MoD

Narrative Report for 1928.

Spetsylvania County.

COUNTY AGENT WORK

Status of County Extension Organization

Extension Orgination in this county is composed of County Agent and an Assistant County Agent, (When the Director of Advisory work has sufficient funds to employ one for this county) and the Advisory Council appointed by the Board of County Supervisors.

A meeting of this advisory Council was called the first Monday in February of this year for the purpose of arranging a plan of work for the entire year. The County Agent submitted a tentative plan of work to them for their approval or disapproval; this plan, after some discussions and changes was approved by this council. At this meeting the Five Year Program of work, sent out by Director Hutcheson, of Blacksburg, was carefully gone over and discussed, and it was decided that we would endeavor to carry out all parts of this program which are applicable to Spetsylvania County.

This county has many kinds of soil, ranging from light sand and gravel, to to heavy clay; therefore when preparing this plan of work we had to keep in mind these different communities and the crops best suited to their local conditions, thus benefitting the greatest number of people. We have been unable to carry out our plan of work in some communities because of unfavorable weather conditions; it was almost impossible to plow sod land and get it in condition to plant a crop after May-1st. consequently, much land was left uncultivated that should have been planted with soy beans or cowpeas; but we have done our best to make the Plan of Work a Success.

Organizations.--

I am compelled to admit a lack of organization and cooperation among the masses of our people: The Farmers' Union Locals are not functioning properly in the county; and the people of the county are not deriving the benefit from this organization which they might.

The Farmers Union Exchange of Fredericksburg, a corporation owned and managed by members or part members of the Farmers Union, is doing a splendid business in both warehouse and store; farmers save on fertilizer alone, bought from this Exchange, at least \$4000 each year: this week a farmer reported to me that he saved \$4.00 per ton on ten tons bought last October; all other farmers who used a high grade fertilizer, bought from the Union Exchange, saved an equal amount; I regret that all farmers cannot be induced to buy through this organization, and thus support and build a greater business for themselves.

Program of Work

My plan of work for 1925, as approved by the County Advisory Council, was intended to reach and benefit every community in the county, by having one or more result demonstrations of the project best suited to that particular section; some of these demonstrations were not carried out because of unfavorable weather conditions; however many were successful, and this is especially true of club work in all its branches.

4-H. Agricultural club work will always be featured ahead of any other part of my plan of work; especially is this true of the organized club which is doing more to develop community spirit, doing more to develop the much needed club spirit, doing more to satisfy their social aspirations and to develop pride and loyalty in their respective localities than any other organization or agency.

Club Work.-

Our aim, as put forth in our 1925 plan of work, was, to improve on the the work done the previous year; we explained to all club members that this was to be A Burr Memorial year in honor of our departed leader, Chas. G. Burr, when his name was mentioned, at the local club meetings, the members would express their determination to do their best and thus prove to the people of their state, their love for Mr. Burr.

The members of five organized clubs of this county raised sufficient money to send 34 delegates to The State Short Course, at Blacksburg, a distance of nearly 300 miles from Spotsylvania C.H.; in addition to this number, six boys and girls paid their own expenses.

Many of those who attended th different Short Courses, have expressed a determination to do more and better work than ever before.

On Monday, August-31st. the District Short Course opened at the State Teachers' College, Fredericksburg, with boys and girls from eight counties attending; again our Spotsylvania girls and boys proved that they had the real club spirit by bringing a delegation of 45 to this District Short Course all seemed to have a good time from the moment they arrived, until they began packing their belongings for the trip home on Saturday; in addition to having a pleasant time socially (and this part should not be overlooked), they appeared to enjoy the lectures and other class work. Since these are over the boys and girls are making plans for their project work for the coming year; we can easily note the difference between those who attended these meetings and those who could not attend: the former showing more enthusiasm and are full of "Pep," while those who were not at these meetings, seem less enthused with club spirit; Several of the clubs have already started to raise money to send even larger delegations next year.

After this Short Course, we began making plans for exhibits at the fairs: We exhibited poultry, purebred Jersey calves, and heifers; corn, potatoes, pigs and other farm products. Our first exhibits were made at Fredericksburg, winning there many prizes: the best of these exhibits were then taken to the State Fair, where they were again successful in winning premiums: Our next exhibits were made at Petersburg, and here they won even a greater number.

The total premiums won by Spotsylvania counties at these three fairs, amounted to the fine sum of \$1981.75.

I do not mean to stress the winning of premium money too strongly, yet the fact remains that we all need money and I find the girls and boys who win the most premium money are the most enthusiastic club workers, and the fact that our club members win such large amounts, certainly proves that the products shown by them were of superior quality.

Farm Crops:-

The great outstanding feature of Extension Work in Spotsylvania Co; is the producing and exhibiting pure bred seed corn of three varieties: Heids Yellow Dent and Johnson County White being the leaders; both men and boys have had their "Bar to Bow" plats under the supervision of the Virginia Crop Improvement Association of Blacksburg; and are now producing certified seed of superior quality.

Thomas Thurburn of chancellor is doing splendid work with Johnson County White* (Certified), raises good crops each year, and sells all of his good seed at \$4.00 per bu; Mr. J.N. Biscoe, of Granite Springs grows the same variety with excellent results. He exhibited at four fairs this year, winning four blue ribbons.

Mr. R.A. James of Fredericksburg, has done wonderful work in breeding up Heids' Yellow Dent of a very superior type. His reputation is not only statewide, but orders come to him for seed from many other states.

While our work with corn has been so outstanding in results obtained, interest steadily increases in the production of better seed of other cereals, wheat, oats, and rye; this is verified by the increased sown each year to certified seed.

The County Agent, and a Specialist from Blacksburg, did head selecting work with wheat for two farmers this year; these farmers carefully threshed and treated this grain, sowed it on well prepared and fertilized land, and the results obtained will be carefully noted when this crop is harvested. Where this certified wheat, oats or rye has been given a fair trial in this county, the result has been greatly increased yields, with no additional cost except paying a little more for the seed.

The results we are getting with certified seed awakens a deeper interest in agricultural development than almost any other branch of Extension work: We sold about 2000 bushels of wheat and oats for seed to T. V. WOODS & Sons, of Richmond, this year, receiving about 25¢ per bu. above prevailing market price; the purchaser furnishing bags and paying freight from loading point, with nothing off for screenings.

We still say that no Eastern Virginia farm can be successfully conducted with soil fertility maintained or increased, without the use of a legume crop in every rotation.

It has been very clearly demonstrated, after several years trial, that that the soy bean, viewed from every angle, is one of the most valuable legume crops, and no other is increasing so rapidly in favor in this part of Virginia: three fields of certified Laredos were grown for seed in this county this year; although the season very dry, they all harvested splendid crops; other varieties also did fairly well, considering weather conditions.

Alfalfa:

Alfalfa as a hay crop was more popular this year than ever before, because of the splendid crops harvested, while clover was almost a failure because of the continued drought: a good rain fell, July 30, alfalfa grew rapidly, making a fine crop of hay, which was harvested about Sept. 1st: there was a smaller acreage sown this year than last, because the land could not be gotten in proper condition for seeding until too late in the fall.

Crimson Clover:

Crimson clover is the leading winter cover crop in this county, and is considered the best legume to plow under in the spring for corn and soy beans: more acres were sown in this crop in Spotsylvania county this year than ever before since I have been in Extension work here: we expect to have at least 400 acres harvested for seed next year.

Velvet Beans:

The velvet bean is gaining rapidly in favor with the farmers who have given this crop a fair trial by planting with the early maturing varieties. This crop is used mainly for planting with ensilage corn, thus increasing tonnage per acre and quality of silage as well. Mr. F. L. Shannon, of Fredericksburg, plants them with his corn that is to be pastured with hogs and cattle, and is very much pleased with results.

Winter Vetch:

Winter or Hairy Vetch is becoming more popular each year, for the early hay crop; it is sown with both wheat and oats, from Sept.-15th to Oct.-1st, and has proven quite satisfactory on most farms where it has been tried; the acreage sown this year, is 25% increase over last year's acreage.

Horticulture:

Before Extension work started, when orchards were not well pruned nor sprayed, Spotsylvania County was not considered in the fruit producing area of Virginia; but in recent years, both peaches and apples from this section have been pronounced among the best.

There are three demonstration orchards in this county at the present time, where the planting was supervised by County Agent, pruned by Specialist from Blacksburg and County Agent, sprayed at the proper time with the right spray, and a splendid crop of first class apples, peaches and grapes harvested in the proper season; we will continue these demonstrations for two more years, with the hope that others will want just such orchards on their farms.

Livestock.

Jersey Cattle:

We are proud of the splendid Jersey cattle found in this section of Spotsylvania around Fredericksburg; some of the highest producing Jerseys of the state were bred and raised here; although two of our largest and best herds have been sold, interest in the breed is increasing and many new herds have been started through the influence of boys and girls Jersey calf club work; these club members had 16 calves at Fredericksburg, Richmond and Petersburg Fairs this year, winning premiums in open and club classes, to the amount of \$489.00. Each boy and girl kept a complete record of feed and time spent in caring for their calves and wrote an interesting story concerning their work for the entire feeding period. This work is not only interesting and helpful to members of the calf club, but to farmers and Jersey breeders as well.

In addition to the club calves shown, we had a County Herd of ten animals from seven different breeders, at three fairs; this herd won \$475.00.

Six club members have already asked the County Agent, to get them calves in time to join the calf club next spring.

The parents of these girls and boys are not growing purebred dairy cattle of any breed at this time, but we believe they will be influenced by these club members, to grow registered herds.

The pig club work has done more to influence to give up their scrubs, than any other agency.

6

One of the leading industries of this county is poultry raising; this has increased at least 50% in the last five years, due in a great measure to the good work done by members of the poultry clubs; no other branch of Extension work reaches so many of our people, because poultry is raised on every farm. Mrs. Blake Lewis, of Margo, was in my office a few days ago talking of club work in the county, she remarked that "her little girl's poultry club work, was responsible for her purebred fowls; this is true of several hundred other farm flocks in the county."

We are planning to have club members bring all their eggs to some central point, where they will grade and pack them in an attractive manner and ship to New York market. This work will benefit many of our people, and I am sure it will increase in volume from year to year.

Assistant Agents Work:

We are asked to report work done by Assistant County Agents, but I have no report on this work, except from observation. Mr. T.G. Ralfour was with me during December, 1924, January and February, 1925. We could not do as much work during these winter months as in summer, but Mr. Ralfour was ready to help whenever called on; seemed especially anxious to learn all he could about organized club work, and rarely ever missed a meeting of the larger clubs of the county. I was sorry when he left us for Chesterfield County.

Mr. P. B. Day, was the next Assistant Agent sent here. He came in August, and remained through October; leaving then for his home in Rock-bridge County, to manage a farm recently purchased by his father.

The major part of his time was spent arranging exhibits for the fairs, and caring for the boys and girls purebred Jersey calves at the fairs; He was one week at Richmond State, and one at Petersburg; returned with the club calves to Fredericksburg, with all of them in better condition than when he took charge of them.

I was sorry when he left the county, but pleased to know that he went back to the farm, with the intention of making farming his life work.

ANNUAL REPORT OF COUNTY EXTENSION WORKERS

This report form is to be used by county extension agents, such as county agricultural agent, home demonstration agent, club agent, and negro agent, reporting on their respective lines of work.

State Virginia County Spotsylvania
 Report of W. R. Lenthicum County Superintendent Agent.
(Name) (Title)
 From December 1st - 1924 to November 30 - 1925.

If agent has not been employed entire year, indicate exact period. Agents resigning during the year should make out this report before quitting the service.

State Extension Director.

SUGGESTIONS RELATIVE TO THE PREPARATION OF THE COUNTY EXTENSION AGENT'S ANNUAL REPORT.

The annual report should be a review, analysis, interpretation, and presentation to the people of the county, the State, and the Nation of the sum total of the extension activities in each county for the year and the results obtained by the county extension agent assisted by the subject-matter specialists. The making of such a report is of great value to the county extension agent and the people of the county in showing the progress made during the year as a basis for future plans. It is of vital concern also to the State and Nation as a measure of rural progress and a basis for intelligent legislation and financial support.

Separate statistical and narrative reports are desired from each county extension agent in charge of a line of work, such as county agent, home demonstration agent, boys' and girls' club agent, and negro agent. Where an assistant agent has been employed a part or all of the year, a report on his or her work should be included with the report of the leader in charge of that line of work. Where an agent in charge of a line of work has quit the service during the year, the information contained in his or her report should be incorporated in the annual report of the agent on duty at the close of the report year, and the latter report so marked. Where two or more extension agents are employed in a county, each in charge of a line of work, care should be exercised to avoid including the same data in the statistical report of more than one agent.

At least four copies of the annual report should be made: One copy for the county officials, one copy for the agent's files, one copy for the State extension office, and one copy for the Extension Service, United States Department of Agriculture. *The report to the Washington office should be sent through the State extension office.*

NARRATIVE SUMMARY.

The narrative report should be a statement in orderly fashion and arranged under appropriate subheadings, of the work done, methods used, and results obtained under each project, as well as of the general work accomplished. Every statement should be clear-cut, concise, forceful, and, where possible, reinforced with ample data from the statistical summary. In the preparation of the part of the report relative to each project, the results reported in the statistical summary for the project should be analyzed, conclusions drawn, and recommendations made. The report may well be illustrated with photographs, maps, diagrams, blue prints, or copies of charts and other forms used in demonstration work. Full credit should be given to all cooperating agencies. The lines should be single-spaced, with double space between the paragraphs, and reasonably good margins left. The pages should be numbered in consecutive order.

The following outline is suggestive of how the narrative report may be clearly and systematically presented:

SUGGESTIVE OUTLINE OF ANNUAL NARRATIVE REPORT.

- I. Cover and title page.
- II. Table of contents.
- III. Status of county extension organization.
 - (1) Form of organization—changes and development.
 - (2) Function of local people, committees, or project leaders in developing the program of work.
 - (3) General policies, including relationships to other organizations.
- IV. Program of work, goals established, methods employed, and results achieved.
 - (1) Factors considered and methods used in determining program of work.
 - (2) Project activities and results.
 - (a) Soils
 - (b) Farm crops

Horticulture	}	(including diseases and insects).
Home gardens		
Beautification of home grounds		
 - (c) Forestry
 - (d) Rodents, predatory animals, and birds.
 - (e) Animal husbandry

Dairy husbandry	}	(including diseases and insects).
Home dairy		
 - (f) Poultry husbandry

Home poultry	}

SUGGESTIVE OUTLINE OF ANNUAL NARRATIVE REPORT—Continued.

IV. Program of work, etc.—Continued.

(2) Project activities and results—Continued.

- (i) Rural engineering.
- (j) Rural engineering—home.
- (k) Agricultural economics, including farm management and marketing.
- (l) Home marketing.
- (m) Foods.
- (n) Nutrition.
- (o) Clothing.
- (p) Home management.
- (q) House furnishings.
- (r) Home health and sanitation.
- (s) Community activities.
- (t) Miscellaneous.

V. Outlook and recommendations, including suggestive program of work for next year.

VI. Summary of activities and accomplishments, preferably of one or two typewritten pages only, placed at the beginning or end of the narrative report.

STATISTICAL SUMMARY.

To supplement the narrative part of the report, and in order that comparable State and National summaries may be made, it is necessary to include a statistical summary of the work in each county. The following form has been prepared to insure uniformity of reporting. In addition to the questions asked under each subdivision of the report, space is provided to add further data if desired. The statistical summary will grow naturally out of the field and office records.

DEFINITIONS OF TERMS USED IN THIS REPORT.

1. A PROGRAM OF WORK is a definitely outlined plan for extension work.
2. A PROJECT is a definite, systematic, organized plan for carrying out some phase of the extension program of work, providing for what is to be done, how much, when, where, how, and by whom.
3. MISCELLANEOUS WORK includes work which has not yet become a regular part of the program of work—work other than project work.
4. A COMMUNITY, for the purposes of this report, may be any one of the several units into which the county is divided for purposes of conducting organized extension work.
5. A PROJECT LEADER OR LOCAL LEADER is a person, selected because of his or her special interest and fitness, who functions as a leader in advancing some phase of the local program of extension work.
6. A DEMONSTRATION is an example designed to show the practical application of an established fact. Demonstrations as contemplated in this report are of two kinds, method demonstrations and result demonstrations.
 - A method demonstration is a demonstration given by an extension worker or other trained leader to a group for the purpose of showing them how to carry out a practice. Synonym: Lecture demonstration. Examples: Demonstrations of canning, mixing of spray materials, and culling of poultry.
 - A result demonstration is a demonstration carried on by a farmer, farm woman, boy, or girl under the direction of the extension service, involving a substantial period of time, records of results, and comparisons. Examples: Child-feeding, corn-culture, and orchard-management demonstrations.
7. A DEMONSTRATOR is a farmer, farm woman, boy, or girl who, under the direction of the extension service, conducts a result demonstration.
8. MEMBERS COMPLETING should include those who have satisfactorily finished the work outlined for the current year.
9. A DEMONSTRATION MEETING is a meeting held to give a method demonstration or to start, inspect, or further a result demonstration.
10. A TRAINING MEETING is a meeting at which project leaders or local leaders are trained to carry on extension activities in their respective communities.
11. AN OFFICE CALL OR TELEPHONE CALL is a visit or call by a farmer or other person seeking agricultural or home economics information, as a result of which some definite assistance or information is given.
12. A FARM VISIT is a call at a farm by the agent at which some definite information is given or concrete plan of work outlined, or some valuable information obtained from the farmer regarding his work, or the better practice prevailing in his neighborhood.
13. A HOME VISIT is a call at a home by the agent at which some definite information is given or concrete plan of work outlined, or some valuable information obtained from the farm woman regarding her work, or the better practice prevailing in her neighborhood.
14. DAYS IN OFFICE should include time spent by the county agent in his office, at county agent conferences, and any other work directly related to office administration.
15. DAYS IN FIELD should include all days spent on official duty other than those spent in office.
16. LETTERS WRITTEN should include all single letters on official business.

DEFINITIONS OF TERMS USED IN THIS REPORT—Continued.

17. A FARMERS' INSTITUTE is one of a series of meetings of one to two days' duration, arranged by a central State farmers' institute agency, at which agricultural and home-economics problems are discussed, usually by outside speakers employed for the purpose.
18. AN EXTENSION OR MOVABLE SCHOOL is an itinerant school usually of two to six days' duration where practical but systematic instruction is given to persons not resident at the college. An extension school continues classes from an extension school in that it is usually held at the college or other educational institution and usually for a longer period of time, but not exceeding two weeks.
19. RECORDS consist of definite information filed in the county office that will enable the agent to verify the data on extension work included in this report.
20. FARM OR HOME PRACTICE ADOPTED is a new or improved practice adopted on a farm or in a home during the year as a result of extension teaching. Examples: Spraying of potatoes for disease, canning of fruits and vegetables, use of balanced rations, and hat making.

GENERAL ACTIVITIES.

Report only this year's extension activities and results that are supported by records.

If an assistant agent has been employed during the year, include his or her work with that of the agent.

1. List below the names, titles, and periods of service of the county extension agents whose work is included in this report.
- | | | |
|-----------------------|----------------------------|---------------|
| <i>H. R. Luthicum</i> | <i>County Agent</i> | <i>Twelve</i> |
| <i>T. J. Ballouer</i> | <i>Assistant Co. Agent</i> | <i>3</i> |
| <i>A. B. Wdy</i> | <i>Assistant Co. Agent</i> | <i>Two</i> |
2. Number of communities in county where extension work should be conducted 26
3. Number of above communities in which the extension program has been cooperatively worked out by extension agents and people concerned 20
4. Number of voluntary county, community, or local leaders actively engaged in forwarding the extension program with—

26. Number of meetings at which were shown	(a) Lantern slides (b) Motion pictures (c) Charts	26

[Use space below to include other important data.]

¹ Do not count the same visit as both a farm visit and a home visit.² See definition on page 1.

FARM-DEMONSTRATION WORK.

SOILS.¹

Report only this year's extension activities and results that are supported by records.

48. Number of method demonstrations given. (See definition 6, page 3.)	48
49. Number of result demonstrations started or under way. (See definition 6, page 3.)	49
47. Number of result demonstrations completed or carried through the year	47
48. Number of acres involved in these completed demonstrations	48
49. Number of farms adopting improved practices in the use of commercial fertilizer this year	49
50. Tons involved in preceding question	50
51. Number of farms taking better care of farm manures this year	51
52. Number of farms using lime or limestone for the first time	52
53. Tons of lime or limestone so used	53
54. Number of farms plowing under cover or other green manure crops for the first time	54
55. Acres of cover and green manure crops so plowed under	55
56. Total number of different farms adopting improved practices, relative to the soils work reported on this page. (Include questions 47, 49, 51, 52, and 54 less duplications.)	56

[Use space below to include other important data relating to soils.]

Many farmers were unable to plow under Crimson Clover at the proper time last spring because of dry weather.

¹ For drainage, irrigation, land clearing, and terracing see "Rural Engineering," page 18.

CEREALS¹

Report only this year's extension activities and results that are supported by records.

[Use space below to include other important data relating to cereals.]

The outstanding work done by usually
 1 agent this year was selling 2000
 lbs. of seed (corn at \$2.00 per bu. in
 quantity, and \$3.00 per bu. in small lots.
 Also, sold 5000 lbs. of wheat and oats for
 seed at 25¢ per bu. above market price.

¹ Report fall-acre crops the year they are harvested.

² Include crop by name.

³ States which do not organize clubs on a project basis should not report on this question but should report on enrollment and completion.

LEGUMES AND FORAGE CROPS—Continued.

Report only this year's extension activities and results that are supported by records.
