NEGRO
COUNTY AGENT ANNUAL REPORT

FORWARD

The year 1940 has been in many respects quite successful and interesting to the farmers of Mecklenburg County. With the passing of 1939 free for all fight, as it is sometime termed; The farmers planted all the tobacco they wanted and harvested a large inferior crop netted them a very small profit, so much so they were willing and did vote a Syr. control. This year they have a much smaller crop and a better quality. I have heard several farmers say: they were sorry they did not plant within their allotment in 1939 since the 1940 year was more successful.

We had the greatest flood in our County this year that has been in over 60 yrs. much of the crop on the low lands was destroyed; with this exception the farmers in Mecklenburg Co. are harvesting the largest hay and corn crops for many years passed.

The tobacco markets will close this year before the Christmas Holydays for the first time in its history. The farmers as a whole will go into winter with a plenty of food and feed, but very little cash with which to begin another year.

N . D . Morse, Local Farm Demonstration Agent.

1. County Advisory Board

The County Advisory Board is an organization established for the purpose of assisting the Extension Service to best perfect plans for the development of our County and the farmers as a whole become more self sustaining.

This organization is composed of representatives from the several communities in which we have organized clubs, outstanding farmers from other communities, business men, Ministers of the Gospel, teachers, school supervisors, thus cooperating with all public workers in the County.

(a) This organization assisted in securing a good delegation from the County to attend the State Farmers' Conference held at Va. State College, (b) It sponsored a County Farm Tour, (c) It represented in the State Advisory Board with its full quota, (d) It assisted with the holding of one of the most successful exhibits ever held in our County, (e) It is now cooperating with the Unified Program Planning for the County as directed from V.P.I.

2. Community Clubs

There are ten organized clubs in the County, these clubs meet monthly for the purpose of discussing their community problems, needs, ways and means of meeting these needs, they maintain membership on the County Advisory Board, they sponsor community projects: Vln' Gardens, corn hay, pigs etc. They also assist with the 4 H club work.

Mt. Ararat this year held a corn exhibit at their November meeting and discussed their seed corn problems for 1941, after many helpful discussions and suggestions, they served one of their usual repasses of which everyone took part and enjoyed.

The Bracey community club held a winter garden exhibit at their last meeting, showing each other what he had in the way of winter greens.

3. Other Groups.

(A) County Fair.

The Negro Exhibit is held annually in connection and co-operation with the County Fair Association held at Chase City,

The Negroes have a separate building in which they display their products and the Fair Association pay the premium. This year it was said by the judges and spectators that our exhibits maintained a high standard of quality which indicated a high production and careful selection. We have always striven to make our exhibits educational rather than the premium value, I feel we have not failed in this effort as we see the increase production and better knowledge in selecting quality products.

(B) County Tour.

This year as in former years we held our County Tour, traveling over some part of the County, visiting some farms and homes never visited before by the County Tour. It was a pleasant and an enjoyable day. We saw corn, lespedeza and pasture demonstrations; also Soil Building practices and Home Improvements. At the end of the Tour we had a picnic dinner, We had short talks from the farmers, a summing up of what was seen on the Tour and an address by the Chairman of the Soil Conservation Committee of the County.

11. Live-at-Home Program

1. Food for the Family

(A) Gardens

The home garden is being expressed more and more in the sense of a year round garden. Our farmers first got the idea of a year round garden during our Extension schools, they never knew that so many vegetables could be grown so late in the garden. The interest thus brought about has never waned and the efforts are increased in trying to prolong the period of gathering vegetables from the home garden. Our Farmers are being taught that it is a health matter as well as a food matter. Stress is being laid more and more on the leafy vegetables; The turnip green and collard are the main winter greens that are grown here. Our Farmers are canning more and more of their summer and fall surplus vegetables.

(B) Poultry

Poultry is a growing industry among our Farmers, they have always kept a few chickens for home consumption and did their

hatching with the hen, today more than ever our farmers are buying day old chick; J.W.Hudson, South Hill, A.J.Hudson, South Hill; P.R. Alexander, Palmers Springs are among those who are succeeding in raising day old chicks with homemade brooders.

(C)Hogs.

The raising of hogs among our farmers is mainly for home consumption and far too many do not raise enough for home use, but through our stock improvement work and the addition of pasture for the hogs more of our farmers are raising enough meat for home consumption. C.S.Alexander, Palmers'Springs, the man selected by the County Advisory Board to take care of the purebred boar won by the County in a Conference attendance contest, is one of those who uses pasture methods and improved stock. Although he has a large family he will kill enough pork for his family and some to spare.

(D) Cows.

Our Farmers as a whole just keep cows for their family supply of milk, and sad but true we have many families who do not keep a cow at all, in a recent survey in one of our communities it was found that out of a total of 95 families 21 did not have a cow, the purpose of this survey is to help this community to better take care of itself and one of its great needs is a family cow. It is gratifying to know that the number of cows are being increased and that they are being fed better, we have better pastures and more hay is being raised for the family cow.

All of our farmers are now accessable to a purebred Guernsey bull since our County is stressing this breed. I do not know of a farmer keeping a scrub bull in the County for breeding purposes McKenzie Talley, Palmers Springs and T.H.Wortham, Bracey are still selling cream on the regular cream routes. They are among those who have good stock and are taking care of them.

4

2. Feed for stock

(A) Forage crops.

Alfalfa .

Alfalfa has never been extensively grown in our County. For the last few years there have been right many failures which the farmers have not quite understood how to overcome, and since the coming of Lespedeza with practically no failures our farmers are largely turning their attention in that direction. Some of the Soil Conservationist are advising the farmers to sow lespedeza instead of alfalfa. We still have a few farmers who are succeeding with alfalfa viz. R.A. Jiggetts, LaCrosse; McKenzie Talley, Palmers Springs; Beverley Valentine, Bracey, and James Shaw, Bracey.

Clover

Crimson clover is very widely grown throughout the County, it is fed both green and cured, The fall seeding is not up to a stand because of the long dry spell, it is one of our best catch crops.

A very little Old Fashion clover is sown in Mecklenburg County. The Mildew got farmers off of it several years ago and they have never gotten back.

Lespedeza.

Lespedeza is the most widely grown feed crop in the County, it is seeded alone and it is seeded as a mixture with other grasses, Farmers are still harvesting the seed to be sown next spring. There has been more lespedeza hay saved this year in Mecklenburg County than I have ever seen before. I feel sure that Mecklenburg County with the exception of the flooded sections, will have ample hay for its stock this winter.

(B) Small Grains

Corn is one of our staple crops and this year the season was splendid for its production. Under the Soil Conservation farmers are trying to qualify for payment, thus they are using more lime and phosphate which in turn make for a better grain crop.

Henry Cooper, Clarksville, made the best crop of corn this year he says that he has ever made because it was planted behind lespedeza. Silas Jones, South Hill, made 40 bus. of corn per acre due to the use of lespedeza and lime which proceeded the corn.

Small Grain continued

Wheat

Wheat is grown in Mecklenburg County for home consumption about 25% grow enough for home needs. There are less than one half dozen farmers in the County having a wheat allotment. For a long time the farmers of Mecklenburg County depended largely on bright tobacco which kept their lands very poor and wheat growing very unprofitable hence not much grown even now. Since the coming of Lespedeza our farmers are seeding it on their wheat allowing it to stand from two to three years adding a little lime and phosphate, now they are making fare crops of wheat. R.A.Jiggetts; C.S.Alexander; Mckenzie Talley; J.W.Hudson; Willie Alexander and Matthew Harrison are among the successful wheat growers in the County, they raise enough for their families and some to spare.

(C) Pasture.

Farmers are just becoming pasture conscious, they are now treating their pasture lands with phosphate and lime, and getting results which they never dreamed of heretofore. I never new one of our farmers to fertilize his pasture land before the AAA offered Triple SuperPhosphate in lue of payments. The farmers tell me their stock is keeping in so much better condition since they began treating their pasture lands.

Solomon Williams, South Hill, treated his pasture with 100lbs Triple Superphosphate per acre 2yrs. ago and for the last two years he has had the best pasture he has ever had.

3.Home Improvement

Health.

We have been working in cooperation with the Sanitation officer and all forces interested in the health of our people in striving to educate them to the importance of taking care of the waste from the body and the screening of the homes from flies. While the health department were building sanitary toilets just for the material, most of our County were supplied by them.

home improvement continued**(B) Homes Painted**

Our farmers have been doing some painting this year. We have two homes painted in one community which is in our Community Improvement Contest and there are several homes painted throughout the County.

(C) Yard Beautification

This fall L.C. Walker, South Hill has painted his home, plowed, disked, harrowed and seeded his yard to a lawn mixture, there are others to follow.

111. Soil Improvement**(A) AAA**

The AAA has many phases under which we have worked this year. Our farmers have tried to comply with the Control Program and plant within their allotments. Many of our farmers over planted their acreage in cotton and tobacco not knowing it, and because of the shortage in the number of supervisors, some of our farms were not checked before the farmers had finished gathering their tobacco and in order to comply part of the crop had to be taken from the packhouses and destroyed. These adjustments had to be made before their Sales Marketing cards could be issued, this caused a great deal of dissatisfaction and inconvenience to those who were thus caught, but at last it was all done and the farmers were soon in good spirit and ready to vote another Control.

The question being asked us today by the farmers: Will their land be measured before planting time in 1941.

Another phase of the AAA is the Mattress making Project, We commenced to make Mattresses during the month of August and to we have made 362. We have worked as one Unit for the most part the White working one week and the Colored working the next on several occasions they would be working the same day in the same building.

AAA continued

This year the farmers voted a Control on Tobacco for 3 yrs. in order to educate to farmers with respect to the Tobacco situation required a great many educational meetings which it was my privilege to conduct and attend. I attended the educational meetings for two days in Pittsylvania County just prior to the referendum.

Conservation

The AAA not only has a control feature but a Soil Conservation feature also of which our farmers are taking apart, they are using lime, superphosphate, seeding lespedeza & herds grass, crimson clover, cowpeas and rye in order to bring up their units for full payments. C.S. Alexander and McKenzie Talley have bought a lime spreader together and have spreaded a car of lime, they also are permitting other farmers to use their spreader.

(C) Our Farmers have become thoroughly interested in the saving of their soil, We have a Terracing machine which is kept busy when the crops are not on the land and the weather is suitable, but cannot get around. I have laid off in addition to the Terracing Association on 647 acres of land, but cannot get around.

(D) Legumes.

Our farmers are seeding more lespedeza than any other legume at present however they are seeding quite a lot of peas during the last cultivation of the corn. One farmer and his wife picked 45 bus. of Cowpeas during one season for seeding purposes.

IV. Other Federal Agencies

(A) The farmers are taking advantage of the Rural Electrification line as it comes near them others are asking when will it pass their place. This is a great blessing to our rural people, they not only have the lights, but other appliances as Raidos, water pumps, Irons and washers. We keep in close touch with the Superintendent and are helping our farmers to secure all the benefits that may come to them through all these agencies.

Federal Agencies continued.

(B) There are no TVA demonstrations in our County among our groupe.

(C) We have the office of the Supervisor of the NYA work in our County and several of our boys and girls have obtained employment through him. The last help we received from public funds to assist with the Mattress making was some NYA girls who had been given special training in doing this type of work.

(D) The FSA has a large number of eliants working with them, I have assisted them with their Soil Conservation problems in various sections of the County. I am cooperating with the Supervisor and the Committees fully intrying to help these farmers. I have visited their Tenant purchased farms and aided by giving suggesting improvements and laying out Terraces. I have given information to the Committees in selecting their eliants.

(E) Farm Credit Administration

The Farm Credit Administration as operating in our County is divided as Follows: The Federal Land Bank which has saved many a farmer from aforeclosure by lending him money and working with the Debt Adjusting Committee. (b) Production Credit Association which serves the more substantial farmers with short time credit, which maybe land owners or they may not, but must have some security for the loan. (c) Farm security may lend for any farm purpose which they are doing in our County; To buy land; team and tools; food and feed, fertilizer and seed. (d) The seed loan is lending a less fortunate groupe a small production loan and they are serving a very needy groupe in our County, A groupe which no other agency reaches. We are cooperating with all of the above forces to help the farmers of Mecklenburg County to make a better living on the farm and thereby become better Citizens.

4 H club activities

1. Organization.

1. There are 11 clubs in Mecklenburg County composing 152 boys and 123 girls. These clubs meet with their leaders and the Agent whenever it is possible for him to be present, Some of them meet the same night with the adult clubs in the same school building but in a separate room, and on the night of the repass, they all assemble themselves together for the recreation hour.

2. The leaders of these clubs are women, they are doing what is in their power to instill the principles of true Manhood and Womanhood in the minds of these young people., How to preside, how to be good leaders and good followers. They are being taught that their Projects are a secondary matter and only means to an end.

We took 7 4 H club members to the State Short course this summer held at Va. State College the last week in July.

All the club members have an opportunity to attend the County Fair and see the exhibits. This year our 4H exhibit was sent to the State Fair on Saturday by rail was delayed and did not reach the State Fair Exhibit in time to be displayed. These young people exhibit in a class with the adults in our County building.

11. Demonstrations

(A) Corn

One hundred and four boys produced 3475 bus. of corn on 104 acres of land at a profit of \$1737.50 They demonstrated the use of good seed and the proper cultivation.

(b) Gardens.

Twenty four members produced \$600 worth of vegetables on 3 acres of land, demonstrating the need for better garden plans and preparation the growth of more vegetables for health and for food.

2. Livestock

(A) Poultry

Eighty six members produced ove 4000 birds, demonstrating the use of the bruders and the proper care and feed for baby chicks.

Extension Service
Washington, D. C.

COMBINED ANNUAL REPORT OF COUNTY EXTENSION WORKERS

This report form is for use by county extension agents in making a combined statistical report on all extension work done in the county during the year. Agents resigning during the year should make out this report before quitting the service.

READ SUGGESTIONS, PAGES 2 AND 3

Approved:

Date

SUGGESTIONS RELATIVE TO THE PREPARATION OF THE COUNTY EXTENSION AGENT'S ANNUAL REPORT

The annual report should be a summary, with analysis and interpretations, for presentation to the people of the county, the State, and the Nation of the extension activities in each county for the year, and the results obtained by the county extension agents assisted by the subject-matter specialists. The making of such a report is of great value to the county extension agents and the people of the county in showing the progress made during the year as a basis for future plans. It is of vital concern also to the State and Nation as a measure of rural progress and a basis for intelligent legislation and financial support of extension work.

At least four copies of the annual report should be made: One copy for the county officials, one copy for the agent's files, one copy for the State extension office, and one copy for the Extension Service, United States Department of Agriculture. *The report to the Washington office should be sent through the State extension office.*

STATISTICAL SUMMARY

Where two or more agents are employed in a county they should submit a single statistical report showing the combined activities and accomplishments of all county extension agents employed in the county during the year. Results obtained through assistance rendered agents by specialists should also be included. This report shows, insofar as possible, the part each agent has taken in forwarding the extension program. The county totals should be the sum of the activities and accomplishments of individual agents *minus duplications due to two or more agents participating in the same activity or accomplishment.* The county totals, when properly recorded, show the progress made in the county during the year in forwarding the entire extension program. Negro men and women agents should prepare a combined statistical report separate from that of the white agents.

The statistical summary should be a report of this year's activities and results that can be verified by records on file in the county office. Where records are not available careful estimates are desired. Such estimates should be marked "Est."

NARRATIVE SUMMARY

A separate narrative report is desired from the leader of each line of work, such as county agricultural agent, home demonstration agent, boys' and girls' club agent, and Negro agent. Where an assistant agent has been employed during a part or all of the year, the report of his or her work should be included with the report of the leader of that line of work. Where an agent in charge of a line of work has quit the service during the year, the information contained in his or her report should be incorporated in the annual report of the agent on duty at the close of the report year, and the latter report so marked.

The narrative report should summarize and interpret, under appropriate subheadings, the outstanding results accomplished and the extension methods used for each project. Every statement should be clear-cut, concise, forceful, and, where possible, reinforced with necessary data from the statistical summary. Use a descriptive style of writing, giving major accomplishments first under each project. Give extension methods fully relating to outstanding results only, and where practicable illustrate with photographs, maps, diagrams, blueprints, or copies of charts and other forms used. Full credit should be given to all cooperating agencies. The lines should be single-spaced, with double space between the paragraphs and reasonably good margins. The pages should be numbered in consecutive order.

The following outline is merely suggestive of how the narrative report may be clearly and systematically presented. Each agent should prepare an outline to fit the situation and the work to be reported.

SUGGESTIVE OUTLINE OF ANNUAL NARRATIVE REPORT

- I. Cover and title page.
- II. Table of contents.
- III. Summary of activities and accomplishments, preferably of one or two typewritten pages only, placed at the beginning of the narrative report.
- IV. Changes in county extension organization made during the year to improve regular procedures or to meet emergencies.
- V. County extension program.
 - (1) Problems determining extension program.
 - (2) Influence of State and National agricultural agencies operating in county upon extension program.
 - (3) Activities and results.

Under appropriate headings present in some detail for each major problem or line of work the goals set up, the methods used, the cooperation received, the coordination effected, the results achieved, and the significance of these results in terms of problem solution.
- VI. Outlook and recommendations.

TERMINOLOGY

To insure reports which convey the intended meaning to others and to facilitate the compilation of satisfactory national statistics on extension, it is extremely important that terms be used in accordance with accepted definitions. The following definitions of extension terms have been approved by the United States Department of Agriculture and the Association of Land Grant Colleges and Universities. Agents should read these definitions before starting to write the annual reports.

DEFINITIONS OF EXTENSION TERMS

1. An extension program is a statement of the specific projects to be undertaken by the extension agents during a year or a period of years.
2. A plan of work is a definite outline of procedure for carrying out the different phases of the program. Such a plan provides specifically for the means to be used and the methods of using them. It also shows what, how much, when, and where the work is to be done.
3. A community is a more or less well-defined group of rural people with common interests and problems. Such a group may include those within a township, trade area, or similar limits. For the purpose of this report a community is one of the several units into which a county is divided for conducting organized extension work.
4. A project leader, local leader, or committeeman is a person who, because of special interest and fitness, is selected to serve as a leader in advancing some phase of the local extension program. A project leader may be either an organization or a subject-matter leader.
5. Demonstrations as contemplated in this report are of two kinds—method demonstrations and result demonstrations. A method demonstration is a demonstration given by an extension worker or other trained leader for the purpose of showing how to carry out a practice. Example: Demonstrations of how to can fruits and vegetables, mix spray materials, and cull poultry.
6. A result demonstration is a demonstration conducted by a farmer, home maker, boy, or girl under the direct supervision of the extension worker, to show locally the value of a recommended practice. Such a demonstration involves a substantial period of time and records of results and comparisons, and is designed to teach others in addition to the person conducting the demonstration. Example: Demonstrating that the application of fertilizer to cotton will result in more profitable yields, that underweight of certain children can be corrected through proper diet, that the use of certified seed in growing potatoes is a good investment, or that a large farm business results in a more efficient use of labor.
7. The adoption of a farm or home practice resulting from a demonstration or other teaching activity employed by the extension worker as a means of teaching is not in itself a demonstration.
8. A result demonstrator is an adult, a boy, or a girl who conducts a result demonstration as defined above.
9. A cooperator is a farmer or home maker who agrees to adopt certain recommended practices upon the solicitation of an extension worker. The work is not directly supervised by the extension agent and records are not required, but reports on the success of the practices may be obtained.
10. A 4-H Club is an organized group of boys and/or girls with the objectives of demonstrating improved practices in agriculture or home economics, and of providing desirable training for the members.
11. 4-H Club members enrolled are those boys and girls who actually start the work outlined for the year.
12. 4-H Club members completing are those boys and girls who satisfactorily finish the work outlined for the year.
13. A demonstration meeting is a meeting held to give a method demonstration or to start, inspect, or further a result demonstration.
14. A leader-training meeting is a meeting at which project leaders, local leaders, or committeemen are trained to carry on extension activities in their respective communities.
15. An office call is a call in person by an individual or a group seeking agricultural or home-economics information, as a result of which some definite assistance or information is given. A telephone call differs from an office call in that the assistance or information is given or received by means of the telephone. Telephone calls may be either incoming or outgoing.
16. A farm or home visit is a call by the agent at a farm or home at which some definite information relating to extension work is given or obtained.
17. Days in office should include time spent by the county extension agent in the office, at annual and other extension conferences, and on any other work directly related to office administration.
18. Days in field should include all days spent on official duty other than "days in office."
19. Letters written should include all original letters on official business. (Duplicated letters should not be included.)
20. An extension school is a school usually of 2 to 6 days' duration, arranged by the Extension Service, where practical instruction is given to persons not resident at the college. An extension short course differs from an extension school in that it is usually held at the college or another educational institution and usually for a longer period of time.
21. Records consist of definite information on file in the county office that will enable the agent to verify the data on extension work included in this report.
22. The county extension association or committee is that county organization, whether a membership or a delegate body, which is recognized officially in the conduct of extension work in the county.

GENERAL ACTIVITIES

Report Only This Year's Extension Activities and Results That Can Be Verified

1. List below the names, titles, and periods of service of the county extension agents whose work is included in this report. Include time of assistants with that of regular agent.

AGENT	Total months of service this year (a)	Days devoted to work with adults (b)	Days devoted to work with 4-H Club and other youth (c)	Total days in office (d)	Total days in field (e)
(Name) Home demonstration agent.....	(1)				
Asst. home demonstration agent.....					
4-H Club agent.....	(2)				
Assistant county agent in charge of club work.....					
<i>N. D. Morse</i> Agricultural agent.....	(3)	12	133	80	109
Assistant agricultural agent.....				50	183

2. County extension association or committee:
- (a) Agricultural extension *County Advisory Board* (2) Number of members *39*
- (b) Home demonstration: (1) Name..... (2) Number of members..... } 2
- (c) 4-H Club: (1) Name..... (2) Number of members..... } 2
3. Number of communities in county where extension work should be conducted..... *12* 3
4. Number of above communities in which the extension program has been planned cooperatively by extension agents and local committees..... *9* 4
5. Number of different voluntary county or community project leaders or committeemen actively engaged in forwarding the extension program: *26*
- (a) Adult work { (1) Men..... *26* (2) Women..... } (b) 4-H Club work { (1) Men..... (2) Women *11* (3) Older club boys..... (4) Older club girls..... } 5
6. Number of different paid local leaders engaged in agricultural-conservation and adjustment programs..... { (a) Men..... (b) Women..... } 6
7. Number of clubs or other groups organized to carry on adult home demonstration work..... 7
8. Number of members in such clubs or groups..... 8

ITEM	Home demonstration agents (a)	4-H Club agents (b)	Agricultural agents (c)	County total ¹ (d)
9. Number of 4-H Clubs.....			<i>11</i>	<i>11</i>
10. Number of different 4-H Club members enrolled.....			<i>151</i>	} <i>10</i>
			<i>122</i>	
11. Number of different 4-H Club members completing.....			<i>130</i>	} <i>11</i>
			<i>110</i>	

12. Number of different members enrolled in 4-H Club work for:⁴

MEMBERS	1st year	2d year	3d year	4th year	5th year	6th year and over
(a) Boys.....	<i>47</i>	<i>24</i>	<i>26</i>	<i>7</i>	<i>5</i>	<i>42</i>
(b) Girls.....	<i>40</i>	<i>16</i>	<i>17</i>	<i>8</i>	<i>6</i>	<i>35</i>

¹ County total should equal sum of preceding three columns minus duplications due to two or more agents participating in the same activity or accomplishment.

² Report the total number of different boys or girls enrolled in club work. This total should equal the sum of the project enrollments reported on pages 7 to 24, minus duplications due to the same boy or girl carrying on two or more subject-matter lines of work. Do not include boys and girls enrolled late in the year in connection with the succeeding year's program.

³ Same as footnote 2 but refers to completions instead of enrollments.

⁴ The total for this question should agree with county total, question 10.

	(2) Total attendance			13498	
34. Meetings held by local leaders or committeemen not participated in by agents or specialists and not reported elsewhere	(1) Adult work			2	34
	(b) Total attendance			57	
34. Number of above meetings (questions 27-34) at which discussion group method of presentation was followed	(2) 4-H Club			13	34
	(b) Total attendance			267	
					344

SUMMARY OF EXTENSION INFLUENCE FOR YEAR

It is highly desirable for extension workers to consider the proportion of farms and farm homes in the county which have been definitely influenced to make some substantial change in farm or home operations as a result of the extension program for men, women, boys, and girls. It is recognized that this information is very difficult for agents to report accurately, so a conservative estimate based upon such records, surveys, and other sources of information as are available will be satisfactory. Such estimates should be marked "Est."

Include results of emergency activities as well as the regular extension program.

35. Number of farms in county	1927	35
36. Number of farms on which changes in practices have definitely resulted from the agricultural extension program	600	36
37. Number of farm homes in which changes in practices have definitely resulted from the home demonstration program		37
38. Number of other homes in which changes in practices have definitely resulted from the home demonstration program		38
39. Number of farm homes with 4-H Club members enrolled	166	39
40. Number of other homes with 4-H Club members enrolled		40
41. Total number of different farm families influenced by some phase of the extension program (Include questions 36, 37, and 39, minus duplications.)	620	41
42. Total number of different other families influenced by some phase of extension program (Include questions 38 and 40, minus duplications.)		42

¹ County total should equal sum of preceding three columns minus duplications due to two or more agents participating in the same activity or accomplishment.

NOTE.—Questions 18-34 refer to the total number of different activities conducted this year. The totals should equal the sums of the corresponding information reported on following pages minus duplications where the same activity relates to two or more lines of work.
