

Table of Contents

| | | |
|----------|--|-----------|
| 1 | Introduction | 1 |
| 1.1 | Background in Robotics | 1 |
| 1.2 | Robot Mechanics | 1 |
| 1.2.1 | Manipulator Kinematics and Dynamics | 2 |
| 1.3 | Robot Architecture | 4 |
| 1.4 | Robotic Wrists | 4 |
| 1.5 | Origins of the Carpal Wrists | 5 |
| 1.6 | Motivation for the New Wrist | 8 |
| 1.7 | Outline of Contents | 9 |
| 2 | Historical Review of Robotic Orienting Devices | 10 |
| 2.1 | Serial Configurations | 10 |
| 2.2 | Parallel Configurations | 12 |
| 2.2.1 | Parallel, Spherical Wrists | 12 |
| 2.2.2 | Parallel, Spatial Wrists | 13 |
| 2.3 | Analytical Methods | 15 |
| 3 | Kinematic Position Analysis | 16 |
| 3.1 | Review of Similar Geometric Architectures | 16 |
| 3.2 | Geometric Model of the Wrist Architecture | 16 |
| 3.3 | Kinematic Position Analysis of Proposed Wrist Architecture | 18 |
| 3.3.1 | Forward Kinematic Analysis | 19 |
| 3.3.2 | Inverse Kinematic Analysis | 21 |
| 3.4 | Artificially Coupled Spherical Configuration | 24 |
| 3.5 | Kinematic Workspace Analysis | 24 |
| 3.6 | Conclusions to Kinematic Position Analysis | 25 |
| 4 | Instantaneous Kinematic Analysis | 26 |
| 4.1 | Discussion of Singularities | 26 |
| 4.1.1 | Singularities in Current Robotic Wrists | 27 |
| 4.2 | Discussion of Dexterity | 28 |
| 4.3 | Closed-Form Jacobian | 29 |
| 4.4 | Singularity Analysis | 33 |
| 4.5 | Dexterity Analysis | 34 |
| 4.6 | Dexterous Manipulator Workspace | 37 |
| 4.6.1 | Approach to Dexterous Measure | 37 |
| 4.6.2 | Definition of Dexterous Measure | 37 |
| 4.6.3 | Application to Three Pointing Manipulators | 38 |

| | | |
|----------|--|-----------|
| 4.6.3.1 | Carpal Wrist | 38 |
| 4.6.3.2 | Serial Pitch-Yaw Wrist | 39 |
| 4.6.3.3 | Spherical Five-Bar Pointer | 40 |
| 4.6.4 | Dexterous Measure Results | 41 |
| 4.7 | Conclusions | 43 |
| 5 | Dynamic Force Analysis | 44 |
| 5.1 | Introduction to Dynamic Analysis | 44 |
| 5.2 | Review of Research in Manipulator Dynamics | 44 |
| 5.3 | Carpal Wrist Dynamics | 45 |
| 5.3.1 | Review of Position Information | 46 |
| 5.3.2 | Determining Tool Velocity | 47 |
| 5.3.2.1 | Angular Velocity of the Distal Frame | 49 |
| 5.3.2.2 | Translational Velocity of the Tool Center of Mass | 50 |
| 5.3.3 | Lagrange's Equations for the Wrist-Isolated Problem | 50 |
| 5.3.3.1 | Derivatives of Kinetic and Potential Energy | 50 |
| 5.3.4 | Solving Lagrange's Equations | 52 |
| 5.4 | Application to the Carpal Wrist Prototype | 53 |
| 5.5 | Results and Conclusions | 58 |
| 6 | Dynamic Simulation Environment | 59 |
| 6.1 | Introduction | 59 |
| 6.2 | Wrist Dynamics | 60 |
| 6.2.1 | Angular Velocity of the Distal Frame | 60 |
| 6.2.2 | Translational Velocity of the Tool Center of Mass | 60 |
| 6.3 | Lagrange's Equations for the Wrist-Isolated Problem | 61 |
| 6.3.1 | Derivatives of Kinetic and Potential Energy | 61 |
| 6.3.1 | Expanding the Equations of Motion | 64 |
| 6.4 | Solving the Forward Dynamics | 67 |
| 6.5 | Results and Conclusions | 68 |
| 7 | Application Issues | 69 |
| 7.1 | Full Orientational Capability of the Carpal Wrist | 69 |
| 7.2 | Redundancy Resolution | 72 |
| 7.2.1 | Redundancy Resolution Literature Review | 73 |
| 7.2.2 | Optimizing on Dexterity | 73 |
| 7.2.3 | Optimizing for Mechanical Advantage | 76 |
| 7.2.4 | Optimizing for Dynamic Performance | 76 |
| 7.3 | Path Planning | 76 |
| 7.4 | Path Planning Based on Input Torque Requirements / Constraints | 78 |
| 7.5 | Optimal Path Planning Based on Input Torque Requirements | 79 |

| | | |
|----------|---|-----------|
| 7.6 | Summary of Application Issues | 80 |
| 8 | Conclusions and Recommendations | 81 |
| 8.1 | Recommendations, Future Work | 82 |
| | Bibliography | 84 |
| | Appendix A: Carpal Wrist Prototype | 90 |
| | Carpal Wrist Prototype Objectives | 91 |
| | Kinematic Parameters | 91 |
| | Strength Considerations | 92 |
| | Actuation Scheme | 92 |
| | Physical Design of Components | 93 |
| | Legs | 93 |
| | Base | 94 |
| | Midplane Joints | 94 |
| | Actuation | 95 |
| | Pictorial Demonstration of Carpal Prototype | 96 |

List of Figures

| | | |
|------|---|----|
| 1.1 | Kinematic Diagram of the Carpal Wrist | 6 |
| 1.2 | CAD Model of the Carpal Wrist Prototype | 8 |
| 1.3 | Photograph of the Carpal Wrist Prototype | 9 |
| 2.1 | Gimbal Representing General Serial Wrists | 10 |
| 2.2 | Cincinnati Milacron Three-Roll-Wrist | 10 |
| 2.3 | Slim Wrist by Graco Robotics Inc. | 11 |
| 2.4 | Omni Wrist | 11 |
| 2.5 | Parallel Spherical Manipulator | 12 |
| 2.6 | Parallel, Spatial Manipulator | 14 |
| 3.1 | Schematic of Double Octahedron | 17 |
| 3.2 | Kinematic Diagram of Proposed Wrist | 18 |
| 3.3 | Wrist Reference Frames | 19 |
| 3.4 | Spherical Kinematic Model | 22 |
| 3.5 | Theoretical Workspace Corresponding to Various R_d Ratios | 25 |
| 4.1 | Kinematic Diagram of the Carpal Wrist | 30 |
| 4.2 | Midplane Normal | 32 |
| 4.3 | Kinematic and Singular Workspace Boundaries | 34 |
| 4.4 | Dexterity Measures Plotted Over an Angular Representation of the Workspace | 35 |
| 4.5 | Determinant-Based Dexterity Plotted Over the Workspace for Multiple R_d Ratios | 36 |
| 4.6 | Serial Pitch-Yaw Wrist | 39 |
| 4.7 | Spherical Five-Bar Pointer | 40 |
| 4.8 | Minimum Dexterity Plot of the Carpal Robotic Wrist | 41 |
| 4.9 | Minimum Dexterity Plot of the Serial Pitch-Yaw Wrist | 42 |
| 4.10 | Minimum Dexterity Plot of the Spherical Five-Bar Linkage | 42 |
| 5.1 | Carpal Wrist Kinematic Model | 46 |
| 5.2 | Base and Distal Frame Assignment | 48 |
| 5.3 | Orientation of Z axis of Distal Frame {D} | 48 |
| 5.4 | Wrist Mounted Tool | 49 |
| 5.5 | Dynamic Force Measurement System | 53 |
| 5.6 | Gages on Actuating Rod | 55 |
| 5.7 | Path Trajectory Plot for a Longitudinal Move | 56 |
| 5.8 | Required Motor Moment Plots: Dynamic Model | 56 |
| 5.9 | Actuator Rod Force: Dynamic Model | 57 |
| 5.10 | Actuator Rod Force: Experimental Model | 57 |

| | | |
|-----|----------------------------------|----|
| 6.1 | Wrist Mounted Tool | 60 |
| 7.1 | Conceptual Roll Axis Design | 71 |
| 7.2 | Exploded View of Roll dof | 72 |
| A.1 | Flowchart of Prototype Evolution | 70 |
| A.2 | Prototype Carpal Wrist | 91 |
| A.3 | Leg | 93 |
| A.4 | Base | 94 |
| A.5 | Midplane Joints | 94 |
| A.6 | Actuation Components | 95 |
| | Prototype Pictorial | 96 |

List of Tables

| | | |
|-----|---|----|
| 1.1 | Features of Alternative Manipulator Structures | 7 |
| 4.1 | Combining Two Dexterity Measures | 28 |
| 4.2 | Comparison of Singularity Measure and Kinematic Closure | 33 |
| 4.3 | Results of the Dexterous Measure Evaluation | 43 |
| 5.1 | Prototype Carpal Wrist Parameters for Dynamic Analysis | 55 |
| A.1 | Kinematic Parameter Selection | 92 |
