Project Activities.....5-6-7-8

COUNTY AGENT WORK

INTRODUCTION

The purpose of this narrative report is to give the plan of work, tell how much of the plan was accomplished, and how the work was done.

This report covers only seven months Extension Work of the year 1936. A vacancy was made possible when C.D. Lewis, former County Agent, resigned, leaving seven months work to his successor.

Before Mr. Lewis left the County, a meeting of the Advisory Council was called. About twenty five leading citizens, all members of the Council attended this meeting. The plan of work was discussed for the benefit of the new Agent who was soon to take over the work. The Advisory Council advised that the new Agent first become acquainted with the people, and general conditions in the County, and then devote his time largely to two or three of the main goals in the plan of work to be accomplished.

Beginning May 1st, the Agent was somewhat handicapped by having only a few acquaintances in the County. In a short time several contact visits had been made among many of the leading citizens in almost every community. Letter, telephone, and personal calls came pouring into the office, and at once visits were limited to those farmers seeking help and advice. The new County Agent had sufficient work now to keep him busy without further effort to employ his time. The work looked bigger at the end of each day than it did the day before, and on several occasions the Agent worked all day and part of the night.

A little joke where it was fitting and proper had its weight in gaining friendship, and was worth much in overcoming some hostile attitude with farmers unfriendly to Extension Work.

A strong effort has been made to make Extension Work a lasting thing in Giles County. The Agent everywhere makes it clear that he is not doing things for self, but a servant of the people, working for the Extension Division and the County Agricultural Advisory Council. The farmers no longer think the

COUNTY AGENT WORK

work of the Extension Division is theory, but improved practical methods that have been tried and tested; and when these improved principles are applied to their agriculture profits are realized in results and can be measured in terms of dollars and cents.

The plan of meeting the farmers on the level^p being congenial socially, talking economy, measuring results both obtained and expected in dollars and cents, and saying, "I don't know", rather than take a chance of giving the farmer the wrong advice, can be identified in every piece of work set forth in this narrative.

PLAN OF WORK

I. Club AND School Work.

<u>Goals</u>	<u>Achievements</u>
1. Organized Clubs----6	Organized Clubs 6
2. Membership-----180	Membership-----118
3. Records turned in-100%	Records turned in 85%
4. Projects:	
(a) Baby beef--15	Baby Beef-----17
(b) Corn and bean-15	Corn and bean--- 3
(c) Pig-----30	Pig-----20
(d) Lamb-----10	Lamb----- 9
(e) Poultry-----50	Poultry-----40
(f) Potato-Onions-10	Potato-Onion---- 2
5. Club Activities:	
(a) Exhibits-----100%	Exhibits-----40%
(b) County Rally----1	Rallies-----1
(c) County Tour----1	Tours-----0
(d) Rep. State Short Course-----40	Rep. Short Course-25
(e) Dem. Teams-----5	Dem. Teams----- 4
(f) Inter-County Judging contest-1	Inter County Cont.0
(g) Juggling Team --1	Judging Team-----1

II. Livestock Development

1. Purebred Sires Campaign:	
(a) Bulls replaced---25	Bulls replaced-- 4
(b) Bucks replaced---50	Bucks replaced--15
(c) Purebred ewes placed in County-----50	Purebred lambs and Ewes-----30
2. Sheep Improvement work:	
(a) Docking and Cast. Demonstrations---15	Docking and Cast.5
(b) Dosing for stom. Worms-----15	Dosing for worms 64
(c) Feeding Del.-----5	Feeding dem.-----10

III. Soils

Goals

1. Lime Demonstrations---25
2. Pasture Demonstrations---3
3. Soybean growers---30
4. Community Meetings---6

Achievements

Farmers using Lime---15
Completed-----2
Soybean growers---30
Community Meetings---0

IV. Crops

1. To encourage farmers to grow known origin of seed

Some work done

V. Industrial Development

1. Cooperate with Industries already developed in such way that tends to make their existence permanent and profitable.

This work is done thru the South West Virginia Inc.

2. That Giles County beauty and resources be advertised to induce tourists and other industries.

VI. County Fair

1. To have Exhibits to fill every class in the following:

- (a) Horses
- (b) Cattle
- (c) Sheep
- (d) Hogs
- (e) Poultry
- (f) Agricultural crops
- (g) Horticulture
- (h) Domestic Arts
- (i) Clubs and Schools
- (j) Flowers

Horses
Cattle
Sheep
Hogs
Poultry
Agricultural Crops
Horticulture
Domestic Arts
Clubs and Schools
Flowers

Project Activities

Club And School Work: Club work does not hold the interest perhaps it once held in this County. It may be due in part to a change of Agents which occurred May 1st. Club work at that time was new to the County Agent, and the Agent was new to the Club members. Some of the leaders failed to attend two meetings in succession, resulting in irregular Club Meetings.

Giles Club boys and girls did not make the financial gains thus expected from their projects. Ten of the Pig Club members had litters of purebred pigs for sale. There was little demand for breeding stock in the County and only a few were disposed of outside the County. The members were forced to let them go at butchers prices. Big profits would have been realized if the pigs could have been disposed of at fancy prices but the boys have learned that growing and selling breeding stock is the work of an expert, and that it takes a long time to get the public recognition as a breeder of purebred livestock.

Another setback came to project work when Virginia baby beeves did not bring their usual price at the State Fair. Our boys and girls want projects that pay and the future of Club work in this County depends on that kind of project.

As a whole Club work in Giles County was a success for the year 1936. 80% of the livestock exhibits at the County Fair were Club exhibits. Our baby beeves were showed at Roanoke and Richmond Fairs, and altho we did not take first place our calves made a good showing and the boys are good sports. Our judging team was no better than 8th. place, and a defeat makes them want to be better instead of having alibis to offer.

An observer of Club work in the County says, "that it is a fine thing to develop leadership and improve the social life of any community? Twenty five boys and girls attended the State Short Course, and almost every organized Club had picnics and social gatherings.

Livestock Development

Purebred Sires Campaign: Several Giles farmers attended Ram Sale at Blacksburg in July to buy some outstanding individuals to head their flocks. Some new blood was brought into the County as a result of that Sale. One Corriedale buck is being tried out in the County at present that was bought at Blacksburg Sale. Two breeders of purebred Dorset and Hampshires have at their flock at present some of the best individuals in the country. About 50 purebred lambs were raised this year and about 80% of them are being kept in the County as breeders.

Bulls and Hogs Replaced: Four bulls were placed on farms, two coming from herds in the County and two from the outside. Giles County has sufficient breeders at present to furnish individuals for fanciers.

The 4-H Club Boys and Girls sold several registered pigs to farmers to replace their grade stuff. In many communities Males are kept for service in the that entire community and at least 75% of the people in that community are building up their livestock that way.

Sheep Improvement Work

Docking and Castrating: Not many lambs were docked and castrated after May 1st. When dosing flocks for stomach worms all late lambs were docked that there would not be any discrimination against them in the market. Farmers who failed to dock in the early spring found that lambs with long tails they were keeping to build up their flock looked scrubby when compared with lambs that were docked. All the ewe lambs in several flocks have been docked late in the fall for this particular reason.

Dosing For Stomach Worms: About 75% of the sheep in Giles County, or a total of about 8000 sheep have been dosed for stomach worms using the bluestone treatment. The results from this work is outstanding. The sheep all over the County are in better health and in better condition than the farmers claim to have ever had them before. Ask a farmer what the treatment is worth and will invariably reply that he does not know, but claims that it is well worth while; that it only takes a little time and the treatment very inexpensive. Almost every farmer in the County will admit the treatment is worth fifty cents per head, and that on sheep alone more than enough is

saved to the farmers in one year to pay the County Agents salary. This work with sheep has turned kickers into ardent supporters of Extension Work, and more people are in sympathy with the work than they have ever been before.

Bigger profits can be expected from healthy sheep and now that the farmers know how to control the stomach worm they are increasing their flocks, improving the blood, and an active campaign is under way to produce better lambs for the market. Sheep barns are being built, several acres of rye were sown for early spring pasture in order to condition the lambs for the early spring market. Better care and attention is being given the ewe on nearly every farm in the county.

Crops And Soils

Soybeans: Soybeans make such a good sheep and cattle feed that it is gaining favor on every farm in the County. It is also a soil improver and the farmers are talking about where they will sow soybeans next year.

Wheat: About 800 bu. wheat was treated for stinking smut in the County last fall before seeding time. 30 demonstrations for treating wheat with the copper carbonate treatment was given in a section of the County where the disease was prevalent. The results cannot be ascertained until harvest time next year. The farmers were sold on the treatment as soon as they saw it demonstrated, and when they see the effectiveness of the treatment every farmer in the County next fall will use the treatment if it is very effective. The Agent was surprised at the number of farmers interested in the copper carbonate treatment.

One day was spent in making an apparatus for giving the demonstrations, which was a very crude thing made from a vinegar barrel. A central shaft extended thru the barrel and fastened to the head of the barrel by means of discs. On one end of the shaft was fastened a crank for turning the barrel when mounted on roller bearings. Two bu. of wheat could be treated at one time, and two persons could treat about 30 bu. in an hour.

Use Of Lime and Fertilizers: The most progressive farmers used heavier applications of fertilizers on wheat at seeding time than usual. Applications of 300 to 400 lbs. of 3-12-2 were common occurrences.

Most of the lime used in this County is in the burnt form. There are two lime kilns in the County and the farmers can buy it reasonable. About 150 tons of burnt lime was used on Giles farms last year.

County Fair

Exhibits: The County Fair was a great success. Exhibits in every Department was increased, especially in livestock. Bland County baby beeves were showed at our County Fair, and shipped to Roanoke and Richmond in car with Giles calves.

Poultry: Not much work was attempted with poultry. Aside from culling a few flocks some time has been spent in observing the conditions for putting on a poultry improvement campaign for another year. There is talk of putting in a hatchery as soon as we have enough birds of standard breeding to furnish eggs sufficient for a small incubator of something like 10,000 egg capacity.

There is a need of better poultry farming conditions in Giles County than is to be found at present, and we are starting this next spring with several farmers beginning with baby chicks. Sheep and Poultry will be the majors in my plan of work for next year.

ANNUAL REPORT OF COUNTY EXTENSION WORKERS

This report form is to be used by county extension agents, such as county agricultural agent, home demonstration agent, club agent, and negro agent, reporting on their respective lines of work.

State Virginia County Giles
Report of J. E. Starnes County Agricultural Agent.
(Name) (Title)
From December 1, 1925 to November 30, 1926.

If agent has not been employed entire year, indicate exact period. Agents resigning during the year should make out this report before quitting the service.

SUGGESTIONS RELATIVE TO THE PREPARATION OF THE COUNTY EXTENSION AGENT'S ANNUAL REPORT.

The annual report should be a review, analysis, interpretation, and presentation to the people of the county, the State, and the Nation of the sum total of the extension activities in each county for the year and the results obtained by the county extension agent assisted by the subject-matter specialists. The making of such a report is of great value to the county extension agent and the people of the county in showing the progress made during the year as a basis for future plans. It is of vital concern also to the State and Nation as a measure of rural progress and a basis for intelligent legislation and financial support.

Separate statistical and narrative reports are desired from each county extension agent in charge of a line of work, such as county agent, home demonstration agent, boys' and girls' club agent, and negro agent. Where an assistant agent has been employed a part or all of the year, a report on his or her work should be included with the report of the leader in charge of that line of work. Where an agent in charge of a line of work has quit the service during the year, the information contained in his or her report should be incorporated in the annual report of the agent on duty at the close of the report year, and the latter report so marked. Where two or more extension agents are employed in a county, each in charge of a line of work, care should be exercised to avoid including the same data in the statistical report of more than one agent.

At least four copies of the annual report should be made: One copy for the county officials, one copy for the agent's files, one copy for the State extension office, and one copy for the Extension Service, United States Department of Agriculture. The report to the Washington office should be sent through the State extension office.

NARRATIVE SUMMARY.

The narrative report should be a statement in orderly fashion and arranged under appropriate subheadings, of the work done, methods used, and results obtained under each project, as well as of the general work accomplished. Every statement should be clear-cut, concise, forceful, and, where possible, reinforced with simple data from the statistical summary. In the preparation of the part of the report relative to each project, the results reported in the statistical summary for the project should be analyzed, conclusions drawn, and recommendations made. The report may well be illustrated with photographs, maps, diagrams, blue prints, or copies of charts and other forms used in demonstration work. Full credit should be given to all cooperating agencies. The lines should be single-spaced, with double space between the paragraphs, and reasonably good margins left. The pages should be numbered in consecutive order.

The following outline is suggestive of how the narrative report may be clearly and systematically presented:

SUGGESTIVE OUTLINE OF ANNUAL NARRATIVE REPORT.

- I. Cover and title page.
- II. Table of contents.
- III. Status of county extension organization.
 - (1) Form of organization—changes and development.
 - (2) Function of local people, committees, or project leaders in developing the program of work.
 - (3) General policies, including relationships to other organizations.
- IV. Program of work, goals established, methods employed, and results achieved.
 - (1) Factors considered and methods used in determining program of work.
 - (2) Project activities and results.

<ol style="list-style-type: none"> (a) Soils (b) Farm crops (c) Home gardens (d) Forestry (e) Rodents, predatory animals, and birds. (f) Animal husbandry (g) Dairy husbandry (h) Home dairy (A) Poultry husbandry (B) Home poultry 	}	(including diseases and insects).
---	---	-----------------------------------

SUGGESTIVE OUTLINE OF ANNUAL NARRATIVE REPORT—Continued.

IV. Program of work, etc.—Continued.

(C) Project activities and results—Continued.

- (6) Rural engineering.
- (7) Rural engineering—home.
- (j) Agricultural economics, including farm management and marketing.
- (k) Home marketing.
- (k) Foods.

- (n) Home management.
- (o) Home furnishings.
- (p) Home health and sanitation.
- (q) Community activities.
- (r) Miscellaneous.

V. Outlook and recommendations, including suggestive program of work for next year.

VI. Summary of activities and accomplishments, preferably of one or two typewritten pages only, placed at the beginning or end of the narrative report.

STATISTICAL SUMMARY.

To supplement the narrative part of the report, and in order that comparable State and National summaries may be made, it is necessary to include a statistical summary of the work in each county. The following form has been prepared to insure uniformity of reporting. In addition to the questions asked under each subdivision of the report, space is provided to add further data if desired. The statistical summary will grow naturally out of the field and office records.

DEFINITIONS OF TERMS USED IN THIS REPORT.

1. A PROGRAM OF WORK is a definitely outlined plan for extension work.
2. A PROJECT is a definite, systematic, organized plan for carrying out some phase of the extension program of work, providing for what is to be done, how much, when, where, how, and by whom.
3. MISCELLANEOUS WORK includes work which has not yet become a regular part of the program of work—work other than project work.
4. A COMMUNITY, for the purposes of this report, may be any one of the several units into which the county is divided for purposes of conducting organized extension work.
5. A PROJECT LEADER OR LOCAL LEADER is a person, selected because of his or her special interest and fitness, who functions as a leader in advancing some phase of the local program of extension work.
6. A DEMONSTRATION is an example designed to show the practical application of an established fact. Demonstrations as contemplated in this report are of two kinds, method demonstrations and result demonstrations.
 - A method demonstration is a demonstration given by an extension worker or other trained leader to a group for the purpose of showing them how to carry out a practice. Synonyms: Lecture demonstration. Examples: Demonstrations of canning, mixing of spray materials, and culling of poultry.
 - A result demonstration is a demonstration carried on by a farmer, farm woman, boy, or girl under the direction of the extension service, involving a substantial period of time, records of results, and comparisons. Examples: Child-feeding, corn-culture, and orchard-management demonstrations.
7. A DEMONSTRATOR is a farmer, farm woman, boy, or girl who, under the direction of the extension service, conducts a result demonstration.
8. MEMBERS COMPLETING should include those who have satisfactorily finished the work outlined for the current year.
9. A DEMONSTRATION MEETING is a meeting held to give a method demonstration or to start, inspect, or further a result demonstration.
10. A TRAINING MEETING is a meeting at which project leaders or local leaders are trained to carry on extension activities in their respective communities.
11. AN OFFICE CALL OR TELEPHONE CALL is a visit or call by a farmer or other person seeking agricultural or home economics information, as a result of which some definite assistance or information is given.
12. A FARM VISIT is a call at a farm by the agent at which some definite information is given or concrete plan of work outlined, or some valuable information obtained from the farmer regarding his work, or the better practice prevailing in his neighborhood.
13. A HOME VISIT is a call at a home by the agent at which some definite information is given or concrete plan of work outlined, or some valuable information obtained from the farm woman regarding her work, or the better practice prevailing in her neighborhood.
14. DAYS IN SERVICE should include time spent by the county agent in his office, at county agent conferences, and any other work directly related to office administration.
15. DAYS IN FIELD should include all days spent on official duty other than those spent in office.
16. LETTERS WRITTEN should include all single letters on official business.

4

DEFINITIONS OF TERMS USED IN THIS REPORT—Continued.

17. A **FARMERS' INSTITUTE** is one of a series of meetings of one to two days' duration, arranged by a central State farmers' institute agency, at which agricultural and home-economics problems are discussed, usually by outside speakers employed for the purpose.
18. AN **EXTENSION OR MOVABLE SCHOOL** is an itinerant school usually of two to six days' duration where practical but systematic instruction is given to persons not resident at the college. AN **EXTENSION SUMMER COURSE** differs from an extension school in that it is usually held at the college or other educational institution and usually for a longer period of time, but not exceeding two weeks.
19. **RECORDS** consist of definite information filed in the county office that will enable the agent to verify the data on extension work included in this report.
20. **FARM OR HOME PRACTICES ADOPTED** is a new or improved practice adopted on a farm or in a home during the year as a result of extension teaching. Examples: Spraying of potatoes for disease, canning of fruits and vegetables, use of balanced rations, and hat making.

GENERAL ACTIVITIES.

Report only this year's extension activities and results that are supported by records.

If an assistant agent has been employed during the year, include his or her work with that of the agent.

1. List below the names, titles, and periods of service of the county extension agents whose work is included in this report 1

<i>W. E. Starnes</i>	<i>County Agent</i>	7
(Name)	Title	(Months of service this year.)
<i>Chas. D. Lewis</i>	" " "	5

2. Number of communities in county where extension work should be conducted 2
3. Number of above communities in which the extension program has been cooperatively worked out by extension agents and people concerned 3
4. Number of voluntary county, community, or local leaders actively engaged in forwarding the extension program with— 4
 - (a) Juniors _____
 - (b) Adults _____
5. Number of clubs carrying on extension work: 5
 - (a) Junior _____
 - (b) Adult _____
6. Membership in above clubs: 6

(a) Boys ¹ _____	61	(c) Men _____
(b) Girls ² _____	43 50	(d) Women _____
7. Number of club members completing: 7

(a) Boys ³ _____	21	(c) Men _____
(b) Girls ³ _____	10	(d) Women _____
8. Number of members in junior club work for four or more years: 8
 - (a) Boys _____
 - (b) Girls _____

¹ Report the total number of different boys or girls enrolled in club work. This total should equal the sum of the project enrollments reported on pages 8 to 21, less any duplications due to the same boy or girl carrying on two or more related activities during the year.

² Include those boys and girls enrolled in club work as reported under 6(a) and 6(b) who have finished the work undertaken or such portion of it as it was planned to finish during the report year.

GENERAL ACTIVITIES—Continued.

9. Number of junior teams trained	(a) Judging	1	} 9	
	(b) Demonstration	4		
10. Number entering college this year who have been club members		0	10

FARM DEMONSTRATION WORK.

SOILS.¹

Report only this year's extension activities and results that are supported by records.

43. Number of method demonstrations given. (See definition 6, page 2.)	0	43
44. Number of result demonstrations started or under way. (See definition 6, page 2.)	2	44
47. Number of result demonstrations completed or carried through the year.	21	47
48. Number of acres involved in those completed demonstrations.	5	48
49. Number of farms adopting improved practices in the use of commercial fertilizer this year.	120	49
50. Tons involved in preceding question.	150	50
51. Number of farms taking better care of farm manures this year.	19	51
52. Number of farms using lime or limestone for the first time.	3	52
53. Tons of lime or limestone so used.	20	53
54. Number of farms plowing under cover or other green manure crops for the first time.	2	54
55. Acres of cover and green manure crops so plowed under.	8	55
56. Total number of different farms adopting improved practices, relative to the soils work reported on this page. (Include questions 47, 49, 51, 52, and 54 less duplications.)	139	56

[Use space below to include other important data relating to soils.]

More acreage grown to soybeans

This year than ever before - these farmers in the County are growing sweet clover as soil improvement for the first time. More farmers used a 2-12-2 fertilizer on wheat this year at seeding time than any previous year. In some communities applications of 200# to 500# were used to the acre.

CEREALS*

Report only this year's extension activities and results that are supported by records.

 most winter plowing is being practiced
 each year to keep down insects and
 weeds. Approximately 100% Copper
 fungicide being used in the County for
 treating wheat for smut for the first
 time.

[†] Report fall-sown crops the year they are harvested.

[‡] Includes crop by name.

[§] States which do not organize clubs on a project basis should not report on this quantity but should report on enrollment and completion.

[¶] Exclude those who have finished the work undertaken, or such portion of it as it was planned to finish during the report year.

9

LEGUMES AND FORAGE CROPS.

Report only this year's extension activities and results that are supported by records.
