

## Acknowledgements

I would like to thank the members of my committee, Wendy R. Jacobson, Brian F. Katen and Rosemary C. Goss for their invaluable help in the research, writing and designing for this project.

I greatly appreciate all the people who participated in the Housing Preference Study and the Community Attitudes Interviews.

The manager of Clayton Estates in Blacksburg, Ed Chenoweth, was an invaluable help for this project. He answered innumerable questions, provided necessary information and enthusiastically supported the work.

The Manufactured Housing Institute in Arlington, Virginia provided me with many of the photographs used in the thesis, at no cost.

Mostly, thank you Sherry Roser for all of your support; both your technical assistance and constant encouragement.

# Table of Contents

List of Photographs .....	v
---------------------------	---

List of Illustrations .....	vi
-----------------------------	----

## Chapter One

Section 1.1 Introduction .....	1
Section 1.2 The Need for Low-cost Housing in the United States .....	1
Section 1.3 Manufactured Housing as a Solution to the Low-cost Housing Shortage .....	2
Section 1.4 The NIMBY Syndrome .....	5

## Chapter Two

Section 2.1 Introduction .....	6
Section 2.2 The History of Manufactured Housing ..	6
Section 2.3 Sociological and Psychological Basis' for NIMBY .....	9
Section 2.4 Aesthetics and the Creation of Positive and Negative Perceptions .....	10
Section 2.5 Residents' Needs .....	14
Section 2.6 Neighborhood Design Criteria .....	15
Section 2.7 House Site Design Criteria .....	17
Section 2.8 Conclusions .....	18

## Chapter Three

Section 3.1 Case Study 1 – Manufactured Housing Developments .....	19
Section 3.2 Case Study 2 – Virginia Municipal Codes Regarding Manufactured Housing .....	23
Section 3.3 House Typology .....	26
Section 3.4 Lot Typology .....	30
Section 3.5 Block Typology .....	46

## Chapter Four

Section 4.1 Methodology .....	57
-------------------------------	----

## Chapter Five

Section 5.1 Community Preference Study .....	60
Section 5.2 Community Attitudes Interviews ....	64
Section 5.3 Visual Survey .....	65
Section 5.4 Site Analysis .....	69
Section 5.5 Assets .....	72
Section 5.6 Problems .....	73

## Chapter Six

Section 6.1 An Ideal Design for Clayton Estates Manufactured Housing Community .....	77
Section 6.2 An Economical or Utilitarian Design. ....	91
Section 6.3 Retrofit Design .....	96

## Chapter Seven

Section 7.1 The Design Process .....	106
Section 7.2 Meeting Needs and Expectations ....	107
Section 7.3 Assessing the Value of this Study . . .	112
Section 7.4 Directions for Further Investigations ..	114

Appendices .....	116

# List of Photographs

## Chapter One

- 1.1 Utilitarian manufactured home development. . . . . 3

## Chapter Two

- 2.1 Early camping trailer . . . . . 6  
 2.2 Camping along the roadside . . . . . 6  
 2.3 Larger trailer circa 1940s . . . . . 6  
 2.4 Early trailer park circa 1940s . . . . . 7  
 2.5 Mobile home of the 1950s/60s . . . . . 7  
 2.6 Mobile home park circa 1950s . . . . . 8  
 2.7 Home ownership is a major goal of American families . . . . . 9  
 2.8 Natural views are preferred over views of the man-made environment . . . . . 11  
 2.9 Japanese Garden, Maymont, Richmond, Virginia . 12  
 2.10 Fence at Mt. Vernon, Virginia . . . . . 13  
 2.11 Visual clutter . . . . . 13

## Chapter Three

## Chapter Four

## Chapter Five

- 5.1 A clearly defined entrance was preferred . . . . . 60  
 5.2 Large front yards were most preferred . . . . . 61  
 5.3 This home was rated low because of the location of the garage . . . . . 61  
 5.4 Though the landscaping received approval the uncovered deck at the front did not . . . . . 61  
 5.5 This home received high marks for its setback, picket fence and landscaping . . . . . 62  
 5.6 Brick is a common element in the four surrounding neighborhoods . . . . . 65

- 5.7 All the homes address the street across a lawn of varying widths . . . . . 65  
 5.8 A large, covered front porch is a feature on many of the houses . . . . . 68  
 5.9 The absence of mature street trees . . . . . 68  
  
 5.17 View looking southwest from the site . . . . . 72  
 5.18 View looking northwest from the site . . . . . 72  
 5.19 Stand of mature trees on the site . . . . . 72  
 5.20 and 5.21 These home owners have claimed territory by landscaping their lots . . . . . 73  
 5.22 Home owners in this utilitarian layout have claimed the area between their homes and the street . . . . . 73  
 5.23 Old roads are in need of repair . . . . . 74  
 5.24 Flooding after a heavy rain . . . . . 74  
 5.25 Dirt road cut by residents . . . . . 74  
 5.26 Deep rut cut by storm water runoff . . . . . 75  
 5.27 Steep hillsides are a problem for siting homes . . 75  
 5.28 Rows of homes marching down a less steep portion of the site . . . . . 75  
 5.29 No-man's land between two homes . . . . . 75  
 5.30 A character distinctly different from that of the surrounding middle-class neighborhoods . . . . 75

## Chapter Six

- 6.7 Examples of inexpensive or found materials used as psychological boundary markers . . . . 80  
 6.27 and 6.28 These two photographs demonstrate the difference in character achieved by moving the entrance of the house to the gable end when using a utilitarian layout . . . . 94  
 6.30 This long narrow house is sited with the front door facing the street . . . . . 97  
 6.36 The covered porch on this home increases the perception of permanence over transience . . . . . 101
