

SAVE THE BEES WITH BEE-BURG! WHY ARE BEES IMPORTANT?

Bees are responsible for 1/3
of global human food supply

With bees

Without bees

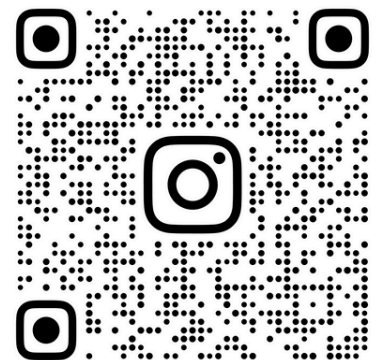

Bees prevent soil erosion

They are the world's
greatest pollinators

SAVE THE BEES WITH BEE-BURG!

INTRODUCING...

THE RUSTY PATCHED BUMBLEBEE

WHAT IS HAPPENING

Overuse of pesticides and habitat loss are killing these bees!

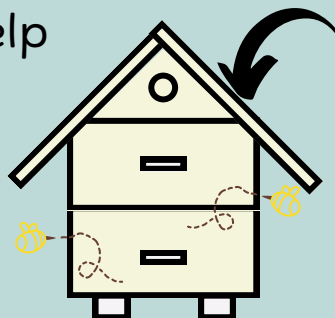

WHY THIS MATTERS

These are one of the few insects that can pollinate tomatoes, cranberries, blueberries, and alfalfa! They are now endangered!

WHAT CAN YOU DO?

Plant these flowers to help feed these bees!

- Scarlet Beebalm
- Joe-Pye Weed
- Wild Bergamot

Set up bee boxes to give these bees homes!

Avoid using pesticides in your garden! That kills bees too!

SAVE THE BEES WITH BEE-BURG!

INTRODUCING...

THE AMERICAN BUMBLEBEE

WHAT IS HAPPENING

Increases in **habitat loss**, **climate change** and **pesticide use** are putting this species at risk for becoming endangered.

WHY IT MATTERS

The American Bumblebee is one of the only insects that can pollinate **tomatoes**, and they help **biodiverse plant life** grow!

WHAT YOU CAN DO

BUILD BEE BOXES

STOP PESTICIDE USE

PLANT NATIVE FLOWERS

SAVE THE BEES WITH BEE-BURG!

INTRODUCING...

**THE GOLDEN
NORTHERN
BUMBLEBEE**

WHAT IS HAPPENING

Loss of habitat from agricultural expansion is killing the bees! They are now at risk of becoming endangered.

WHY IT MATTERS

They **pollinate raspberries, blueberries, pumpkins, cucumbers, watermelons** and more! Plus, they **support biodiverse plant life!**

WHAT YOU CAN DO

- **Quit** using **pesticides**.
- **Avoid mowing**. Delay mowing or leave a strip of grass unmowed.
- **Plant native species**
 - Honeysuckle, Thistle, Bee Balm and more!
