

COUNTY AGENT WORK

CROP DEMONSTRATIONS

Nothing to index
Shenandoah County
Virginia

Besides the corn and orchard demonstrations which have been discussed in separate articles a good bit of work has been done on the other staple crops of the county namely; Wheat, Oats, Alfalfa, and Soybeans.

There were four men who seeded certified wheat last fall and all four of these crops passed the field inspection. Two of them however failed to pass the final inspection. One of these growers whose wheat failed to pass inspection last year spent three days roguing out the mixture and then seeded more than half his crop with this wheat. This wheat averaged more than his other wheat per acre by 8 bushels, and he had over 600 bushels to pass the inspection this year.

The other work done with wheat was getting demonstrators to use fertilizer or a better grade of fertilizer or a part of their wheat and compare the results with that seeded in the ordinary way. The use of better seed was also encouraged.

There were several demonstrations in oats this year several who tried for the first time the seeding of winter oats. These oats were seeded early in September and made very good growth during the fall and winter. The freezing weather caused a large part of the crop to freeze out, in spite of that the oats did fairly well and most of the men are trying them again this fall.

There were also a few crops of spring oats that were treated for smut this spring. The Upsulum treatment was used and it gave fair results but did not give as complete a control as was hoped for.

There is still a growing interest in alfalfa among the farmers in the county and new men are seeding a few acres each fall and spring. Our work along this line has been largely the proper preparation of the seed bed, and the use of lime fertilizer and inoculation.

There has also been some work done on the harrowing out of filth in alfalfa and top dressing it with lime and fertilizer. Some good demonstrations have carried out along this line.

Along with the alfalfa work has been that of Soy Beans and other legumes. Only a comparatively few farmers have been growing Soy Beans but we are having some very good demonstrations as to their value as a catch crop, and much interest has been shown in the work relating to this crop.

Orchard Demonstrations

In the program of the work planned for the county at the beginning of the year, was included the home orchard demonstration work. The first done along this line was that of pruning. During the first week in March there were five pruning demonstrations held in the county. The weather was unfavorable at this time but there was an average of 14 men at each one of the demonstrations. At these meetings besides the pruning work Mr. Apperson gave directions for spraying and for cultivating the orchard, also fertilization. Several men have followed the directions given them by Mrs. Apperson with the help of the county agent. Several men have used Sodium Nitrate and acid fertilizer and have gotten good results.

One peach orchard demonstration visited during the peach season showed very clearly the value of clean cultivation. The portion that had been cultivated during the dry weather had peaches much larger and freer of disease than the portion that had not been cultivated, and the owner said that he could see very clearly the value of clean cultivation especially in dry years.

Another phase of the orchard work was the sending out of spray cards prepared by the V.P.I. Spray Service. These cards were sent to about 250 fruit growers before each spray and gave the exact date the spray should be applied, the formula recommended, and the pest controlled by the spray. This service has been very much appreciated by the growers and they have come to depend on the cards for their spray calendar.

CORN DEMONSTRATION WORK

For three or four years there has been some demand by the farmers of the county for seed corn germination work. Some of this work has been done on a small scale for two years, but owing to the poor facilities and the changing temperature of the buildings the work was not satisfactory. The germination of the corn could be tested but the testing for ear and root-rot, and other diseases, for which there was considerable demand was not at all satisfactory.

Because of the increasing demand for this work and the increased loss from root-rot the testing of seed corn on a large scale was included in the plan of work for the year. This work was planned and worked out by the county agent in cooperation with the Smith-Hughes teacher in the county and the Extension Plant Pathologist. The tester was built in the shops of the school and all of the testing was done there. The agricultural students helped do all the work connected with the test and the plant pathologist helped to make the first readings. There were about 3000 ears tested and about 20% of this number was discarded. About 3% of this was because of poor germination and the rest on account of the presence of root-rot.

We tried to get all of this corn planted to itself and along the side of untested corn so that a comparative study could be made. Owing to the exceedingly wet spring and the river washing out some of the planted corn we will not get results on all that was tested.

There has been a great deal of trouble with down corn this year and the study that has been made seems to indicate that it was caused by root-rot. In the fields that have been examined where tested corn was planted we have found no symptoms of the disease, and it looks as if the tested corn will yield more on the average than the untested. At this time it is impossible to get a tabulation on the comparative yields.

ANNUAL REPORT OF COUNTY EXTENSION WORKERS

This report form is to be used by county extension agents, such as county agricultural agent, home demonstration agent, club agent, and negro agent, reporting on their respective lines of work.

State Virginia County Sherandoah
Report of G. G. Dickerson County Agricultural Agent
(Name) (Title)
From November 30, 1924 to December 1, 1924

If agent has not been employed entire year, indicate exact period. Agents resigning during the year should make out this report before quitting the service.

Mr. Keith

State Extension Director.

SUGGESTIONS RELATIVE TO THE PREPARATION OF THE COUNTY EXTENSION AGENT'S ANNUAL REPORT.

The annual report should be a review, analysis, interpretation, and presentation to the people of the county, the State, and the Nation of the sum total of the extension activities in each county for the year and the results obtained by the county extension agent assisted by the subject-matter specialists. The making of such a report is of great value to the county extension agent and the people of the county in showing the progress made during the year as a basis for future plans. It is of vital concern also to the State and Nation as a measure of rural progress and a basis for intelligent legislation and financial support.

Separate statistical and narrative reports are desired from each county extension agent in charge of a line of work, such as county agent, home demonstration agent, boys' and girls' club agent, and negro agent. Where an assistant agent has been employed a part or all of the year, a report on his or her work should be included with the report of the leader in charge of that line of work. Where an agent in charge of a line of work has quit the service during the year, the information contained in his or her report should be incorporated in the annual report of the agent on duty at the close of the report year, and the latter report so marked. Where two or more extension agents are employed in a county, each in charge of a line of work, care should be exercised to avoid including the same data in the statistical report of more than one agent.

At least four copies of the annual report should be made: One copy for the county officials, one copy for the agent's files, one copy for the State extension office, and one copy for the Extension Service, United States Department of Agriculture. *The report to the Washington office should be sent through the State extension office.*

NARRATIVE SUMMARY.

The narrative report should be a statement in orderly fashion and arranged under appropriate subheadings, of the work done, methods used, and results obtained under each project, as well as of the general work accomplished. Every statement should be clear-cut, concise, forceful, and, where possible, reinforced with ample data from the statistical summary. In the preparation of the part of the report relative to each project, the results reported in the statistical summary for the project should be analyzed, conclusions drawn, and recommendations made. The report may well be illustrated with photographs, maps, diagrams, blue prints, or copies of charts and other forms used in demonstration work. Full credit should be given to all cooperating agencies. The lines should be single-spaced, with double space between the paragraphs, and reasonably good margins left. The pages should be numbered in consecutive order.

The following outline is suggestive of how the narrative report may be clearly and systematically presented:

SUGGESTIVE OUTLINE OF ANNUAL NARRATIVE REPORT.

- I. Cover and title page.
- II. Table of contents.
- III. Status of county extension organization.
 - (1) Form of organization—changes and development.
 - (2) Function of local people, committees, or project leaders in developing the program of work.
 - (3) General policies, including relationships to other organizations.
- IV. Program of work, goals established, methods employed, and results achieved.
 - (1) Factors considered and methods used in determining program of work.
 - (2) Project activities and results.

(a) Soils	}	
(b) Farm crops		
(c) Horticulture	}	(including diseases and insects).
(d) Home gardens		
(e) Beautification of home grounds		
(f) Forestry	}	
(g) Rodents, predatory animals, and birds.		
(h) Animal husbandry	}	(including diseases and insects).
(i) Dairy husbandry		
(j) Home dairy		
(k) Poultry husbandry		
(l) Home poultry		

SUGGESTIVE OUTLINE OF ANNUAL NARRATIVE REPORT—Continued.

IV. Program of work, etc.—Continued.

(2) Project activities and results—Continued.

- (i) Rural engineering.
- { Rural engineering—home.
- (j) Agricultural economics, including farm management and marketing.
- { Home marketing.
- (k) Foods.
- (l) Nutrition.
- (m) Clothing.
- (n) Home management.
- (o) Home furnishings.
- (p) Home health and sanitation.
- (q) Community activities.
- (r) Miscellaneous.

V. Outlook and recommendations, including suggestive program of work for next year.

VI. Summary of activities and accomplishments, preferably of one or two typewritten pages only, placed at the beginning or end of the narrative report.

STATISTICAL SUMMARY.

To supplement the narrative part of the report, and in order that comparable State and National summaries may be made, it is necessary to include a statistical summary of the work in each county. The following form has been prepared to insure uniformity of reporting. In addition to the questions asked under each subdivision of the report, space is provided to add further data if desired. The statistical summary will grow naturally out of the field and office records.

DEFINITIONS OF TERMS USED IN THIS REPORT.

1. A PROGRAM OF WORK is a definitely outlined plan for extension work.
2. A PROJECT is a definite, systematic, organized plan for carrying out some phase of the extension program of work, providing for what is to be done, how much, when, where, how, and by whom.
3. MISCELLANEOUS WORK includes work which has not yet become a regular part of the program of work—work other than project work.
4. A COMMUNITY, for the purposes of this report, may be any one of the several units into which the county is divided for purposes of conducting organized extension work.
5. A PROJECT LEADER OR LOCAL LEADER is a person, selected because of his or her special interest and fitness, who functions as a leader in advancing some phase of the local program of extension work.
6. A DEMONSTRATION is an example designed to show the practical application of an established fact. Demonstrations as contemplated in this report are of two kinds, method demonstrations and result demonstrations.
 - A method demonstration is a demonstration given by an extension worker or other trained leader to a group for the purpose of showing them how to carry out a practice. Synonym: Lecture demonstration. Examples: Demonstrations of ensiling, mixing of spray materials, and culling of poultry.
 - A result demonstration is a demonstration carried on by a farmer, farm woman, boy, or girl under the direction of the extension service, involving a substantial period of time, records of results, and comparisons. Examples: Child-feeding, corn-culture, and orchard-management demonstrations.
7. A DEMONSTRATOR is a farmer, farm woman, boy, or girl who, under the direction of the extension service, conducts a result demonstration.
8. MEMBERS COMPLETING should include those who have satisfactorily finished the work outlined for the current year.
9. A DEMONSTRATION MEETING is a meeting held to give a method demonstration or to start, inspect, or further a result demonstration.
10. A TRAINING MEETING is a meeting at which project leaders or local leaders are trained to carry on extension activities in their respective communities.
11. AN OFFICE CALL OR TELEPHONE CALL is a visit or call by a farmer or other person seeking agricultural or home economics information, as a result of which some definite assistance or information is given.
12. A FARM VISIT is a call at a farm by the agent at which some definite information is given or concrete plan of work outlined, or some valuable information obtained from the farmer regarding his work, or the better practice prevailing in his neighborhood.
13. A HOME VISIT is a call at a home by the agent at which some definite information is given or concrete plan of work outlined, or some valuable information obtained from the farm woman regarding her work, or the better practice prevailing in her neighborhood.
14. DAYS IN OFFICE should include time spent by the county agent in his office, at county agent conferences, and any other work directly related to office administration.
15. DAYS IN FIELD should include all days spent on official duty other than those spent in office.
16. LETTERS WRITTEN should include all single letters on official business.

4

DEFINITIONS OF TERMS USED IN THIS REPORT—Continued.

17. A FARMERS' INSTITUTE is one of a series of meetings of one to two days' duration, arranged by a central State farmers' institute agency, at which agricultural and home-economics problems are discussed, usually by outside speakers employed for the purpose.
18. AN EXTENSION OR MOVABLE SCHOOL is an itinerant school usually of two to six days' duration where practical but systematic instruction is given to persons not resident at the college. An extension course continues courses differs from an extension school in that it is usually held at the college or other educational institution and usually for a longer period of time, but not exceeding two weeks.
19. RECORDS consist of definite information filed in the county office that will enable the agent to verify the data on extension work included in this report.
20. FARM OR HOME PRACTICE ADOPTED is a new or improved practice adopted on a farm or in a home during the year as a result of extension teaching. Examples: Spraying of potatoes for disease, canning of fruits and vegetables, use of balanced rations, and hat making.

GENERAL ACTIVITIES.

Report only this year's extension activities and results that are supported by records.

If an assistant agent has been employed during the year, include his or her work with that of the agent.

1. List below the names, titles, and periods of service of the county extension agents whose work is included in this report.
- | | | |
|------------------------|-------------------------------|--------------------------------|
| <u>Harry S. Moore</u> | <u>county agent</u> | <u>9 1/2</u> |
| (Name) | (Title) | (Months of service this year.) |
| <u>G. G. Dickerson</u> | <u>assistant county agent</u> | <u>2</u> |
| <u>G. G. Dickerson</u> | <u>county agent</u> | <u>2 1/2</u> |
2. Number of communities in county where extension work should be conducted. 30
3. Number of communities in which the extension program has been cooperatively worked out by extension agents and people concerned. 14
4. Number of voluntary county, community, or local leaders actively engaged in forwarding the extension program with—
- | | | | |
|-------------------------|----|-----------|----|
| (a) Junior ¹ | 6 | (1) Boys | 2 |
| | | (2) Girls | 4 |

	(2) Girls	7	
(c) Total attendance		100	
25. Other extension meetings attended and not previously reported	(a) Number	3	25
	(b) Attendance	18	
26. Number of meetings at which were shown	(a) Lantern slides		26
	(b) Motion pictures		
	(c) Charts		

[Use space below to include other important data.]

Club work in county seems to have improved very much since last year. The business men of the county contributed \$275.00 for club premiums at the county fair. The first club livestock judging team that was ever trained in the county took red stage at the state fair with 11 members competing.

¹ Do not count the same visit at both a farm-visit and a home visit.

² See definition on page 3.

PROGRAM SUMMARY.

List below information on each project of the program of work for the year. If an assistant agent has been employed during the year, include his or her name with that of the agent. This page should not be filled out until the questions on the following pages have been answered.

Title of project.	Number of meetings of committee or participants.		Days spent directed to project.	Days spent on other projects.	Number of small demonstrations.	Meetings at which demonstration.		Method-demonstrations (see meetings).		Other meetings in relation to project.		Number of exhibits or items of interest or information.
