

Make IT Work: Collaborating with IT to Create Sustainable Preservation Systems

...

Alex Kinnaman, Luke Menzies, Shira Peltzman, Mary Leverance,
Elena Colón-Marrero
October 18th, 2018
#r1a

Panelists

Alex Kinnaman
Virginia Tech
alexk93@vt.edu

Luke Menzies
Virginia Tech
limen@vt.edu

Shira Peltzman
UCLA
speltzman@library.ucla.edu

Mary Leverance
University of Arkansas
mleveran@uark.edu

Elena Colón-Marrero
Computer History Museum ecolon-marrero@computerhistory.org

Panel Overview & Goals

To discuss and provide practical strategies for the challenges surrounding IT collaboration, including:

- Translation
- Advocacy and outreach
- Time, resources, and responsibility
- Compromise
- Hardware & software

Virginia Tech University Libraries

- Located in Blacksburg, VA
- Approx. 91 faculty
- Large IT unit for entire Library
- 5 major repositories
- Administrative support for digital preservation
- Preservation technologies chosen before our hiring

VTUL Technologies

Managed Externally

ACADEMIC
PRESERVATION TRUST

Managed by University IT

Managed by Library IT

VTUL Challenge: Lost in Translation

How do we communicate our vision and needs to IT
and

How do we understand their vision and needs?

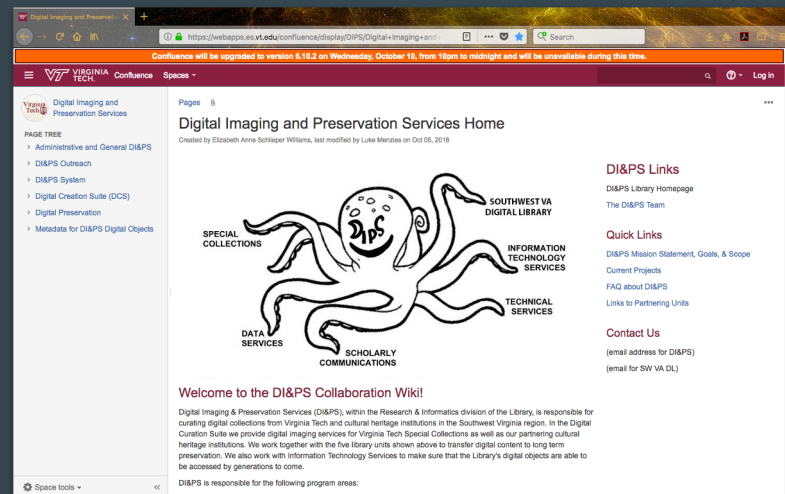

VTUL Challenge: Translation

- Terminological & conceptual barriers
- Competition with other units for IT equipment and services
- Need to establish preservation as a top priority
- 'Getting things done' and 'making things happen' closely tied with the organizational hierarchy and the authority of persons or units

VTUL Translation Strategies

- Conduct extensive research
- Centralize & unify documentation
- Make policy explicit
- Meet face-to-face
- Unify the message (DI&PS 'branding')

VTUL: Tips for Building Bridges with IT

- Unify the message
- Be prepared to advocate for your work
- Know your own terminology, and be able to translate it to IT
- Keep in mind that there are external factors at play
- Compromise!

UCLA Library

- Collaborating with DIIT to implement **archivematica**®
- a study in contrasts
 - 2016-17
 - 2017-

UCLA Library Special Collections

- Located in sunny L.A., CA
- LSC includes: Center for Oral History and Research, Biomedical Library, and UCLA's University Archives
- Approx 33 LTEs

UCLA Library

UCLA LSC Digital Archives Program

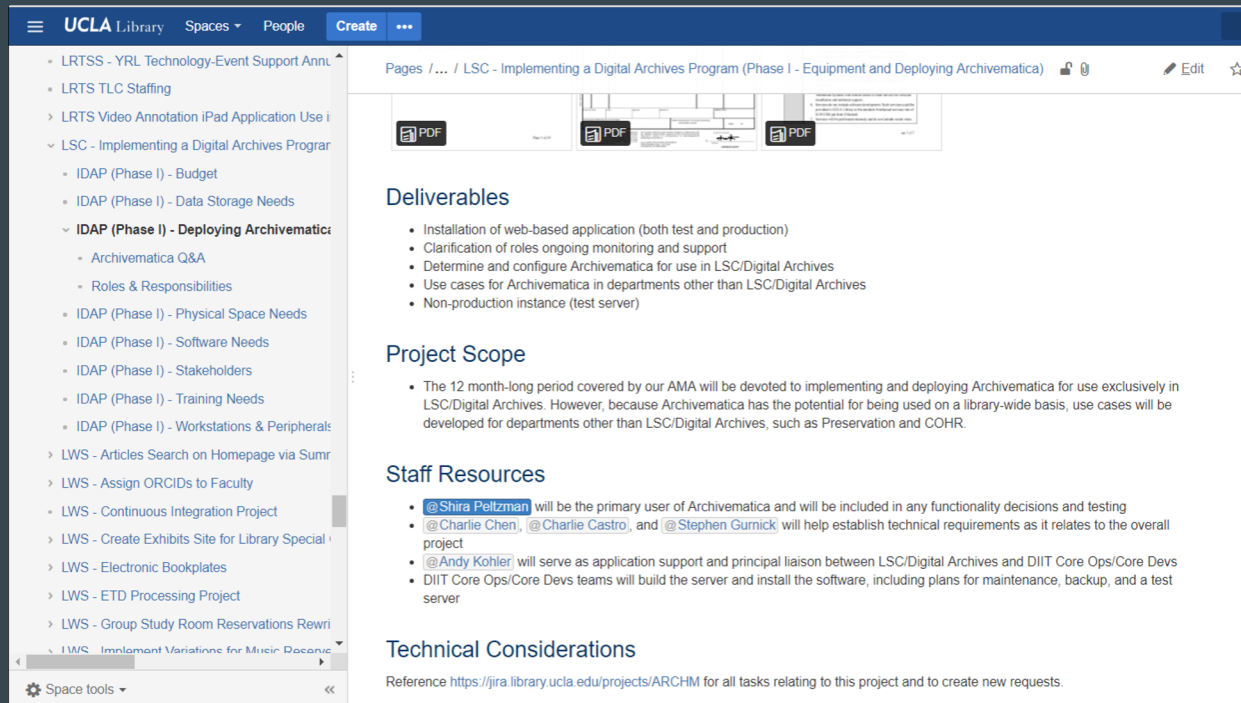

- LSC's Digital Archives Program, 2015-
- Proposal for funding
 - Submitted Feb 2016
 - Approved* Feb 2016

UCLA Library

UCLA Library: Archivematica (2016-17)

The screenshot shows a Jira page titled "UCLA Library" with a sidebar on the left containing a list of project items. The main content area displays the details for the issue "LSC - Implementing a Digital Archives Program (Phase I - Equipment and Deploying Archivematica)".

Deliverables

- Installation of web-based application (both test and production)
- Clarification of roles ongoing monitoring and support
- Determine and configure Archivematica for use in LSC/Digital Archives
- Use cases for Archivematica in departments other than LSC/Digital Archives
- Non-production instance (test server)

Project Scope

- The 12 month-long period covered by our AMA will be devoted to implementing and deploying Archivematica for use exclusively in LSC/Digital Archives. However, because Archivematica has the potential for being used on a library-wide basis, use cases will be developed for departments other than LSC/Digital Archives, such as Preservation and COHR.

Staff Resources

- @Shira Peltzman will be the primary user of Archivematica and will be included in any functionality decisions and testing
- @Charlie Chen, @Charlie Castro, and @Stephen Gurnick will help establish technical requirements as it relates to the overall project
- @Andy Kohler will serve as application support and principal liaison between LSC/Digital Archives and DIIT Core Ops/Core Devs
- DIIT Core Ops/Core Devs teams will build the server and install the software, including plans for maintenance, backup, and a test server

Technical Considerations

Reference <https://jira.library.ucla.edu/projects/ARCHIM> for all tasks relating to this project and to create new requests.

UCLA Digital Initiatives and I.T. (DIIT)

- Partners with units in other areas of the library to
- Centrally supports much of the software used in LSC's digital archives program
 - ePADD, KryoFlux, FTK, BitCurator, etc.
- Approx 40 LTEs
- They have a lot (!) on their plates

Archivemata roles & responsibilities

DIIT DEV OPS

- Archivemata storage management
- Software management for patches and upgrades
- Oversight for interaction with other tools
- Manage general software support issues

LSC DIGITAL ARCHIVES

- Create and manage user accounts
- Create and manage pipelines
- Respond to user needs offer solutions to issues as they arise
- Train others in department
- Serve as designated coordinator between departments

UCLA Library Challenges

1. Project required a significant commitment of resources and time from DIIT
2. Application is complex; supporting it requires a degree of expertise
3. DIIT had no background in archives or digital preservation

UCLA Library: Solutions

- Regular coffee meetings with a key DIIT collaborator
 - This helped me better understand DIIT (and vice versa)
 - It also led to a closer and more productive partnership between LSC and DIIT

Edson Smith
DIIT, UCLA Library

UCLA Library: Strategies

- 2nd AMA began fall 2017
- Project was re-scaled and re-scoped
- The burden of application support shifted from DIIT to Artefactual

Archivematica deliverables

DIIT DEV OPS

- Provide a hosting environment
- Perform load testing
- Provide documentation

ARTEFACTUAL

- Deploy Archivematica
- Deliver MySQL and SQLite backups on the VMs (Production and Test)
- Upgrade settings on the new servers (UCLA DIIT can review for policy adherence if required.)
- Provide relevant training

UCLA Library: Outcome

**Santhosh
Kundukulangara**
DIIT Project Manager,
UCLA Library

Archivematica Implementation Project

Created by Santhosh David, last modified on May 21, 2018

| | | | | | |
|------------------|---|--|-------------------|--------|--------------------|
| Description | Provide a hosting environment into which Artefactual can deploy an Archivematica instance | | | | |
| Requestor | @Shira Peltzman | | | | |
| Cabinet Sponsor | @Sharon Farb @Todd Grappone | | | | |
| Project Manager | @Santhosh David | | | | |
| Project Health | Condition | Status Description | | | |
| | On Target | Archivematica 1.7 implemented successfully. Project Officially closed. Docs moved to DIIT Project Archives | | | |
| Status and Dates | Project Priority | Planned Due Date | Original Due Date | Phase | Project Completion |
| | High | Oct 05, 2018 | Jun 29, 2018 | Closed | 100% |
| JIRA Link | DITPP-214 - Archivematica Implementation Project CLOSED | | | | |

UCLA Library: Tips

- Make connections
- Understand how decisions are made
- Help colleagues understand how this work will benefit them or make their jobs better/easier/faster
- Advocacy and outreach are everything
- Accept that change will not happen overnight

Shout out and thanks to my team!

- Santhosh Kundukulangara
- Charlie Chen
- Stephen Gurnick
- Edson Smith
- Josh Gomez
- Jasmine Jones

Univ. of Arkansas Libraries & CAST

- Libraries
 - 2 IT workers / 160+ workers
 - No digital preservation staff
- CAST
 - 1 IT worker / 14 research staff
 - Preserve data per grant req.

U of A: Challenges

Libraries

1. So, what /S digi pres?
2. “Wandered lonely as a cloud” storage
3. New leadership
4. The great unknown

CAST

1. So, what /S digi pres?
2. Files: size and type
3. ~~\$\$\$\$\$~~ / no system

U of A: Strategies

Libraries

1. Keep interest levels elevated
2. Continued education
3. New position

CAST

1. Terminology
2. NSF requirements
3. Open access repository options

U of A: Tips

1. Know your role
2. Value institutional knowledge
3. But... what works now and going forward?
4. Hands-on experience with YOUR system

Computer History Museum

- Located in Mountain View, CA.
- Archive is off site in Fremont, CA .
- Approximately 70 person staff.
- IT Department of 5 for whole museum.
- Budget: Small.

CHM: Challenges

Goal: Build two digital workstations to image software and process other born-digital materials.

Obstacles:

- 1) Not a Priority
- 2) Avoiding being short-changed

CHM: Tips

1. Consistent follow ups.
2. Set your goals higher.
3. You will HAVE to compromise
4. Pick your battles.

Guided Discussion and Q&A

What would you say is your greatest success in applying particular strategies or techniques to dealing with IT? Your biggest blooper?

Is there an aspect of your project/case study that was unexpected or surprising?

What resources did you find to be helpful in overcoming barriers (e.g. books or articles, websites, tools, people, departments, etc.)?

What tools or strategies can you recommend, based on your experience?
