

dateCollect	The date that pitfall traps were collected in mm-dd-yyyy format.
dateTrap	The date pitfall traps were put out in the field in mm-dd-yyyy format.
site	The location where data was collected. Two locations: TR (Tub Run Road), PR (Pocahontas Road).
siteID	The specific site identification number.
forestType	Each site contained two types of forests. UM is for unmanaged forest with no logging history, M is for managed forest with recent logging history.
forestAge	Age of the sampled forest.
totalSpiAbun	The total number of spider individuals caught in pitfall traps.
totalFamRich	The total number of spider families caught in pitfall traps.
abunFamC	The abundance of the spider family Cheiracanthiidae caught in pitfall traps.
abunFamP	The abundance of the spider family Phalangidae caught in pitfall traps.
abunFamL	The abundance of the spider family Lycosidae caught in pitfall traps.
abunFamD	The abundance of the spider family Desidae caught in pitfall traps.
abunFamA	The abundance of the spider family Anyphaenidae caught in pitfall traps.
abunFamT	The abundance of spider family Theridiidae caught in pitfall traps.
totalOtherAbun	The total number of other non-spider organisms caught in pitfall traps.
abunCricket	The abundance of crickets caught in pitfall traps.
abunBeetle	The abundance of beetles caught in pitfall traps.
abunMilli	The abundance of millipedes caught in pitfall traps.
abunCenti	The abundance of centipedes caught in pitfall traps.
abunAnt	The abundance of ants caught in pitfall traps.
abunWing	The abundance of winged organisms caught in pitfall traps.
abunMisc	The abundance of miscellaneous organisms caught in pitfall traps.
