24
Cow	1	1
Dairy Calf	3	3
Poultry	61	57
Wildlife	29	29
Total	183	173

In the early spring the Buckingham 4-H club held a social at the school house. Thirty members, leaders, and friends were present. Many games were played and refreshments were served.

The importance of using certified seed was emphasized to the club members. Six demonstrations with a total attendance of 120 were given to club members on selecting seed corn. Certified seed was delivered to sixteen boys. The Five County Fair Association gave \$5.00 toward purchasing certified seed for 4-H club members.

The results of using good seed was demonstrated at the Five County Fair held in Farnville, September 28th through October 3rd., where six members exhibited corn grown from certified seed.

Club members of Buckingham County made exhibits of their projects at the Five County Fair, the State Fair, and the Lynchburg Farm Show. Arvonie, Buckingham, Cardsville and Beck Spring made individual club exhibits at the Five County Fair. The Beck Spring Club won the first place which gave them \$7.00. This money will be used toward sending delegates from the club to the Hampden Sydney Short Course. The club members of all the clubs won individual prizes of \$18.50.

The college of Hampden Sydney threw open its doors on June 22nd. for the 11th annual session of the District 4-H Club Short

Course of seven counties. Buckingham County came second in enrollment with 32 members. Each club in the county was represented at the Short Course. Class work of the girls was grooming, mental and physical health. Boys classes dealt with identification of weeds and pests, Wildlife, Wildlife Conservation, and Soil Conservation.

In preparation for the State 4-H Club Short Course at V.P.I. the County Demonstration or rally day was held. Dr. Broomfield, County health officer, gave a physical examination to the boys and girls. Nancy Boatwright and Guy Poole were the healthiest 4-H girl and boy in the county. Helen Morgan and Guy Poole entered the State Correct Dress Contest held during the State Short Course. Guy Poole won second place in the outfit appropriate for work on the farm. Both became members of the All Star organization while attending the Short Course. Five members from the county attended the State Short Course.

One Poultry Judging Demonstration was given in the county by the Assistant County Agent with the assistance of A. L. Dean, Poultry Specialist.

In August two boys of the Buckingham Club and one of the Dillwyn Club attended the State Wildlife Conservation Camp held a week at Jamestown. Here the members were given information on conserving the wildlife on the farm and other natural resources. Twenty members carried wildlife conservation projects in addition to their other projects. Twenty-nine members completed their wildlife projects.

The Assistant County Agent visited 97 of the club members and their projects. Some very excellent projects were conducted by the members, especially the members who used certified seed corn.

The snapshot at the right shows Virginia Boatwright, Arvonis Club member in her garden. Her total receipts were \$30.50. Nineteen members in the county entered this project and seventeen completed with total receipts of \$361.83.

The snapshot at the left shows Charlie Boscq, Buckingham Club member in his dark tobacco crop. His total receipts amounted to \$96.00. He grew $1\frac{1}{2}$ acres of tobacco.

The snapshot to the right shows Dancy McCraw in his one acre of dark tobacco. His receipts from this acre were \$80.00. The six boys enrolled in the dark tobacco project grew nine acres and produced from this acreage 7,550 pounds which showed total receipts of \$732.00.

The snapshot at the left is Ralph Hayes with his corn grown from Certified Johnson County White seed corn. On his $1\frac{1}{2}$ acres of corn he produced 51.3 bushels. He entered and completed the Nitrate Soda Contest with eight other boys in the County. His total receipts were \$53.05. The use of nitrate of soda on the one acre increased his yield 41.3%. The total receipts for the $1\frac{1}{2}$ acres was \$53.05. Twenty-four boys carried corn as their project and twenty-three completed. Their total receipts were \$951.56.

Eleven members entered the farm account record contest. Each contestant was given instructions by the Assistant County Agent in making farm inventories and starting their records. This contest will not be completed until the 1st of March, 1937 and the result of this contest will be given in the 1937 report.

Eighteen members completed the Thomas E. Wilson Meat Animal Contest. Charlie Hall, Buckingham Club member, was the County winner.

The County Achievement Day was held Friday night, October 30th at Dillwyn High School with 110 members, parents, and friends present. A pageant, "The Quest", was staged which showed the four-fold purpose of 4-H club work. Mr. J. B. Whitehead, County Agent, Nelson County, gave the address. Four -H club pins were awarded Charlie Rosen and Virginia Stanley for the best kept record on their project. Pins were awarded to other members who won honors at the County Demonstration Day and the State Short Course. The Buckingham Club won the Club banner for the club who had done the best work during the year.

Seventy-eight club meetings were held during the year, twelve of which were held by the former Assistant County Agent. The total attendance was 2,153. The seven clubs have been organized for 1937.

MISCELLANEOUS

Home Gardens

The personal work with home gardens was very limited this year due to the press of other work. In cooperation with the State Extension Garden Specialist 175 circular garden letters were mailed every month. A number of bulletins on special vegetables and insects and diseases was distributed. In 4-H Club work garden projects

are second in importance in the county and in many cases the club members have charge of home gardens. The dry weather greatly reduced the yields and to some extent the interest in gardens this year.

POULTRY

Poultry Production

The production of turkeys for market has become an important money crop in the county for about 20 farms. With the cooperation of the State Poultry Specialist a circular letter was mailed them each month giving timely information. The commercial and home poultry flocks are either being increased materially or they will be housed much better this year if the request for poultry houses, brooder houses and range shelter plans are any guide. The demand for poultry house plans this year exceeded that of the past five years. Poultry projects rank first in 4-H Club work in the county and the training these boys and girls are getting should be of great assistance to them later. Poultry exhibits from the county at the Five County Fair made an excellent showing—winning a number of first places and placing in every class offered at the fair. The agent received requests for assistance in calling a number of flocks.

BETTER SEED

The Five County Fair Association supplies 10 4-H club members with certified corn seed this year. They all made exhibits at the fair and made a very creditable showing. This certified corn should be a good starting point for the improvement of seed corn in the county in 1937. A number of the farmers also used certified seed for different crops this year and many have improved their seed by selection and careful cleaning. All of the better farmers are treating their grain seed before planting.

PUREBRED STEERS

The agent helped producers select and purchase eight purebred rams, two purebred bulls, and a registered cow and calf.

For the past four years the agent has tried to emphasize the value of purebred sires with special emphasis on sheep. During that time the use of registered rams has more than doubled in the county and the producers have been well pleased with the results. They report that their lambs have made better gains and sold better but the fact that there ewe flock has improved so much has pleased them most.

TERRACING

Last year a terracing association was found in the county and a terracing outfit was secured on trial. The association was not able to purchase the outfit due to the fact that not enough work could be lined up to pay for it in a reasonable length of time. Many of the farmers interested in terracing were disappointed and they still hope that the county can secure an outfit. In the meantime about 60 acres of land has been terraced this year, with farm outfits and even more would have been terraced if the agent had had an opportunity to lay off more terraces. At the present time he has requests for laying off terraces on over 125 acres of land. with the help of the engineers from the county with terracing outfits we plan to get these terraces laid off this fall.

MARKETING

During the year the agents helped with two wool pools at which 1,860 pounds of wool from this county was sold for \$638.44. Besides this it is estimated that \$300.00 worth of wool from the county was sold through the Richmond pool. The Agent was able to help the producers dispose of their lambs to better advantages by furnishing them with feeding and price information. In fact a majority of the growers come to the office to get the market reports before they sell their lambs. Due to the fact that the age of the lambs was so irregular this year no lambs were graded and shipped from the county as had been the custom formerly.

The agent has been of some assistance to the Va. Dark-Fired Tobacco Association whose territory embraces this county. It is estimated that Buckingham farmers will sell \$65,000.00 worth of tobacco this year through this association. The agent was asked to help with dark tobacco grading referendum for which the farmers in the county voted 96% "Yes".

OTHER ACTIVITIES

The Five County Fair which included Buckingham County was quite a success this year in spite of an unusually dry season. The exhibits were of good quality and Buckingham exhibitors received a proportionate share of the prizes. The educational value of the fair was increased by booths and representatives of the Soil Conservation Association, Rural Resettlement Association, and the T.V.A. as well as others.

While the A.A.A. was declared unconstitutional payments under existing contracts were made amounting to approximately \$21,510.00 in this county. Completing the compliance forms for these payments required considerable of the agents time.

Requests for plans and help with farm building, water jobs, and bees during the year were received by the agent who was able to assist with many of these requests. Extension specialists also came to the county to help. Two cheese making demonstrations were given by the extension specialist at the request of the County Director of the N.Y.A. and interested farmers. These demonstrations were well attended and cheese making may become an important side line.

Other activities were seed and production credit loans, land bank loans, drought relief, red cross, cooperation with the Resettlement workers, Farm Debt Adjustment work and Rural Electrification. Electric lines have been approved for 2 additional miles of line. These extensions will make current available to about 65 homes and three churches.

OUTLOOK AND RECOMMENDATIONS FOR 1937

As a result of the drought this summer the hay and feed crops in the county were reduced about 50% with a corresponding decrease

in home gardens and a 25% or more decrease in grain^{and} tobacco yields. The farmers of the county are not in as good shape for the winter as last year, even though more livestock than usual was sold. However, prices for livestock and farm products locally were better than last year and with payments from the Agricultural Adjustment Administration on an average the farmers will have about as much money as last year but more of it will have to be spent for food, feed and supplies. The fall was unusually favorable for harvesting corn and seeding wheat. Due to the favorable weather the land seeded to wheat this fall has been increased about 5% or 10% and the wheat land was in better shape for seeding than it has been in years.

The plan of work for 1937 should include these projects that will tend to reduce the cost of production and increase the revenue from farm operations and at the same time tend to conserve and improve the soil and the farm. The Agricultural Conservation Program or a similar program should be maintained as a stimulus and means of accomplishing this goal. Such a program might also include some control and insurance features. The County Agricultural Committee in outlining the 1937 program should work out a program to secure close cooperation of all State and Federal Agencies to secure the best farming conditions possible in the county and one that will improve the standard of living of all classes in the county.

COMBINED ANNUAL REPORT OF COUNTY EXTENSION WORKERS

This report form is for use by county extension agents in making a combined statistical report on all extension work done in the county during the year. Agents resigning during the year should make out this report before quitting the service.

Approved: _____

Date _____

SUGGESTIONS RELATIVE TO THE PREPARATION OF THE COUNTY EXTENSION AGENT'S ANNUAL REPORT

The annual report should be a summary, with analysis and interpretations, for presentation to the people of the county, the State, and the Nation of the extension activities in each county for the year, and the results obtained by the county extension agents assisted by the subject-matter specialists. The making of such a report is of great value to the county extension agents and the people of the county in showing the progress made during the year as a basis for future plans. It is of vital concern also to the State and Nation as a measure of rural progress and a basis for intelligent legislation and financial support of extension work.

At least four copies of the annual report should be made: One copy for the county officials, one copy for the agent's files, one copy for the State extension office, and one copy for the Extension Service, United States Department of Agriculture. *The report to the Washington office should be sent through the State extension office.*

STATISTICAL SUMMARY

Where two or more agents are employed in a county they should submit a single statistical report showing the combined activities and accomplishments of all county extension agents employed in the county during the year. Results obtained through assistance rendered agents by specialists should also be included. This report shows, insofar as possible, the part each agent has taken in forwarding the extension program. The county totals should be the sum of the activities and accomplishments of individual agents *minus duplications due to two or more agents participating in the same activity or accomplishment.* The county totals, when properly recorded, show the progress made in the county during the year in forwarding the entire extension program. Negro men and women agents should prepare a combined statistical report separate from that of the white agents.

The statistical summary should be a report of this year's activities and results that can be verified by records on file in the county office. Where records are not available careful estimates are desired. Such estimates should be marked "Est."

NARRATIVE SUMMARY

A separate narrative report is desired from the leader of each line of work, such as county agricultural agent, home demonstration agent, boys' and girls' club agent, and Negro agent. Where an assistant agent has been employed during a part or all of the year, the report of his or her work should be included with the report of the leader of that line of work. Where an agent in charge of a line of work has quit the service during the year, the information contained in his or her report should be incorporated in the annual report of the agent on duty at the close of the report year, and the latter report so marked.

The narrative report should summarize and interpret, under appropriate subheadings, the outstanding results accomplished and the extension methods used for each project. Every statement should be clear, concise, forceful, and, where possible, reinforced with necessary data from the statistical summary. Use a descriptive style of writing, giving major accomplishments first under each project. Give extension methods fully relating to outstanding results only, and where practicable illustrate with photographs, maps, diagrams, blueprints, or copies of charts and other forms used. Full credit should be given to all cooperating agencies. The lines should be single-spaced, with double space between the paragraphs and reasonably good margins. The pages should be numbered in consecutive order.

The following outline is merely suggestive of how the narrative report may be clearly and systematically presented. Each agent should prepare an outline to fit the situation and the work to be reported.

SUGGESTIVE OUTLINE OF ANNUAL NARRATIVE REPORT

- I. Cover and title page.
- II. Table of contents.
- III. Summary of activities and accomplishments, preferably of one or two typewritten pages only, placed at the beginning of the narrative report.
- IV. Changes in county extension organization.
 - (1) Form.
 - (2) General policies.
 - (3) Procedure.
- V. County program of work.
 - (1) Factors considered and methods used in determining program of work.
 - (2) Project activities and results.

Under appropriate headings and subheadings present in some detail for each major project or line of work the goals set up, the methods used, the results achieved, and the significance of these results in terms of improved farms and homes and of better community life.
- VI. Outlook and recommendations, including suggestive program of work for next year.

TERMINOLOGY

To insure reports which convey the intended meaning to others and to facilitate the compilation of satisfactory national statistics on extension, it is extremely important that terms be used in accordance with accepted definitions. The following definitions of extension terms have been approved by the United States Department of Agriculture and the Association of Land Grant Colleges and Universities. Agents should read these definitions before starting to write the annual reports.

DEFINITIONS OF EXTENSION TERMS

1. A program of work is a statement of the specific projects to be undertaken by the extension agents during a year or a period of years.
2. A plan of work is a definite outline of procedure for carrying out the different phases of the program of work. Such a plan provides specifically for the means to be used and the methods of using them. It also shows what, how much, when, and where the work is to be done.
3. A community is a more or less well-defined group of rural people with common interests and problems. Such a group may include those within a township, trade area, or similar limits. For the purpose of this report a community is one of the several units into which a county is divided for conducting organized extension work.
4. A project leader, local leader, or committeeman is a person who, because of special interest and fitness, is selected to serve as a leader in advancing some phase of the local extension program. A project leader may be either an organization or a subject-matter leader.
5. Demonstrations as contemplated in this report are of two kinds—method demonstrations and result demonstrations. A method demonstration is a demonstration given by an extension worker or other trained leader for the purpose of showing how to carry out a practice. Examples: Demonstrations of how to can fruits and vegetables, mix spray materials, and cull poultry. A result demonstration is a demonstration conducted by a farmer, home maker, boy, or girl under the direct supervision of the extension worker, to show locally the value of a recommended practice. Such a demonstration involves a substantial period of time and records of results and comparisons, and is designed to teach others in addition to the person conducting the demonstration. Examples: Demonstrating that the application of fertilizer to cotton will result in more profitable yields, that underweight of certain exhibitors can be corrected through proper diet, that the use of certified seed in growing potatoes is a good investment, or that a large farm business results in a more efficient use of labor. The adoption of a farm or home practice resulting from a demonstration or other teaching activity employed by the extension worker as a means of teaching is not in itself a demonstration.
6. A result demonstrator is an adult, a boy, or a girl who conducts a result demonstration as defined above.
7. A cooperator is a farmer or home maker who agrees to adopt certain recommended practices upon the solicitation of an extension worker. The work is not directly supervised by the extension agent and records are not required, but reports on the success of the practices may be obtained.
8. A 4-H Club is an organized group of boys and/or girls with the objectives of demonstrating improved practices in agriculture or home economics, and of providing desirable training for the members.
9. 4-H Club members enrolling are those boys and girls who actually start the work outlined for the year.
10. 4-H Club members completing are those boys and girls who satisfactorily finish the work outlined for the year.
11. A demonstration meeting is a meeting held to give a method demonstration or to start, inspect, or further a result demonstration.
12. A leader-training meeting is a meeting at which project leaders, local leaders, or committeemen are trained to carry on extension activities in their respective communities.
13. An office call is a call in person by an individual or a group seeking agricultural or home-economics information, as a result of which some definite assistance or information is given. A telephone call differs from an office call in that the assistance or information is given or received by means of the telephone. Telephone calls may be either incoming or outgoing.
14. A farm or home visit is a call by the agent at a farm or home at which some definite information relating to extension work is given or obtained.
15. Days in office should include time spent by the county extension agent in the office, at annual and other extension conferences, and on any other work directly related to office administration.
16. Days in field should include all days spent on official duty other than "days in office."
17. Letters written should include all original letters on official business. (Duplicated letters should not be included.)
18. An extension school is a school usually of 2 to 6 days' duration, arranged by the Extension Service, where practical instruction is given to persons not resident at the college. An extension short course differs from an extension school in that it is usually held at the college or another educational institution and usually for a longer period of time.
19. Records consist of definite information on file in the county office that will enable the agent to verify the data on extension work included in this report.
20. The county extension association or committee is that county organization, whether a membership or a delegate body, which is recognized officially in the conduct of extension work in the county.

GENERAL ACTIVITIES

Report Only This Year's Extension Activities and Results That Can Be Verified

1. List below the names, titles, and periods of service of the county extension agents whose work is included in this report. Include time of assistants with that of regular agent.

AGENT		Total months of service this year (c)	Days devoted to agr'l conservation and adjustment programs (b)	Days devoted to relief work (e)	Total days in office (d)	Total days in field (f)
(Name) Home demonstration agent	} (1)					
Asst. home demonstration agent						
4-H Club agent	} (2)					
Assistant 4-H Club agent						
R. S. Ellis Agricultural agent	} (3)	12	185	5	134	165
A. G. Birdsall Assistant agricultural agent		12			7	61
J. B. Farrar (1/2 time)						

2. County extension association or committee:

(a) Agricultural extension:

(1) Name County Agricultural Committee (2) Number of members 24

(b) Home demonstration:

(1) Name _____ (2) Number of members _____

(c) 4-H Club:

(1) Name _____ (2) Number of members _____

3. Number of communities in county where extension work should be conducted 9

4. Number of above communities in which the extension program has been planned cooperatively by extension agents and local committees 8

5. Number of different voluntary county or community project leaders or committeemen actively engaged in forwarding the extension program:

(a) Adult work { (1) Men 50 (2) Women 10 } (b) 4-H Club work { (1) Men 1 (2) Women 6 } (3) Older club boys 1 (4) Older club girls 1 } 5

6. Number of different paid local leaders engaged in agricultural-conservation and adjustment programs { (a) Men _____ (b) Women _____ } 6

7. Number of clubs or other groups organized to carry on adult home demonstration work _____ 7

8. Number of members in such clubs or groups _____ 8

ITEM	Home demonstration agents (a)	4-H Club agents (b)	Agricultural agents (c)	County total (d)
9. Number of 4-H Clubs		7		7
10. Number of different 4-H Club members enrolled { (1) Boys ¹ _____ (2) Girls ¹ _____ }		81		81
		68		68
11. Number of different 4-H Club members completing { (1) Boys ¹ _____ (2) Girls ¹ _____ }		75		75
		64		64

12. Number of different members enrolled in 4-H Club work for:

MEMBERS	1st year	2d year	3d year	4th year	5th year	6th year and over
(a) Boys <u>81</u>	28	22	15	5	8	5
(b) Girls <u>68</u>	27	20	11	6	4	

¹ County total should equal sum of preceding three columns minus duplications due to two or more agents participating in the same activity or accomplishment.

² Report the total number of different boys or girls enrolled in club work. This total should equal the sum of the project enrollments reported on page 7 to 10, minus duplications due to the same boy or girl carrying on two or more subject-matter lines of work.

³ Same as footnote 2 but refers to completions instead of enrollments.

⁴ The total for this question should agree with county total, question 10.

		(b) Total attendance		2153	306	2459

SUMMARY OF EXTENSION INFLUENCE FOR YEAR

It is highly desirable for extension workers to consider the proportion of farms and farm homes in the county which have been definitely influenced to make some substantial change in farm or home operations as a result of the extension program for men, women, boys, and girls. It is recognized that this information is very difficult for agents to report accurately, so a conservative estimate based upon such records, surveys, and other sources of information as are available will be satisfactory. Such estimates should be marked "Est."

(Include results of emergency activities as well as the regular extension program.)

35. Number of farms in county	2,398	35
36. Number of farms on which changes in practices have definitely resulted from the agricultural extension program	70	36
37. Number of farm homes in which changes in practices have definitely resulted from the home demonstration program	0	37
38. Number of other homes in which changes in practices have definitely resulted from the home demonstration program	0	38
39. Number of farm homes with 4-H Club members enrolled	128	39
40. Number of other homes with 4-H Club members enrolled	21	40
41. Total number of different farm families influenced by some phase of the extension program (Include questions 35, 37, and 39, minus duplications.)	750	41
42. Total number of different other families influenced by some phase of extension program (Include questions 38 and 40, minus duplications.)	21	42

County total should equal sum of preceding these columns minus duplications due to two or more agents participating in the same activity or same place.

Note.—Questions 18-34 refer to the total number of different activities conducted this year. The totals should equal the sums of the corresponding information reported on following pages minus duplications where the same activity relates to two or more lines of work.
