REPORT OF WORK OF THE COUNTY AGENT

Due November 30, 1922

State Va. County Charlotte

Report of J. F. Wilson County Agent

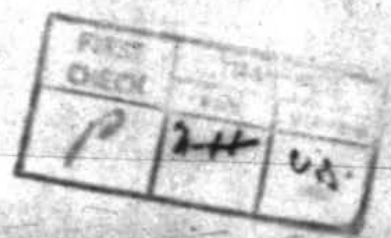
From December 1, 1921 to November 30, 1922

Approved:

State Agent

Date Forwarded

Director of Extension Work



17-SRS

ANNUAL REPORT FORM AND INSTRUCTIONS TO AGENTS

The agent's annual report should be a complete summary of all the work performed during the year. This is the only record that the officials of the Extension Division of the State and the Department have of the agent's activities.

The only means of making such a report is to keep field notes or a field diary of everything that is done each day. It is well to not only keep notes of things actually done, but to make some brief observations of general conditions as found from time to time. Many things which seem of minor importance to the agent may be very valuable to the head offices when asked for detailed information regarding certain localities.

An agent's efficiency and the success of his work is necessarily judged from this office by what is contained in his report. Your district and State agent may know that you are rendering efficient service, but it is absolutely essential to have something on record to show that the work has been done, when outside parties who can not possibly inspect your work desire definite and accurate information in regard to the results that are being accomplished in local territory.

Every agent in the work has been instructed, by circular letter and by the supervising force at agents' meetings, as to the importance of keeping systematic records throughout the year. If this advice has been followed you should have no difficulty in rendering your annual report upon the forms which are herewith attached. These are broad enough to include the activities of the agents in the entire territory covered by the Extension Work in the South. Some of the questions will not apply to your local territory, and these, of course, need not be answered.

In some instances you will observe that the same form is used for several crops. Be sure to use separate sheets for each crop named under the heading. For example, take the sheet headed "Small Grains", under which are included oats, wheat, barley, and rye. In this case all the demonstrations in oats should be included on one sheet, all the demonstrations in rye on another, and so on for all the crops included under this heading.

Be sure to answer the questions in the order in which they are asked, and see that you give the information called for. If this is done, all the reports will be uniform when they are sent in to the State agent's office, and in like manner the State agent's reports will be uniform when sent to the Director's office in the State and then to the Washington Office.

It should be distinctly understood that these forms are only to summarize the statistical part of the report.

A separate narrative report should accompany this statistical summary.

In collecting the replies to the questions of a personal nature, the agent will have to depend on his tact and good judgment in approaching the farmer. A few, no doubt, will be averse to furnishing you with some of the information asked for, but if reliable data could be collected with reference to these points, it would enable the Department to get a rather definite idea as to the beneficial effects of the demonstration work in your section.

The forms that we are sending out include the following crops, groups of crops, and other miscellaneous work of the county agent:

C R O P S:

Corn
Cotton
Tobacco
Small grain
Hay and forage
Cover crops
Summer legumes
Potatoes (Irish and Sweet)
Truck crops and gardens
Sugar cane
Orchards

LIVE STOCK:

Horses
Dairy cattle
Beef cattle
Hogs
Sheep and goats
Poultry
Live stock diseases and pests

OTHER WORK:

Fertilizers
Farm manures
Silos
Dipping vats
Seed selection
Lime
Rotations
Pastures
Organizations
Farm buildings
Drainage
Farm machinery and tools
Clearing land, stumps, etc.
Timber and wood lots
Miscellaneous demonstration work
Effect of demonstration work on community, and human interest features
Successful undertakings
Work with negroes
Boys' club work

If there is anything in any of these forms that is not thoroughly understood discuss the matter with your district or State agent or write to this office for a more specific explanation.

MAP OF COUNTY

SHOWING KIND AND DISTRIBUTION OF WORK

The following sheet is to be used for an outline map of your county, to show the kinds and distribution of your work. Maps larger in size than this sheet may be used if desired. In some states, suitable maps, showing topography, railroads, rivers, election districts, etc., are obtainable from the Office of the State Geological Survey. It is suggested that a copy of the map furnished with your report be kept for your own office record, unless you already have one answering the same purpose.

The map is intended to show the approximate location of your various demonstrations, community clubs, boys' clubs, etc., each kind of demonstration club, or other activity to be indicated by the same sign or mark, so that a glance at the map will give a general impression of the nature and extent of the work. Be sure to enter at some convenient place along the margin of the map sheet a key or explanation to the various marks. For example, some such set of marks and key as the following might be used:

 community organizations;  corn;  cotton;

 tobacco;  wheat;  oats;  hay;

 legumes;  potatoes;  orchards;  livestock;

 poultry;  silo;  boys' clubs; cr cream routes, etc.

Additional signs may be used for other lines of work. The use of colored pencils for these signs, using one color for all the work of the same kind, makes such a map very effective. If further suggestions are desired in this connection write direct to this office. It is believed that a large outline map of the county, showing the kind and the location of the work, could be displayed to advantage in every county agent's office.

MAP OF COUNTY

SHOWING KIND AND DISTRIBUTION OF WORK

COUNTY ORGANIZATIONS

1. Is there a central county committee supporting your work? Yes.
2. If so, what is it called? Advisory Board.
3. Who constitute its membership? Delegates from each Community Club.
4. How is membership selected or appointed? Selected.
5. Does this committee help you make a county plan of work? Yes.

How long has this county organization been in existence? 6 years.

6. Number of communities in your county 13
7. How many community farmers' clubs have you assisted in organizing this year? —
   Total membership —
8. How many community farmers' clubs have you in your county? 12
   Total membership 210
9. How many community farmers' clubs have ceased to exist during the year? —
   (Give reason)
10. How many of these clubs are organized so as to include the farmer's wife, children, and others, in their membership? 12

Space for agent's stamp

COUNTY ORGANIZATIONS (Continued)

11. How have these clubs been helpful to the farmer and his family? (Use extra pages if necessary)

By meeting in these clubs farmers get the cooperative spirit and it also creates a friendly rivalry among themselves. Hence buying and selling is often practiced through these meetings.

12. Are these community farmers' clubs dependent on the county agent for their existence and the continuation of their efforts? Largely Yes

13. Does each club have a community plan or program of work? (Attach a copy of such plans for the past year) Yes

Space for agent's stamp

COOPERATIVE BUYING AND SELLING ORGANIZATIONS

1. How many of your farmers' organizations buy and sell cooperatively? 2

2. State the quantity and value of each farm necessity or product bought or sold cooperatively by these organizations and the approximate saving to the farmer. Make a separate list of purchases and likewise one for sales, and indicate which are purchases and which sales. Report all livestock in carload lots, keeping the different kinds of livestock separate, for example, ____ cars cattle; ____ cars hogs, etc. Report all grains and potatoes in bushels and carloads, making a separate report on each kind of grain, i.e., 10 carloads, or 8000 bushels of corn. Report all seed in bushels, all fertilizer and lime in tons, and wool in pounds. In the column headed "value", report the amount at which the commodity was actually sold, or for which it was bought. If more commodities have been bought or sold than can be listed on this form, use an additional sheet. A full report on this subject is urged.

Article	Quantity: Cars	Quantity: Bu., lbs. or tons	Value	Saving
*Bought				
Fertilizer	1	18	$404.00	$75.00
Seed		25	47.00	8.75
			451	83
*Sold				

3. Have you attempted to keep a bulletin board in your office, listing things for sale and things wanted?

Yes.

4. Have you used the market news service of the U. S. Department of Agriculture or your State market news service?

Yes.

23.	Number of communities in which corn demonstrations were conducted	12

Dems. select their seed corn in the field and each year get better yields, in most cases this crop is worked with flat cultivation.

The corn crop is good this year. Ten (10) dems. made corn enough to carry them and some to sell.

Forty (40) farmers made corn enough to carry them + some to sell.

One hundred (100) farmers made enough to carry them through the season.

Five hundred (500) made enough to carry them 6 months.

Dem H. C. Johns. Charlotte C.H. 1853, has a a 3 acre plat which will yield from 60 to 70 bushels per acre. This corn is bred up well, and will average up as well as any corn I ever saw.

9. How many farmers treated tobacco seed for disease? _____
10. How many acres did this treated seed plant? _____
11. On how many farms have you introduced the growing of tobacco or improved cultural methods? _____
12. Number of communities in which tobacco demonstrations were conducted _____

We have no demonstrators in tobacco this year, but we have been instructing the farmers about raising this crop, and also giving them information regarding the cooperative Marketing Assc.

This problem has had the farmers attention this year more than any other one thing, and we are urging them to be loyal to the organization; I am glad to say that most farmers are pleased with its working.

22.	Number of communities in which demonstrations were conducted	5

Wheat crops were not as good as was expected; The yield of straw was heavy but grain far below expectation; The shortage is laid to the wind storms which were frequent when the wheat was in bloom. Still some of our farmers made good crops,

Wm. N. C. Johns, Charlotte C.H. R.D. 3. Threshed 150 bushels

Wm. Joe Wood Cullen, R.D. 2 Threshed 200 bushels.

Seventy five (75) farmers made wheat enough and some to sell,

Two hundred (200) made enough to carry them a year.

Four hundred (400) made enough to carry them 6 months.

19.	Number of communities in which demonstrations were conducted	4

We have 4 dems in clover hay and 4 in mixed hay. The yields from both of these crops were poor this year, the average yield 3/4 tons. but with a good crop of soy bean and cowpea hay, to supplement the mixed hay + clover crops, - the farmers are safe for their winter roughage.

Ten (10) farmers made feed enough and some to sell.

One hundred (100) made enough to carry them one year.

Four hundred made enough to carry them 6 months.

26.	On how many farms have you introduced the growing of summer legumes or improved cultural methods?	40
27.	Number of communities in which demonstrations were conducted	6

The Soy bean hay crop was good in my county this year.

Farmers become more attached to it each year for hay. More acres were raised in this county this year than has been since the demonstration work began.

This crop will greatly supplement the clover + mixed hay crop which was cut by mildew + cool weather last spring.

15. Number of poultry houses remodeled at your suggestion —
16. Report on reverse side of this sheet any work done on poultry diseases.
17. Number of communities in which poultry demonstrations were conducted 6

Farmers of this county have greatly improved their methods of raising poultry in the last year.

Pure bred cockerls & pure bred eggs severes purchased by nine persons, one farmer purchased 12 pure bred chicks & raised 9. 3 cockerls & 6 pullets. He sold 2 of these cocerls and kept 1. also kept the pullets. He has lumber on the yard to build a modern poultry house.

We held 2 culling demonstrations, had 8 birds in one, & 5 in another.

We reccommend black draught for sick birds, one farmer who had stupid hens that would not eat & sat around like she had cholera. he gave her a good dose of the above named remedy & in a day or two she was alright.

We reccommend creoline, & kerosine for mites & blue ointment for lice, and gave a demonstration showing how to kill them.

SPECIAL REPORT BY WHITE AGENTS ON WORK WITH

NEGRO FARMERS

NOTE:- The data reported on this and following page must be included in your report on all work done. Negro agents need not report on these sheets.

1. Number of negro demonstrators (all crops) _____

2. Number of negro demonstrators reporting (all crops) _____

3. Total acreage of all crops grown under improved methods on negro demonstration farms _____

4. Number of negro cooperators (all crops) _____

5. Total acreage of all crops of negro cooperators _____

6. Number of negro farmers who planted pure or selected seed on their demonstrations _____

7. Number of negro farmers you have influenced to select seed for next year's crop _____

8. Estimated quantity of all seed selected by negro farmers (bushels) _____

9. Name the principal crops grown under demonstration methods by negro demonstrators and cooperators _____

10. Number of pure-bred animals bought by negro farmers at your suggestion - - -
(Horses - - - - - - - - - _____
(Beef cattle - - - - - - _____
(Sheep and goats - - - - _____
(Dairy cattle - - - - - - _____
(Hogs - - - - - - - - - _____
(Poultry - - - - - - - - _____

11. Number of negro farmers who have produced practically all their home food and feed due to your influence _____

12. Number of negro agricultural clubs or community organizations formed this year for the general improvement of rural conditions _____

13. Number of members _____

SUCCESSFUL UNDERTAKINGS

Each county agent will be expected to report three (3) important pieces of extension work attempted and successfully accomplished by him during the year. Details of your plan, method of procedure, and results, together with any other interesting facts and observations concerning each piece of work, should be included.

This sheet and as many additional sheets as are necessary should be used for this purpose.

1st We succeeded in getting two communities interested in our Co fair, These communities contributed financially & morally this year.

2nd We succeeded in getting most of the farmers who were fighting the Tobacco Growers Coop. to become friendly toward it, about 30% of the Negro farmers were not inclined to sign the contract but we visited their meetings, spoke in their locals and urged the importance of organization, and through these efforts we succeeded in getting 85% of the negro farmers signed up. Charlotte Co. has the banner,—having 95% "sign up" of both white & negro farmers.

We had in our plan to get the farmers more interested in poultry this year, we got 6 farmers to improve their poultry houses + raise a better breed of poultry. They are also feeding for winter eggs. We have builded 4 of the poultry houses planned + hope to build more this fall + winter - after the farmers are through seeding their winter crops.

A farmer said to me a few days ago, that it looks as tho' every farmer will have pure bred chickens in another year.

BOYS' CLUB WORK

Furnish at least three human interest stories, with pictures if possible. Use separate sheet if necessary.

Also furnish the name and address of the club member in each crop or animal demonstration who made the best record for the year, and a statement of the record to include, variety of seed planted, yield per acre, cost, net profit, value of prizes won, and for livestock the number of animals involved, original and final values of the same, net profit, and value of prizes won.

John Johns, Charlotte R.D.3. grew a plat of excellent corn this year. This plat will yield 65 bushels per acre.

This club boy won first prize on white corn at the State Fair in Richmond this year and also won sweepstakes, the value of these prizes is $10.00

The judges said that this corn was better than any that had been exhibited since the Negro boys have been exhibiting at the State Fair.

We organized 2 "Farm Makers' clubs" this year
