Abstract	ii
List of Tables	ix
List of Figures	x
Chapter 1 Introduction	1
1.1 The History of Inflatable Space Structures	1
1.1.1 Rigidization of Inflatable Space Structures	3
1.2 Literature Review	6
1.2.1 Fiber-Reinforced Polymeric Composites: An Overview	7
1.2.2 Rigidization by Resistive Heating	12
1.3 Motivation	14
1.4 Research Objectives	15
1.5 Contributions	16
1.6 Overview	17
Chapter 2 Controlled Resistive Heating of Carbon Fiber Composites	18
2.1 Introduction to Resistive Heating	18
2.1.1 The Resistive Nature of CFRP Materials	20
2.1.2 Resistive Heating Experimental Goals	21
2.2 Thermal Control Experimental Setup	22
2.3 Open-Loop Heating Results and Discussion	26
2.3.1 High-Temperature Open-loop Resistive Heating	32
2.4 Active Temperature Control of Resistive Heating	33
2.4.1 Model Formulation	33

2.4.2	Predictive Joule Heating Results	38
2.4.3	Feedback Temperature Control	39
2.4.4	Feedback Control Experimental Results	41
2.5	Infrared Thermography: A Visual Approach	51
2.5.1	Introduction to Infrared Imaging	51
2.5.2	Thermographic Imaging Results and Discussion	53
2.6	Conclusions	59
Chapter 3 Rigidization via Internal Resistive Heating		61
3.1	Sample Composition and Preparation	62
3.1.1	Thermal Analysis on the Thermosetting Resins	63
3.2	Experimental Setup and Procedure	65
3.2.1	Proof-of-Concept Stiffness Evaluation	65
3.2.2	Instrumented Stiffness Measurement	66
3.3	Discussion of Results	69
3.3.1	Initial Rigidization Tests	69
3.3.2	Temperature-Controlled Rigidization	73
3.3.3	Complete Curing of U-Nyte Set 201 Resin	77
3.3.4	Cure Parameter Tuning for Successful Rigidization	81
3.4	Conclusions	89
Chapter 4 Toward Rigidization of Inflatable Structures		91
4.1	Boom Construction and Experimental Setup	92
4.1.1	Materials	92
4.1.2	Boom Fabrication	92
4.1.3	Experimental Procedure	94
4.2	Experimental Results and Discussion	96
4.2.1	Coupon Testing Results	96
4.2.2	Boom Wrapping and Rigidization	98
4.2.3	Increased Boom Strength	100
4.3	Conclusions	101

Chapter 5	Conclusions	103
5.1	Accomplishments and Contributions	103
5.2	Recommendations for Continued Work	105
