Program for next year	5

## SUMMARY

A summary of the activity in extension work in this county the past year shows a 50 per cent increase in acreage of lespedeza, which is now about 1500 acres; 2000 sheep treated for parasites; 454 calves immunized against blackleg and 14 pure bred sires placed.

Outlook information continues to be in greater demand as judged by information required by farmers. Use of the production credit system of financing is increasing. A saving of \$1400.00 was made in the pooling system of selling wool.

A subordinate Grange, a Pomona Grange, and 1 4-H Club were organized. Rural Rehabilitation was started on its way with 32 clients. There were 31 Corn-Hog contract signers who will secure \$2500.00 in benefit payments.

2 surveys were made on a Rural Electrification project, 1 on lespedeza, and 1 on damages to poultry and game caused by foxes.

## CHANGES IN COUNTY EXTENSION ORGANIZATION

There were practically no changes in the extension organization during the past year. The Advisory Board has about ceased to function but the Control Association has taken on more of the A.A.A. work. A grange organization was started which should be of some help with future plans and a 4-H Club has been organized.

Nothing of an expansive nature was included in this years program except an increased use of lespedeza.

## 4-H CLUB WORK

One organized club of 45 members was established at Millboro, 9 other members were in unorganized club work. As usual, poultry was the most popular project. Flower gardening was a new and popular project among the girls. Lillian Rhea made a very good showing with dahlias and other plantings around the house. She raised over 30 varieties of dahlias in addition to the other flowers. Her dahlia plantings covered  $\frac{1}{2}$  acre of ground. She also displayed good leadership in club meetings and assisted in preparing programs. The club leader was unable to devote the necessary time to club work that he should, consequently reports and meetings were not as good as they should have been. The project work of members was fairly satisfactory for a first year club.

## AGRONOMY

Corn. 16 demonstrations in proper placements of fertilizer on corn were conducted, most of which were satisfactory.

This method was advocated to all who were contacted regarding the fertilization of corn. Fertilizer merchants also co-operated in recommending this practice.

Wheat. 6 demonstrations in better seed and fertilizer were conducted, one of which consisted of nitrate top dressing which gave an increased yield of  $6\frac{1}{2}$  bushels per acre. Fertilizer merchants also co-operated in recommending the proper use of fertilizer on wheat.

Rye, Oats and Barley. 9 demonstrations in the use of these grains for hay, pasture, and grain were conducted. Especially good results were obtained with winter barley on river bottom land.

Lespedeza. More time was devoted to this than to any other crop. It showed an increase of nearly 500% in acreage over last year. 130 growers reported over 1500 acres in this crop. 300 tons of hay were produced. One farmer raised 75 acres for hay and 30 acres for pasture. He reported that it produces more hay than he has ever been able to secure from seedings of timothy and clover and it is cheaper to seed.

Much time was required to inform growers of the danger from dodder, most of them having never before experienced the ravages caused by this weed. The proper methods in using this crop in rotations ~~was~~ also emphasized.

Circular letters, news articles, and Corn-Hog meetings were used to disseminate information.

A survey was made by observation and questionnaire to determine the acreage and uses of this crop. 93% reported favorably, and of those who reported unfavorably, some had been sold the wrong variety of seed and others did not understand the proper handling of the crop. Only 17 used it for hay, most of them using it for pasture and land improvements. One farmer produced a crop of more than 1 ton of hay per acre on a 35 acre field which had not made as much as  $\frac{1}{2}$  ton of hay per acre in the last 15 years.

Soybeans. 13 farmers used curing racks. One 20 acre demonstration was conducted in which curing racks were used for the first time.

Clover. Fertilization of clover when seeded in spring on small grain was emphasized and fertilizer merchants co-operated in making this recommendation.

Timothy. Owing to the extremely high price of this seed in the fall of 1934, farmers were advised to either substitute lespezoza in the spring of 1935 or wait until the following fall and sow grass alone on small grain stubble. This information saved the

31 Corn-Hog contract signers alone something like \$1000.00 in seed cost and was a great factor in extending the use of lespedeza. However, it was the persistent recommendation and demonstrations of lespedeza during the past 3 years that had developed an attitude among the farmers which was favorable to this new legume crop.

Pastures. One demonstration in fertilizing a 50 acre pasture was conducted. This convinced the user that it is far more economical to fertilize rough pasture land than it is to plow and seed it in order to improve the stand of grass. 7 demonstrations were also conducted to show that lespedeza can be used on the thinner parts of a pasture where the blue grass will not grow.

#### ANIMAL HUSBANDRY

Prevention of Losses. The following livestock was treated in demonstrations to prevent losses from diseases and parasites: 454 calves vaccinated for 69 farmers; 1894 sheep drenched for 27 owners and 575 sheep dipped for 12 farmers. 6 farmers were advised regarding veterinary treatment for animals.

Two dipping vats, were constructed, one of which was made by digging out a proper sized hole in impervious clay and lining it with rough lumber. A draining floor and pens were also provided. This held water all summer and was satisfactory in every way. The cost was \$4.60 for lumber and nails. The other vat was constructed of concrete.

Hog Cholera. 2 outbreaks occurred, but owing to prompt vaccination by a veterinary and other preventive measures, only 5 hogs were lost and the spread of the disease was stopped.

Pure Bred Sires. Assistance was given in obtaining 14 pure bred sires. A new method of placing pure bred bulls was tried out. This was accomplished by finding out how many farmers wanted a pure bred Angus calf, which was 3, then getting 2 breeders to send a truck load of 4 calves to the county seat. No one was obligated to buy, but this resulted in placing 2 calves. In addition to making the 2 sales, the breeders were given much advertising and the farmers were much impressed with this method of selling. 3 farmers have said since then that they wished they had taken advantage of this opportunity. As the calves were not kin, they may be exchanged by the 2 purchasers in later years to avoid inbreeding.

Poultry. 7 flocks were treated for worms and 3 for lice. 7 culling demonstrations were conducted in which 161 culls were taken from 765 fowls. Plans were furnished for one wood burning brick brooder.

**ECONOMICS**

Records. Record books for 31 contract signers with a circular letter of explanation were distributed. 20 were assisted with keeping accounts.

Financing. 2 farmers were assisted with debt adjustments, 7 with crop production loans, 2 with Federal Land Bank Loans and 9 came to the office for advice on other phases of financing.

Marketing. Assistance was given in pooling and marketing 70,000 lbs. of wool. This was estimated to save farmers 2¢ per pound or \$1400.00. Assistance was also given in purchasing 2000 pounds of lespedeza seed at a saving of approximately \$40.00.

Outlook Information, was disseminated by discussions at Corn-Hog Educational meetings, through newspapers and by bulletins to members of the Advisory Board. This service had become so popular that the first question many farmers asked the agent is something pertaining to the outlook.

Arrangements were made with the local paper to carry a weekly summary of livestock prices which are sent out by the Livestock Marketing Association of Baltimore.

**AGRICULTURAL ENGINEERING**

Building. Very little building was done in the county under the agent's supervision. Assistance was given in constructing one large sheep shed, one brooder house and stove, 2 sheep dipping vats, none of the vats being concrete, the other soil & boards. A specialist spent 3 days in making surveys for hydro electric and water supply projects.

**ORGANIZATIONS**

A.A.A. Control. The Corn-Hog project was continued with 31 members. More work was done by the association members this year than formerly. Benefit payments amounted to \$2500.00. 6 Educational meetings were held and 1 referendum supervised.

F.E.R.A. Assistance was given to the garden supervisor and 200 circular letters were distributed each month to her garden clients which gave timely information on garden work. 2 canning demonstrations were held in the county.

Rehabilitation. The agent co-operated with the local supervisor in locating and establishing 35 clients. Assistance was also given in preparing farm plans of the applicants.

R. E. A. A preliminary and secondary survey of 22 miles of rural electric lines having 78 prospective users was conducted by the agent. A specialist assisted one day. 3 meetings were held

and circular letters and news items were used.

Grange. The agent assisted in organizing one subordinate grange of 31 members and one Pomona Grange of 54 members.

4-H Club. One 4-H Club was organized and 9 members enrolled in an unorganized club, making a total of 54 members.

#### MISCELLANEOUS

Landscape Gardening. A specialist was used one day to landscape one home and one school. One school was landscaped according to plans made last year.

Cheese Making. 2 demonstration meetings held during the year. 24 families now make cheese for home use as a result of demonstrations held during the last 3 years.

Predatory Animals. A survey was made to determine of damage done to poultry and game by foxes. This showed that foxes had destroyed 1738 fowls for 68 farmers at an estimated loss of \$1408.25. 42 other farms were reported to have lost poultry by foxes but no report had been received from them to date.

#### PROGRAM FOR NEXT YEAR

Corn-Hog Control will be continued with a possibility of potato control being added.

Dissemination of outlook information will be better organized for the coming year.

Program planning will be done with the assistance of a better organized Advisory Board and more assistance from the board will be required in carrying out the plans.

## COMBINED ANNUAL REPORT OF COUNTY EXTENSION WORKERS

This report form is for use by county extension agents in making a combined statistical report on all extension work done in the county during the year. Agents resigning during the year should make out this report before quitting the service.

State Virginia County Bath

#### REPORT OF

(Name) Home Demonstration Agent. From \_\_\_\_\_ to \_\_\_\_\_, 193

4-H Club Agent. From \_\_\_\_\_ to \_\_\_\_\_, 193

J. L. Montague From Dec. 1, 1934 to Nov 30, 1935  
Agricultural Agent.

**READ SUGGESTIONS, PAGES 2 AND 3**

Approved: \_\_\_\_\_

Date \_\_\_\_\_ State Extension Director.

## SUGGESTIONS RELATIVE TO THE PREPARATION OF THE COUNTY EXTENSION AGENTS' ANNUAL REPORT

The annual report should be a summary, with analysis and interpretations, for presentation to the people of the county, the State, and the Nation of the extension activities in each county for the year, and the results obtained by the county extension agents assisted by the subject-matter specialists. The making of such a report is of great value to the county extension agents and the people of the county in showing the progress made during the year as a basis for future plans. It is of vital concern also to the State and Nation as a measure of rural progress and a basis for intelligent legislation and financial support of extension work.

At least four copies of the annual report should be made: One copy for the county officials, one copy for the agent's files, one copy for the State extension office, and one copy for the Extension Service, United States Department of Agriculture. *The report to the Washington office should be sent through the State extension office.*

### STATISTICAL SUMMARY

Where two or more agents are employed in a county they should submit a single statistical report showing the combined activities and accomplishments of all county extension agents employed in the county during the year. Results obtained through assistance rendered agents by specialists should also be included. This report shows, insofar as possible, the part each agent has taken in forwarding the extension program. The county totals should be the sum of the activities and accomplishments of individual agents minus duplications due to two or more agents participating in the same activity or accomplishment. The county totals, when properly recorded, show the progress made in the county during the year in forwarding the entire extension program. Negro men and women agents should prepare a combined statistical report separate from that of the white agents.

The statistical summary should be a report of this year's activities and results that can be verified by records on file in the county office. Where records are not available careful estimates are desired. Such estimates should be marked "Est."

### NARRATIVE SUMMARY

A separate narrative report is desired from the leader of each line of work, such as county agricultural agent, home demonstration agent, boys' and girls' club agent, and Negro agent. Where an assistant agent has been employed during a part or all of the year, the report of his or her work should be included with the report of the leader of that line of work. Where an agent in charge of a line of work has quit the service during the year, the information contained in his or her report should be incorporated in the annual report of the agent on duty at the close of the report year, and the latter report so marked.

The narrative report should summarize and interpret, under appropriate subheadings, the outstanding results accomplished and the extension methods used for each project. Every statement should be clear-cut, concise, forceful and, where possible, reinforced with necessary data from the statistical summary. Use a descriptive style of writing, giving major accomplishments first under each project. Give extension methods fully relating to outstanding results only, and where practicable illustrate with photographs, maps, diagrams, blueprints, or copies of charts and other forms used. Full credit should be given to all cooperating agencies. The lines should be single-spaced, with double space between the paragraphs and reasonably good margins. The pages should be numbered in consecutive order.

The following outline is merely suggestive of how the narrative report may be clearly and systematically presented. Each agent should prepare an outline to fit the situation and the work to be reported.

#### SUGGESTIVE OUTLINE OF ANNUAL NARRATIVE REPORT

- I. Cover and title page.
- II. Table of contents.
- III. Summary of activities and accomplishments, preferably of one or two typewritten pages only, placed at the beginning of the narrative report.
- IV. Changes in county extension organization.
  - (1) Form.
  - (2) General policies.
  - (3) Procedure.
- V. County program of work.
  - (1) Factors considered and methods used in determining program of work.
  - (2) Project activities and results.

Under appropriate headings and subheadings present in some detail for each major project or line of work the goals set up, the methods used, the results achieved, and the significance of those results in terms of improved farms and homes and of better community life.
- VI. Outlook and recommendations, including suggestive program of work for next year.

## TERMINOLOGY

To insure reports which convey the intended meaning to others and to facilitate the compilation of satisfactory national statistics on extension, it is extremely important that terms be used in accordance with accepted definitions. The following definitions of extension terms have been approved by the United States Department of Agriculture and the Association of Land Grant Colleges and Universities. Agents should read these definitions before starting to write the annual reports.

## DEFINITIONS OF EXTENSION TERMS

1. A program of work is a statement of the specific projects to be undertaken by the extension agents during a year or a period of years.
2. A plan of work is a definite outline of procedure for carrying out the different phases of the program of work. Such a plan provides specifically for the means to be used and the methods of using them. It also shows what, how, when, and where the work is to be done.
3. A community is a more or less well-defined group of rural people with common interests and problems. Such a group may include those within a township, trade area, or similar limits. For the purpose of this report a community is one of the several units into which a county is divided for conducting organized extension work.
4. A project leader, local leader, or committeeman is a person who, because of special interest and fitness, is selected to serve as a leader in advancing some phase of the local extension program. A project leader may be either an organization or a subject-matter leader.
5. Demonstrations as contemplated in this report are of two kinds—method demonstrations and result demonstrations. A method demonstration is a demonstration given by an extension worker or other trained leader for the purpose of showing how to carry out a practice. Examples: Demonstrations of how to can fruits and vegetables, mix spray materials, and cull poultry.  
A result demonstration is a demonstration conducted by a farmer, home maker, boy, or girl under the direct supervision of the extension worker, to show locally the value of a recommended practice. Such a demonstration involves a substantial period of time and records of results and comparisons, and is designed to teach others in addition to the person conducting the demonstration. Examples: Demonstrating that the application of fertilizer to cotton will result in more profitable yields, that underweight of certain children can be corrected through proper diet, that the use of certified seed in growing potatoes is a good investment, or that a large farm business results in a more efficient use of labor.  
The adoption of a farm or home practice resulting from a demonstration or other teaching activity employed by the extension worker as a means of teaching is not in itself a demonstration.
6. A result demonstrator is an adult, a boy, or a girl who conducts a result demonstration as defined above.
7. A cooperator is a farmer or home maker who agrees to adopt certain recommended practices upon the solicitation of an extension worker. The work is not directly supervised by the extension agent and records are not required, but reports on the success of the practices may be obtained.
8. A 4-H Club is an organized group of boys and/or girls with the objective of demonstrating improved practices in agriculture or home economics, and of providing desirable training for the members.
9. 4-H Club members enrolled are those boys and girls who actually start the work outlined for the year.
10. 4-H Club members completing are those boys and girls who satisfactorily finish the work outlined for the year.
11. A demonstration meeting is a meeting held to give a method demonstration or to start, inspect, or further a result demonstration.
12. A leader-training meeting is a meeting at which project leaders, local leaders, or committeemen are trained to carry on extension activities in their respective communities.
13. An office call is a call in person by an individual or a group seeking agricultural or home-economics information, as a result of which some definite assistance or information is given. A telephone call differs from an office call in that the assistance or information is given or received by means of the telephone. Telephone calls may be either incoming or outgoing.
14. A farm or home visit is a call by the agent at a farm or home at which some definite information relating to extension work is given or obtained.
15. Days in office should include time spent by the county extension agent in the office, at annual and other extension conferences, and on any other work directly related to office administration.
16. Days in field should include all days spent on official duty other than "days in office."
17. Letters written should include all original letters on official business. (Duplicate letters should not be included.)
18. An extension school is a school usually of 2 to 6 days' duration, arranged by the Extension Service, where practical instruction is given to persons not resident at the college. An extension short course differs from an extension school in that it is usually held at the college or another educational institution and usually for a longer period of time.
19. Reports consist of definite information on file in the county office that will enable the agent to verify the data on extension work included in this report.
20. The county extension association or committee is that county organization, whether a membership or a delegate body, which is recognized officially in the conduct of extension work in the county.

## GENERAL ACTIVITIES

Report Only This Year's Extension Activities and Results That Can Be Verified

1. List below the names, titles, and periods of service of the county extension agents whose work is included in this report. Include time of assistants with that of regular agent.

AGENT	Total months of service this year	Days devoted to A. A. A. work	Days devoted to relief work	Total days in office	Total days in field
	(a)	(b)	(c)	(d)	(e)
(Name) Home demonstration agent	1				
Asst. home demonstration agent					
4-H Club agent	2				
Assistant 4-H Club agent					
<i>J. L. Montague</i> Agricultural agent	3	12	51	8	107
Assistant agricultural agent					

2. County extension association or committee:

(a) Agricultural extension:

(1) Name *Agricultural Advisory Board* (2) Number of members *16*

(b) Home demonstration:

(1) Name \_\_\_\_\_ (2) Number of members \_\_\_\_\_

(c) 4-H Club:

(1) Name \_\_\_\_\_ (2) Number of members \_\_\_\_\_

3. Number of communities in county where extension work should be conducted *16* 3

4. Number of above communities in which the extension program has been planned cooperatively by extension agents and local committees *8* 4

5. Number of different voluntary county or community project leaders or committeemen actively engaged in forwarding the extension program:

(a) Adult work { (1) Men *18* (2) Women *—* } (b) 4-H Club work { (1) Men *1* (2) Women *—* } (3) Older club boys *1* (4) Older club girls *2* } 5

6. Number of different paid local leaders engaged in A. A. A. program, or in relief work { (a) Men *14* (b) Women *2* } 6

7. Number of clubs or other groups organized to carry on adult home demonstration work *0* 7

8. Number of members in such clubs or groups *—* 8

ITEM	Home demonstration agents (a)	4-H Club agents (b)	Agricultural agents (c)	County total <sup>1</sup> (d)
9. Number of 4-H Clubs			<i>2</i>	<i>2</i>
10. Number of different 4-H Club members enrolled { (1) Boys <i>31</i> (2) Girls <i>23</i> }			<i>31</i>	<i>31</i>
11. Number of different 4-H Club members completing { (1) Boys <i>22</i> (2) Girls <i>20</i> }			<i>22</i>	<i>22</i>

12. Number of different members enrolled in 4-H Club work for:<sup>2</sup>

MEMBERS	1st year	2d year	3d year	4th year	5th year	6th year and over
(a) Boys	<i>26</i>	<i>—</i>	<i>—</i>	<i>5</i>	<i>—</i>	<i>—</i>
(b) Girls	<i>19</i>	<i>2</i>	<i>2</i>	<i>—</i>	<i>—</i>	<i>—</i>

<sup>1</sup> County total should equal sum of preceding three columns minus duplications due to two or more agents participating in the same activity or accomplishment.

<sup>2</sup> Report the total number of different boys or girls enrolled in club work. This total should equal the sum of the project enrollments reported on page 7 to 10, minus duplications due to the same boy or girl carrying on two or more subject-matter lines of work.

<sup>3</sup> Same as footnote 2 but refers to completions instead of enrollments.

<sup>4</sup> The total for this question should agree with county total, question 10.

## SUMMARY OF EXTENSION INFLUENCE FOR YEAR

It is highly desirable for extension workers to consider the proportion of farms and farm homes in the county which have been definitely influenced to make some substantial change in farm or home operations as a result of the extension program for men, women, boys, and girls. It is recognized that this information is very difficult for agents to report accurately, so a conservative estimate based upon such records, surveys, and other sources of information as are available will be satisfactory. Such estimates should be marked "Est."

Include results of emergency activities as well as the regular extension program.

35. Number of farms in county	550	35
36. Number of farms on which changes in practices have definitely resulted from the agricultural extension program	25	36
37. Number of farm homes in which changes in practices have definitely resulted from the home demonstration program	25	37
38. Number of other homes in which changes in practices have definitely resulted from the home demonstration program	45	38
39. Number of farm homes with 4-H Club members enrolled	32	39
40. Number of other homes with 4-H Club members enrolled	6	40
41. Total number of different farm families influenced by some phase of the extension program (Include questions 35, 37, and 39, minus duplications.)	432	41
42. Total number of different other families influenced by some phase of extension program (Include questions 38 and 40, minus duplications.)	51	42

1 County total should equal sum of preceding three columns minus duplications due to two or more agents participating in the same activity or accomplishment.

NOTE.—Questions 35-42 refer to the total number of different activities conducted this year. The totals should equal the sums of the corresponding information reported on following pages minus duplications where the same activity relates to two or more lines of work.
